Intermediate Arabic for Dummies

by Keith Massey, PhD
About the Author

Keith Massey has been studying languages his whole life, starting with high school Latin and continuing to a PhD in Biblical Hebrew and Arabic at the University of Wisconsin-Madison. After 9/11, he went to work at the Top Secret National Security Agency as an Arabic linguist, where he served for more than four years. He now teaches Latin and Arabic in New Jersey, summering with his wife in her native Romania. An avid traveler, Keith has visited 15 different countries, 5 of which have been Arabic-speaking countries.

Dedication

To my father Bill and my late mother Nancy, who taught me the value of hard work.

And to Dustin Cowell, my first Arabic instructor. May this book further the mutual understanding between cultures to which you have devoted your life.

Author’s Acknowledgments

First and foremost, I want to thank my wife, Adriana, for her support as I wrote this book.

Thanks to my agent, Barb Doyen, for her encouragement throughout this process. And to all the people at Wiley Publishing, especially to project editor Stephen Clark and copy editor Jessica Smith for their extraordinary patience and enormous talent in this project. Thanks also goes to acquisitions editor Michael Lewis, senior copy editors Sarah Faulkner and Danielle Voirol, and technical editor Dr. Haitham M. Alkhateeb.

Last but not least, thanks to my former colleagues David, Jennifer, Michael, and Ron for their friendship at the Fort and beyond as well as to my students Arielle Shahid and Sherron Tynan for their helpful suggestions on the manuscript.
Publisher’s Acknowledgments

We’re proud of this book; please send us your comments through our Dummies online registration form located at www.dummies.com/register/.

Some of the people who helped bring this book to market include the following:

Acquisitions, Editorial, and Media Development

Project Editor: Stephen R. Clark
Acquisitions Editor: Michael Lewis
Copy Editor: Jessica Smith
Editorial Program Coordinator: Erin Calligan Mooney
Technical Editor: Haitham M. Alkhateeb
Editorial Manager: Christine Meloy Beck
Editorial Assistants: Joe Niesen, David Lutton
Cartoons: Rich Tennant (www.the5thwave.com)

Composition Services

Project Coordinator: Katie Key
Layout and Graphics: Carl Byers, Carrie A. Cesavice
Proofreaders: Jessica Kramer, Shannon Ramsey
Indexer: Carol A. Burbo
Special Help: Sarah Faulkner and Danielle Voirol

Publishing and Editorial for Consumer Dummies

Diane Graves Steele, Vice President and Publisher, Consumer Dummies
Joyce Pepple, Acquisitions Director, Consumer Dummies
Kristin A. Cocks, Product Development Director, Consumer Dummies
Michael Spring, Vice President and Publisher, Travel
Kelly Regan, Editorial Director, Travel

Publishing for Technology Dummies

Andy Cummings, Vice President and Publisher, Dummies Technology/General User

Introduction

If you’ve picked up this book, you’ve likely succeeded in learning the beginning level of Modern Standard Arabic. مبروك! (mabruuk! Congratulations!) What you’ve accomplished is no easy feat. Unlike the Romance languages, such as French and Spanish, your English didn’t really help you at all with Arabic. Instead, you were learning a language with completely different ways of expressing everything.

Now you’re ready to take your Arabic to the next level and improve your writing skills. You may be a student in an Arabic course looking for something to supplement your course materials and help you get a higher grade. Or perhaps you plan to visit an Arabic-speaking country sometime soon. Or maybe you’re conducting business with Arabic speakers and know that being able to write an official letter in Arabic will give you an edge (and it will). Whatever your reason, Intermediate Arabic For Dummies can help you achieve your particular needs. You’ll even have some fun along the way.

About This Book

Intermediate Arabic For Dummies is primarily a workbook for people who have a basic to beginning knowledge of Arabic and are ready to move to the next level of ability by improving their writing skills. That’s why it’s important that you not just read this book, but you use it as well! Write notes to yourself in the margin, and highlight things you want to concentrate on.

More importantly, however, you should complete each exercise in your own handwriting in the spaces provided. Then you can easily compare your answers with the correct answers provided in the key at the end of each chapter. You may even want to reinforce each exercise by then writing out the answer again to correct any mistakes you made. Believe it or not, you’ll remember things you see in your own handwriting much more efficiently than you would by just looking at the type-written answers.

Each chapter of this book gives you exercises that let you practice your Arabic writing in the topic that’s being focused on. I include many different types of exercises. Some are fill-in-the-blanks. Others are more involved, giving you the chance to edit or compose different types of communications, such as business letters and e-mails. This book can help you learn everything you need to confidently compose and read higher-level communications.

Remember that this book is a reference tool that doesn’t have to be read from cover to cover. Instead, you can just review the topics that you need to know about — when you need to know about them. Check out the Table of Contents or the Index to find the topic you’re interested in. Feel free to bounce around the book and skip any of the chapters that don’t pertain to you (such as the chapter on the alphabet if you already know how to read and write it). The beauty of this book is that each chapter is a self-contained unit that doesn’t assume knowledge of the others.
Conventions Used in This Book

To help you easily digest the information that you see in this book, I use the following conventions:

- All Arabic words and examples are presented in both Arabic script and English transliteration. The English transliteration is in bold.
- English translations of Arabic examples, both individual words and sentences, are italicized.
- Arabic doesn’t have capital letters like English does. Because the transliteration method makes use of some capital letters to distinguish among Arabic sounds, the transliteration also won’t be automatically capitalized.
- Answer Keys are provided at the end of each chapter. That way you don’t lose time searching in the back of the book for specific exercises.
- I use several abbreviations throughout the book. Most of them are pretty intuitive:
  - F (feminine)
  - M (masculine)
  - S (singular)
  - P (plural)
- To reduce clutter in the writing, I follow the common convention of not writing redundant vowels in my Arabic. Because there’s always a ﹴ (fatHa) preceding a ﹿ (taa’ marbuuTa), I don’t write out the ﹴ (fatHa). I also don’t write the ﹴ (fatHa) or ﹴ (sukuun) of the definite article ﹶ (alif laam). After all, those sounds can always be assumed. I do, however, always write a ﹷ (shadda) over a sun letter following the ﹶ (alif laam). (To discover more about the vowels, see Chapter 3. For an exploration of the ﹶ (alif laam), go to Chapter 2.)
- I don’t always include the formal and final vowels on nouns in the examples and exercises in this book because they usually aren’t pronounced in formal media sources. Chapters that focus on learning the formal and final vowels will, of course, comprehensively include them.

Foolish Assumptions

As someone interested in learning an intermediate level of Arabic, I assume that your basic or beginning knowledge includes the following:

- You have personal motivations for advancing to the next level in your Arabic.
- You don’t want a book that’s just a grammar textbook. You know where to find those. You’re after something that introduces a few important topics in each chapter and then covers them fully.
You have experience with the fundamentals of Arabic grammar. This includes knowing the present, future, and past tenses of the verb. You understand the rules for making a noun definite and for constructing simple ‘iDaafas. You’re also familiar with the more common prepositions and particles of Arabic. If you’re a bit rusty on any of these topics, don’t worry — Chapters 1 and 2 give you the chance to review those things.

However, I don’t assume that you know how to read and write in the Arabic alphabet. In fact, if you learned your beginning Arabic from *Arabic For Dummies* by Amine Bouchentouf (Wiley), you know that the alphabet wasn’t included there. Not including this information allowed you to concentrate instead on speaking ability. But if you haven’t studied the Arabic alphabet yet, you need to master it before you can consider yourself at the intermediate level. In Chapter 3, I help you learn it in a thorough and engaging way. In the meantime, all exercises and lessons include Arabic script and English transliteration for you to get started improving your Arabic right away.

### How This Book Is Organized

*Intermediate Arabic For Dummies* is divided into six parts. The parts begin with the basics of the language and the alphabet and continue through exploration of the nouns, verbs, and particles. Each part has at least two chapters where you can discover the topic of that part in depth. Here’s how the various parts break down.

#### Part I: Polishing Your Arabic Skills

In this part, you review the alphabet, the numbers, and other words necessary to express things like dates and time in Arabic. I also provide you with a grammar review in case it has been a while since you studied to your basic level. I also show you how to use both the dictionaries included in this book as well as the larger ones you may acquire. Finally, I include a chapter on reading and writing the Arabic alphabet.

#### Part II: Becoming a Master at Using Nouns

The chapters in this part present several topics necessary for an intermediate level command of nouns. You learn the three cases of the noun, and you meet the mystifying types of broken plurals. You also get the info you need to confidently coordinate complicated ‘iDaafa strings and add in adjectives. I round out this part with a chapter that helps you become a master at adding pronouns and relative clauses to your writing.

#### Part III: Staying Active: Forming Arabic Verbs

In Part III, you discover how to write with every imaginable type of verb. First I introduce all ten forms of the Arabic verb and show you how to produce them when you
throw in the irregular stems. Then you discover how to create commands and put objects on your verbs. The final chapter in this part introduces the various moods of the verb and demonstrates their uses in complicated constructions.

**Part IV: Enlivening Your Writing with Particles**

If you're looking to make your writing even more sophisticated, this is the part for you. It equips you to use any of the dozens of particles in Arabic to join clauses, form conditional sentences, and enliven your writing with the use of the verbal noun and participles. This part also explains how to negate your sentences.

**Part V: The Part of Tens**

The chapters in this part give you further hints and help you improve your ability to write in the Arabic language. I show you ten common mistakes to steer clear of, and I provide ten tips to polish your Arabic writing.

**Part VI: Appendixes**

The last part of this book provides you with valuable references. You get a full chart that shows you how to produce all forms of the Arabic verb. You also get English-Arabic and Arabic-English dictionaries to use in completing the exercises throughout the book.

**Icons Used in This Book**

To help you navigate the chapters in this book, I use tiny pictures, called icons, in the margins. These icons help you spot particularly important or potentially troublesome concepts. The following icons appear in this book:

I use this icon whenever I introduce something that you should keep in mind while practicing your Arabic.

This icon highlights information that can provide you with another angle when trying to understand a particular point. These tips can save you time and frustration.

This icon points to differences between English and Arabic. The information highlighted with this icon can help you learn, because it lets you compare how your native language is similar to or different from Arabic. Comparing languages can be a powerful way to enhance your memory.
When you see this icon, it means that there’s a common error to be found nearby. Trust me, I’ve made them all. Hopefully, I’ve made them (and kept track of them) so you won’t have to.

This icon highlights the practice exercises, which help to reinforce the text I cover. These exercises are a good opportunity to improve your Arabic. I’ve even tried to make them fun.

Where to Go from Here

From here on out, dig in and follow your instincts! If you start a chapter and find that it just isn’t what you want to concentrate on, skip to something else. In my own language studies, I’ve had days when I just didn’t want to concentrate on verb forms. Instead, I was hungry for some grammatical information. A week later, I couldn’t get enough of verbs. I’m giving you a wide variety of things to master. Whatever you do, I urge you to never rush your studies. Working regularly for a little while is better than cramming in hours of study in one sitting once a month.

If I can, I’d like to give you a little advice: Complete all the exercises! There’s nothing like committing yourself to putting down an answer on paper to force you to see where you need more study. Don’t be afraid of making errors. You’ve probably already seen that native speakers of Arabic are ever appreciative of your efforts. As you advance to the use of more intermediate concepts, errors are unavoidable, but the rewards are great. ! (HaDHDHan sa3ildan! Good luck!)
Part I

Polishing Your Arabic Skills

The 5th Wave

By Rich Tennant

“...My wife and I are taking the course together. I figure I only have to learn half as much, since she finishes all of my sentences anyway.”
In this part . . .

The chapters in Part I help you refresh your basic knowledge of Arabic and boost your confidence as you work to improve your writing skills. I offer you a quick review of the cardinal and ordinal numbers and how they're used to tell time and express dates. I also give you a quick refresher on the basic Arabic grammatical issues, such as nouns, pronouns, possessive suffixes, verbs, and the main types of Arabic sentences. Also in this part is a chapter on how to read and write the Arabic alphabet. This is essential knowledge if you don't already have it. With the information in this part, you'll be bravely treading into the more advanced parts of the book in no time.
Chapter 1

Looking at Numbers, Times, and Dates

In This Chapter
- Mastering the Arabic cardinal and ordinal numbers
- Telling time using two methods
- Expressing dates in Arabic

Catullus said, “Give me a thousand kisses.” And Elizabeth Barrett Browning declared, “How do I love thee? Let me count the ways.” Obviously, even the language of love can’t get by without numbers! In fact, numbers and all the ways you need to use them are so important that they deserve to start off this brief review of basic Arabic. Besides telling that special someone when you’d like to see them again (for example, at 3 o’clock tomorrow or on Tuesday, March 4th, at 5:17 p.m.), people use numbers in commerce and for making appointments in all matters formal and mundane.

This chapter reviews the basics surrounding numbers and their use in making appointments and telling time. By the end of this chapter, you’ll be using numbers comfortably and confidently. I can’t promise that you’ll be able to avoid setting a lunch date with that boring office mate, but at least you’ll know how much your half of the bill is!

Focusing on Arabic Numbers

Numbers come in two forms in almost every language. The most common form is called the cardinal number. You use cardinal numbers when you look at a price tag or do your taxes. In other words, you use these types of numbers for any type of counting. The second type of number is called the ordinal number, which allows you to rank something. For example, you may want to tell a client that you work on the fourth floor.

In the following sections, I give you the lowdown on both cardinal and ordinal numbers. I also introduce you to Arabic numerals, which are important because, as in English, you use them as a handy way to refer to numbers without writing out the whole word. I mean, after all, we call it the “War of 1812,” not the “War of Eighteen Twelve.”
Cardinal numbers: The digits you count with

Cardinal numbers are the ones that you use constantly in life, so they deserve to be considered ahead of the ordinals. If you haven’t yet mastered the basic forms of cardinal numbers, now would be a great time to do so. In Table 1-1, I show you many of the Arabic cardinal numbers.

Many Arabic numbers have both a masculine and a feminine form (which I discuss later in this section), so I list both forms where necessary in the table. In this chart, I display the words in Arabic and English transliteration without any of the case endings (see Chapter 4 for more on the forms of the cases), with the exception of the numbers 11–19, which invariably have a ʿ (fatHa) ending.

</tbody>
</table>
Dealing with gender in cardinal numbers

English has one gender-neutral form for each of the cardinal numbers. Arabic, however, has masculine and feminine forms (refer to Chapter 2 for more on gender of nouns). One of the maddening aspects of Arabic numbers is the strange practice of reverse gender agreement. In other words, the numbers that look similar to feminine nouns or adjectives are the ones you use with masculine nouns (and vice versa). Here are two examples of plural nouns with reverse gender agreement:

- ﺱﹶﻴﹾﺎﺭﺍﺕ (sayyaaraat; three cars)
- ﺧﹶﻤﹾﺴﺎﺓ ﺭﹺﺟﺎﻝ (khamsa rijaal; five men)

As you can see, ﺱﹶﻴﹾﺎﺭﺍﺕ (sayyaaraat; cars) is feminine, but it takes the masculine-appearing form of the number. Similarly, ﺧﹶﻤﹾﺴﺎﺓ ﺭﹺﺟﺎﻝ (khamsa rijaal; men) is masculine but it takes the feminine-appearing form. So you need to know the gender of the noun you want to count. Then all you have to do is select the appropriate number from the list I provide you.

Putting two-digit numbers in the correct order

Another difference between English and Arabic is the order of two-digit numbers. After 20, English puts the second digit after the first, joining them with a hyphen. For example, you would write twenty-three. Arabic, on the other hand, puts the second digit first and joins the two numbers with the word ﻭ (wa; and). Here’s an example: ﺛﹶﻼﺜﹸﺃ ﺭﹺﻋﹺﺸﹾﺮﺍﺕ (thalaatha wa-3ishruuna), which translates to twenty-three.

Writing about one of something

To say there’s one of something, such as one house or one woman, the number must follow the noun and agree in gender and case (see Chapter 2 for more on gender and Chapter 4 for more on case). Note: In this section and the others that follow, I underline the numbers themselves to help you explore the examples. The following example shows you a masculine and a feminine noun accompanied by the number one in Arabic:

- ﺑﹶﻴﹾﺖﹲ ﻭﺎﺤﹶﺩ (baytun waaHidun; one house)
- ﺍِﻤﹾﺮﹶﺃﹶﺓ ﻭﺎﺤﹶﺩﺓ (’imra’atun waaHidatun; one woman)

Writing about two of something

If you want to talk about two of something in Arabic (two pens or two letters, perhaps), you have two options. The first option is to use the dual form of the noun. (Chapter 4 explains the dual form.) If you use the dual form of the noun, you won’t even be using a separate word for two. The ending of the noun itself will indicate that there are two of whatever you’re talking about. Here are a masculine and a feminine noun with the dual endings underlined:

- ﺎﹶﻔﹶﻼﻤﺎﻥ (qalamaani; two pens)
- ﺮﹺﺴﹶﺎﻝﺎﺕ (risaalataani; two letters)
Your other option is to use the dual form with the number two following (agreeing in gender and case, of course). You would use this option if you were trying to emphasize the fact that you’re talking about two of something. You might need to emphasize the number to dispel a misunderstanding. If someone thought there were three books on the table, you could correct them, saying:

لا. هُنَاكَ كَتَابَانِ إِثْنَانِ عَلَى الطَّاْوِلَةِ.

(laa. hunaaka kitaabaani 'ithnaani 3alaa-T-Taawilati. No. There are two books on the table.)

Take a look at these two nouns that have the number two in Arabic added for emphasis:

بِيَتَانِ إِثْنَانِ (baytaani 'ithnataani; two houses)

طَاوْلَتَانِ إِثْنَانِ (Taawilataani 'ithnataani; two tables)

**Writing about three to ten of something**

When you’re speaking about three to ten of something, you first write the number using the form that appears to be the opposite gender of the noun that you want to count. (When most folks speak Modern Standard Arabic — and even when they write it — they don’t usually use the formal final vowels that can appear with the counted nouns.) Then you write the noun in its indefinite genitive plural form (refer to Chapter 4 for more on this form). Look closely at these examples of genitive plural nouns following numbers:

رِجَالٌ أَرْبَعةٌ (arba3at rijaalin; four men)

مِجلَاتٌ سَبْعَة (sab3a majallaatin; seven magazines)

Throughout this section, I tell you what the formal ending after the numbers is. I even show you the formal final vowels in my examples so you can become accustomed to them. But if you drop them from your speech and writing, you’ll still be correct. So that you can see what the same examples would be without the formal final vowels, here they are:

أَرْبَعَةٌ رِجَالٌ (arba3at rijaal; four men)

سَبْعَةٌ مَجِلَالَات (sab3a majallaat; seven magazines)

**Writing about eleven to ninety-nine of something**

To count things between eleven and ninety-nine, you have to put the noun that’s following the number in the indefinite accusative singular form (see Chapter 4). Here are some examples of indefinite accusative singular nouns following their numbers:

سَبْعَةٌ مَجِلَالَات (sab3a majallaatin; seven magazines)
Writing about hundreds or thousands of something

When you talk about things occurring in even multitudes of hundreds or thousands, you write your number and use the indefinite genitive singular noun after it (see Chapter 4). Check out these examples:

١٠٠٠ دولار (alf duulaarin; a thousand dollars)
٣٠٠ نساء من إسبارطة (thalaathumi’ati rajulin min ’isbaarTa; three hundred men from Sparta)

Writing about even multiples of ten

The multitudes of ten have two different forms, depending on whether the number is being used in the nominative or accusative/genitive cases. You can learn more about the cases and when you use them in Chapter 4. To produce the accusative/genitive form of the multiples of ten, you just have to change the -وَن (uuna) ending into an -يَنَ (iina) ending. Here are the nominative and accusative/genitive forms of twenty in Arabic:

٢٠ عشرون (3ishruuna; twenty; nom.)
٢٠ عشرين (3ishriina; twenty; acc./gen.)

Writing numbers with three or more digits

In Arabic, when stating numbers that have three or more digits, you write the highest digit first and work your way down, adding the word and between number sets. Take a look at the following two multiple-digit numbers. This is how the number 5,678 would be rendered in English according to Arabic style: Five thousand, and six hundred, and eight and seventy. As you can see, with the exception of the way Arabic expresses seventy-eight, this is how we state large numbers in English as well.

Here are a few more examples:

٣٥٦٧٨ (thalaathumi’a wahamsa wa-sittuuna; 365)
٣٥٦٧٨ (thalaathat aalaaf wahamsumi’a wa-sitta wa-tis3uuna; 3,596)

Sometimes you need to write about a counted number in the definite state. For instance, you may need to discuss the set of five questions your boss asked you to answer. To do this in Arabic, just put the number after the noun and add the definite article to both. Reverse gender agreement still applies in this case. Here are two examples for you:

فكّرت بالأسئلة الخمسة. (fakkartu bil-’as’ila al-khamsa. I thought about the five questions.)
مررت الشهرين السريعين. (marrat al-‘ayyaamu al-mi’atu sari3an. The hundred days passed quickly.)
Ordinal numbers: The numbers you rank things with

Ordinal numbers aren’t quite as common in ordinary use (forgive the pun). But you need to use them whenever you express things that occur in an order or series. In a hotel, for instance, you may discover that your room is on the fifth floor. Or you may be considered first in your class. Table 1-2 shows you the ordinal numbers (through 12) in Arabic. I explain what to do with numbers above 12 later in the section.

</tr>
</tbody>
</table>

To properly use ordinals in Arabic, remember that ordinal numbers are adjectives. You have to choose the form that matches the gender of the noun it modifies. The following examples show both masculine and feminine nouns:

الرجل العاشر (ar-rajul al-3ashir; the tenth man)

الساعة التاسعة (as-saa3a at-taasi3a; the ninth hour [9 o’clock])

No abbreviation exists in Arabic to turn a cardinal into an ordinal like in English, when you write 1st and 3rd.

In Arabic, for any ordinal above 12, all you have to do is use the cardinal form. Take a look at the following example, which is a big number without a separate ordinal form:

المرة المليون (al-marra al-milyuun; the millionth time)
Suppose that you’re reading an Arabic newspaper, and you come across a food critic’s ratings of some local eating establishments. She lists them in her order of preference, like this:

- ﻣَﻄْﻌَمٌ لُوُلُوَّ (maT3am luuluu)
- ﺟَوْهْرَ ﻝُﺒَنَﺎَ (jawhar lubnaan)
- ﺑَيْﺖَ ﺍﻟْﻛَﺑَﺎَ (bayt al-kabaab)
- ﻧَﺠْﻤَةَ ﺳَوْرِﻳَةَ (najmat suuriya)
- ﻓَﻼَﻓِﻴَلِ ﻣُﺮْوَانَ (falaafil marwaan)
- ﻳَذْﻛَرِيَاتِ ﺍﻟْمُﻐْرِبَ (dhikrayat al-maghrib)

As a friend asks you in English how his favorite places fared, you need to find them in the list and write the ranking in ordinal numbers on the line provided.

Q. Memories of Morocco

A. سَﺎَدِسَ (saadis; sixth)

Chapter 1: Looking at Numbers, Times, and Dates

Arabic numerals: The symbols you write numbers with

In addition to the Arabic cardinal and ordinal numbers themselves (which I discuss earlier in this chapter), you also need to know the forms of the Arabic numerals (the symbols used to depict numbers). They’re called Arabic numerals because the Europeans borrowed them from the Arabs and acknowledged their source. The Arabs, however, actually borrowed them originally from India. Here are zero through nine in Arabic numerals (notice that a couple of them do resemble their Western counterparts; others, not so much):

<table>
<thead>
<tr>
<th>ن (0)</th>
<th>ي (5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ي (1)</td>
<td>ي (6)</td>
</tr>
<tr>
<td>ي (2)</td>
<td>ي (7)</td>
</tr>
<tr>
<td>ي (3)</td>
<td>ي (8)</td>
</tr>
<tr>
<td>ي (4)</td>
<td>ي (9)</td>
</tr>
</tbody>
</table>

For numbers ten and higher, just combine the Arabic numerals from the chart above and use the same order you would for English. Here you can see a few larger numbers:

1٩٤١ (1942)
١٠٠٨ (2008)

Arabic uses a comma where English uses a decimal point. And Arabic doesn’t usually separate large numbers the way English does with the comma. Consider these examples:

١,٠٠٠,٠٠٠ (1,000,000)
٣٥ (3.5)

As financial officer for your company, you need to fill out checks for several purchases. The amounts are in دينار (dinaars) — the unit of currency used in many Arab countries, such as Bahrain and Iraq — but they have been given to you as English numerals. To do your job properly, first convert them into Arabic numerals and then write the Arabic numeral and the number itself, in Arabic. For the purpose of the exercise, use the masculine forms of the numbers.
Discovering How to Tell Time the Arabic Way

Time flies when you’re having fun. It drags when you’re looking forward to something later. And like money, it seems we never have quite enough of it. Because telling time is such a major part of our lives, knowing how to tell time and write it correctly is another one of those necessary skills in life.

In English you ask, “What time is it?” Someone asking you the time in Arabic will say كَمُ السَّاعَةُ (kam as-sa3a). Literally, this translates as “How much is the hour?” Arabic has two methods of telling time, one of which shows a better command of language. I explain both in this section.

Before you can tell time, however, here are a few words that you need to know:

- السَّاعةُ (as-sa3a; the hour [o’clock])
- الْدَقِيقةُ (daqiqa; minute)
- الْدَقَائِقُ (daqaa’iq; minutes)
- نَصْفٌ (niSf; half [to indicate 30 minutes])
- رَبعٌ (rub3; a quarter [to indicate 15 minutes])
- ثَلْثٌ (thulth; a third [to indicate 20 minutes])
- صَبَاحًا (SabaaHan; in the morning)
- عَفَاءٌ (masaa’an; in the evening)
To tell time in Arabic, you replace the cardinal number with the correct ordinal form. Because **الساعة** (as-saa3a), the Arabic word for *hour*, is a feminine noun, you select the feminine forms of the ordinal. The only exception is that you use the feminine form of the cardinal **واحدة** (waaHida) for 1:00.

To express the number of minutes on the hour up to the 30-minute mark, you add **و** (wa), followed by the number of minutes in cardinal form. **و (wa)** translates to *and* in English. You can use **ربع** (thulth) for 20 minutes, and **نصف** (niSf) for the half hour (30 minutes). The following examples show you how to use these fractions to tell time:

- 4:30 translates to **الساعة الرابعة والنصف** (as-saa3a ar-raabi3a wa-n-niSf; literally the hour the fourth and the half)
- 2:15 translates to **الساعة الثانية والربع** (as-saa3a ath-thaaniya wa-r-rub3; literally the hour the second and the quarter)

To state more complex times, you write the hour, followed by more specific minutes. For one or two minutes, you can just use the singular and dual forms of the word **دقيقة** (daqiiqa) and **دقيقتان** (daqiiqataani). For more than two minutes, you use the cardinal number, followed by the plural form of **دقيق** (daqaa'iq). Here are examples of one, two, and seven minutes past an hour:

- 9:01 translates to **الساعة التاسعة ودقيقة** (as-saa3a at-taasi3a wa-daqiiqa; literally the hour the ninth and a minute)
- 7:02 translates to **الساعة السابعة ودقيقتان** (as-saa3a as-saabi3a wa-daqiiqataani; literally the hour the seventh and two minutes)
- 3:07 translates to **الساعة الثامنة وسبع دقائق** (as-saa3a ath-thaalitha wa-sab3 daqaa'iq; literally the hour the third and seven minutes)

If the time you want to write is after the half hour, you can write that it’s half past an hour, and then just add another number as necessary. For example, the time 6:35 translates to **الساعة السادسة والنصف وخمس دقائق** (as-saa3a as-saadisa wa-n-niSf wa-khamsa daqaa'iq; literally the hour the sixth and a half and five minutes).

There comes a point, however, when it becomes easier to talk about how many minutes there are until the next hour. The times 3:55 and 2:45 are both close enough to the next hour that it’s convenient to use **إلى** (‘illaa), which in English is *except* (but here it’s the equivalent of *to* in the sense of “a quarter to four”). After **إلى** (‘illaa), you use the accusative form of the noun or number. Consider the following examples:

- 3:55 translates to **الساعة الرابعة إلى خمس دقائق** (as-saa3a ar-raabi3a 'illaa khamsa daqaa'iq; literally the hour the fourth except five minutes)
- 2:45 translates to **الساعة الثالثة إلى ربع** (as-saa3a ath-thaalitha 'illaa rub3an; literally, *the hour the third except a quarter*)
Now it’s time for some practice. Read the time given in English, and then write it in Arabic in the space provided.

Q. 4:15

A. الـساعة الرَّابعة والـربع (as-saa3a ar-raabi3a wa-r-rub3)

11. 3:20

12. 10:13

13. 7:50

14. 2:45

15. 12:30

Making Dates: Getting to Know the Arabic Days and Months

Whether they’re dreaded deadlines or anniversaries that you don’t want to forget, knowing dates is a critical skill in any language. In this section, I prepare you for writing out some dates in Arabic by presenting some important categories of words: days of the week and months in a year.

Before you begin, however, check out some useful words for talking about dates:

يوم (yawm; day)
 أسبوع (usbuu3; week)
 شهر (shahr; month)
Exploring the days of the week

The days of the week in Arabic are easy to remember because most of them are based on numbers, with Sunday being number one (it’s the first day of the week, after all). When you get to the end, the word for Friday means “Gathering Day,” because it’s the main prayer day for Muslims. Saturday preserves the Hebrew word “Sabbath.”

Here are the days of the week in Arabic:

- **yawm al-ʼaHad** (Sunday)
- **yawm al-ʼithnayni** (Monday)
- **yawm ath-thulathaa’** (Tuesday)
- **yawm al-ʼarba3aa’** (Wednesday)
- **yawm al-khamiis** (Thursday)
- **yawm al-jum3a** (Friday)
- **yawm as-sabt** (Saturday)

Whether you’re speaking or writing, it isn’t uncommon to save time by dropping off the word **yawm** and just state the second element. In other words, **yawm al-khamiis** (al-khamiis) can mean Thursday all on its own.

Remembering the months of the year

Most of the Arab world today uses the Gregorian calendar with names for the months borrowed from the Western world. An ancient Semitic system of names, which dates back more than 3,000 years, has also been preserved. In many Arabic language newspapers, you see the Western month, followed by the ancient Semitic months in parentheses. In Table 1-3, I provide you with the Western months in Arabic along with their ancient Semitic equivalents and Western translations.
Table 1-3  
The Western Months in Arabic with Their Semitic Equivalents

Writing full dates with the day, month, and year

To find out the date in Arabic, you can ask someone, ما سُمِّيْتُ مَنْ؟ (maa at-taariikh?). The response, as in English, can be in either cardinal or ordinal numbers. Here are examples of a date with a cardinal number and one with an ordinal:

العِشْرَونَ من آَبِرِيلَ (al-3ishruuna min ’abriil; April 20)
الأَوَّلَ من ﺑَنَﺎيْر (al-’awwal min yanaayir; January 1st)

To write a date in Arabic, you reverse the order of the month and day that you use in English. For example, January 14, 2008, in English, becomes ١٤/١/٢٠٠٨ in Arabic.

Here’s where your knowledge of the Arabic numerals is going to come in handy. To write a date in Arabic numerals, you can do one of two things: You can put the whole thing in numerals and separate them with back slashes, or you can write out the month in Arabic (with the rest in numerals). The following examples show you how to write January 15, 2008, using both options:

١٥/١/٢٠٠٨ (yanaayir)
Convert the following dates into both of the two Arabic options.

Q. April 10, 2006
A. ٦٠٠٢ /٤ /٠١

16. September 18, 2004

17. July 4, 1776

18. February 14, 1963

20. March 15, 1923

21. December 9, 1985

22. October 3, 1939

I love languages and have studied a good number of them. No matter how familiar I become with a language, however, I still find it valuable to go back and review the basics every now and then. In so doing, sometimes I discover new and better ways to remember things that have long plagued me. So, no matter how recently you completed your basic studies in Arabic (and I’m assuming you have already completed at least a year’s worth of studies and are about to take or are currently in an intermediate level course), a refresher will help you as you move on.

If you’re a bit rusty, this chapter can reinvigorate your knowledge of some things I don’t cover elsewhere in this book. In the remaining chapters, I go beyond the material reviewed here, which is the reason you picked up *Intermediate Arabic For Dummies* in the first place.

In this chapter, you encounter a description of what the Arabic triliteral root is and how it works. You experience the many ways that nouns can function in your sentence. This chapter also acquaints you with how to add the Arabic definite article, the equivalent of English *the*, to your nouns. You see how to describe possession in Arabic, and you have the chance to review past, present, and future tense verbs. Finally, you discover the two main types of Arabic sentences.

This is a lot to cover, but gaining the skills from the material in this chapter provides you with a sound foundation. And this foundation will help you become proficient at the intermediate level.
As you likely learned in the first semester of your first year of Arabic studies, the vast majority of Arabic words are derived from a root that’s made of three consonants. Each of these three-consonant roots are referred to as a triliteral root. (This name comes from the Latin for, you guessed it, three letters.) Thousands of different triliteral roots exist in Arabic. It’s important to know about these triliteral roots because Arabic uses them in stable word patterns to form almost every noun and verb in the language.

A triliteral root has an inherent meaning. For example, consider the triliteral root كتَب (k-t-b). This root means to write. Arabic uses the three consonants of the root k-t-b in different word patterns, each of which (because of the root meaning) will have something to do with the concept of writing.

Grammarians model word patterns in Arabic with a sort of “dummy” root, فعل (f-3-I). The root f-3-I means to do, but when it’s used to model word patterns, don’t think about its meaning at all. Instead, view the use of f-3-I to show patterns as a sort of blueprint. The three consonants of the root f-3-I show you where the three consonants of any triliteral root will go when you use the word pattern in question.

In the following example, I demonstrate how you use the root فعل (f-3-I) as the model for word patterns. These are the word patterns:

- فَعَلَ (fa3ala; to do something)
- مَفْعُولٌ (maf3alun; the place to do that something)
- فَاعِلٌ (faa3ilun; one who does that something)

Here are the same word patterns from the previous list with the triliteral root كتَب (k-t-b), which means to write:

- كَتَبَ (kataba; to write)
- مَكْتَبٌ (maktabun; office, or place of writing)
- كَاتِبٌ (kaatibun; writer)

As you make your way through this book and advance in your Arabic studies, you’ll become familiar with many productive word patterns that have stable meanings no matter what root you insert. Notice, for instance, how the words on the pattern faa3ilun mean one who does something. The words on the pattern maf3alun mean place [where the verb happens].

Now’s your chance to practice replacing the consonants of the dummy root f-3-I with another root. For each of the items below, I give you a word pattern using f-3-I and a new triliteral root. Your job is to substitute the consonants of f-3-I with the consonants of the new root. This exercise gives you a little practice writing in Arabic (if you’re rusty on that important skill). You can also guess at the meaning of the word you create, based on the root meaning and the word pattern.
Q. Pattern:فاعل (faa3ilun); practice root: ركب (r-k-b; to ride)

A. راكب (raakibun; rider)

1. Pattern:فاعل (faa3ilun); practice root: سمّ (s-m-3; to hear)

2. Pattern:فعل مفعول (maf3alun); practice root: طبخ (T-b-kh; to cook)

3. Pattern:فاعل (faa3ilun); practice root: حكم (H-k-m; to pass judgment)

4. Pattern:فعل مفعول (maf3alun); practice root: خرج (kh-rj; to exit)

Naming People, Places, and Things: Nouns 101

As you know, a noun is the part of speech in a language that names people, places, things, or even more abstract concepts, such as qualities and actions. This section offers a brief refresher on noun basics. I present the various types of nouns you find within a sentence and explain what they are. I also discuss how the topic of gender fits with nouns in the Arabic language. (To read about the noun cases, visit Chapter 4.)

Exploring the types of Arabic nouns

As in English, nouns fall into several different categories. Here are the categories in which a noun can appear in Arabic:

✔ Animate: Included in this category are humans, real or imaginary, and animals (and some might add aliens!). Here’s an example:

ذلك الرجل وسياسمَ.
(dhaalikaa-r-rajulu wasiimun. That man is handsome.)

✔ Thing: Here you have any inanimate object that you can see, touch, taste, or somehow feel. For example:

أكلت الطعام سريعاً.
('akaltu aT-Ta3aama sarii3an. I ate the food quickly.)
Part I: Polishing Your Arabic Skills

Proper noun: Whether it’s a person’s name or a place like New Jersey, a proper noun refers to something ordinarily capitalized in English (but Arabic has no capital letters). Check out this example:

\[\text{زارة القاهرة.} \]  
\(\text{(zaarat al-qaahirata. She visited Cairo.)}\)

Abstract quality or concept: This broad category basically covers anything that doesn’t fit in the previous three categories. Some items that fall into this category include feelings, concepts, and even actions. Consider this example:

\[\text{السكوت من الذهب.} \]  
\(\text{(as-sukuut min adh-dhahab. Silence is golden.)}\)

Engendering differences

An important feature of Arabic nouns is their gender. So in this section, I show you ways to recognize the gender of an Arabic noun.

English nouns may describe males and females, but there’s no grammatical gender for inanimate nouns or abstract concepts. So, John may be referred to as he and Mary as she, but the table is referred to as it. In Arabic, the pronoun it doesn’t exist. Instead, every noun is either masculine or feminine. When the noun is masculine, it takes masculine adjectives. When it’s feminine, feminine adjectives are the correct choice. (See Chapter 6 for more information on how adjectives and genders interact.)

Working with masculine nouns

In Arabic, two clues can tell you whether a noun is masculine. For instance, an Arabic noun is masculine if:

- The noun describes something intuitively masculine, such as a man, brother, or uncle.
- The noun doesn’t have the š (\text{taa’ marbuuTa}), which is the ordinary ending for a feminine noun.

As an example of the first rule, here are a couple of masculine nouns describing males:

\[\text{رجل (rajul; man)} \]  
\[\text{جد (jadd; grandfather)} \]

Unfortunately, Arabic has no masculine ending (as, for instance, you have with the Spanish word \text{carro}, meaning car). There’s nothing about a typical masculine noun that tells you it’s masculine except the fact that it doesn’t have the š (\text{taa’ marbuuTa}). Here are a few examples of masculine nouns that aren’t intuitively masculine:
Getting girly with feminine nouns

In Arabic, two factors help you determine whether a noun is feminine. For instance, a noun is feminine if it:

✔ Describes something understood as feminine, such as a woman, an aunt, or a grandmother
✔ Ends with the regular feminine ending, the ﺓ (taa' marbuuTa)

The following are examples of the first rule. These feminine nouns describe females in Arabic:

ﺍﹺﻣﹾﺮﹶﺃﹶﺓ (imra’a; woman)

ﺑﹺﻨﹾﺖ (bint; girl, daughter)

And now here are examples of the second rule. These nouns that describe gender-neutral objects are still feminine nouns in Arabic. You can guess that they’re feminine because of the ﺓ (taa’ marbuuTa) ending.

ﺳﹶﻴﹼﺎﺭﺓ (sayyaara; car)

ﺟﹶﺮﻳﺪﺓ (jariida; newspaper)

There are always exceptions to the rule, of course. There are a handful of nouns with ﺓ (taa’ marbuuTa) that are masculine. There are some nouns without it that are feminine. And there’s no rhyme or reason to the few violations of the expected rules. So you have to look up words that you aren’t familiar with. Note that most comprehensive dictionaries on the market only tell you the gender of nouns that violate the expected gender. I don’t use any of these rare irregular nouns in this book, but be on the lookout for them elsewhere.

In this practice set, I give you the chance to recognize the probable gender of a noun and add the appropriate form of the adjective. For each item, I give you the noun and a masculine adjective. Put the adjective after the noun. I don’t throw any curve balls at you in this exercise. The gender will be what you can and should safely assume.

Q. ﻗﹶﺮﹾﻳﺔ (qarya; village); ﺺﹶﻐﻴﺮ (Saghiir; small)

A. ﻗﹶﺮﹾﻳﺔ ﺺﹶﻐﻴﺮﺓ (qarya Saghiira; small village)

5. ﻧﹺﻈﺎﻡ (niDHaam; system)
Being Specific with the Definite State

The *definite state* is the form of a noun that refers to a specific example of that noun — not just any theoretical case. In other words, when you say that you saw *the* movie, you’re referring to a specific, or definite, movie. But if you ask someone whether they saw *a* movie on Friday night, you aren’t asking about a specific movie. Grammarians use the term definite state to refer to a noun that’s given some equivalent to the English word *the*, which is considered a definite article. A noun in English with the word *the* in front of it is considered to be in the definite state. By contrast, if you use the indefinite article *a/an*, you’re describing the indefinite state.

Arabic creates the definite state by adding the prefix ﺍﹶﻝ (al-) to a noun. Even though al- is a prefix on the word — not a separate word like *the* — grammarians still generally call al- the definite article. Because the definite article in Arabic is made up of just the two consonants ﻋﹶﻞ (‘alif) and ﺟﹶﻞ (laam), Arab speakers and writers frequently refer to making a noun definite as “adding the *‘alif laam.*”

The following are two nouns that I make definite by adding the *‘alif laam.* In each case, I first show you the noun by itself and then the noun with the prefixed definite article:

- كتاب (kitaab; a book)
  - الكتاب (al-kitaab; the book)
- سيارة (sayyaara; a car)
  - السيارة (as-sayyaara; the car)

Notice that in the Arabic script, I have indeed added the *‘alif laam* to each noun. But with سيارة (sayyaara), the definite version has no ﺟﹶﻞ (laam) at all. Instead, you find a double s sound. This is because about half of the consonants in Arabic absorb the l sound of the laam and turn into a doubled consonant.

In the following sections, you discover how each consonant behaves when you add the *‘alif laam* to it. The Arabic consonants are classified as sun letters or moon letters depending on what they do to the laam in the definite state.
The sun letters

Consonants that assimilate the laam of the 'alif laam are called sun letters. The reason they're called this is because the first letter of the word for sun in Arabic, شمس (shamsun), is a sun letter itself.

The assimilation of the laam to produce a doubled consonant is primarily a matter of pronunciation. In writing, you use the usual 'alif laam as the prefix to create the definite state. If, however, the first consonant of the word is one of the sun letters, you acknowledge the assimilation of the laam by writing ʿ (shadda), which is the symbol for a doubled consonant, above the sun letter itself. (If you’re uncertain about the shadda, you can review Arabic writing rules in Chapter 3.) What’s great about this in Arabic is that there’s a convenient way to visually recognize that a noun is definite, even if the pronunciation doesn’t have a laam with sun letters.

Table 2-1 displays each of the sun letters, along with a noun that begins with each.

<table>

</tbody>
</table>
The moon letters

The moon letters are those consonants that don’t assimilate the laam. Instead, with the moon letters, the ’alif laam goes onto the word as a simple prefix pronounced al-. The reason they’re named as they are is that the first letter of the word for moon in Arabic, قَمْرُ (qamrun), is a moon letter itself.

Table 2-2 displays each of the moon letters along with examples of words beginning with each of the moon letters.

<table>
<thead>
<tr>
<th>Arabic Moon Letter</th>

</tr>
</tbody>
</table>

It’s your turn to put your newfound knowledge of the ’alif laam into practice. For each of the words I give you, add the ’alif laam.

Q. صَوْمٌ (Sawm; fasting)

A. الْحَصُوْمُ (aS-Sawm; the fasting)

9. مَتْحَفٌ (matHaf; museum)

10. سوق (suuq; market)
Working with Pronouns and Pronoun Suffixes

**Pronouns** are words that can take the place of nouns. For instance, in English, you can say, “I saw my friend at the party and went with him to the buffet table. He ate all the breadsticks!” Instead of repeating the word friend, you can use pronouns to be more concise. In this example, you can see how English has separate pronouns for both subjects (he) and objects (him) of verbs.

English also has possessive pronouns. With possessive pronouns, you’re able to say “I attended his wedding” and “I know their secret.” While English has separate words for pronouns and possessive pronouns, Arabic only has separate, or independent, pronouns for the subjects of verbs. When you need to express a pronoun as the object of a verb or to express a possessive pronoun, you use pronoun suffixes on the nouns and verbs.

**Discovering the independent forms of Arabic pronouns**

An independent (or stand-alone) form of the Arabic pronoun is used when the pronoun is the subject of a verb or the main topic of an equational sentence. However, in a sentence with a verb, the pronouns aren’t strictly necessary, because the verb form itself also tells you who’s performing the action. But you can add the independent forms of the Arabic pronoun to provide emphasis about who’s doing the action. (For example, you may want to make it very clear that “You need to take out the garbage, not me.”)

In Arabic, when you’re talking to or about a group that has mixed gender, you use the masculine plural forms. You only use the feminine plural forms when talking to or about a group that’s composed of three or more female people.
Table 2-3 shows the independent forms of the Arabic pronoun.

Tacking on the possessive pronoun suffixes to Arabic nouns

Unlike English, Arabic doesn’t have separate possessive pronouns such as *his, our,* and *their.* Instead, Arabic has possessive pronouns that you attach as suffixes to the noun. (When you want to express possession of one full noun over another noun, you use the "I’daafa construction covered later in this chapter.)

To form the possessive, you attach the proper possessive pronoun suffix to the noun without adding the *alif laam* to make it definite. After all, if I tell you that I like his car, I’m referring to a specific, or definite, car. You attach your pronouns to the noun after the case ending with only one exception — the suffix *يَ (ii)*, which is used to express *my.*

In Table 2-4, I use the nominative case, but these possessive pronoun suffixes go on a noun in the accusative or genitive as well. (To see the cases covered in detail, you can go to Chapter 4 of this book.) In the table, you see the possessive suffixes added to the nouns after the normal *u* vowel of the nominative. In the exception, you remove the nominative ending *u* and add the suffix *يَ (ii)* directly to the noun. I show you how to apply the suffixes using the example noun *كِتابَ (kitaab; book).*

<td>كنتابونه (kitaabuhunna; their [FP] book)</td>
</tr>
</tbody>
</table>

When you put the possessive suffixes on a noun with the ﺃ (taa’ marbuuTa) — the Arabic feminine ending that’s described earlier in the chapter — you change the taa’ marbuuTa into a ﺃ (taa’). Then you add the usual endings. Consider the feminine noun ﺔجابة (‘ijaaba; answer). Here’s what it looks like with the possessive pronoun suffixes added:

my answer
her answer

For each of the supplied English nouns and pronouns, add the possessive suffix in Arabic.

Q. his house  
A. ﺔبيته (baytuhe; his house)  
19. my job  
20. his name  
21. our hope  
22. her university  
23. your (MP) president  
24. their (FP) idea  
25. your (MS) food  
26. your (FS) pen
Getting Active with Arabic Verbs

Verbs are the words in a language that really make life exciting because they express action. One interesting thing you may have discovered is that Arabic manages to get by without using a verb that means to be in the present tense. So, instead of saying “I am happy,” you just say “I happy.” (You can explore sentences without the verb to be in the present tense in the later section “Adding up equational sentences.” But, don’t worry. Arabic has a rich inventory of ways to describe the other actions that spice up your life.

In Chapter 9, I introduce you to the ten forms of the Arabic verb. And Chapter 10 helps you sort out the irregular verbs that can sometimes be troublesome. In this section, however, you can review the formation of the past, present, and future tenses of simple and regular verbs.

Writing the past tense verb

I start with the past tense because Arabic dictionaries use the past tense form as the base word to show you any verb. Another good reason to start with it is because it’s easier than the present — you only have to add suffixes to form the past tense. (The present requires both prefixes and suffixes.) So I start you out easy with the past tense.

Simply put, the past tense describes actions or conditions that happened in the past. In Arabic, you express past tense by adding one of the many past tense personal pronoun suffixes to the verb. All verbs in Arabic use the same endings to produce the past tense. Table 2-5 shows the different personal pronoun suffixes that you use.

</tr>
<tr>
<td>﴾هوا شربا﴿</td>
</tr>
<tr>
<td>﴾هي شربت﴿</td>
</tr>
</tbody>
</table>

I drank the water quickly, because I was very thirsty.

You don’t necessarily need to use the separate pronouns in addition to the verb since the suffixes of the past tense tell you who’s performing the action. Use the pronouns only if you want to emphasize who’s performing the action.

**Creating the present tense verb**

The present tense expresses action occurring in the present time. In Arabic, forming the present tense is a bit more complicated than forming the past tense. The main reason is because every verb in the present tense receives a prefix, but some also get a suffix. I explain the rules a little later in this section.

Before you can properly form the present tense of a verb, you need to look in the dictionary to determine the vowel that goes over the second consonant of the verb. You can read more about these vowels in Chapter 3. You don’t have to worry about which vowel to choose, however; it’s predetermined. You just need to find out which one is correct in the dictionary. (And you’ll be able to find it easily since I give you the past and present tense of each verb. Whatever vowel you find following the second consonant of the triliteral root in the present tense is the vowel you use for all the forms of the present.) Each verb uses only one of the three possible vowels: Damma, kasra, and fatHa. Table 2-6 shows examples of verbs using each of the three vowels.

<table>
<thead>
<tr>
<th>Arabic Vowel</th>
<th>Arabic Verb</th>
<th>Translation</th>
</tr>

<td>(kasra; i)</td>
<td>﴿نجلس﴾</td>
<td>we sit</td>
</tr>
<tr>
<td>(Damma; u)</td>
<td>﴿تشكر﴾</td>
<td>she thanks</td>
</tr>
</tbody>
</table>
Before I show you all the forms of the present tense, I need to describe the steps for generating the present tense verb. Here they are:

1. **Attach the necessary prefix for each person of the verb to the first consonant.**
   
   The first consonant won’t be followed by a vowel (you write a consonant without a vowel in Arabic by placing the [sukuun] symbol over the consonant).

2. **After the second consonant, add the vowel that the particular verb uses in the present tense.**
   
   You can discover the correct vowel in your dictionary.

3. **Add a Damma to the third consonant of the root.**
   
   The following are exceptions to this rule:
   - *You* (FS) takes the suffix [iina].
   - *You* (MP) and *they* (MP) take the suffix [uuna].
   - *You* (FP) and *they* (FP) take the suffix [na].

Table 2-7 shows the prefixes and suffixes that you must add to create the present tense.

### Table 2-7: Personal Pronoun Prefixes and Suffixes for Verbs in the Present Tense

Chapter 2: Arabic 101 Refresher

Forming the future tense verb

If there were an Olympic event for the easiest way to form the future tense in a language, Arabic would likely take the gold medal. All you have to do to write a verb in the future tense is add س (sa) to the present tense form. How easy is that?

Following are the future tense forms of the verb شرب (shariba; to drink). Notice that the forms here are identical to the present tense forms except for the addition of the prefix س (sa).

Producing the proper form of the verb is an important skill to master as you move on to the various forms and irregular verbs in the rest of the book. So be sure to take a run through this exercise before you begin. In the following sentences, each blank needs a verb. For clues, you get the root and vowel of the verb you need. To keep you from having to go to the dictionary, I give you the present tense vowel of each verb in parentheses. For the sake of the exercise, use past tense for anything in the past, present for anything today, and future for tomorrow.

<table>

sanashrabu al-qahwa ma3an 3indamaa yaSilu 'aHmad, 'in shaa’a allah.

We will drink coffee together when Ahmad arrives, God willing.)
### Grasping Arabic Grammar Essentials

As you know, nouns are the things and verbs are the actions. Knowing how to put these items together is where you enter that often feared area of grammar. To compare language to baking a cake, nouns and verbs alike are the ingredients you use. But grammar is the recipe that tells you the specific ways to combine those ingredients so you can produce something good. Grammar lets writers produce a work in a way that’s understandable (and hopefully enjoyable) to all.

<table>

---

Grasping Arabic Grammar Essentials

As you know, nouns are the things and verbs are the actions. Knowing how to put these items together is where you enter that often feared area of grammar. To compare language to baking a cake, nouns and verbs alike are the ingredients you use. But grammar is the recipe that tells you the specific ways to combine those ingredients so you can produce something good. Grammar lets writers produce a work in a way that’s understandable (and hopefully enjoyable) to all.
In terms of their grammar, there are two main types of languages. One type relies on word suffixes or prefixes to determine what every part of speech is doing in the sentence. We call these inflected languages. Latin is one of them; it has different endings for every possible function of the words. Another type of language is what's called a word order language. English is a member of this class. In English, the subject comes before the verb and the object comes after.

Modern Standard Arabic is an inflected language that has developed into a word order language. What do I mean by that? Well, Arabic has case endings (which you can read about in Chapter 4) that tell you whether a noun is the subject or the object. However, because word order also tells you the subject and object, you can drop those endings out of your pronunciation without causing any loss of understanding. It isn’t surprising that all the modern dialects have abandoned the case endings.

In this section, I give you a brief overview of a few important grammatical issues in Arabic, including a description of the two types of sentences (equational and verbal) and an explanation of the 'iDaafa structure. Familiarity with these concepts equips you to expand your use of Arabic into the more complicated grammatical constructions that are covered in Part IV of this book.

**Adding up equational sentences**

The most basic sentence in Arabic is one in which you write $A$ [is] $B$. This type of sentence is known as an equational sentence. In Arabic, there’s no verb meaning *to be* in the present tense. Instead, it’s understood from the context. To give you an idea of how this works, I put the word *to be* in brackets in the English translation of the examples to remind you that this word is missing in the Arabic.

In the following examples, I show you the possible types of equational sentences. What they have in common is the lack of a present tense verb *to be* as well as the existence of two parts. The first part ($A$) is the *subject*. The subject could be a name, pronoun, or proper noun. The second part ($B$) is called the *predicate*. The predicate is the additional information your equational sentence imparts about the subject. That information could be in the form of an adjective (if you’re describing an attribute of the subject) or a proper noun or name.

Here’s an example of an equational sentence in which $A$ could be a proper name and $B$ could be another noun:

\[
\text{مُحمَّد مُهَنَّدِس.} \\
\text{(Muhammad muhandis. Muhammad [is] an engineer.)}
\]

$A$ could also be a noun and $B$ could be a proper name, like this:

\[
\text{اِسْمِي اَحْمَد.} \\
\text{(ismii 'aHmad. My name [is] Ahmad.)}
\]
And, finally, A could be a pronoun and B could be an adjective, as in this example (which also adds a temporal adverb):

\[
\text{‘انا تُعبَان الْيَوْم.}
\]

\( ('\text{anaa ta3baan al-yawm. I [am] tired today.} \)\)

You can add the interrogative particle َهَلْ (hal) to an equational sentence to make it a question. There’s no direct English equivalent for hal; it just introduces a question. Consider this example:

\[
\text{هَل آنَت مَتاَكَد مِن ذلِك؟}
\]

\( (\text{hal 'anta muta`akkid min dhaalika? [Are] you sure about that?}) \)

**Creating action with verbal sentences**

A verbal sentence contains a verb in the predicate. In a verbal sentence, the fact that a particular action took place or is taking place is an integral part of the information being conveyed. It may also be true that the verbal sentence tells you who’s doing the action or to whom the action is being done. Here’s an example of a verbal sentence:

\[
\text{نَامَ الْكَلْب كَلْلُ الْيَوْم.}
\]

\( (\text{naama al-kalb kulla-l-yawm. The dog slept all day.}) \)

Here the word َدَوْغ is the subject and َسَلَط is the verb. This sentence displays the normal word order you use in Arabic. The first word of the sentence is your verb. Immediately following your verb comes your subject. There’s no object to the verb. However, if your sentence requires you to add an object, you express the object immediately after the subject. For example, here’s a sentence with a subject, a verb, and an object:

\[
\text{أَكَلَتْ الْقَطْة الْماَرْ.}
\]

\( ('\text{akalat al-qiTTa al-fa'ar. The cat ate the mouse.}) \)

Here the word َدَوْغ is the subject, اَتَه is the verb, and, well, the َسُبْط is the unfortu-

**Expressing possession with the 'iDaafa structure**

An 'iDaafa is the grammatical construction used in Arabic to express possession of one noun over another. To form an 'iDaafa, you put two nouns next to each other, with the second noun possessing the first. Refer to Chapter 7 for help on perfecting your use of complicated and long 'iDaafas. For now, I keep it simple and just go over the two-word 'iDaafa.
In English, you have two ways to express possession of one noun over another. You can use the word of, as in the phrase, the house of Ahmad. You can also use the possessive suffix 's, as in Ahmad’s house. In Arabic, you express either one of these two English phrases with an 'iDaafa in which you put together the two words, بَيْت أَحْمَد (bayt ‘aHmad; literally, house Ahmad).

One inviolable rule about the Arabic 'iDaafa is that the first word in the 'iDaafa can never take the ال (‘alif laam). If the second word is definite — it’s either a proper name like Ahmad or it’s a noun with the ‘alif laam — the whole 'iDaafa is translated as if both members are definite. Here’s an example of an 'iDaafa with a noun in the definite state coming second. Notice that the translation renders both definite:

مُسَاعِدُ الرَّئيِس
(musaa3id ar-ra‘lis; the assistant of the president or, the president’s assistant)

You see in the final example that when the first word in an 'iDaafa ends with the taa’ marbuuTa, you pronounce the word as if there’s a final t. In Arabic writing, however, there’s no difference in spelling.

The only way to master the 'iDaafa construction is by practicing extensively. So in the following exercise, I provide you with several English possessive phrases. Produce the indicated 'iDaafas in Arabic based on those English phrases.

Q. the tree’s leaves
A. أَوْرَاق الْشَجْرَة ('awraaq ash-shajara)

35. the man’s shirt _____________________________________________________________

36. a friend’s pen ______________________________________________________________

37. the girl’s school ___________________________________________________________

38. a cup of coffee ____________________________________________________________

39. the friend’s car _____________________________________________________________

40. the college stadium ________________________________________________________

41. a man’s daughter __________________________________________________________

42. the professor’s address ____________________________________________________

Navigating Arabic Bilingual Dictionaries

Have you ever forgotten a word even in English? In that moment, you may tell a friend that there’s a word you need, and it’s right on the tip of your tongue. You use so many words every day that you’re bound to have difficulties even in your native language. However, how much more frustrating it is to find yourself needing a word that you’ve never even learned! That’s where bilingual dictionaries come in.
Consider the following common Arabic saying: Arabic is an Ocean. Arabic contains the largest number of native words of all other languages on the planet. (English has more words overall, but a majority of English words are borrowed from other languages.) So obviously, you need to know your way around a dictionary, whether it’s one in the back of this book or a separate Arabic-English dictionary.

**Using the dictionaries in the appendixes of this book**

As you go through this book, you may need to consult the dictionaries in the appendixes to complete the exercises. So to help you do that most efficiently, you need a little guidance on how to use them. When you need to find the Arabic equivalent to an English word, look it up in the English-Arabic dictionary. You look it up alphabetically (according to the English word).

To help you distinguish between nouns and verbs, a verb is always given in the form of an infinitive (to + a verb). Compare the following two entries; the first one is a verb and the second a noun:

- to answer: ﻓﻲ ﺑﺠﻴﺐ (yuujiibu) / ﻓﻲ ﺟﻮﺍﺏ (jawaab)
- answer: ﻓﻲ ﺟﻮﺍﺏ (jawaab) / ﻓﻲ ﺑﺠﻴﺐ (yuujiibu)

For the Arabic-English dictionary, I include all forms alphabetically by the order of the Arabic alphabet — as opposed to listing words under their triliteral roots (which is how many other dictionaries are organized). If you’re unsure of the order of the Arabic alphabet, it’s included in the Cheat Sheet at the front of the book. This organization should help you more quickly locate the forms you need. When I give you a verb, I supply the present tense in parentheses along with the past tense. For nouns and adjectives, I give you the plural form in parentheses.

**Finding your way through a regular Arabic-English dictionary**

The main difference between the dictionaries you encounter in this book and many of the full dictionaries on the market is that many follow the convention of organizing by root rather than presenting each word alphabetically. In this book’s Arabic-English dictionary, you find the word مكتب (maktab; office) on the same page as مصنع (maSnah; factory) because both start with m. In other full dictionaries, however, you would find مكتب (maktab; office) on the same page as كاتب (kaatib; writer) because all the words formed from the root كتـب (k-t-b; to write) are put together.

For a good alphabetical dictionary that’s organized the same way as the dictionaries in this book, try Al Mawrid (English-Arabic/Arabic-English dictionary) by Mounir Baalbaki. A good dictionary that’s organized by triliteral root is The Hans Wehr Dictionary of Modern Written Arabic.

Chapter 3

The Write Stuff: How to Read and Write the Arabic Alphabet

In This Chapter
- Discovering Arabic letters that connect in only one direction
- Producing Arabic letters that connect in two directions
- Writing the vowels and special characters in Arabic

Many times, when native speakers of Arabic discover that I know how to speak their language, they ask me if I also know how to read and write it. When I tell them I do, they're ordinarily more impressed (and even astounded) with the fact that I know the Arabic alphabet than with the fact that I know how to speak the language itself! This is because, for good or bad, the Arabic alphabet is a difficult matter.

If you have no background yet in how to read and write the Arabic script that you find in this book, you can still get started learning some intermediate level Arabic. This is because as an extra feature of this book, I include English transliteration for everything. But learning the alphabet still is essential for you if you intend to gain any depth in the language.

The purpose of this chapter is to provide a straightforward presentation of each Arabic letter. I show you how to recognize and write each letter. I also explore how each consonant is pronounced and how to add vowels to your consonants.

Understanding the Basics of Writing Arabic Script

Arabic, as you probably know, is written from right to left. Arabic letters that can be connected only to letters on their own right side are called non-connectors. This name is conventionally used even though it’s a bit of a misnomer, since the so-called non-connectors can indeed connect to letters that precede them in a word. But they can’t ever connect to letters that follow them. Other letters can connect to letters that both precede and follow them. These letters are called connectors.
When I present each of the letters to you, I give you the name of the letter in Arabic, which is a dummy word that starts with that letter (like how we, in English, pronounce the letter b as bee.) In this chapter, I use consistent names for the potential shapes of both the non-connectors and the connectors from the start. Here’s a description of the potential letters:

- **Independent (I):** The form of the letter that stands alone and not connected to any other letter.
- **Initial Connected (In.C.):** The form of the letter that’s not connected to any letter on its own right side but is connected to a following letter on its left side.
- **Medial (Med.):** The form of the letter that’s connected to other letters on both its right and left sides.
- **Final Connected (F.C.):** The form of the letter that’s connected to another letter on its own right side but is also the final letter of a word.

One of the benefits of a *For Dummies* book is the modular organization. In other words, topics are self-contained in the book for you to explore however and whenever you see fit. Indeed, the rest of this book is organized that way. My advice to you, however, is that if you’re currently making your first foray into the alphabet, you should work through this particular chapter from start to finish. Because the Arabic letters connect with one another in a cursive script, they really need to be explored from start to finish so you can build on what you learn.

**Exploring the Non-Connectors**

Letters that can connect only on their own right side are called non-connectors. Because they can never connect to letters that follow them, they won’t have a form for the Initial Connected and Medial letters. They also, by definition, can never connect to one another. I show you each of the non-connectors in the following sections.

**‘Alef (‘alif)**

The ‘Alef (‘alif) as a letter by itself represents the long a vowel (transliterated in this book as aa. You write the Independent ‘Alef (‘alif) as a single line downward. The Final Connected ‘Alef (‘alif) goes upward from the letter that it’s connected to. Table 3-1 shows the two shapes of the ‘Alef (‘alif) as you will see them in the book and written by hand.

Chapter 3: The Write Stuff: How to Read and Write the Arabic Alphabet

\( \text{ bod } \) (\text{waaw}\)

The \( \text{ bod } \) (\text{waaw}\), which is transliterated as \text{w} in this book, can represent two sounds. It can be a consonant equal to the English \text{w} in \text{wish}. It also can stand for the long \text{u} vowel (transliterated in this book as \text{uu}) as in the English word \text{food}. There are two ways to know when the \( \text{ bod } \) (\text{waaw}\) is being used as a consonant. If there’s a vowel symbol above or below the \( \text{ bod } \) (\text{waaw}\), it represents the consonantal sound \text{w}. (You can explore vowels in the final section of this chapter.) Also, if the \( \text{ bod } \) (\text{waaw}\) is followed by a long vowel, written with an \text{alif}, \text{yaa'}, or \( \text{ bod } \) (\text{waaw}\), it’s being used as a consonant. If the \( \text{ bod } \) (\text{waaw}\) doesn’t have a vowel, it’s being used to represent a long \text{u} vowel on whatever consonant it’s following.

You write the Independent \( \text{ bod } \) (\text{waaw}\) like a large comma with a space inside. The Final Connected \( \text{ bod } \) (\text{waaw}\) forms the same shape. Table 3-2 shows the two shapes of the \( \text{ bod } \) (\text{waaw}\) as you will see them in the book and written by hand.

<table>

<td>(\text{nuur; light})</td>
<td></td>
</tr>
</tbody>
</table>

\( \text{ dal } \) (\text{daal}\) and \( \text{ dal } \) (\text{dhaal}\)

The \( \text{ dal } \) (\text{daal}\) and \( \text{ dal } \) (\text{dhaal}\) are formed with the same shape. The only difference is that the \( \text{ dal } \) (\text{dhaal}\) has a dot drawn above the letter and the \( \text{ dal } \) (\text{daal}\) doesn’t. The form is written like a 45-degree angle pointing left.

\( \text{ dal } \) (\text{daal}\)

The \( \text{ dal } \) (\text{daal}\), which is transliterated in this book as \text{d}, represents the same sound as the English \text{d} as in \text{door}. See Table 3-3 for the two shapes of the \( \text{ dal } \) (\text{daal}\) as you will see them in the book and written by hand.

<td>ذ</td>
<td>ذﹶﺫﹶﺫﹸﺩ</td>
<td>(ladhiidh; tasty)</td>
</tr>
</tbody>
</table>

ٍٍٍٍ (raa’) and ٍٍٍٍ (zaay)

The ٍٍٍٍ (raa’) and ٍٍٍٍ (zaay) are written with the same shape. The one difference is that the ٍٍٍٍ (zaay) has a dot placed above it, and the ٍٍٍٍ (raa’) doesn’t. The form is drawn as a curved line pointing to the left and dropping a bit below the line of writing.

ٍٍٍٍ (raa’)

The ٍٍٍٍ (raa’) represents a trilled r sound (like Spanish perro, meaning dog). ٍٍٍٍ (raa’) is transliterated as r in this book. Refer to Table 3-5 for the two shapes of the letter as you will see them in the book and written by hand.

<table>
<thead>
<tr>

ناء مربوطة (taa’ marbuuTa)

The ناء مربوطة (taa’ marbuuTa) is a form that occurs only as the last letter of words, which are almost always feminine. You pronounce it as a final a. It’s transliterated in this book as a. As an Independent letter, the ناء مربوطة (taa’ marbuuTa) is written as a small circle with two dots directly above it. In the Final Connected form, it looks like a small raised oval shape with two dots directly above it. See Table 3-7 for the two shapes of the ناء مربوطة (taa’ marbuuTa) as you will see them in the book and written by hand.

Table 3-7

</tbody>
</table>
Taking a Look at Connectors

The majority of Arabic letters can connect on both their right and left sides. These are called **connectors**. They have four different shapes depending on their positions relative to other letters.

َبَاء (baa'), َتَاء (taa'), َثَاء (thaa'), َنَون (nuun), and َيَاء (yaa')

The letters َبَاء (baa'), َتَاء (taa'), َثَاء (thaa'), َنَون (nuun), and َيَاء (yaa') are written with the same shapes. The only differences are that َبَاء (baa') is written with a single dot under the shape, َتَاء (taa') is written with two dots above, َثَاء (thaa') is written with three dots above, َنَون (nuun) is written with a single dot above, and َيَاء (yaa') rounds out the series with two dots below.

You write the Independent form like a bowl. The Initial Connected form is like a small comma that connects to the next letter. The Medial form is like a single wave between the letters on each side of the letter. The Final Connected form is like the Independent form, just connected with the letter preceding it.

َبَاء (baa')

The َبَاء (baa') , which is transliterated in this book as b, represents the b as in the English word bakery.

Table 3-9 shows the four shapes of the َبَاء (baa') as you will see them in the book and written by hand.

<table>
<thead>
<tr>
<th>Location</th>

</tr>
</tbody>
</table>

The نون (nuun), which is transliterated in this book as n, represents the n as in the English word new. You write the Independent and Final Connected نون (nuun) like a bowl — but a bit deeper in shape than the باء (baa’), تاء (taa’), and تاء (thaa’). Refer to Table 3-12 for the four shapes of the نون (nuun) as you will see them in the book and written by hand.
### Table 3-12  Shapes of نون (nuun)

<td></td>
</tr>
<tr>
<td>F.C.</td>
<td>ﺔِن</td>
<td>ﺔَﻠْﻨَآنْ('a3lana; he announced)</td>
<td></td>
</tr>
</tbody>
</table>

### (yaa’)

The (yaa’), which is transliterated in this book as й, can represent two sounds in Arabic. As a consonant, it’s the same as the й in the English word yes. However, it also can be used to signify the long й vowel (transliterated in this book as ii). There are two ways to know when the (yaa’) is being used as a consonant. If you see a vowel symbol above or below the (yaa’), it represents the consonantal sound й. (You can explore vowels in the final section of this chapter.) If the (yaa’) is followed by a long vowel — written with an 'اَلْﻴِٰفِ (alif yaa’), or (waaw) — it’s also being used as a consonant. If the (yaa’) doesn’t have a vowel, it’s being used to represent a long й vowel on whatever consonant it’s following.

You write the Independent (yaa’) like an s shape, which is identical in form to the ‘اَلْﻴِٰفِ مَكْسُوْرَةَ (alif maksuura). The Initial Connected and Medial forms are identical in shape to the other letters in this section, except that the (yaa’) has two dots below the letter. The Final Connected form of the (yaa’) is like the Independent form. Table 3-13 shows the four shapes of the (yaa’) as you will see them in the book and written by hand.

### Table 3-13  Shapes of ياء (yaa’)

<td></td>
</tr>
</tbody>
</table>
(jiim), حاء (Haa'), and خاء (khaa')

The جيم (jiim), حاء (Haa'), and خاء (khaa') are written with the same form. The only differences are that the جيم (jiim) has one dot below, the حاء (Haa') has no dot at all, and the خاء (khaa') has one dot above.

You write the Independent form like a sharp angle with a hook below. The Initial Connected and Medial forms have the same sharp angle, but no hook. The Final Connected form is like the Independent form, but it’s connected to the letter preceding it.

The جيم (jiim), transliterated in this book as j, represents the same sound as j in the English word jam. Check out Table 3-14 for the four shapes of the جيم (jiim) as you will see them in the book and written by hand.

<table>
<thead>
<tr>
<th>Location</th>
<th>Font</th>
<th>Handwritten</th>

<td>ﺧ</td>
<td>ﻲ</td>
<td>ﻲ</td>
</tr>
</tbody>
</table>

**siin** and **shiin**

**Siin** (siin) and **shiin** (shiin) are written with the same shape. The only difference is that **shiin** (shiin) has three dots above it, and **siin** (siin) has none. The Independent form is written with two small hooks, followed by a larger hook. The Initial Connected form keeps the two small hooks and connects to the following letter. The Medial form has the two hooks connected on both sides. The Final Connected form is like the Independent form except that it’s connected to the preceding letter.

**Siin**

The **siin** (siin), which is transliterated in this book as **s**, is the same sound as the **s** in the English word **soup**. See Table 3-17 for the four shapes of the **siin** (siin) as you will see them in the book and written by hand.

<table>
<thead>
<tr>

</table>

ﻋٍ (3ayn) and ﻔ (ghayn)

ﻋٍ (3ayn) and ﻔ (ghayn) are written with the same shape. The only difference is that ﻔ (ghayn) has one dot above it, and ﻋٍ (3ayn) has none. The Independent form is written like the English letter c, with a hook. The Initial Connected form is the same as the Independent form except that it doesn’t have the hook, and it connects to the following letter. The Medial form is like an inverted filled-in triangle, connected on both sides. The Final Connected form is written like the Medial form except that it has a final hook.

ﻋٍ (3ayn)

The ﻋٍ (3ayn) has no correspondence in English. It’s produced by tightening the back of the throat and then speaking a vowel through it. This letter is transliterated in this book as 3. To see the four shapes of the ﻋٍ (3ayn) as you will see them in the book and written by hand, check out Table 3-23.

</tbody>
</table>

فَاء (faa’) and قَاف (qaaf)

فَاء (faa’) and قَاف (qaaf) are written with the same shape. The only difference is that فَاء (faa’) has one dot above it, and قَاف (qaaf) has two. The Independent form is a small circle (written clockwise) with a hook. The Initial Connected form is the same as the Independent form except that it doesn’t have the hook, and it connects to the following letter. The Medial form is written as a clockwise circle, connected on both sides. The Final Connected form is a circle with a final hook. The hook of the فَاء (faa’) stays on the line of writing, but the hook of the قَاف (qaaf) drops below.

فَاء (faa’)

The فَاء (faa’), which is transliterated in this book as f, is the same sound as the f in the English word fortune. To see the four shapes of the فَاء (faa’) as you will see them in the book and written by hand, refer to Table 3-25.

<table>

Chapter 3: The Write Stuff: How to Read and Write the Arabic Alphabet

قاف (qaaf)

The قاف (qaaf) has no correspondence in English. It’s like a k sound, but it’s pronounced at the back of the throat, as if you were cawing like a crow. The letter is transliterated in this book as q. Table 3-26 shows the four shapes of the قاف (qaaf) as you will see them in the book and written by hand.

Table 3-26 Shapes of قاف (qaaf)

</tbody>
</table>

كاف (kaaf)

The كاف (kaaf), which is transliterated in this book as k, is the same sound as the English k in kind. The كاف (kaaf) has distinctly different shapes depending on its position. As an Independent letter, it’s a right angle facing left with a symbol like an s written alongside it. As an Initial Connected or Medial letter, it’s like a sharp angle facing rightward. The Final Connected form is like the Independent form except that it’s connected to the preceding letter. See Table 3-27 for the four shapes of the كاف (kaaf) as you will see them in the book and written by hand.

Part I: Polishing Your Arabic Skills

(لام) (laam)

The لام (laam) is the same sound as the l in the English word loaf. The letter is transliterated as l.

Be careful not to mix the لام (laam) up with the ألف (alif); both are written as a straight vertical line, so it’s easy to do. The way to distinguish the ألف (alif) from the لام (laam) is to remember that the لام (laam) is a connector. So, if you see a straight line that connects with the next letter, it’s a لام (laam). If it doesn’t connect with the next letter, you know it’s an ألف (alif). Additionally, the لام (laam) has a hook on the Independent form and the Final Connected form.

To see the four shapes of the لام (laam) as you will see them in the book and written by hand, refer to Table 3-28.

(ميم) (miim)

The ميم (miim) is the same sound as the m in the English word meat. It’s transliterated in this book as m.

Be careful not to mix the ميم (miim) up with the فاء (faa’) and the قاف (qaaf), since they’re all essentially small circles. There are two ways to distinguish the ميم (miim) from the فاء (faa’) and the قاف (qaaf). Most importantly, the ميم (miim) has no dots, and the others each have some. Also, the ميم (miim) is written counterclockwise.

The Independent and Final Connected forms of the ميم (miim) have tails that drop below the line of writing.

Table 3-29 shows the four shapes of the ميم (miim) as you will see them in the book and written by hand.
Chapter 3: The Write Stuff: How to Read and Write the Arabic Alphabet

Table 3-29 Shapes of ﻣﻴﻢ (miim)

<table>
<thead>
<tr>

</tbody>
</table>

The ﺘَم (‘alif), ﻓَم (laam), ﻫاء (haa’), حاء (Haa’), ﻫاء (kaa’), ﻫاء (Haa’), ﻫاء (khaa’), ﻫاء (kaa’), ﻫاء (Haa’), ﻫاء (khaa’), ﻫاء (Haa’), ﻫاء (khaa’), and ﻫاء (Haa’), ﻫاء (khaa’) can join together in peculiar ways. When these letters connect to certain others, they take on slightly different shapes than when they connect with any other letter. The technical name for these atypically connected forms is **ligature**. For instance, you’ll notice that the ﺘَم (‘alif) leans more to the left than normal when following a ﻓَم (laam). Here’s an example: ﻻ (laa; no/not).

Similarly, when the preposition ل (li-) is followed by a noun with the ﺘَم (‘alif laam), you don’t write the ﺘَم (‘alif). This allows you to avoid writing three straight lines in a row. Here’s an example:

ل ﻣُرِّج (li-ar-rajul) becomes لُرِّج (li-r-rajuli; to the man)

In some Arabic fonts, when a ﻫاء (haa’) follows a ﻓَم (laam), the ﻫاء (haa’) may be written so that it’s sticking a bit to the right of the ﻓَم (laam).

Finally, in some Arabic fonts, when a حاء (Haa’), حاء (Haa’), حاء (kaa’), حاء (Haa’), حاء (khaa’), or حاء (Haa’), حاء (khaa’), حاء (Haa’), حاء (khaa’) follows a ﻓَم (laam), the ﻓَم (laam) may be written sticking out of the middle of the following letter.

**haa’**

The ﻫاء (haa’), which is transliterated in this book as h, is the same sound as the h in the English word *hot dog*. The ﻫاء (haa’) has distinct shapes depending on its position. For example, the Independent form is a small circle. The Initial Connected form is a larger circle with the smaller circle inside it, which is then connected to the following letter. The Medial form is written as a figure eight above and below the line of writing. The Final Connected form is like a raised oval connected to the preceding letter. Refer to Table 3-30 for the four shapes of the ﻫاء (haa’) as you will see them in the book and written by hand.
Part I: Polishing Your Arabic Skills

</tbody>
</table>

هاء (haa‘)

The هاء (haa‘), which is transliterated in this book as ‘, represents the glottal stop. The glottal stop is that slight catch of air before actually releasing a vowel. For instance, think of how some people pronounce the word Latin (sort of like La‘in). In Arabic, the هاء (haa‘) is written as a tiny symbol like a backwards z.

The هاء (haa‘) can be written above or below three letters: the ﯽ (alif), the ﯽ (waaw), or the ﯽ (yaa‘). These letters are called the seats of the هاء (haa‘). It may also, in some cases, be written all on its own without one of the seats.

There’s a complicated set of rules governing where you place the هاء (haa‘). Instead of memorizing the dozens of rules for it, you’ll instead intuitively pick up the rules by practicing your Arabic reading. The beauty of having full transliteration in this book is that you can always see how the Arabic is pronounced.

Here are several examples showing you the possible ways you may see the هاء (haa‘):

- أكلة (‘akla; food)
- أم (umm; mother)
- إمرأة (‘imra’a; woman)
- أسئلة (‘as’ila; questions)
- سؤال (su’aal; question)
- أصدقاء (aSdiqaa‘; friends)

Examining Vowels and Special Characters

Arabic was originally a purely consonantal alphabet. In other words, there were no vowels at all. As time went on, especially as people were learning Arabic as a second language, it was necessary to invent a system for telling readers what vowels a word
had and when a consonant had no vowels or was doubled. Because this secondary system was invented later, it was tacked onto the alphabet as a system of symbols that you write above and below the existing letters. In this section, I introduce you to these important symbols.

\( \text{fatHa} \)

The \( \text{fatHa} \) represents a short \( a \) vowel. It’s written as a short dash above the letter. In other words, if you write a \( \text{fatHa} \) above a \( \text{taa‘} \), the combination is written \( \text{ta-} \). And if you write a \( \text{fatHa} \) above a \( \text{kaaf} \), you produce \( \text{ka-} \).

Here are examples of words with only \( \text{fatHa} \) to help you spot how they produce the short \( a \) vowel within the words. In each word, you see a \( \text{fatHa} \) written above the first consonant:

-  \( \text{kalb; dog} \)
-  \( \text{rabb; Lord} \)
-  \( \text{damm; blood} \)

\( \text{kasra} \)

The \( \text{kasra} \) represents a short \( i \) vowel. It’s usually written as a short dash below the letter. See the section on the \( \text{shadda} \) for an exception to this rule. In other words, if you write a \( \text{kasra} \) below a \( \text{taa‘} \), the combination is written \( \text{ti-} \). If you write a \( \text{kasra} \) below a \( \text{kaaf} \), you produce \( \text{ki-} \).

Here are examples of words with only \( \text{kasra} \) to help you spot how they produce the short \( i \) vowel within the words. In each word, you see a \( \text{kasra} \) written below the first consonant:

-  \( \text{Hilm; dream} \)
-  \( \text{miSr; Egypt} \)
-  \( \text{Tifl; child} \)

\( \text{Damma} \)

The \( \text{Damma} \) represents a short \( u \) vowel. It’s a tiny \( \text{waaw} \) above the letter. If you write a \( \text{Damma} \) above a \( \text{taa‘} \), the combination is written \( \text{tu-} \). If you write a \( \text{Damma} \) above a \( \text{kaaf} \), you produce \( \text{ku-} \).
Here are examples of words with only ُ(Damma) to help you spot how they produce the short u vowel within the words. In each word, you see a ُ(Damma) written below the first consonant:

- ُقُرْبٌ (qurb; near)
- ُفُرْنٌ (furn; oven)
- ُأُمْ (‘umm; mother)

ُ (sukuun)

The ُ(sukuun) represents the absence of a vowel. It’s a tiny circle written above the letter. Notice how in the following examples, the first consonant is followed by a vowel, but the second consonant isn’t. In each case, you spot a ُ(sukuun) written above the second consonant. This tells you that the second consonant isn’t followed by a vowel and closes the syllable with the first consonant and the vowel between them:

- ُجُمْلَةٌ (jumla; sentence)
- ُمُكْتَبٌ (maktab; office)
- ُدَرْسٌ (dars; lesson)

ـ (shadda)

The ـ(shadda) represents the doubling of a consonant. It’s a symbol similar to a tiny w written above the letter. You can then write a vowel over the ـ(shadda) to indicate that the doubled consonant has a vowel that follows it.

Notice how in the following examples, the first consonant has a vowel, but the second consonant has a ـ(shadda) and a vowel. In each case, you spot a ـ(shadda) and a vowel written above the second consonant:

- ـمَكْا (makka; Mecca)
- ـحَتْا (Hattaa; until)
- ـقِسَّةٌ (qiSSa; story)

When the ـ(shadda) is followed by the vowel ـ(kasra), people usually write the ـ(kasra) below the ـ(shadda) but over the consonant itself (even though in every other situation, the ـ(kasra) is below the consonant). In other words, a short dash above a ـ(shadda) represents the vowel ـ(fatHa). A short dash below the ـ(shadda) but above the consonant represents the vowel ـ(kasra). The font in this book universally represents the ـ(kasra) between the ـ(shadda) and the consonant. Note how in these examples, the ـ(kasra) is above the consonant but below the ـ(shadda):

- ـيُدَرْسَ (yudarrisu; he teaches)
- ـتُقِبّلُ (tuqabbiliina; you kiss)
Arabic doesn’t permit the writing of two \( \text{ﺍ} \) (‘alifs) side by side. Something about too many long lines in a row just wasn’t seen as attractive. Whenever circumstances of the language produce two \( \text{ﺍ} \) (‘alifs) at the beginning of a word, you instead write a single \( \text{ﺍ} \) (‘alif) with a \( \text{ﺁ} \) (madda) over it. A \( \text{ﺁ} \) (madda) is a wavy line you write over an \( \text{ﺍ} \) (‘alif) to indicate the sound ‘aa — that is, an initial glottal stop followed by a long a vowel.

Here are some examples of words with the \( \text{ﺁ} \) (madda):

- ﷑ (‘aal; tool)
- ﷑ (‘asif; sorry)

The \( \text{ﺁ} \) (waSla) is an elongated oval written over an \( \text{ﺍ} \) (‘alif) to indicate that the \( \text{ﺍ} \) (‘alif) has lost its vowel. The short a vowel over the \( \text{ﺍ} \) (‘alif) in the \( \text{ﺍ} \) (‘alif laam) ordinarily disappears whenever there’s a preceding vowel. Because this vowel disappearance is expected, people don’t bother writing the \( \text{ﺁ} \) (waSla) at all. I don’t use the \( \text{ﺁ} \) (waSla) in this book. But just so you know what it is, here’s an example of a sentence with a \( \text{ﺁ} \) (waSla):

- دَهَبَ الْرَجُلُ إِلَىَ دِبَيَّ. (dhahaba-r-rajulu 'ilaa dubayya. The man went to Dubai.)
Part II
Becoming a Master at Using Nouns

The 5th Wave  By Rich Tennant

“If you’re having trouble with the irregular plural of Arabic nouns, try using flash cards and taking more fiber.”
In this part . . .

This is the part where you encounter the three cases of the Arabic noun. This is crucial information as you move officially into intermediate territory. But wait, there’s more — literally more as you discover the ways Arabic takes the noun and describes the plural of it. In this part, you also experience the adjectives necessary to liven things up a bit. Then I introduce you to the ways to compare things — and label one as the best.

Finding out how to make one noun possess another puts you in the territory of the infamous 'iDaafa construction. In this part, the 'iDaafa becomes your best friend. Finally, in this part, I explain how to add relative clauses to your writing.
Chapter 4

Making Your Case with the Three Cases of the Arabic Noun

In This Chapter

- Discovering the use of nominative case for subjects
- Forming the accusative case for direct objects
- Using the genitive case after prepositions and in an ‘iDaafa

If you’re like most people, you’ve never had to worry about case endings before — even in English. English nouns are the same whether they’re the subject, the object, or the word after a preposition. But English pronouns do preserve cases in some instances. “Him” can’t be a subject and “She” can’t be an object, after all. Unlike English, Arabic relies fairly heavily on cases.

The good news for you is that the situation isn’t nearly as bad as it could be. Latin has five cases, and depending on which of the five declensions of nouns they go on, there are dozens of different endings.

Arabic has only three cases (nominative, accusative, and genitive), and with very few exceptions, the ending is the same regardless of the gender and number of the noun. In this chapter, I show you the three case endings and how to produce them for the different nouns in an Arabic sentence.

Getting to the Point with the Nominative Case

The term nominative refers to nouns that are the subject of a sentence. In English grammar, there are several pronouns that have a separate nominative form. For example, in these sentences, “I” and “She” are nominative:

I study Arabic.

She is a fine doctor.
Any other form of the pronoun would create a grammatically incorrect sentence, such as this one (my apologies to Tarzan):

Me study Arabic.

Unlike English, Arabic has separate nominative forms of all nouns, not just pronouns.

The primary use of the nominative is as the subject of a sentence. Nominative is used in *equational sentences*, where the verb *to be* will be unstated. The nominative case is also used in verbal sentences. (See Chapter 2 for more on equational and verbal sentences.) Here’s an example of an equational sentence and a verbal sentence with subjects in the nominative case:

ﺍﻟﻤﹶﻄﹾﺒﹶﺦﹺ ﻓﻲ ﺍﻟﺘﹾﺒﺎﺥ ﴿aT-Tabbaakhu fii-l-maTbakhi. The cook is in the kitchen.﴾

ﻕﹾﺭﹶﺃ ﺍﻟﹸمﹸﺩﺭﱢﺱﹸ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹸﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱﹺ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺱِ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱡﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢﺽﹶ ﺍﻟﹸمﹶﺩﺭﱢ➘ ﺍﻟﹸمﹶﺩﺭﱢ⟨

In the following sections, I show you the simple nominative and the indefinite nominative forms.

**Keeping it simple: Simple nominative form**

The *simple nominative* form is the form that’s used with definite nouns. To produce the simple nominative form, you simply place a ﹴ (Damma) on the last consonant of the noun. The ﹴ (Damma) is the tiny ﹸ (waaw) shaped symbol that indicates a short u vowel. If you’re uncertain about the writing of a ﹴ (Damma), you may want to review Chapter 3, where I cover all the consonants and vowels in written Arabic. Here are examples of a few definite nouns with a ﹴ (Damma) added to the last consonant:

- ﺍﻟﺒﹶﻴﹾﺖﹸ (al-baytu; the house)
- ﺍﻟﺮﹾﺟﺎﻝﹸ (ar-rijaalu; the men)
- ﺍﻻﹸﺳﹾﺘﺎﺫﺓ (al-ustaadha; the professor)
- ﺍﻻﹸﺳﹾﺘﺎﺫﺓﹸ (al-ustaadhatu; the professor)

Ordinarily, the ﹶ ﺃ (taa’ marbuuTa) is pronounced as the vowel a at the end of a word. But when you put the simple nominative ending u on the ﹶ ﺃ (taa’ marbuuTa), you pronounce the ﹶ ﺃ (taa’ marbuuTa) like a taa’ (a t sound). Here’s an example of a noun with ﹶ ﺃ (taa’ marbuuTa) without the simple nominative, followed by the same word with the additional ﹴ (Damma). Note how the t sound is inserted:

- ﺍﻵﹸﺳﹾﺘﺎﺫﺓ (al-ustaadha; the professor)
- ﺍﻵﹸﺳﹾﺘﺎﺫﺓﹸ (al-ustaadhatu; the professor)
Adding an n for the indefinite nominative form

When a noun is indefinite, you still express the nominative case with a (Damma), but you add a final n in the pronunciation. However, this particular sound isn’t represented with the letter نون (nuun). Instead, it’s represented with a special form of the vowel. The Arabic name for such a final vowel closed with an n is تَنْوَيْن (tanwiin). Western grammarians have coined the term nunation to refer to this addition of a final n sound to the indefinite forms in Arabic. To write the indefinite nominative ending, you use a unique shape, which resembles a Damma with a hook on it: ﹹ. Here’s an example of that indefinite nominative ending in action: كتاب (kitaabun; a book).

In handwritten forms, sometimes you may see two Dammas simply drawn next to each other or inverted beside each other. No matter which form you see, these Dammas have the rather descriptive name Dammatayn (which literally means “two Dammas”). The Dammatayn looks like this: ﹹ.

When you write equational sentences with all the vowels expressed, you use the nominative for both parts of the sentence. The subject can be definite, but the predicate is indefinite. Here are two equational sentences with indefinite predicates:

 السيارة جيدة.

(as-sayyaaratu jadiidatun. The car is new.)

الرئيس مسرور.

(ar-ra’isusu masruurun. The president is happy.)

An indefinite noun also can be the subject in a verbal sentence. Here’s an example:

سيسرف مدير على هذا القسم.

(sayushrifu mudiirun 3alaa-haadha-l-qismi. A director will oversee this department.)

In this practice set, I give you a number of Arabic sentences. Rewrite the sentence (for further writing practice) but add to the sentence the proper form of the nominative (Damma or the Dammatayn) wherever it should be found. Note that nominal sentences require you to fill in two nominatives.

Q. الصديقة لطيفة. (aS-Sadiiqa laTiifa.)

A. الصديقة لطيفة. (aS-Sasiiqatu laTiifatun. The girlfriend is nice.)

1. الكتاب مهم. (al-kitaab muhimm.)

2. أرسل العامل الصندوق إلى الساقنة. (’arsala al-3aamil aS-Sunduuqa ’ilaa-sh-shaaHinati.)
Making a Statement with the Accusative Case

The *accusative case* is the most poorly named of the cases because it sounds like it committed a crime or something. Actually, though, it’s not criminal at all. It’s mostly used to indicate the direct object in a sentence. Whoever said this case was difficult was falsely accusing it.

The English language preserves a few separate accusative forms for pronouns. Consider these examples:

* I love her.
  * She hates him.

In Arabic, however, separate pronouns are all nominative. When you need to put a pronoun in a different case, it will always be a suffix on either a verb or a preposition.
In this section, I show you the simple accusative, indefinite accusative, and accusative as predicate forms.

**Forming the simple accusative form with fatHa**

In Arabic, the *simple accusative* is used with definite nouns. This case is formed by adding a ﹶ(fatHa) to the final consonant of a word. Here are three definite nouns with the ﹶ(fatHa) indicating the simple accusative case:

- ﺍﻟﺒﹶﻴﹾﺖﹶ (al-bayta; the house)
- ﺍﻟْﻮَﺳﹾﺎﺩﹶﺓﹶ (al-ustaadhata; the professor)
- ﺍﻟﺮﱢﺟﺎﻟﹶﺍ (ar-rijaala; the men)

Nouns with a feminine sound plural ending, however, form their accusative with a ﹴ(kasra). For example, consider this feminine plural noun: ﺍﻟﻄﹼﺎﻭﹺﻼﺕﹺ (aT-Taawilaati; the tables).

**Using the indefinite accusative**

The *indefinite accusative* ending is used to express the accusative case of an indefinite noun. Like the nominative, the indefinite accusative adds a final ﺛﻮﻥ (nuun) sound after the ﹶ(fatHa). This is indicated with a doubled fatHa, which is called fatHatayn. The fatHatayn looks like this: ﹶ.”

When the fatHatayn is added to a singular feminine noun, there’s no other change in spelling. You can see in these examples that the fatHatayn symbol is placed directly above the ﹶ (taa’ marbuutTa):

- ﻋﹶﺪِﻳﻘﺔﹶ (Hadiiqatan; a park)
- الزﹺﻳﺎﺭﺓﹶ (ziyaaratan; a visit)

Because masculine nouns don’t have distinct and recognizable endings like the feminine nouns, Arabic uses the convention of putting the indefinite accusative ending on a masculine noun after first adding a dummy ﺐﹶ (alif) to carry the symbol. Here are two masculine nouns in the indefinite accusative:

- ﻣﹶﻜﺎﺑﱠﺍ (kitaaban; a book)
- ﻥﺍﺭﹶﺍ (naaran; a fire)

**Dealing with the accusative as predicate**

As you probably know, an equational sentence in the present uses two nominatives. (See the earlier section “Getting to the Point with the Nominative Case” for more details.) But a special class of verbs that requires an accusative predicate exists in Arabic. Here’s an example of an equational sentence:
Part II: Becoming a Master at Using Nouns

The weather is nice today.

(al-jawwu laTiifun al-yawma. The weather is nice today.)

Remember that you don’t have to state the verb to be in Arabic. It’s just understood.

You can use the verb (kaana; was) to create a subject-predicate sentence referring to the past tense. But (kaana) requires a predicate in the accusative case. Notice in the following example how the subject of (kaana) is in the nominative, but the predicate is in accusative:

(kaana-l-jawwu laTiifan 'amsi 'ayDan. Yesterday the weather was also nice.)

The predicate can also be another noun, as in this example:

(kaana ar-rajulu Tabbaakhan jayyidan. The man was a good cook.)

The class of verbs that takes the accusative predicate is known by the quaint name, (kaana wa'akhawaatuhaa; kaana and her sisters). Some words in this group of verbs occur quite rarely. Here are examples of the most important ones that you (as an intermediate student) should know:

- لِيَسَ (laysa; [there is] not)
- أَصْبَحَ (aSbaHa; to become)
- مَا يَزَالُ (maa yazaalu; yet, still)
- لَا يَعْودُ (laa ya3uudu; no longer, anymore)

Here are a few important points to remember about some of these verbs:

- لِيَسَ (laysa) allows you to negate a nominal sentence in the present. (To see all the forms of laysa, check out Chapter 17 of this book.) Here are a few examples:

  - (lastu jaa'i3an al-'aana. I'm not hungry now.)
  - لِيَسَ مُسْتَبْعَدًا لِلْإِمْتِيْحَانِ (laysa musta3iddan lil'imtiHaani. He isn’t ready for the test.)

- You can use (maa yazaalu) by itself to complement an equational sentence. Check out this example:

  - (maa tazaalu Haziinatan 3alaa-l-mushkila. She’s still sad about the problem.)

- (maa yazaalu) can also be used as an auxiliary to give the meaning still to a following verb. Consider this example:

  - (maa yazaalu yadh-habu 'ilaa-l-Haflati? Is he still going to the party?)
Chapter 4: Making Your Case with the Three Cases of the Arabic Noun

In the following exercise, I give you a number of Arabic sentences that require, depending on the verb, a nominative or accusative indefinite as the predicate adjective or noun. In brackets is the English equivalent of the Arabic word you need (which you can find in the dictionary). Write in the blank the correct form of the Arabic word or words.

Q. [sure]  
   ﺲﹶﺮﹶٌ ﺎﹶﹶﻴﹶﹶ ﴿ٌ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ 3an ra'yika.

A. (kuntu muta'akkidan 3an ra'yika.)

11. [happy]  
   ﺗﹶﹶ  ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻔﹶﹶ ﻣﱢ ﻤﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ 3an ra'yika.

12. [optimistic]  
   ﻣﺎ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻓﹶﹶ ﻔﹶﹶ ﻣﱢ ﻤﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻔﹶﹶ ﻔﹶﹶ ﻣﱢ ﻤﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ 3an ra'yika.

13. [a cheap restaurant]  
   ﻣﺎ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻓﹶﹶ ﻕﹶﹶ ﺟﹶﹶ ﻕﹶﹶ اﹶﹶ لﹶﹶ 3an ra'yika.

14. [preferable]  
   ﺗﹶﹶ  ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻩﹶﹶ ﺎﹶﹶ ﻣﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻓﹶﹶ ﻩﹶﹶ ﺎﹶﹶ ﻣﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ ﴿ٌ ﺎﹶﹶ ﻔﹶﹶ ﻔﹶﹶ ﻣﱢ ﻤﹶﹶأﹶﹶﻛﹶﹶدﹶﹶا ﻓﹶﹶ ﺎﹶﹶ ﻖﹶﹶﻨﹶﹶ ﺖﹶﹶ 3an ra'yika.

Writing All the Rest with the Genitive Case

The genitive case is generally used everywhere the nominative and accusative cases aren’t used. In this section, I show you the simple and indefinite forms of the genitive and offer several examples of how to use the genitive.

Working with simple genitive form

The simple genitive form is used whenever a definite noun follows a preposition or follows the first member of an 'iDaafa (Refer to Chapter 7 for more on 'iDaafas.) You form this case in Arabic by adding a kasra — the short i vowel — to the final consonant of the noun. Like the nominative and accusative cases, you use the same ending regardless of gender and number. The following are two definite nouns in the genitive:

- ﺲﹶ ﻣﹶ ﻖﹶ ﺲﹶ (al-kitaabi; the book)
- ﺲﹶ ﻣﹶ َـ (ar-rajuli; the man)

Understanding indefinite genitive

The indefinite genitive ending is used to express the genitive case of an indefinite noun. Like the nominative and accusative, the indefinite genitive adds a final ﺱﹶ at the end of the noun.
(nuun) sound after the ﹶ(kasra). This is indicated with a doubled kasra (called kasratayn). The kasratayn looks like this: ﹶ. Take a look at a few examples:

كتاب (kitaabin; a book)
رجل (rajulin; a man)

Discovering the uses of the genitive case

You use the genitive case in two important situations: following the head of an 'iDaafa and following a preposition. I explain each situation in the following sections.

Following the head of an 'iDaafa

You use the genitive case for all the words that follow the head of an 'iDaafa — no matter how many there are. In the following two examples, you see how the second and third words in an 'iDaafa are in the genitive case:

ـ السيارة الـرجـل (sayyaaratu ar-rajuli; the man’s car)
ـ السيارة صديقـ الرجل (sayyaaratu Sadiqi-r-rajuli; the man’s friend’s car)

Following a preposition

You use the genitive whenever a noun directly follows a preposition. Here are examples with several different prepositions. Notice the use of the genitive after each one:

ـ مع الـرجـل (ma3a-r-rajuli; with the man)
ـ إلى الجـدار (ilaa-l-Hadiiqati; to the park)
ـ من البـيت (mina-l-bayti; from the house)
ـ لـصديق (ilSadiiqin; for a friend)

A noun can follow a preposition but also can be the head of an 'iDaafa. In the following example, I underline a word governed by a preposition and that starts out a long 'iDaafa:

ـ وجدت آلتي التصوير تحت مقعـد السيارة بنـت خالتي (wajattu 'aalatii taSwiiri maq3adi sayyaarati binti khaalatii. I found my camera under the seat of my cousin’s car.)

When a noun in the genitive has possessive pronoun suffixes, the suffixes ﹶ(hu) and ﹶ(hum) change their vowels to i (written with a ﹶ[kasra]) to match the vowel of the genitive ending. Linguists call this a euphonic change (meaning it just sounds better). Here are a few examples of nouns in the genitive with euphonically changed possessive pronoun suffixes:

ـ مع أمي (ma3a ummihi; with this mother)
ـ في بيتهم (fii baythim; in their house)
Your friend is about to send this follow-up to a phone interview, but his potential employer won’t be very impressed if he spots a bunch of grammatical errors! Help your friend out by underlining the words that are incorrect. Then write the proper form in the spaces provided. **Note:** Your friend has made eight mistakes. (So he obviously really needs your help!)

| 15. |                                                                                           |
| 16. |                                                                                           |
| 17. |                                                                                           |
| 18. |                                                                                           |
| 19. |                                                                                           |

Part II: Becoming a Master at Using Nouns

Answer Key

1. (al-kitaabu muhimmun. The book is interesting.)
2. (’arsala al-3aamilu aS-Sunduqa ’ilaa-sh-shaaHinati. The worker sent the box to the truck.)
3. (maktabatu al-jaami3ati kabiiratun. The university library is big.)
4. (dhaalikaa-l-waladu muDHiqun. That boy is funny.)
5. (’aHDara aT-Taalibu aT-Ta3aama hunaa. The student brought the food here.)
6. (al-muHarriru mashghuulun ghadan. The editor is busy tomorrow.)
7. (raja3a as-safiiru mina-r-riHlati. The ambassador returned from the trip.)
8. (al-mu'allifu raa'i3un. The composer is outstanding.)
9. (faazat al-mughanniyatu bi-jaa'izatin. The singer won an award.)
10. (zawjatii jamiilatun. My wife is beautiful.)
11. (masruuratan)
12. (mutafa'ilan)
13. (maT3aman rakhiiSan)
14. (mufaDDalun)
(as-sayyid brawn,

‘ashkurukum 3alaa-l-muqaabalta bil’haatifi al-yawma. ‘anaa masruuru lil-furSati. lastu muta’akkidun ‘idhaa ‘arsaltu lakum 3unwaanu maktabii al-jadiidi. al-’usbu3a al-maaDii ‘aSbaHtu mudiirun fii qisma ‘aakhar fii-sh-sharikati wa-taghayyara makaana maktabii. fa-huwa:

12 shaari3 al-maTaar
ad-dawHa qaTar

min jadiid ‘ashkurukum 3alaa ‘ihtimaamukum bii.

William Smith)

(Mr. Brown,

I thank you for the phone interview today. I am happy for the opportunity. I wasn’t sure if I sent you the address of my new office. Last week I became a director in another department in the company and my office location changed. Here it is:

12 Airport St.
Doha, Qatar

Again, I thank you for your interest in me.

William Smith)
Part II: Becoming a Master at Using Nouns

15 (al-muqaabalati; interview)
Because this word follows the preposition, it should have been genitive.

16 (masruurun; happy)
As the indefinite predicate, this word should have had a Dammatayn.

17 (muta’akkidan; sure)
When this word is used with laysa, it should be in the accusative.

18 (3unwaana; address)
Because this is the object, it should have been in the accusative.

19 (mudiiran; director)
When this word is used with ’aSbaHa, it should be in the accusative.

20 (makaanu; location)
Because this is the subject of the verb, it should be nominative.

21 (qismin; department)
Because this word follows a preposition, it should be genitive.

22 (’ihtimaamikum; your interest)
Because this word follows a preposition, it should be genitive.
Chapter 5

Forming the Plural in Arabic

In This Chapter

► Forming the plural of regular feminine nouns
► Using broken plural patterns to form the masculine plural
► Recognizing and working with irregular plurals
► Putting nouns in the dual

Most languages have relatively simple ways of creating the plural. English, for instance, puts an *s* on the end of almost every noun. Sure, English has a handful of nouns like *child/children* and *goose/geese* that dance to their own tune. But 99 percent of English nouns just add *s* to form the plural. In Arabic, however, well over half of the total nouns form their plural in a way that’s similar to the *goose/geese* situation in English.

Let’s face it: Among world languages, Arabic may have the most irregular and difficult-to-master system when it comes to talking about more than one thing. This system is called the *broken plural*. At times over the years, the system has made me feel like a broken man! One grammarian lists 29 different patterns in use in Classical Arabic; and half of these patterns are still used in Modern Standard Arabic today. Don’t worry, though. In this chapter, I do everything I can to help you see how Arabic plurals work.

You have two options for grasping the forms of the plural in Arabic. I recommend that you pursue both of them at once. First, remember this one key bit of information: You just have to bite the bullet and memorize both the singular and plural of any new vocabulary item you want to acquire. If you make vocabulary cards, it’s a good idea to put both the singular and the plural on the cards. Any good dictionary will give you both forms.

Your second method of attack to grasp plurals in Arabic is what I cover in this chapter. I show you that, in the end, Arabic does have some tendencies of regularity in this otherwise bewildering system. By the end of this chapter, you still won’t be able to take any new noun and infallibly produce the plural. But that’s not your fault. The language just isn’t fully regular. However, what you will be able to do is predict with a high degree of accuracy the plural of several common patterns of nouns. In addition, you’ll discover the more regular system of forming the dual.

English has a single plural ending for almost all nouns, regardless of gender. Arabic has different plural endings for the different genders. So in this chapter, I explain the ins and outs of making both feminine and masculine nouns plural. (If you need a refresher on masculine and feminine nouns, spend some time with Chapter 2.)
Working with Feminine Plural Nouns

The best way to discover the wonderful world of plurals is with the more or less regular class of nouns: feminine nouns. Feminine nouns frequently have the recognizable ꞏ (taa’ marbuuTa) endings. The masculine noun, by contrast, doesn’t have a recognizable ending and will also not have a regular way to form the plural.

Many feminine nouns form the plural easily and regularly. All you have to do to form the regular feminine plural is to take off the ꞏ (taa’ marbuuTa) ending and replace it with a different ending. But in other cases, unfortunately, the plural form will be unpredictable. So when it comes to making feminine nouns plural, you have two different situations: regular plurals and broken plurals. I explain what each of these two methods is and how to form both in the following sections.

Regular plural endings with ꞏ (taa’ marbuuTa)

There are nouns that form their plural by just adding a regular plural ending to the noun or by replacing a singular ending with a plural ending. Arabic grammarians call this regular category the sound plurals. They’re called this because grammarians consider them safe and sound. A more descriptive name for the sound plurals may be to call them suffixed plurals. In the case of feminine nouns, the sound plural is formed by removing the ꞏ (taa’ marbuuTa) and replacing it with the following sound plural ending: ات (aat).

Here are a few examples of how to form the plural of a regular feminine noun with the ꞏ (taa’ marbuuTa) ending:

- ﻣﻴﺎﺭﺓ (sayyara; car) becomes ﻣﻴﺎﺭﺍﺕ (sayyaraat; cars)
- ﻁﺍﻭﹸﻠﺔ (Taawila; table) becomes ﻁﺍﻭﹸﻝﺍﺕ (Taawilaat; tables)
- ﺱﺎﻉﺔ (saa3a; hour) becomes ﺱﺎﻉﺎﺕ (saa3aat; hours)

Regular broken plurals with ꞏ (taa’ marbuuTa)

I wish I could tell you that whenever you see the ꞏ (taa’ marbuuTa) ending, you just replace it with ات (aat) to form the plural of a feminine noun. But, as you probably can guess, it’s a bit more complicated than that. For reasons that no one really knows, early Arabic speakers developed a system of forming plurals in which you don’t add an ending. Instead, you just change the vowels in the word.

Arab grammarians call this phenomenon the broken plural. It’s analogous to English plural formations such as mouse/mice and foot/feet. Languages closely related to Arabic, such as Hebrew and Aramaic, don’t have broken plurals, so it’s something early Arabic speakers developed all on their own. The term broken plural is just a translation of the term that’s used to describe them in Arabic: ﺞﻤﻊ ﺃﺪﻴﻦ (jam3 taksir). Perhaps an Arab grammarian coined this term because they “broke” the regular pattern.
Luckily, there’s a rule of sorts that you can use to predict the plural of certain feminine nouns. When a feminine noun with the ⲓ (taa’ marbuuta) ending has a long i vowel — written with یاء (yaa’) — after the second letter of the root, it usually has a plural on a specific pattern.

However, before I show you that pattern, I need to explain what Arab grammarians mean when they use the term pattern. Because almost every Arabic word has three root consonants in it, grammarians long ago began using the Arabic root فعل (fa3ala; to do) as a convenient model to describe any word pattern. Here’s an example: The noun كلمة (kalima) means word. But that noun also has a shape to it. It has the vowel a after the first consonant, the vowel i after the second, and the ⲓ (taa’ marbuuta) after the third. By inserting the shape of the word kalima into the root فعل (fa3ala), you produce the nonexistent word فعلة (fa3ila). You can then say that كلمة (kalima) is a noun on the pattern of فعلة (fa3ila).

This is a convenient way to reference the various plural forms you see in this book. When I say, for instance, that a certain noun forms its plural on a specific pattern, all you have to do is insert that noun’s three consonants into that pattern. For example, كتاب (kitaab; book) forms its plural on the pattern of فعل (fu3ul). So to produce the word books in Arabic, you replace the consonants in order to produce the word كتب (kutub).

Getting back to feminine nouns with ⲓ (taa’ marbuuta) and a long i vowel after the second consonant, they almost always form their plural on the pattern فعلات (fa3a’il). For example:

جريدة (jariida; newspaper) becomes جرائد (jaraa’id; newspapers)

حقيبة (Haqiiba; suitcase) becomes حقائب (Haqaa’ib; suitcases)

The type of plural any given noun has isn’t a matter of choice or style. Each noun has a set plural you should learn at the same time that you learn the singular. You can discover the correct plural for a noun in the dictionary if you’re uncertain of it.

Some nouns that don’t have the ⲓ (taa’ marbuuta) ending also take the feminine sound plural ending. Check out the following examples:

طلبات (Talab; request) becomes طلبات (Talabaat; requests)

خطابات (khiTaab; speech) becomes خطبات (khiTaabaat; speeches)

In this exercise, I have listed the singular forms of some important feminine nouns. Put them in the correct plural form using the rules I explain in this section. In other words, if you see a long vowel in یاء (yaa’) after the second consonant of the root, you know you should form the plural using the same pattern as جريدة (jariida; newspaper), which is shown earlier in the chapter. Otherwise, you can be sure that you just need to use the regular plural ending of ⲓات (aat). Note: There are, of course, always exceptions in any language. But to help you build confidence, I include only nouns that aren’t exceptions to the rule.
## Memorizing Masculine Plural Nouns

Here’s some potentially bad news: The more common and basic a masculine noun is, the more unpredictable its plural will be. There’s simply no way, based solely on the shape of the singular form, to predict that the plural of رَجُل (rajul; man) would be رَجَال (rijaal; men). Because of this irregularity, you just have to memorize the plural forms. A dictionary can help you determine the plural forms of the words you intend to put to memory.

The broken plural system in Arabic follows tendencies, but no rules work 100 percent of the time. When I tell you that a given word pattern frequently takes a certain plural pattern, there will always be exceptions. Also keep in mind that the particular plural pattern a noun uses is already determined. You can’t choose which of the patterns you want to use. Instead, your task is just to learn what pattern it does follow.

However, do note that a few patterns are somewhat predictable. So, in this section, I show you ten common plural patterns and give you examples of important and useful words that follow each of them. In some cases, you can see that certain forms of singulars have a tendency to follow a given pattern. After you’ve seen the potential patterns of plurals, you’ll have a better chance of correctly guessing that something you run across in Arabic is a plural. And recognizing plurals allows you to succeed in finding the correct singular in a dictionary.

There are other plural patterns than the ten I focus on here. But they’re used for a smaller number of nouns. You quickly reach a point of diminishing returns when you
try to learn every possible plural pattern that Arabic uses. The ten you master in this chapter can equip you to recognize and produce the plurals of the vast majority of Arabic nouns.

To form the plural, you need to know two things. You need to know the three consonants that make up the triliteral root for that word. You also need to know the word pattern that particular noun uses to form its plural. After you know those two things, all you have to do is substitute the consonants in the dummy root of the word pattern (we use the root ﻓُﻌﻞ [f-3-l; to make, do] traditionally) with the three consonants of the word you want to turn into the plural. If you’re unsure of how to do that, I discuss the triliteral root in depth and show you how to find the three consonants in Chapter 2.

**Plural Pattern 1: ﻓُﻌْﺎﻝ (fu33aal)**

**ﻓُﻌْﺎﻝ (fu33aal)** is a regular plural pattern for any noun derived from a Form I participle, which follows the word pattern ﻓﺎﻋﹺﻞ (faa3il). An example of a noun that falls into this category is the word ﻞﹶﻛﹶﰱ (kaatib; writer). As a participle, this word means [someone] writing, and would take the sound plural endings. (A full discussion of the sound plural endings for participles is found in Chapter 18.) But the participle has also transitioned into a noun that means one who writes (that is, a writer). When this word is used as a noun, it doesn’t take the sound plural endings. Instead it forms its plural with Plural Pattern 1. The following are two common examples of plurals made with Pattern 1:

- ﻞﹶﻛﹶ玥 (kaatib; writer) becomes ﻞﹸﻛﹶ玥 (kuttaab; writers)
- ﻌﹶل (3aamil; worker) becomes ﻊﹸل (3 ummaal; workers)

**Plural Pattern 2: ﺎﹶﻔْﻌَ '&#39;ل (’af3aal)**

Nouns formed on the pattern ﻓﹶﻌُل (fa3al) frequently follow Pattern 2, ﺎﹶﻔْﻌَ '&#39;ل (’af3aal). Here are a few common examples:

- ﻞﹶل (wlaad; child) becomes ﻞُل (’awlaad; children)
- ﻢﹶل (mathal; proverb) becomes ﻢُل (’amthaal; proverbs)

**Plural Pattern 3: ﻓُﻌْﻮﻝ (fu3uul)**

Many nouns formed on the patterns ﻓِﻴﻞ (fi3I), ﻓﻖﹸل (fa3I), and ﻓُﻌْل (fu3l) form the plural with Pattern 3, ﻓُﻌْﻮﻝ (fu3uul). Here are some common examples:

- ﻛﹾن (bank; bank) becomes ﻛُن (bunuuk; banks)
- ﻖُﻮَل (fa3I; semester) becomes ﻖُﻮَل (fuSuul; semesters)
Pattern 3 is also sometimes used for nouns with the patterns ﻓَﻌَلٌ (fa3al) and ﻓَﻌْلٌ (fa3il), such as مَلِكٍ (malik; king), which becomes مُلُوكٍ (muluuk; kings).

Note that because this plural pattern separates the second and third consonants of the triliteral root, nouns with a doubled final consonant split them up if it takes the pattern that صَفِّ (Saff; class) takes. It becomes صَفُوفٍ (Sufuuf; classes).

**Plural Pattern 4: ﻓُعَلٌ (fu3al)**

You’ll see Pattern 4 — ﻓُعَلٌ (fu3al) — mostly with nouns of the patterns ﻓُعْلَةٍ (fu3la) and ﻓُعْلَةٌ (fa3la). The following are some important nouns that use Pattern 4:

- غُرَفَةٍ (ghurfa; room) becomes غُرفَاتٍ (ghuraf; rooms)
- دَوْلَةٍ (dawla; state) becomes دُوَّلٍ (duwal; states)

**Plural Pattern 5: ﻑِعَالٍ (fi3aal)**

Unfortunately, many different patterns of nouns use Pattern 5, ﻑِعَالٍ (fi3aal). But it’s a common enough plural pattern that you need to be ready for it. Some important nouns that use Pattern 5 include the following:

- رَجُلٍ (rajul; man) becomes رِجَالٍ (rijaal; men)
- بَلَدٍ (balad; country) becomes بُلَادٍ (bilaad; countries)

To reinforce your mastery of the first five broken plural patterns, in this exercise I give you several singular nouns along with their plural pattern in brackets. Substitute the consonants of the singular into the pattern, and you’ll successfully convert the noun into the plural.

Q. ﻊُقَدةٍ (3uqda; knot) [ﻓُعَلٌ; fu3al]

A. ﻊُقَدٍ (3uqad; knots)

11. ﻗُرِصَةٍ (furSa; opportunity) [ﻓُعَلٌ; fu3al]

12. ﻣَبَتٍ (bayt; house) [ﻓُعْوَلٍ; fu3uul]

13. صَنْفٍ (Sanf; kind) [ﻓُعْلٍ; 'af3aal]

14. ﺡَقَ (Haqq; law) [ﻓُﻋُولٍ; fu3uul]

15. ﻣُﻠْكٍ (kalb; dog) [ﻓِعَالٍ; fi3aal]
16. ﺒﻛﹺر ﻃﹶﺎن ﻃﹶﺎن ﺒﻛﹺر (raakib; rider) ﺒﻛﹺر ﻃﹶﺎن ﻃﹶﺎن (fu33aal)

17. ﺒﹶﺤﹶر ﻁﹶﺎن ﻁﹶﺎن ﺒﹶﺤﹶر (qalb; heart) ﺒﹶﺤﹶر ﻁﹶﺎن ﻁﹶﺎن (fu3uul)

18. ﺲﹶﺤﹶر ﻁﹶﺎن ﻁﹶﺎن ﺲﹶﺤﹶر (qism; division) ﺲﹶﺤﹶر ﻁﹶﺎن ﻁﹶﺎن ('af3aal)

19. ﺔﹶﺢﹸر ﻁﹶﺎن ﻁﹶﺎن ﺔﹶﺢﹸر (nuqTa; point) ﺔﹶﺢﹸر ﻁﹶﺎن ﻁﹶﺎن (fu3al)

**Plural Pattern 6: ﻓﹺﻭﺍﻉﹶﻠﹸل (fawaa3il)**

Nouns of the form ﻓﺎﻋﹺﻞ (faa3il) that don’t refer to humans can take a plural according to Pattern 6, ﻓﹺﻭﺍﻉﹶﻠﹸل (fawaa3il). Here are a few common examples:

- طﺎبﹶﻊ (Taabi3; printer) becomes ﻓﹶوَﺎﺏﹺﻊ (Tawaabi3; printers)
- ﺵﹶاﺭﹶﻊ (shaari3; street) becomes ﻓﹶوﹶاشﹺاﺭﹶﻊ (shawaari3; streets)
- ﺧﹶاﹶﺕﹺﻢ (khaatim; ring) becomes ﻓﹺوﹶﺥﹶاﹶﺕﹺﻢ (khawaatim; rings)

**Plural Pattern 7: ﻡﹶﻑﺎﺃﻝ (mafaa3il)**

Nouns referring to places, such as museums, schools, factories, and so on, that have the pattern of either ﻡﹶﻑَﻌﹶﻞ (maf3al) or ﻡﹶﻑﹶاﹶﺭﹶﺔ (maf3ala) take Pattern 7 — ﻡَﻑَﺎﹶﺃﹶﻝ (mafaa3il) — almost exclusively. The following are some common examples:

- ﺪﹶصﹶﺶ (maSna3; factory) becomes ﻡَﺪﹶصﹶﺍﹾﺵ (maSaani3; factories)
- ﺪﹾﻛﹶﺎﹶﺚ (maktab; office) becomes ﻡَﺪﹾﻛﹶﺎﹶﺚ (makaatib; offices)

Note that the expected plural of the noun ﻢَﻙَﺎﹶﻑَﺓ (maktaba; library) would be identical to the plural of ﻢَﻙَﺎﹶﻑَﺓ (maktab; office). To avoid this potential problem, you’ll usually see a sound plural for this word instead: ﻢَﻙَﺎﹶﻑَﺎﹶﺕ (maktabaat; libraries).

**Plural Pattern 8: ﻓﹶاﹶﺽﹶﻳﹶﺍﹶﺀ (af3ilaa’)**

Nouns of the form ﻓﺎﺽﹶﻳﹶﺍﹶﺀ (fa3il) usually use plural Pattern 8, ﻓﹶاﹶﺽﹶﻳﹶﺍﹶﺀ (af3ilaa’). (Sometimes these nouns use Pattern 9, however. So refer to the next section for details on that pattern.) Here are some examples of nouns that use Pattern 8 to form the plural:

- ﺔﹶﺪﹶﻴﹶﻕ (Sadiiq; friend) becomes ﺔﹶﺪﹶﻴﹶﺫﹺﻕ (‘aSdiqaa; friends)
- ﺔﹶﺪﹶﻴﹶﻕ (ghanii; rich person) becomes ﺔﹶﺪﹶﻴﹶﻕ (aghniyaa; rich people)
Part II: Becoming a Master at Using Nouns

Plural Pattern 9: ﻓَﻌَلاء (fu3alaa’)

Nouns of the form ﻓَ잶ل (fa3iil) frequently use Pattern 9 — ﻓَﻌَلاء (fu3alaa’) — to form the plural. (Do note that nouns of this form may occasionally use Pattern 8, which is discussed in the previous section.) The following are common examples of nouns that use Pattern 9 to form the plural:

- ﺗَمِيل (zamiil; colleague) becomes ﺗَمَلاء (zumalaa’; colleagues)
- رَئِيس (ra’lis; president) becomes رُؤَساء (ru’asaa’; presidents)

Plural Pattern 10: ﻓَعال (fu3ul)

Pattern 10 — ﻓَعال (fu3ul) — is another frustratingly random pattern that happens to be used with many words you need to know to be proficient in Arabic. The following are some examples of nouns that use Pattern 10 to form the plural:

- ﻝَب (kitaab; book) becomes ﻝَب (kutub; books)
- ﺘَمَدة (madiina; city) becomes ﺘَمَد (mudun; cities)

To help you remember the way Patterns 6–10 work, in this exercise I give you several singular nouns along with their plural pattern in brackets. Substitute the consonants of the singular form into the pattern to convert the noun into the plural form.

Q. ﻣَصَدر (maSdar; source) [مَفَاعِل; mafa3il]

A. ﻣَصَادر (maSaadir; sources)

20. ﻤَؤِر (waziir; minister) [فَعال; fu3alaa’]

21. ﻣَسْجِد (masjid; mosque) [مَفَاعِل; mafa3il]

22. ﻷِب (jabal; mountain) [فَعال; fi3aal]

23. ﻪَمْسَأ (3aaSima; capital) [مَوَاعِل; fawaa3il]

24. ﻢَخْبَر (makhbaz; bakery) [مَفَاعِل; mafa3il]

25. ﻓَعِيم (za3iim; leader) [فَعال; fu3alaa’]

26. ﻓَيْر (firaash; bed) [فَعال; fu3ul]

27. ﻗَرْب (qariib; relative) [فَعال; af3ilaa’]

28. ﻢَركِز (markaz; center) [مَفَاعِل; mafa3il]
Discovering Nouns with Irregular Plurals

Several important nouns have irregular plurals, or they use patterns that aren’t common enough to treat separately. There’s no way to predict that any of these nouns should have the plural form that they have. And because these are some important and common nouns, you should just commit the singular and the plural forms to memory:

- **أب (ab; father)** becomes **أباب (aabaa'; fathers)**
- **أم (umm; mother)** becomes **أمّات (ummahaat; mothers)**
- **أخ (akh; brother)** becomes **أخوة (ikhwa; brothers)**
- **أخت (ukht; sister)** becomes **أخوات (akhawaat; sisters)**
- **أمّة (imra'a; woman)** becomes **نساء (nisaa'; women)**
- **يوم (yawm; day)** becomes **أيام (ayyaam; days)**
- **سنة (sana; year)** becomes **سنوات (sanawaat; years)**
- **أرض (arD; land)** becomes **أراضي (araaadin/al-'araaDii; lands)**
- **كرسي (kursii; chair)** becomes **كراسي (karaasin/al-karaasii; chairs)**

Seeing Double: Forming the Dual

You’ve heard that two’s company and three’s a crowd. Anytime you have exactly two of something, you can call it a pair, a couple, or, grammatically, a dual. (That’s why two people fighting is called a duel.) The broken plural patterns covered in preceding sections are challenging to learn. But the formation of dual nouns, covered in this section, is a little easier to take. In Arabic you use a special ending, referred to as the dual ending, whenever you refer to only two of something (rather than three or more of something). Compared to the broken plural, mastering the dual will be a breeze.

To form the dual in Arabic, all you have to do is take the singular form and add the ending **اِن (aani)** for the nominative and **يْنِ (ayni)** for the accusative and genitive. (Check out Chapter 4 if you need a refresher on working with these cases.) Masculine and feminine nouns both take the same endings, but remember that the **تَاءّ (taa’ marbuutaa)** is secretly a **تَاء (taa’)** and will turn back into a **تَاء (taa’)** whenever you add an ending to it.

The dual of masculine nouns

In this section, I include some examples of how to form the dual when working with masculine nouns. Consider the following masculine singular noun: **كتاب (kitaab; book).**
Here’s how to form the dual of *two books* in all three cases:

**Nominative:** كتابان (kitaabaani)

**Accusative and genitive:** كتابين (kitaabayni)

When a dual noun appears as the first word of an 'Idaafa, the final letter ن (nuun) will disappear. (For more on the 'Idaafa construction, check out Chapter 7.) Here’s an example of what I mean:

baytaa-rajuli jadiidaani jiddan. *The man’s two houses are very new.*

### The dual of feminine nouns

As noted earlier, the dual of feminine nouns uses the same endings as the masculine nouns. Consider this singular feminine noun: سيارة (sayyaara; car).

Here’s how to form the dual of *two cars* in each of the three cases:

**Nominative:** سيارتان (sayyaarataani)

**Accusative and genitive:** سيارتين (sayyaaratayni)

Suppose you’re throwing a dinner party, and just as you’re about to go shopping, you find out that a few more good friends will be coming. That means you need to double your supplies. Examine your shopping list, and then convert every item into the dual form. You can just produce the dual of the Arabic word provided, but do produce both the nominative and accusative forms. وجبة طيبة (wajba Tayyiba). In other words, *Bon Appetit!*
Q. One item on your grocery list is a block of cheese جبنة (jubna). Convert this to the dual form, or two blocks of cheese.

A. جبنتان / جبنتيين (jubnataani/jubnatayni; two blocks of cheese)

Chapter 6

Bringing Your Sentences to Life with Adjectives and Adverbs

In This Chapter

- Recognizing and using the forms of adjectives
- Discovering the use of adverbs
- Using the Arabic comparative form
- Forming the superlative

If nouns and verbs are the meat and potatoes of language, adjectives and adverbs are certainly the spices that make the meal interesting. Being able to incorporate these important words expertly into your writing brings your prose to life — even if it’s just a simple business memo.

You may have noticed that an adjective or adverb has found its way into every sentence of this chapter opening. So being hesitant with them can have a paralyzing effect on what you want to say. Mastering adjectives and adverbs is a win-win for you.

In this chapter, I show you the forms of the Arabic adjectives and the rules for how to use them within your sentences. This information will come in handy on a variety of occasions, such as when you want to compliment your boss about that nice tie. In this chapter, you also explore how to make a comparative adjective in Arabic. This information will equip you to tell your old friend that she looks younger than the last time you saw her. You also see how to jazz up your description of actions with Arabic adverbs. You’ll need them if you want to include on your resume how well you perform your duties. This chapter is a great way to make your Arabic writing even better!

Describing People and Things with Adjectives

To use adjectives in Arabic, you need to know how to properly form them and also how and where to add them to your sentence. The simple explanation is that an adjective must agree grammatically with the word it describes and come immediately
after that word, as in the following example. I underline the adjective so you can spot it:

تُعجبُكْ سَيْارَتِي الْجَدِيَّة؟
(tu‘3ibuki sayyaaratii al-jadiida? Do you like my new car?)

Recognizing adjective patterns

To recognize an adjective in Arabic, you must become familiar with the different word patterns that adjectives can follow. There are a handful of word patterns that are frequently adjectives, but a strong majority of adjectives in Arabic use the word pattern ﻓﹶﻋﹾﻴﹶﻞ (fa3iil). To give you an idea of how two very different adjectives can each have the same word pattern, compare these antonyms:

كْبِير (kabiir; big)
صَغيِر (Saghiir; small)

These words mean the exact opposite, but what they do have in common is the exact same shape. They each have the vowel a after the first consonant and the long i after the second consonant.

Because the ﻓﹶﻋﹾﻴﹶﻞ (fa3iil) word pattern is so common, it’s the best adjective type to master first. Here are several common adjectives that follow this word pattern:

جَدِيد (jadliid; new)
قَدِيم (qadiim; old)
جَميِل (jamiil; beautiful/handsome)
قَبِيح (qabiiH; ugly)

To read about some of the other adjective forms, check out the following section.

Wrestling with Arabic forms of the adjective

In your basic studies of Arabic nouns, you became acquainted with the masculine and feminine gender as well as the singular and plural. (To review these concepts, visit Chapters 2 and 5.) In the later section, “Keeping adjectives in agreement,” you discover that you have to use adjective forms that match your noun in gender and in number. The good news is that three of the four potential adjective endings are formed regularly.

The only tricky thing about adjectives in Arabic is that the masculine plural forms are unpredictably irregular. They’re irregular in the sense that their shapes can’t be predicted from the most basic form of the adjective — the masculine singular. As a result, you have to simply memorize the masculine plural (unless you want to reach for this book or your dictionary every time you want to write one).
The following sections introduce you to the shapes of the irregular masculine plurals as well as the (thankfully) fully regular masculine singular and feminine singular and plural forms.

**Looking at irregular masculine plurals**

In this section, I show you the forms of some common adjectives so you see the various shapes that the masculine plural can take. Every adjective forms the feminine singular regularly by adding the suffix ُﺓ (a) and the plural by adding the suffix ﺍﺕ (aat). But the pesky masculine plural turns out different in all three of the common adjectives shown in Table 6-1. Because the masculine singular is the most basic form (it doesn’t have suffixes like the feminine forms), the masculine singular is the word that will double as the dictionary entry for every adjective.

<table>
<thead>
<tr>
<th>Table 6-1</th>
<th>The Forms for Some Common Adjectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Masc. Singular</strong></td>
<td><strong>Fem. Singular</strong></td>
</tr>
<tr>
<td>ﻟِﻛَﺒِيرٌ</td>
<td>ﻟِﻛَﺒِيرَﺓ</td>

<td>ﻟِﺟَﺪِﻳﺪَﺓ</td>
</tr>
<tr>
<td>ﻟِﻣَﺮِﺽٌ</td>
<td>ﻟِﻣَﺮِﺽَﺓ</td>
</tr>
</tbody>
</table>

A majority of adjectives form the masculine plural on the word pattern ﻓِﻌَﺄْﻝ (fi3aal), such as ﻟِﻛِﺒَارٍ (kibaar; big) in the previous table. So if you’re ever in a bind, don’t have access to a dictionary, and need to take a wild guess at forming a masculine plural adjective, go ahead and put it in the ﻓِﻌَﺄْﻝ (fi3aal) word pattern. Even if you’re wrong, people will understand what you mean to say. And most of the time you’ll be right anyway.

Adjectives can appear in several other word patterns as well. The word pattern ﻓِﻋَﺄْﻝ (fa33il) (which you discover in the previous section) is so pervasive in the Arabic language that it deserves to be learned as a type. The other potential word patterns an adjective can take, however, are numerous and not individually common. Table 6-2 shows you four other word patterns for adjectives. The feminine will be regular, but be ready for the masculine plurals to be irregular.

</table>
Part II: Becoming a Master at Using Nouns

Seeing patterns in feminine adjectives

Because feminine adjectives are always regular, the only thing worth mentioning that’s specific to feminine forms is a feature of adjectives on the word pattern ﻓﹶﻋﹶﻼﻥ (fa3lan). In Classical Arabic, these adjectives had a different feminine singular than what I show you in Table 6-3. That feminine singular was formed on the word pattern ﻓﹶﻌﹾﻠﹺﱄ (fa3lai). You may see this obsolete feminine form in older books, but in Modern Standard Arabic it has been replaced by the more regular forms that I show you in Table 6-3.

Table 6-3 Adjectives That Use the ﻓﹶﻋﹶﻼﻥ (fa3lan) Form

<table>
<thead>
<tr>
<th>Masc. Singular</th>
<th>Fem. Singular</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﻉﹶﻄﹾﺸﺎﻥ (3aTshaan)</td>
<td>ﻉﹶﻄﹾﺸﺎﻧﺔ (3aTshaana)</td>
<td>thirsty</td>
</tr>
<tr>
<td>ﻏﹶﻀﹾﺒﺎﻥ (ghaDbaan)</td>
<td>ﻏﹶﻀﹾﺒﺎﻧﺔ (ghaDbaana)</td>
<td>angry</td>
</tr>
<tr>
<td>ﻜﹶﺴﹾﻼﻥ (kaslaan)</td>
<td>ﻜﹶﺴﹾﻼﻧﺔ (kaslaana)</td>
<td>lazy</td>
</tr>
</tbody>
</table>

Adjectives like ﻉﹶﻄﹾﺸﺎﻥ (3aTshaan; thirsty) are diptotes, meaning that they have only two case endings (the normal nominative u and the accusative a for both accusative and genitive). They also don’t take nunation (the additional n sound after the vowel to make it indefinite).

Using participles as adjectives

A number of adjectives in Arabic are actually participles. To understand what I mean, think about it from the standpoint of English: When you say something is exciting, you’re using the word as an adjective to describe that thing. But because of that -ing ending, exciting is a present participle. (A detailed description of participle formation is available to you in Chapter 18.)

The good news for you is that all the adjectives derived from participles take the regular masculine and feminine singular and plural sound endings. Table 6-4 shows three participles that have adjectival meanings.

</tr>
</tbody>
</table>
Forming adjectives when naming places

I’m from Wisconsin originally. People there call themselves “Wisconsonites” (that is, they did until the label “Cheesehead” came along). Similarly, people from New York are called “New Yorkers.” And somebody from America is considered an “American.” In English, we have plenty of different endings to turn a place name into an adjective. It all depends on the ending of the word and, well, just what sounds the best. And then there’s Indiana with its Hoosiers — who knows what that’s all about!

Arabic, on the other hand, has a more regular way to form an adjective from a place name. You can add a doubled یّ (yaa’; nisba) to almost every country (and even city) to create an adjective that describes a person from that place. It’s known as the َنِسْبَة (nisba) ending because nisba in Arabic means relationship. With the place name مَصْرِ (miSr; Egypt), you just add the َنِسْبَة (nisba) ending to the end to produce the following: مَصْرِيّ (miSrīi; Egyptian).

To form the feminine and the plurals with َنِسْبَة (nisba), keep in mind that the ending is actually a doubled یّ (yaa’). Notice in the following examples the doubled یّ (yaa’) in the feminine singular (FS) forms and the masculine and feminine plural forms (MP and FP):

- مَصْرِيّة (miSrīyya; Egyptian; FS)
- مَصْرِيونَ (miSrīyyuuna; Egyptians; MP)
- مَصْرِيّات (miSrīyyaat; Egyptians; FP)
- أُرْدُنِيّة (urduniyya; Jordanian; FS)
- أُرْدُنِيونَ (urduniyyuuna; Jordanians; MP)
- أُرْدُنِيّات (urduniyyaat; Jordanians; FP)

When you put the َنِسْبَة (nisba) ending on a word with a final consonant, the word doesn’t undergo any further change. When you put the َنِسْبَة (nisba) on a word with a final vowel or ْتَ (taa’ marbuuTa), you drop the final syllable and add the َنِسْبَة (nisba) ending. (See Chapters 1 and 2 for more on the taa’ marbuuTa.) Here are a few examples:

- أمْرِيْكَة (amriika; America) becomes أمْرِيْكي (amriikki; American)
- لِبْيَا (libyaa; Libya) becomes لِبْيٍ (libii; Libyan)
- مَكَّة (makk; Mecca) becomes مَكَِّي (makkii; Meccan)
Some country names have an ال (’alif laam), the Arabic definite article. The country we call Kuwait in English is literally called الكُوَيْت (al-kuwayt; The Kuwait) in Arabic. For country names that have the ال (’alif laam), you have to remove it and then add the نِسْبة (nisba) ending. Take a look at two examples:

العراق (al-3iraaq; Iraq) becomes عراقيّ (3iraqqi; Iraqi)
القاهرة (al-qaahira; Cairo) becomes قايرئيّ (qaahirii; Cairene)

### Labeling abstract concepts with adjectives

In English, we have adjectives that are formed from more abstract concepts than place names. Think, for instance, about how you can form the adjective melodic from the word melody and responsive from response.

In Arabic, you can create such abstract adjectives by putting the نِسْبة (nisba) ending on virtually any noun. Notice in the following examples how a noun generates a nisba adjective:

عائِلة (3aa’ila; family) becomes عائليّي (3aa’ilii; familial/domestic)
مال (maal; money) becomes ماليّي (maalii; monetary)

Some adjectives are formed by putting the نِسْبة (nisba) ending on a historical root that you couldn’t have predicted. (A historical root is a root that was used thousands of years ago but changed over time.) Obsolete consonants from the historical root reappear when you put on the نِسْبة (nisba) ending. Here are several examples of nisba adjectives formed on roots that are slightly different than the nouns they come from:

لغة (lughaa; language) becomes لغويّي (lughawii; linguistic)
أب (’ab; father) becomes أبوّيي (’abawi; paternal/fatherly)
أخ (’akh; brother) becomes أخويّي (’akhawii; fraternal/brotherly)

It’s time for you to take your نِسْبة (nisba) adjective formation quiz! For each of the following place names and nouns, create a nisba adjective. If you can also correctly write the English translation of your newly created adjective, you get extra credit. Two of the questions prompt you to produce feminine singular. All the rest should be masculine singular. Good luck!

**Q.** روسيا (ruusiyaa; Russia)

**A.** روسيّ (rusii; Russian)
Adding colors to your writing

Most of the adjectives describing color in Arabic are formed on the same word pattern as the comparative form: أَفْعَلْ (‘af3al). This pattern is discussed later in the chapter. You can see in Table 6-5 that the masculine forms are of the same pattern as the comparative adjective, but there are feminine singular forms as well (unlike the comparative adjective, which doesn’t have a feminine singular form).

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>أَحْمَرْ (‘aHmar)</td>
<td>حَمْرَاء (Hamraa’)</td>
<td>red</td>
</tr>
<tr>
<td>أَخْضَرْ (‘akhDar)</td>
<td>خَضْرَاء (khaDraa’)</td>
<td>green</td>
</tr>
<tr>
<td>أَرْزَاق (‘azraq)</td>
<td>زَرْقاَء (zarqaa’)</td>
<td>blue</td>
</tr>
<tr>
<td>أَبْيض (‘abyaD)</td>
<td>بَيْضاء (bayDaa’)</td>
<td>white</td>
</tr>
<tr>
<td>أَسْوَد (‘aswad)</td>
<td>سَوْداَء (sawdaa’)</td>
<td>black</td>
</tr>
<tr>
<td>أَصْفَر (‘aSfar)</td>
<td>صَفْرَاء (Safraa’)</td>
<td>yellow</td>
</tr>
<tr>
<td>أَسْمَار (‘asmar)</td>
<td>سَمْرَاء (samraa’)</td>
<td>brown</td>
</tr>
</tbody>
</table>
When you get beyond the basic color wheel, however, you run into words formed with the نِسْبَة (nisba) ending on nouns. Here are a few examples of how the نِسْبَة (nisba) ending produces a color from a noun:

- 

  ﺩﹶﻫﹶﺐ (dhahab; gold [the metal]) becomes 

  ﺩﹶﻫﹶﺒﻲﹼ (dhahabii; golden [the color])

- 

  ﺑﹸﺮﹾﺗﹸﻘﺎﻝ (burtuqaal; orange [the fruit]) becomes 

  ﺑُﺮﹾﺗﹸﻘﺎﻟﻲﹼ (burtuqaalii; orange [the color])

**Keeping adjectives in agreement**

In Arabic, when you’re using an adjective as a predicate, it must agree with the subject in gender and number. Here’s an assortment of examples using all the genders and numbers of Arabic:

- ﺗﹶﻌﺒﺎﻥ ﺍﻟﺮﱠﺟﹸﻞ (ar-rajul ta3baan. The man is tired.)

- ﺛﹶﻴﹶanyahu. (al-bint dhakiyya. The girl is intelligent.)

- ﻣﹶﻬﹺﻢﹼ ﻣﹶﻮﹾﺿﻮﻉ (mawDu3 muhimm; an important issue)

- ﺗﹶﺤﹶﻴﹶرﺍﺕ ﺍﻟآﻟﺎ испыта (al-ayn mashhuuraat. The women are famous.)

- ﻣﹶﺼﹾﺮﹺﻳﱢﻮﻥﹶ ﻗﹶﻠﹶﻁﺎ (al-maSriyyuuna liTaaf. The Egyptians are nice.)

Unlike English, adjectives in Arabic always follow the nouns they describe. For example, in English you write the white house. In Arabic, this same phrase would literally be the house the white. Look at these two examples:

- ﺑﹶﻴﹾﺖ ﺍﻟْـ (al-bayt al-'abyaD; the white house)

- ﻣُﻮْﺿﻮﻉ ﻣُﺤﹶﻴِّﻢ (mawDu3 muhimm; an important issue)

In the previous two examples, I use what’s called the attributive adjective. An attributive adjective is so named because it attributes a description to the noun. In other words, it’s an attributive adjective when you describe a noun in your sentence with the adjective placed before it in English, such as blue cheese, sour cream, and the greasy spoon. When an adjective is attributive in Arabic, it always has to agree with the noun in gender (masculine or feminine), number (singular or plural), or state of definiteness (whether it has the or a/an). (See Chapter 2 for more on the definite state.)

Notice how the adjectives in the following two sentences match their nouns’ definite or indefinite state:

- ﺗﹶﻠﹶﻴﹶﺮَي ﺑِرزَأْ ﻣَأْرِيَّا ﻣَأْرِيَّا (ra'aytu shay'an ghariiban hunaaka. I saw a strange thing there.)
In other words, when you state an indefinite noun such as *shay'an* (a thing), the adjective following the word will also be indefinite (as in the first example). But after a definite noun, such as *the building* (al-binaaya) in the second example, the adjective describing the noun also has to have the الْ (‘alif laam).

The only exception to adjectives following nouns comes with the demonstrative adjectives. These are the adjectives that demonstrate who or what you’re talking about, for example *this car* or *that girl*. The Arabic demonstrative adjectives come immediately before the nouns they go with, but they still agree in gender. As a rule, they only go before nouns with the الْ (‘alif laam). Here are the masculine and feminine forms of *this* and *that* in Arabic with examples:

- **البيت** (haadha-l-bayt; this house) MS
- **هذة السيارة** (haadhihi-s-sayyaara; this car) FS
- **ذاك الرجل** (dhaalika-r-rajul; that man) MS
- **هذة السفينة** (tilka-sh-shaqqa; that apartment) FS

In addition to using adjectives to describe the nice girl, you can also use an adjective in a sentence such as *The girl is nice*. This is known as the predicate adjective. It’s simple to form in Arabic because you just put it after the noun and don’t add the الْ (‘alif laam) to the adjective. Here are two examples:

- **البنت أطيبّة.** (al-bint al-Tiifa. The girl is nice.)
- **البناءة جميلة.** (al-binaaya jamilla. The building is beautiful.)

A possessive pronoun suffix, such as *my* or *her*, also makes its noun definite. Because of that, if the noun in your sentence has one of the possessive pronoun suffixes, you have to make your adjective definite to match. (You can review possessive pronoun suffixes in Chapter 2.) You don’t put the same possessive pronoun suffix on the adjective. Instead, you just add the الْ (‘alif laam) to the adjective. This is the equivalent of saying, as in the following example, *my idea the new*. Take a look at how adjectives describing nouns with possessive pronoun suffixes have the الْ (‘alif laam):

- **فكرةتي الجديدة.** (fikratii al-jadiida; my new idea)
- **مهنتها الصعبة.** (mihnatuhaa aS-Sa3ba; her difficult occupation)

**Handling feminine singular for inanimate plurals**

A curious grammatical rule in Arabic is that only humans are counted as plurals when it comes to adjective agreement. So the plural forms explored in the earlier section, “Wrestling with Arabic forms of the adjective,” are used to describe men, women, children, and even animals.
But never will you see plural adjectives used for houses, cars, or balloons. Instead, whenever an inanimate object is plural, you use feminine singular adjectives. Here are some examples of inanimate plurals with their feminine singular adjectives:

- ﻣﹸﻀﹾﺤﹸﻜﺔ ﺍﻟﻘﱡﺼﹶﺺ (al-qiSas muDHika. The stories are funny.)
- ﺍﻹﺟﺎﺑﺎﺕ ﺩِﺣِﻴﺤِﺔ (al-'ijaabat SaHiiHa. The answers are correct.)
- ﻩﺬﹺﻩ ﺍﻟﹶﺎﹶﺧﹾﻼמין ﺡُﻠْوَة (haadhihi-l-'aHlaam Hulwa. These dreams are sweet.)

In this exercise, I list several phrases in English, each one containing a noun and an adjective. Using the dictionary in the back of this book, look up any words you don’t know, and then write the phrase in Arabic.

Q. my tall friend

A. ﺗﺬَﻳْﻞ ﺗﺬَﻳْﻞ (Sadiiqii aT-Tawiil)

9. a small problem _________________________________

10. the clean plates _________________________________

11. The pen is blue. _________________________________

12. The house is big. _________________________________

13. the happy students (mixed group) _________________________________

14. the good doctors (FP) _________________________________

15. The books are useful. _________________________________

16. The cat (FS) is black. _________________________________

17. a scared dog _________________________________

18. the nice director (MS) _________________________________

19. My grandmother is famous. _________________________________

20. our favorite restaurant _________________________________

21. their only opportunity _________________________________

22. your (FS) final choices _________________________________
Describing Verbs with Adverbs

G.K. Chesterton said, “If a thing is worth doing, it’s worth doing badly.” An adverb describes the manner with which a verb is performed (badly or otherwise). Adverbs are easily formed in English. Most every adjective you know can get -ly tacked onto the end; at that point, you’ve made yourself an adverb. Perhaps someone can cook beautifully so their guests can eat greedily. And English has just one irregular adverb, “well” (which may explain why so many people don’t use it when they should!).

Arabic creates adverbs regularly as well. You can take any adjective, put it in the masculine singular accusative indefinite form, and then use it as an adverb. (For a review of the accusative singular, see Chapter 4.) You put your adverb after the verb, as in English. Here are three adjectives turned into adverbs in the accusative indefinite:

- ﺗﹸﻜﱢﻠﹶﻠﹾﻢﹶ (takallam; speak)
- ﺗﹸﻜﱢﻠﹶﻠﹾﻢﹶ ﺑﹶﻄﹾﻴﹶﺀ (takallam baTii’an, min faDlika. Please speak slowly.)
- ﺗﹶﻜﹶﻠﹶﻠﹾﻢﹶ ﺟﹶﻴﱢﺪ (katabat jayyidan. She wrote well.)

In English, you can use a noun plus a preposition to create an adverbial phrase. For example, in the sentence, Walk carefully on that ice, the adverb is carefully. Now consider the sentence, Handle this package with care. It showcases an adverbial phrase — with care.

Arabic also uses some prepositional phrases adverbially. You can add the prefixed preposition bi- to abstract nouns, and they take on an adverbial sense. Here are three common examples:

- ﺑﹺﻀﹺﺒﹾﻂ (biDabT; with exactitude/exactly)
- ﺑﹺﺴﹶﻬﻮﻟﺔ (bisahuula; with ease/easily)
- ﺑﹺﺼﹶﻌﻮﺑﺔ (biSa3uuba; with difficulty)

Each of the following sentences has a blank and an Arabic word in brackets. Your challenge is to put the bracketed word into the form of an adverb.

Q. ﺛَرَصْبَتْ ﻨَهَرَةَ ﺗَنْزِرَ ذَهَبَةً ﺍِذَٰﻟِإِنَّ آَمَسُ (darastu al-3arabiyya _______ ‘amsi.) [قَلِيل; qaliil]

A. قَلِيلٌ; qaliil / I studied Arabic a little yesterday.

23. ﺍِذَٰﻟِإِنَّ آَمَسُ ﺍِذَٰﻟِإِنَّ آَمَسُ ﺍِذَٰﻟِإِنَّ آَمَسُ (yu3jibhu as-safar fa-saafara _______)[واسع; waasii3]

24. ما كَانَتْ غَضْبَانَةً بِلْ ﺗُكَلَّمَتْ _______ [هُدوء; hduu’]
This Is Better than That: Making Comparisons

Earlier in this chapter, I show you how to use adjectives and adverbs, so now you can probably describe someone as beautiful or tell her that she sings beautifully. Another important skill is knowing how to tell someone that she’s more beautiful than another person. (Maybe I should caution you that whether you’re doing it in English or Arabic, you should be careful about the kinds of comparisons you make!).

To form the comparative in English, you can just add the suffix -er to most adjectives. For example:

- big becomes bigger
- small becomes smaller

As always, there are exceptions to this rule. For instance, you wouldn’t say “beautiful- fuller.” If you did call someone “beautifuler,” she would understand that you intend a compliment, but she wouldn’t exactly be impressed with your language ability! Instead, you need to say someone is more beautiful, or you can switch to prettier.

Arabic, on the other hand, forms the comparative in several different ways depending on the words you’re using. I explain everything you need to know in the following sections.

Forming the comparative from the triliteral root

Like English, Arabic has a regular way to form the comparative. You take the three consonants of the adjective’s triliteral root (the three consonants any word contains), and you put them in the word pattern أفعل (af3al).

In the following list, you see how several adjectives turn into the comparative form when you put their roots into the word pattern. To put the root into the comparative form, you add the prefix أ (‘a- ) and use the a vowel, which is written with the (fatHa), over the second consonant of your root. Here are some examples:

- (Saghiir; small) becomes أصغر (‘aSghar; smaller)
- (Hasan; good) becomes أحسن (‘aHsan; better)
- (Sa3b; difficult) becomes أصعب (‘aS3ab; more difficult)
Dealing with geminate roots

If an adjective has *geminate roots*, meaning it has the same second and third consonant, the two consonants are doubled in the comparative form, and you put the accent on the second syllable. Here are some examples of geminate roots becoming comparative adjectives:

- حَارَّ (Harr; warm) becomes أَحْرَّ (‘aHarr; warmer)
- قَايِلٍ (qailil; little/few) becomes أَقْلَّ (‘aqall; fewer)
- خَفَيفٌ (khafiif; light) becomes أَخَفَّ (‘akhaff; lighter)

Encountering waaw or yaa’ as a third consonant

If an adjective has a *وَاَو* (waaw) or a *يَاَء* (yaa’) as its third consonant, the comparative form is written with the *mination* (‘alif maksuura) in place of the final consonant. (See Chapter 3 for information on the *‘alif maksuura*.) Take a look at a few examples:

- غَنِي (ghanii; rich) becomes أَغْنِي (‘aghnaa; richer)
- عَالِ (3aalin; high) becomes أَعْلَى (‘a3laa; higher)
- خَلَوُ (Hulw; sweet) becomes أَخْلَى (‘ahlaa; sweeter)
- ذَكَى (dhakii; intelligent) becomes أَذْكَى (‘adhkaa; more intelligent)

When you use the comparative as a predicate, the preposition مِنْ (min) functions like English *than*. Just as you put the English word *than* directly in front of the word you want to compare, so also you put *min* directly in front of the noun you want to compare in Arabic. *Min* ordinarily means *from*. So in Arabic you’re saying something like, *John is taller from Steve*. But when you use *min* in a comparative sentence, always translate it as *than*. The following sentences show you some examples:

- هُوَ أَطَوْلُ مِنْ أَخِي. (huwa ’aTwal min ’akhii. *He is taller than my brother.*)
- هُيَ أَذْكَى مِنِّي. (hiya ’adhkaa minnii. *She is smarter than I.*)

The comparative can function as an attributive adjective, as well. However, to do so correctly, the adjective must match its noun in definiteness, as in these examples:

- بَعْضُ السَّبَارَةِ الأَعْلَى. (bi3tu as-sayyaarata al-’aghlaa. *I sold the more expensive car.*)
- لِبَيَّ السَّمِيِّ الأَرْخَصِ. (labisa al-qamiiS al-’arkhaS. *He wore the cheaper shirt.*)
For each of the following items, I give you a simple English sentence with something being compared to something else. Translate these into Arabic, observing the rules you have discovered in this section.

Q. Ahmad is taller than Latiif.
A. ﻟﹶﻄﻴﻒ ﻣﹺﻦﹾ ﻛﹶﻃﹾﻮﹶﻝ ﹾ ﻛﹶﺤﹾﻤﹶﺪ (’aHmad ’aTwal min laTiif.)

27. My car is faster than your car. _______________________________________________

28. This house is newer than that apartment. _________________________________

29. She is nicer than her sister. _______________________________________________

30. The student is smarter than the teacher! _________________________________

**Being Super with the Superlative**

The superlative takes your writing beyond saying something is merely good or even better. With the superlative, the object you’re talking about is really great. It may even be stupendous! It’s sort of like when two kids go back and forth saying, “My dad’s better than your dad!” Then a third kid walks up and ends the argument by stating in the superlative, “Well, my dad’s the best of all!”

To produce the superlative in English, you usually add *-est* to the regular adjective. Arabic doesn’t have a separate form for the superlative. Instead, you use the comparative form in any of three constructions to produce a superlative idea. In the following sections, I explain each of the constructions.

**Comparative plus ال (’alif laam)**

You can add the ال (’alif lam) to a comparative adjective used as a predicate, and it will pick up a superlative sense. If you’re rusty on adding the ال (’alif laam), see Chapter 2. Here are two examples:

هَذَا الْكِتَابُ الأَقْصَرُ.
(haadha-l-kitaab al-’aqSar. That book is shortest.)

عَسَانِي الأَجْدَدُ هُنَا.
(ustaadhii al-’ajadd hunaa. My professor is the newest one here.)

**Comparative plus the indefinite singular**

An indefinite noun following the comparative form can provide a superlative sense. (See Chapter 4 for more on creating indefinite nouns.) Take a look at two cases of this option:
Comparative plus an 'iDaafa

A comparative in an 'iDaafa construction with a definite plural noun produces a superlative in Arabic. (To discover more about the 'iDaafa, refer to Chapters 2 and 7.) Here are two examples of this superlative expression:

- (haadhihi aFDal fikra sami3tuha. That's the best idea I've heard.)
- (huwa 'afqar rajul fii-l-qarya. He's the poorest man in the town.)

In this exercise, I give you a few English sentences using superlatives. Each one is accompanied by three Arabic versions, only one of which expresses the English correctly. Remember that one of the Arabic sentences does match the English sentence provided, so dig in and find the one that follows the rules you discovered in this section.

Q. This test was the hardest.
   a) كان هذا الإمتحان الصعب. (kaana haadhaa-l-imtiHaan al-'aS3ab.)
   b) كان هذا الإمتحان أصعب. (kaana haadhaa-l-imtiHaan aS3ab.)
   c) كان هذا الإمتحان أسهل. (kaana haadhaa-l-imtiHaan 'as-hal.)

A. a; كان هذا الإمتحان الأصعب. (kaana haadhaa-l-imtiHaan al-aS3ab.)

31. He discussed the most interesting issue with his friends.
   a) ناقش الموضوع الأهم مع أصدقائه. (naaqasha al-mawDuu3 al-'ahamm ma3a 'aSdiqaa'ihi.)
   b) ناقش أهم المواضيع مع أصدقائه. (naaqasha 'ahamm al-mawaaDi3 ma3a 'aSdiqaa'ihi.)
   c) ناقش الموضوع المهم مع أصدقائه. (naaqasha al-mawDuu3 al-muhimm ma3a 'aSdiqaa'ihi.)
32. I preferred the newest kind.
   a) فَضَلْتُ الصَّنْف الأَجْدَدَ (faDDaltu aS-Sanf al-'ajadd.)
   b) فَضَلْتُ الصَّنْف الأَجْدَدَ (faDDaltu aS-Sanf al-'ajdad.)
   c) فَضَلْتُ أَجْدَدُ الْاَصْنَافِ (faDDaltu 'ajadd al-'aSnaaf.)

33. Use the sharpest knife.
   a) إِسْتَعْمِلْ السَّكِينَةَ حَادَةً (ista3mil sakiina Haadda.)
   b) إِسْتَعْمِلْ السَّكِينَةَ الأَحْدَدَ (ista3mil as-sakiina al'aHadd.)
   c) إِسْتَعْمِلْ أَحْدَدَ السَّكِينَةِ (ista3mil 'aHadd sakiina.)

34. He is the dumbest man in the office.
   a) هُوَ رَجُلٌ غَبُبٌ فِي الْمَكَّتَبِ (huwa rajul ghabii fii-l-maktab.)
   b) هُوَ أَعْبَى رَجُلٌ فِي الْمَكَّتَبِ (huwa 'aghbaa rajul fii-l-maktab.)
   c) هُوَ أَعْبَى رَجُلٌ فِي الْمَكَّتَبِ (huwa 'aghabb rajul fii-l-maktab.)

Part II: Becoming a Master at Using Nouns

19. جَذَّبَني مَشْهورة. (jaddatii mash-huura.)
20. مُطْعَمُنا المُفْضَلِ (mat3amunaa al-mufaDDal)
21. فُرَصْتُهم الوَحِيدَة (furSatuhum al-waHiida)
22. إِخْتِيَارُكَ الَّآخِرَةٌ (’ikhtiyaaraatuki al-’akhiira)
23. وَاسِعًا; waasi3an / He likes travel, so he’s traveled widely.
24. بَهُدْوَهُ; bihuduu’ / She wasn’t angry, rather she spoke calmly.
25. وَاحِدًا; waaDiHan / He wrote his opinion clearly in his article.
26. سَرِيْعًا; sarii3an / They went quickly because they were late.
27. سَيْارَتِي أَسْرَعْ مِنَ سَيْارَتِكَ (sayyaaratii ‘asra3 min sayyaaratika.)
28. هَذَا الْبَيْتُ أَجُدَّ مِنْ نَيْكَ الْشَّقَّةُ (haadhaa-l-bayt ’ajadd min tilka-sh-shaqqa.)
29. هِيَ أَلْتوْفِ مِنْ أَخْتِهَا (hiya ’alTaf min ’ukhtihaa.)
30. الَّطَلَّابُ أَذْكُرُ مِنَ الْمُدْرِسِ (aT-Taalib ’adhkaa min al-mudarris!)
31. نَاقِشَنَّ أَهْمَّ المَوَاضِعِ مَعُ أَصْدَافُهُ. (naaqasha ’ahamm al-mawaaDi3 ma3a ’aSdiqa’ihi.)
32. قُضِّلُتُ أَجُدَّ الْأَصْنَافِ (faDDaltu ’ajadd al-’aSnaaf.)
33. إِسْتَعْمَلُ أَحْدَ السَّكِينَةِ (ista3mil ’aHadd sakiina.)
34. هُوَ أَعْبَى رَجُلٌ فِي الْمَكْتَبِ. (huwa ’aghbaa rajul fii-l-maktab.)
Chapter 7
Making Connections: Mastering the 'iDaafa Construction

In This Chapter
- Creating 'iDaafas in Arabic
- Using adjectives to modify words in a complex 'iDaafa

The goal of the lesson of this chapter is . . . Wait, let me try to write that more clearly: This chapter’s lesson’s goal . . . Huh, that still doesn’t sound quite right. How about, the goal of this chapter’s lesson? Oh bother! What I’m trying to write requires the 'iDaafa in Arabic. The 'iDaafa is the way that Arabic expresses possession of one noun over another. So you need it to state things like this lesson’s goal or the goal of this chapter.

You’ve seen simple two-word 'iDaafas in your beginning Arabic studies. (I provide you with a review of the 'iDaafa and practice with the two-word 'iDaafa in Chapter 2.) Intermediate level Arabic, however, permits 'iDaafas of several items. You can also describe one or more of the words in the 'iDaafa with adjectives. Keeping track of the genders and numbers through it all can be a real feat. But mastering the complex 'iDaafa allows you to write much more concisely and correctly. This chapter familiarizes you with the rules of the 'iDaafa of the Arabic language. Oh, there it is! This chapter’s goal is to present Arabic’s 'iDaafa rules!

Showing Possession and Relationship with 'iDaafas

In English, you describe possession or relationship using apostrophes; you use either ‘s or s’. Or you can use the preposition of. For example, the phrase the man’s office means the same thing as the office of the man.

In Arabic, however, possession is indicated a bit differently. You use the 'iDaafa construction to express how one noun either possesses another or is in some kind of relationship with another. You describe possession or relationship by putting the two words next to each other with no words in between them. Here’s an example: مَکَتَبُ الْرَجُلِ (maktab ar-rajul), which means the man’s office (or literally, office the man).
If you’re *vowelling* your text fully (meaning you add the formal final vowels that indicate the noun’s case), the second member of the 'iDaafa chain will be in the genitive, like this: مَكْتَبٌ الرَّجُلِ (maktab ar-rajuli; the man’s office).  

*Note:* I’m not going to include all the formal final vowels in this chapter because the main lesson to take away here is the order of the words and agreement of the words in gender and state of definiteness. If you want to master the case endings, consult Chapter 4.

---

**Tracking multiple words in an 'iDaafa**

Adding multiple members to your 'iDaafa is just a matter of, well, piling them on. But keep in mind that every time you add a new word to the 'iDaafa, you’re indicating that the added word is somehow connected to the one before it. However, if there are three words in the 'iDaafa, you aren’t saying that all three are necessarily related to one another; you’re just saying that each is related to the word on either side of it.

Arabists sometimes call the first word in an 'iDaafa the head of the 'iDaafa. It’s really the topic being discussed in the sentence. One inviolable rule about the Arabic 'iDaafa is that the first word can never take the اَلُّ (’alif laam). If the second word is definite, either being a noun with the اَلُّ (’alif laam), a proper name, or a noun with a possessive pronoun suffix, the whole 'iDaafa is translated as if both members are definite.

To help you grasp the 'iDaafa concept, I start by showing you two-word 'iDaafas, and then I build from there. You’ll frequently need to create even longer 'iDaafas than those with two words, such as to render the phrase *Arabic’s* 'iDaafa rules. But you need to be comfortable with two-word 'iDaafas before moving on to three (or four or five).

---

**Two-word 'iDaafas**

A two-word 'iDaafa expresses possession of one noun over just one other noun. Here’s a two-word 'iDaafa that expresses actual ownership:

**بَيْتُ الرَّجُلِ** (bayt ar-rajuli; the house of the man or the man’s house)

Even though the 'iDaafa expresses possession, you can also use it to describe relationships of one person with another. We do the same thing in English. Here are examples of two-word 'iDaafas describing relationships:

**زَوْجَةُ الرَّجُلِ** (zawjat ar-rajuli; the wife of the man or the man’s wife)

**مُدِيرَةُ الرَّجُلِ** (mudiirat ar-rajuli; the boss of the man or the man’s boss)

---

**Three-word 'iDaafas**

Adding a third word to an 'iDaafa doesn’t imply that the first and third words have anything to do with each other (apart from the fact that each is somehow connected to the second word). Each item is only in charge, so to speak, of the item in front of it. Check out this three-word 'iDaafa as an example:

**سَيَارَةُ مُدِيرِ صَديقي** (sayyarat mudiir Sadiiqii; my friend’s boss’s car)
You may go further to write, for instance, *My friend’s boss’s car is red.* In the course of the ‘*iDaafa*, you discover who owns the car — namely, the boss. You also understand something about the man who owns the car — that he’s my friend’s boss.

### ‘iDaafas with more than three words

If you’re writing complex sentences in Arabic, you may need to write an ‘*iDaafa* that has more than three words. Pushing the envelope just a bit further, here’s an example to show you how to make an ‘*iDaafa* grow to impressive lengths:

*Wajadtu ‘aalat a-taSwiir taHt maq3adi sayyaarati ibni khaali.* *I found the camera under the seat of my cousin’s car.*

There’s no separate word in Arabic for the English *cousin*. Instead, you write *son/daughter of uncle/aunt*. So the word *cousin* is already starting out as an ‘*iDaafa*. When you put the possessive suffix on a word, that possessive suffix is in an ‘*iDaafa* with the noun it owns. (If you’re rusty on the use of the possessive suffixes, you can find a review of them in Chapter 2.) Add all this together and the previous sentence contains a whopping five-word ‘*iDaafa*:

*Maq3adi sayyaarati ibni khaali; seat – car – son – uncle – my*

Keeping these levels of ownership straight is difficult for English speakers. And because Arabic sentences frequently include ‘*iDaafas* longer than three members, mastering what relationships an ‘*iDaafa* does and doesn’t imply is crucial to effective reading and writing in Arabic.

Now it’s your turn to create some ‘*iDaafas*. Each of the following English phrases requires an ‘*iDaafa* to express it in Arabic. Put these ‘*iDaafas* in the correct order (in Arabic). The sample practice question shows you a three-word ‘*iDaafa*, but in the exercise I start you out slow with a few two-word ‘*iDaafas* before moving on to the more difficult ones.

### Practice

**Q.** the color of her company’s building

**A.** *lawn binaayat sharikatihaa* (لَون بِنايَة شَرِيكَتِهَا)

1. my wife’s job ____________________________________________________________

2. the book’s author _____________________________________________________

3. his friend’s house ______________________________________________________

4. the door of the doctor’s office __________________________________________

5. his mother’s friend’s phone _____________________________________________

6. the university library’s director __________________________________________

---

*Chapters 7: Making Connections: Mastering the ‘iDaafa Construction*
7. the city's transportation system

8. the radio program’s announcer

9. the beauty of the summer season

10. the importance of my father’s opinion

---

Crafting complex 'iDaafas using the different noun cases

'iDaafas aren’t just isolated phrases telling you how nouns possess each other. An 'iDaafa can be the subject of a verb. It can be the direct object. An 'iDaafa can even follow a preposition. When an 'iDaafa appears in one of these grammatical positions, it will only be the head of the 'iDaafa that changes its grammatical case. (I discuss the grammatical cases of nouns in Chapter 4.) In this section, I show you some multiple member 'iDaafas in the nominative, accusative, and genitive cases.

No matter how long your 'iDaafa is, every word that follows the head of it will be in the genitive case. But if the head of the 'iDaafa is the subject of a verb or is the subject of an equational sentence, it should be in the nominative case. (See Chapter 2 for more on equational sentences.) To help you visualize how the case of the head of the 'iDaafa changes, I underline the head of the 'iDaafa in all my examples.

Here are two 'iDaafas in nominative case. The first example is an equational sentence. The second is a verbal sentence:

1. كتاب أمي طويل جداً.
   (kitaabu ‘ummi Tawiilun jiddan. My mother’s book is too long.)

2. دُهَّبَتْ بُنْتُ خالِتِي زُوَّجَتْ إِلَى أَورُوبَا.
   (dhahabat bintu khaalati zawjatika ‘ilaa ‘uuruubaa. Your wife’s cousin went to Europe.)

Similarly, when the head of an 'iDaafa is the object of a verb, it’s in the accusative case, and all the other members that follow it are in the genitive. Take a look at this example, which shows an accusative as the first word in an 'iDaafa:

3. قُرُّتَ مَجْمُوعَةً مَقالَاتٍ مَدْرِسِي.
   (qara’tu majmuu3ata maqaalaati mudarrisii. I read my teacher’s essay collection.)

The only way the head of an 'iDaafa can itself be genitive is when the 'iDaafa is governed by a preposition. Here’s an example with the 'iDaafa head underlined:

4. أمي المدير إلى حفل تفَاعِل المَوظَّف.
   (’ataa al-mudiiru ‘ilaa Hafi taqaa3udi al-muwaDHDHafi. The director came to the employee’s retirement party.)
There are just five nouns that have irregular forms for their three cases when they appear in an 'iDaafa. For your reference, Table 7-1 shows those five nouns and their forms.

<table>
<thead>
<tr>
<th>Table 7-1</th>
<th>Common Nouns Having Irregular Forms in an 'iDaafa</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Nominative</td>
</tr>
<tr>
<td>father</td>
<td>أبو ('abuu)</td>
</tr>
<tr>
<td>brother</td>
<td>أخو ('akhuu)</td>
</tr>
<tr>
<td>father-in-law</td>
<td>حموم (Hamuu)</td>
</tr>
<tr>
<td>owner of</td>
<td>ذو (dhuu)</td>
</tr>
<tr>
<td>mouth</td>
<td>فو (fuu)</td>
</tr>
</tbody>
</table>

When a noun with a masculine sound plural ending is at the head of an 'iDaafa, you drop off the final ن (nuun) of the suffix. (To study all the sound plural endings, see Chapter 18.) Here are two examples:

\[
\text{كأن مُؤَسِّسَة الجريدة مَشْغُولاً بالِيَوم.} \\
\text{kaana muraasiluu al-jaririnda mashghuullina al-yawm. The newspaper correspond-} \\
\text{ents were busy today.)} \\
\text{أَعْتَقَدْ إِن مَدَرِّسٍ المَدْرَسة مُمَنَّأَرٌ.} \\
\text{‘a3taqidu ‘inna mudarrisii al-madrasa mumtaaaziinu. I think that the school’s } \\
\text{teachers are excellent.)}
\]

**Including Adjectives in Your Complex 'iDaafas**

Knowing how to put many words together in lengthy 'iDaafas is a good starting point, but wouldn’t it be nice to be able to describe the words in your 'iDaafa with adjectives as well? If you answered with a resounding “yes!” you’ve come to the right place. In this section, I show you the rules for adding adjectives to your 'iDaafas.

**Looking at 'iDaafas with single adjectives**

Adjectives in Arabic ordinarily follow the words they describe. (Chapter 6 covers adjectives in detail.) Here’s an example showing how the two words usually appear together:

\[
\text{السَّبِاَرَة السَّرِيِّعَة (as-sayyaara as-sarii3a; the fast car)}
\]
However, an adjective isn’t allowed to interrupt the flow of the 'iDaafa. For this reason, if you want to describe a word in an 'iDaafa, you must put the adjective after the 'iDaafa itself. The adjective still needs to agree with its noun in gender, number, and definiteness. Here’s a simple 'iDaafa with a single adjective describing the first word in the 'iDaafa:

In this example, ﺍﻟﻤﹸﻔﻴﺪ (al-mufiid; useful) is an adjective that’s further describing the advice, not the grandmother. Notice that the word ﻥُﺼْﺢ (nuSH; advice) itself doesn’t have the ﺍﻝ (‘alif laam). It can’t have the ﺍﻝ because it’s the head of an 'iDaafa. The next word in the 'iDaafa, ﻗﺎﺋِدُي (jaddatii; my grandmother), is definite because it has the possessive pronoun suffix. If the final word in an 'iDaafa is definite, the whole 'iDaafa is definite. For that reason, the adjective describing the word ﻥُﺼْﺢ (nuSH) has to have the ﺍﻝ (‘alif laam).

The only partial exception to the rule that nothing can interrupt the flow of the 'iDaafa is when you use demonstrative adjectives, such as this or that. Because demonstrative adjectives usually come before the noun in Arabic, they can come between two words in an 'iDaafa. Here’s an example:

However, if the demonstrative adjective describes the head of the 'iDaafa, it follows the 'iDaafa, as you see here:

Translate the following phrases from English into Arabic.

Q. that street’s dangerous intersection

A. ﻣُفْﺗَرِقُ ذَﻟِكِ ﺍﻟﺸﱢﺎﺭِﻋ (muftaraq dhaalika-sh-shaari3 al-khaTiir)

11. the book’s final page

12. the car’s big engine

13. this man’s courage

14. the doctor’s clean clinic

15. the color of the tall tree

16. my favorite class’s teacher

17. the senator’s final votes

18. the contract’s lengthy negotiations

19. a plate of tasty food
Handling 'iDaafas with multiple adjectives

After reading the heading for this section, you’re probably thinking: “How can I possibly use an adjective to describe both nouns in an 'iDaafa?” I’m glad you asked! In this section, I demonstrate how you can add multiple adjectives to complex 'iDaafas by expanding on a previous example about my grandmother. In this example, the adjective describing her advice comes after the 'iDaafa itself:

nuSH jaddatii al-mufiid; my grandmother’s useful advice

However, I can use an adjective to describe my grandmother instead of an adjective describing her advice. In this case, the adjective still follows the whole 'iDaafa, as in this example:

nuSH jaddatii al-laTiifa; my kindly grandmother’s advice

If I want to add one adjective describing the advice and another adjective describing my grandmother, the rule is to add the adjectives — in reverse order — after the 'iDaafa. In other words, the adjective describing my grandmother comes first, because grandmother is the final word in the 'iDaafa. Then I add the adjective describing her advice. Look at how the adjective for the last word in the 'iDaafa comes before the adjective for the first word:

nuSH jaddatii al-laTiifa al-mufiid; my kindly grandmother’s useful advice

If your 'iDaafa has three or more words in it, you continue to add the adjectives — in reverse order — after the 'iDaafa, as in this ridiculously complicated example:

mudilir maktabat al-jaami3a al-amriikiyya al-lughawiyya al-’awwal; the first director of the American university’s linguistic library

Constructing an 'iDaafa as long and complicated as the preceding example isn’t fun for anyone, even native writers. To avoid making an 'iDaafa this long in the first place, you have the option of breaking up the 'iDaafa with a preposition. Here’s the same long example, but this time it’s made a bit more manageable by splitting the subject off the 'iDaafa with a preposition:

al-mudiir al-’awwal li-maktabat aljaami3a al-amriikiyya al-lughawiyya; the first director of the American university’s linguistic library or the first director to the American university’s linguistic library

You’re hosting a working luncheon with representatives from several companies and government entities. The place settings contain placards with the titles of several important guests. The placards were translated from English into Arabic by a co-worker who hasn’t yet mastered the complex 'iDaafa construction with adjectives. To
save your company some embarrassment, indicate whether each of the following is correct or incorrect, and then make the corrections as needed. They range in difficulty from one adjective to three adjectives in an 'IDaafa:

0. الرَّئِيسُ الْوَلَايَاتِ المُتَّحَدَةِ (ar-ra‘iis al-wilaayat al-muttaHida; the President of the United States)

A. Incorrect. The placard should have been written like this: رَئِيسُ الْوَلَايَاتِ المُتَّحَدَةِ (ra‘iis al-wilaayat al-muttaHida)

20. السَّفِيرُ السَّابِقُ لِلْأَرْدُنِ (as-safiir as-saabiq al-urdun; the Former Ambassador of Jordan)

21. مَديِرُ الْمَرْكَزِ الْتَرْبَيْةِ الإِقْلِيمِيِّ الرَّئِيِسِيَّ (mudiir al-markaz at-tarbiya al‘iqliimii ar-ra‘iisii al‘ibtidaa‘iyya; the Chief Director of the Regional Secondary Education Center)

22. نَائِبُ الرَّئِيسِ لِإِدَارَةِ الْتَنْمِيَةِ الإِقْتِصَادِيَّةِ (na‘ib ar-ra‘iis li‘idaarat at-tanmiya al‘iqtiSaadiyya; the Vice President for the Economic Development Administration)

23. وَزيرةُ الدَّفَاعِ الْوَطَنِيَّةِ (waziirat ad-difaaq al-waTaniyya; the National Defense Minister)
Answer Key

1. وظيفة زوجتي (waDHiifat zawjatii)
2. كاتب الكتاب (kaatib al-kitaab)
3. بيت صديقته (bayt Sadiiqihi)
4. باب مكتبة الطبيب (baab maktab aT-Tablib)
5. هائفة صديقة أمها (haatif Sadiifat 'ummihi)
6. مدير مكتبة الجامعة (mudiir maktabat al-jaamia3a)
7. نظام نقل المدينة (niDHaam naql al-madiina)
8. مذيع برنامج الراديو (mudhii3 barnaamaj ar-raadiyu)
9. جمال فصل الصيف (jamaal faSl aS-Sayf)
10. أهمية رأي أبي (‘ahammiyat ra’y ‘abii)
11. صفحه الكتاب الأخيرة (SafHat al-kitaab al-’akhiira)
12. محرر السيارة الكبير (muHarrik as-sayyaara al-kabiir)
13. سجاعة هذا الرجل (shaja3at haadhaa-r-rajul)
14. عبادة الطبيب النظيفة (3iyaadat aT-Tabliib an-naDHiifa)
15. نون الشجرة الطويلة (lawn ash-shajara aT-Tawiila)
16. مدرس صفى المفضل (mudarris Saffii al-mufaDDal)
17. أصوات الشيخ الأخيرة (‘aSwaat ash-shaykh al-’akhiira)
18. مفاوضات العقد الطويلة (mufaawaDaat al-3aqd aT-Tawiila)
19. صحن طعامن لذيذ (SaHn Ta3aam ladhiidh)
Incorrect. The placard should have been written like this: سَفِير الْأَرْدن السَّابِق (safiir al-’urdun as-saabiq).

Incorrect. The placard should have been written like this: مُدِير مْرَكِز التَّرْبِيَّة الإِبْنِدَائِيَّة الإِفْلِيْمِي الرَّئِيْسِي (mudiir markaz at-tarbiya al-’ibtidaa‘iyya al-’iqlimii ar-ra’iisii).

Correct.

Incorrect. The placard should have been written like this: وَزِيْرَة الدِّفَاع الْوَطَّنِيّ (waziirat ad-difaa3 al-waTanii).
A good writer goes beyond just writing a subject, verb, and object. The world of subordinate clauses allows you to give important background on a topic, all within a single sentence. The relative clause lets you add levels of detail in your background explanation that go way beyond what adjectives alone can achieve.

Like other skills you acquire by working through this book, the use of the relative clause in Arabic distinguishes you as an accomplished writer. In this chapter, you discover the essential tricks for forming relative clauses correctly and precisely in Arabic.

**Getting to Know the Singular Relative Pronoun**

A *relative clause* is a secondary clause that tells you information about a word in the main sentence. Here’s an example of a sentence with a relative clause in English: *The man, who just called me, is my brother.* The main sentence informs the reader that *The man is my brother.* The relative clause gives information about the man in the form of sub-clause.

Before you can compose a relative clause, you need to understand the components that make them up and the situations in which to include them. So in this section, I cover the elements of a relative clause and then discuss the masculine and feminine singular relative pronouns. At the end of the section, I discuss relative pronouns and the parts of speech. And, as usual, I include practice questions to help you sharpen your skills.
Dissecting relative clauses

The relative clause is always about someone or something in the sentence. The word being described further in this way is called the **antecedent**. As a rule, the antecedent comes before the relative clause and ordinarily is the word that immediately precedes the relative clause.

When you describe someone or something, you frequently use an adjective. You may, for instance, say that a man you met is “tall.” Perhaps you want to describe the man even further and add that he’s “tall and angry.” Adjectives can take you a long way toward describing physical and other attributes.

Sometimes, however, what you want to describe to your reader isn’t a visible attribute, but a fact concerning your topic. You may want to describe important background information to help your reader or listener understand the topic better. For instance, you may write that you met “the tall and angry man who came to the party with Fatima.” This information may be significant if a second tall and angry man came to the party with Dalia!

The way you convey background information in this way is through a relative clause. If you remove the whole relative clause, what’s left over is a separate and grammatical sentence. Here’s an example in Arabic where the relative clause comes at the end of the sentence:

الليلة الماضية التقت بالرجل الطويل والعصبان الذي أتى إلى الحفلة مع فاطمة

(الليلة الماضية التقت بالرجل الطويل والعصبان الذي أتى إلى الحفلة مع فاطمة.)

Here’s the same sentence without the relative clause. As you can see, it’s still a complete thought:

الليلة الماضية التقت بالرجل الطويل والعصبان

(الليلة الماضية التقت بالرجل الطويل والعصبان.)

A relative clause can come in the middle of the sentence as well. Here’s a sentence with the relative clause imbedded inside:

الرجل الطويل والعصبان الذي أتى إلى الحفلة مع فاطمة أخبرني بكمة

(الرجل الطويل والعصبان الذي أتى إلى الحفلة مع فاطمة أخبرني بكمة.)

You can remove the relative clause from the middle and still have a full sentence:

الرجل الطويل والعصبان أخبرني بكمة

(الرجل الطويل والعصبان أخبرني بكمة.)
Use *الذي* (alladhii; who/that) or *التي* (allatii; who/that) only when the antecedent is a definite noun — that is, it has the ال (‘alif laam; the), a possessive suffix, or it’s the head of an ’I’Daafa that’s definite. Arabic has a slightly different way of forming relative clauses for indefinite antecedents (see the later section “Looking at Other Relative Clauses” for details).

**Masculine singular relative الذي (alladhii)**

Arabic has separate relative pronouns for the different genders and numbers of potential antecedents. When the antecedent is a masculine singular noun in the definite state, whether it’s a person or an object, use the pronoun الذي (alladhii; who/that). Check out the following examples:

الفيلم الذي شاهدناه أمّي كان رائعًا.
*(al-film alladhii shaahadnaahu 'amsi kaana raa'i3an. The film that we saw yesterday was tremendous.)*

الرجل الذي أتصل بي أمّي قال لي نفس الشيء.
*(ar-rajul alladhii ittaSala bil 'amsi qaala lii nafsa-sh-shay'. The man who called me yesterday told me the same thing.)*

**Feminine singular relative التي (allatii)**

When the antecedent in a relative clause is a feminine singular definite noun, use the relative pronoun التي (allatii; who/that). Here are three examples of sentences with feminine singular definite antecedents:

أمي التي أتصل بها يو микًا ما نزال نقلق عليه.
*(‘ummi allatii ’attaSilu biha yawmiyyan maa tazaalu taqlaalu 3alayya. My mother, whom I call daily, still worries about me.)*

اللغة التي تدرسها هي مفيدة جدا في الشرق الأوسط.
*(al-lughatu allatii tadrusuhaa hiya mufiidatun jiddan fii-sh-sharqi -l’awsaTi. The language that you are studying is very useful in the Middle East.)*

Suppose you’re writing an e-mail describing your vacation to a friend. Depending on the gender of the antecedent, write the correct form of the relative pronoun on the lines that are provided to you.

Q. الرسالة __________ *أكتبها* لكل *قهري* عن مطلعنا.
   *(ar-risaalatu _____ 'aktubuhaa lakaa fa-hiya 3an 3uTlatinaa. The letter _____ I write to you is about our vacation.)*

A. الرسالة __________ *أكتبها* لكل *قهري* عن مطلعنا.
   *(ar-risaalatu allatii 'aktubuhaa lakaa fa-hiya 3an 3uTlatinaa. The letter that I write to you is about our vacation.)*
### Part II: Becoming a Master at Using Nouns

| 1.   |   | (al-3uTlatu ______ intaDHarnaahaa waSalat 'akhiiran. The vacation that we were waiting for finally arrived.) |
| 2.   |   | (nusaafira ma3a jaarinaa _______ katabtu 3anhu fii risaalatii as-saabiqa. We are traveling with our neighbor about whom I wrote in my previous letter.) |
| 3.   |   | (as-sayyaaratu _______ ‘ajjarnaahaa hiya kabiiratun wa-jadiidatun. The car that we rented is big and new.) |
| 4.   |   | (waSalnaa sarii3an 'ilaa-l-funduqi _______ ikhtaarahu zawjii lanaa. We arrived quickly at the hotel that my husband chose for us.) |
| 5.   |   | (ghurfatunaa _______ nastaTii3u 'an naraa minhaa ash-shaaTi’a hiya naDHiifa jiddan. Our room, from which we can see the beach, is very clean.) |
| 6.   |   | (sa-‘aktubu min jadiid 3an al-makaani _______ qarrarnaa bi-‘an nazuurahu ghadan. I will write again about the place that we have decided to visit tomorrow.) |

| al-mukliSa, maryam; Sincerely, Maryam.) |
Singular relative pronouns and parts of speech

A relative pronoun in Arabic can appear anywhere a noun might. It could be the subject of its own verb. You could have a relative pronoun as the object of a verb within a relative clause. It also could be governed by a preposition.

The relative pronoun presents a situation in which the normally complicated Arabic language is considerably easier than English. Arabic has preserved case endings for almost all nouns, while English nouns are invariable. Arabic relative pronouns, however, are nondeclinable (meaning, they have a single form that can stand for the subject or object within a relative clause). You use the forms اﻟﱠﺪﻱ (alladhii; who/that) or اﻟﱠﺘﻲ (allatii; who/that) regardless of whether the relative pronoun is the subject or object in the relative clause. English, by contrast, has one form for the nominative, who, another for accusative or after prepositions, whom, and even a genitive relative pronoun, whose.

Relative pronoun as a subject

No matter what role the antecedent plays in the sentence, the relative pronoun describing it can be the subject of the relative clause. Here’s a relative clause with the relative pronoun as a subject:

أحب الكاتب الذي كتب ذلك الكتاب.

('uHibbu al-kaatiba alladhii kataba dhaalika-l-kitaaba. I love the author who wrote that book.)

Relative pronoun as a direct object

An antecedent can be the object within a relative clause. Whenever a relative pronoun is the object, you then have to add an object pronoun either directly to the verb or to a preposition required by the verb. This produces the Arabic equivalent of saying “The man whom I met him” or “His book that he wrote it.” This certainly does sound odd to an English-speaking person. But if you form a relative clause and forget to use these object pronouns, a more advanced reader of Arabic will certainly notice their absence.

The extra pronoun you add when the relative pronoun is an object or is governed by a preposition is an essential part of a fully grammatical relative clause in Arabic. Grammarians call the object pronoun used in this way a resumptive pronoun, meaning it resumes speaking about the antecedent.

The following are two examples of relative pronouns that are direct objects. I underline the resumptive pronoun in the Arabic so you can become accustomed to its use:

الرجل الذي التقت به في الحفلة كان طويلا وغضبان.

(ar-rajulu alladhii iltaqaytu bihi fi-l-Haflati kaana Tawiilan wa-ghaDbaaana. The man whom I met at the party was tall and angry.)

قرأ الكتاب الذي كتبه عن هذا الموضوع.

(qara’tu kitaabahu alladhii katabahu 3an haadhaa-l-mawDuu3i. I read his book that he had written on that subject.)
**Relative pronoun governed by a preposition**

In English, relative pronouns can be governed by a preposition. Here are two examples in English:

- *The friend about whom I told you is getting married soon.*
- *She sent a letter to the uncle from whom she received the present.*

By contrast, Arabic doesn’t put the preposition before the relative pronoun. Instead, you move the prepositional phrase into the relative clause and use the object suffix. Here are Arabic versions of the preceding English example sentences. I translate them into literal English here to show you where to put the prepositions. I’ve underlined the prepositions with their object suffixes so you can see how they compare to the English:

(aS-Sadiiqu alladhii 'akhbartuka 3anhu sawfa yatazawwaju qariiban. *The friend who I told you about him* is getting married soon.)

(arsalat risaalatan lil-khaali alladhii HaSalat 3ala-l-hadiyati minhu. *She sent a letter to the uncle who she received the present from him.*)

**Relative pronoun in the genitive**

The relative pronoun in Arabic doesn’t have a genitive case, but you can still use a relative clause to describe an antecedent that owns something. In English you use *whose* or *of whom* to form a relative clause describing ownership. Here’s an example in English: *The colleague whose proposal we are considering wants to speak before the group.*

To express this sentence in Arabic, use the relative pronoun and put the possessive suffix on the object within the relative clause. Here’s an Arabic version of the preceding example sentence. I’ve underlined the possessive suffix to show you how Arabic creates a relative pronoun in the genitive:

(az-zamiilu alladhii nahtammu bi-'iqtiraahiHihi yuriidu 'an yatakallama 'amaama al-lajnati. *The colleague who we are considering his proposal wants to speak before the committee.*)

As you become more experienced with picking the correct relative pronoun for each gender, you can take it to the next level by adding the resumptive pronouns. Here’s your chance to show off what you know by using these skills! Translate each of the following sentences into Arabic. Any words you don’t know are in the dictionary at the back of the book.

**Q.** The room I entered was very dark.

**A.** (al-ghurfatu allatii dakhaltuhaa kaanat muDHlimatan jiddan.)
7. The letter that I sent to my friend arrived after only two days.

8. I wanted to study with the professor whose specialty is in Arabic.

9. The pen with which he signed the contract was a gift from his grandfather.

10. They submitted their proposal to the company that has a branch in Qatar.

11. She looked for the solution that would lead to success.

12. The sister with whom I visited Jordan wants to return there soon.

13. He wore the shirt in which he got married.

### Examining Relative Clauses with Plural Antecedents

A relative clause can have a plural noun as its antecedent. Arabic has plural relative pronouns for such occasions. One peculiar grammatical trait of Arabic, however, is that the only time you actually use a plural relative pronoun is when the antecedent is both plural and animate. An *animate* object is something alive, either a human or even an animal. An *inanimate* object, by contrast, is something that isn’t living, such as a book or a sofa. The dual relative pronouns are the only ones that have different forms depending on the case of the pronoun. For your reference, Table 8-1 shows the singular and plural forms of the relative pronoun.

<table>
<thead>
<tr>
<th>Table 8-1</th>
<th>Singular and Plural Forms of the Relative Pronoun</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Singular</strong></td>
<td><strong>Plural</strong></td>
</tr>
<tr>
<td>Masculine</td>
<td></td>
</tr>
<tr>
<td>(alladhii; who, whom, that)</td>
<td>(alladhiina; who, whom, that)</td>
</tr>
<tr>
<td>Feminine</td>
<td></td>
</tr>
<tr>
<td>(allatii; who, whom, that)</td>
<td>(allawaati; who, whom, that)</td>
</tr>
</tbody>
</table>
**[alladhiina](alladhiina)** with animate plurals

Because you use the masculine plural relative pronouns for any group of humans that’s either all male or (as is more common) of mixed gender, the masculine plural relative is overwhelmingly the most common plural form. All the rules you observe with the singular relative forms apply to its use. The antecedent has to be definite, plural, and animate. Consider the following examples:

المُرَاسِلُونَ ﺍﻟَّذِينَ كَتَبُوا هَذِهِ ﺍﻟَّمَقالَةَ سَيَفُوُﺯُونَ بِبِجَائِزةً.

(al-muraasiluuna alladhiina katabuu hadhihi-l-maqaala sayafuuzuuna bi-jaa'izatin. The correspondents who wrote that article will win an award.)

سَلَامُنَا عَلَى ﻣُرَايِزَةَ ﺍﻟَّذِينَ ﺡَضَرُوا ﺍﻟْمُحاضرَةُ

(sallamnaa 3ala kull-l-zuwwaari alladhiina HaDaruu al-muHaaDarata. We greeted all the visitors who attended the lecture.)

You can additionally modify many plural nouns with the word **كُلَّ** (kull; all). Here is an example:

رأَيَ الرَّأِيسُ ﻟِلَّزْوَارِ

(ra'aa ar-ra'iisu kull-l-zuwwaari. The president saw all the visitors.)

Even though technically the plural noun is in 'idaa' with **كُلَّ** (kull) (a singular noun), you won’t see grammatical agreement between **كُلَّ** (kull) and relative pronouns. Instead, Arabic intuitively uses plural relative pronouns. Here’s an example of a relative clause with **كُلَّ** (kull). Note the use of the plural relative pronoun (underlined):

رأَيَ الرَّأِيسُ ﻟِلَّزْوَارِ ﺍﻟَّذِينَ ﻋَلَى ﻛُلَّ ﺍﻟَّزْوَارِ ﺗُحْضُرُوا إِلَى الْمُحاضَرَةٍ

(ra'aa ar-ra'isu kull-l-zuwwaari alladhiina Hadaruu 'ilaa-l-bayti- al-'abyaDi. The president saw all the visitors who came to the White House.)

**[allatii](allatii)** with inanimate plurals

When you form a relative clause with inanimate plurals as the antecedent, use the feminine singular relative pronoun **أَلْتَيْ** (allatii; who, whom, which, that). If you need to use resumptive pronouns in these sentences, make sure they’re feminine singular as well. Here are two examples:

بَاغَ ﺍﻟْبَاعَةُ ﻣُرَأَيِزَاتُ ﺍﻟَّذِي أُنْتَجَتُهَا ﺍﻟْمَصْنَعُ

(baa3a al-baasatu kull-l-muntajaati allatii 'antajahaa al-maSna3u. The salesmen sold all the products that the factory produced.)

يُفْضِلُ الْأَوْلَادُ ﺍﻟْكُتِبَ آﻟْتَيْ ﻓِيهَا الصُّورُ

(yufaDDilu al-'awlaadu alku'tuba allatii fiihaa aS-Suwaur. The children prefer the books that have pictures.)
In the following sentences, translate and write the sentences using the exact type of plural relative pronoun necessary.

Q. The writers who wrote the stories were my friends.

A. الكُتَّابُ الَّذِينَ كَتَبُوا الْقُصُصَ كَانُوا أُصْدِقَائِي.

14. The students who heard the lecture learned much.

15. He denied the rumors about which the reporter asked.

16. The president praised the women who founded that college.

17. The doctor examined all the patients who came to the hospital.

18. Our company is improving the products that it sells.

Looking at Other Relative Clauses

The beginning of this chapter shows you how Arabic handles relative clauses when the antecedent is a definite noun. But some relative clauses have indefinite antecedents or, for that matter, no stated antecedent at all. In the following sections, I show you how to write these kinds of relative clauses.

Indefinite antecedents in relative clauses

You form a relative clause with an indefinite antecedent exactly the same way you form a relative clause with a definite antecedent, except you don’t use the relative pronoun. Because a relative pronoun can only have a definite antecedent, you leave the relative pronoun unstated in Arabic. (See the earlier section “Getting to Know the Singular Relative Pronoun” for details on how to form a relative clause with a definite antecedent.)
Here are examples of indefinite antecedents in relative clauses. The English translations have relative pronouns, but there’s no stated word in the Arabic for the relative pronoun:

(کَتَبْتُ رسالةً لَّمْ أُرْسِلْهَا.
(katabtu risaalatan lam 'ursilhaa. I wrote a letter that I never sent.)

(بَقِيَتْ فِي فُندُقٍ اقتُرِحَهُ صَديقِي عَلَيْ.
(baqaytu fii funduqin iqtaraHahu Sadiiqii 3alayya. I stayed in a hotel that my friend had suggested to me.)

**Topical antecedents in relative clauses**

Sometimes the antecedent in a relative clause isn’t a noun that’s stated explicitly in the sentence. The very topic of a sentence can become the unstated antecedent. Luckily, each of these situations has a relative pronoun that tells you when to expect a relative clause without a stated antecedent. To help you spot the relative pronouns in this section, I underline them in the Arabic and the English.

**Who**

The particle ﻣَﻦْ (man; who) can serve as a relative pronoun in cases where you want to form a relative clause referring to a previously unmentioned human or animate object. Here’s an example of a sentence using this particle:

(كَانَ فِي الجُمْهُورِ ﻣَﻦْ بَحْثَ عَنْ إِجَابَتِهِ.
(kaana fii-l-jumhuuri man baHatha 3an 'ijaabatin. There was in the crowd someone who sought an answer.)

**What**

The word ﻣَأْ (maa; what) stands as a relative pronoun for indefinite objects that are unstated. Consider this example:

(دَعَمْتُ ﻣَا كَتَبَ الصحِّي.
(da3amtu maa kataba aS-SuHufiyyu. I supported what the reporter wrote.)

**Which**

The word مَمْا (mimmaa; which), which is the contraction of ﻣَﻦْ (min; from) and ﻣَأْ (maa; what), can serve as a relative pronoun. It stands for concepts or ideas raised within the first part of the sentence. Check out the following example:

(قَرَرَ أنْ يَدْرِسَ فِي بَارْسِ مَا أَحْزَنَ أُمَهُ.
(qarrara 'an yadrusa fii-baariis mimmaa 'alHzana 'ummahu. He decided to study in Paris, which saddened his mother.)
For each of the sentences in this exercise, look at the relative pronouns provided, select the one that grammatically fits, and write it in the blank.

Q. استمعنا للشيوخ ______ تكلموا معنا (istama3naa li-sh-shuyuukhi ______ takallamuu ma3anaa. We listened to the Senators ______ spoke with us.)

A. استمعنا للشيوخ الذين تكلموا معنا (istama3naa li-sh-shuyuukhi alladhiina takallamuu ma3anaa. We listened to the Senators who spoke with us.)

19. رأيت هنالك ______ قال لي قصة. (ra’aytu hunaaka ______ qaala lii qiSSatan. I saw there someone ______ told me a story.)

20. لم أحصل على رسالتي من حبيبتي ______ أفاقني. (lam ‘aHSul 3alaa risaalatin min Habiibatii ______ ‘aqlaqani. I didn’t get a letter from my girlfriend, ______ worried me.)

21. لا أستطيع أن أفهم ______ حدث بينهما. (laa ‘astaTii3u ‘an ‘afhama ______ Hadatha baynahumaa. I can’t understand ______ happened between those two.)

22. النساء ______ وجدها الولد أنقذته من الموت. (an-nisaa' ______ wajadna al-walada ‘anqadhnahu mina-l-mawti. The women ______ found the boy saved him from death.)

23. الأماكن ______ زرتها كانت جميلة. (al-'amaakin ______ zurtuhaa kaanat jamiilatun. The places ______ I visited were beautiful.)

24. الشخص ______ علمني الكثير كان أبي. (ash-shakhSu ______ darrasani al-kathiira kaana ‘abii. The person ______ taught me the most was my father.)
Part II: Becoming a Master at Using Nouns

**Answer Key**

| 1.   | (al-3uTlatu allati intaDHarnaahaa waSalat ‘akhiiran.) |
| 2.   | (nusaafiru ma3a jaarinaa alladhi katabtu 3anhu fii risaalatii as-saabiqa.) |
| 3.   | (as-sayyaaratu allatii ‘ajjarnaahaa hiya kabiiratun wajadiidatun.) |
| 4.   | (waSalnaa sari3an ‘ilaa-l-funduqi alladhi ikhtaarahu zawjii lanaa.) |
| 5.   | (ghurfatunaa allatii nastaTii3u ‘an naraa minhaa ash-shaaTi’a hiya naDHiifa jiddan.) |
| 6.   | (sa-‘aktubu min jadiid 3an al-makaani alladhii qarrarnaah bi-an nazuurahu ghadan.) |

7.   | (ar-risaalatu allatii ‘arsaltuhaa li-Sadiiqii waSalat ba3da yawmayni faqaT.) |

8.   | (’aradtu ‘an ‘adrusa ma3a-l-’ustaadhi alladhii takhaSSuSuhu al-lughata al-3arabiyyata.) |

9.   | (al-qalam alladhii waqqa3a al-3aqda bihi kaana hadiyatun min jaddihi.) |

10.  | (sallamu iqtiraaHahum li-sh-sharikati allatii 3indahaa far3un fii qaTar.) |

11.  | (baHathat 3an al-Halli alladhii qad yu’addii ‘ilaa-n-najaaHi.) |

12.  | (al-’ukhtu allatii zurtu al-’urdun ma3ahaa turridu ‘an tarji3a hunaaka qarilban.)
13. The boy who died there is real.

14. The students described the observations they made.

15. What they say is that, the scholars please them with the secrets of them.

16. The president of the students is considered by the students.

17. The doctors described the secrets of the patients.

18. The doctors have decided to prepare the students.

19. I saw someone who told me a story.

20. I didn’t get a letter from my girlfriend, which worried me.

21. I can’t understand what happened between those two.

22. The women who found the boy saved him from death.

23. The places I visited were beautiful.

24. The person who taught me the most was my father.
Part III

Staying Active: Forming Arabic Verbs

The 5th Wave

By Rich Tennant

"Mona's trying to form endings to Arabic verbs. This from a woman who can't form an ending to a conversation."
In this part . . .

If you like to be part of the action, this is the part for you. It’s where you find everything you need to write verbs of every size, shape, and especially, form in Arabic. The ten forms of the Arabic verb will bow to your command after you master them here. I introduce those pesky irregular verbs as well, but I show you that deep down they’re manageable, too. Discovering how to add an object to your verb helps you polish your writing skills, so I include a chapter on the object suffix. Finally, in this part, you break out of the basic world of indicative verbs and take on the task of using the subjunctive and the jussive when Arabic calls for it.
In This Chapter

- Recognizing the structure of the Arabic verb forms
- Producing the past and present of the verb forms

Every language has basic verbs to describe the actions of the world. But beyond simply using basic verbs, such as eat, run, and sleep, each language also has ways to nuance descriptions. In English, for example, you can refine verbs with prepositions, to produce statements such as eat out, run on, and sleep in. In some cases, just adding a preposition produces an idiomatic meaning quite separate from the basic verb by itself.

Similarly, Arabic has a way to change basic verbal roots to produce multiple meanings. Arabic, however, adds various prefixes, vowels, and doubled consonants to generate meanings such as to cause to do something, to seek to do something, or to be done. So in this chapter, you discover how to apply the changes that turn a verbal root into any of the different word patterns, creating various shades of meaning or even whole new verbs in the process.

Understanding the Forms of the Arabic Verb

The nine word patterns you read about in this chapter are called forms by English language linguists. These forms are usually distinguished by the use of Roman numerals, which is the convention that I use in this book. You likely became acquainted with the common Form I in your basic studies of Arabic. (If not, you can find a refresher on Form I in Chapter 2.)

An Arabic verb form is a word pattern created by the addition of extra consonants or long vowels. These extra elements, depending on the form, are added to the verbal root at the beginning of the word or in between the consonants of the verbal root.

Each of the forms has specific features that you’ll come to recognize and associate with that form. I highlight the features for you in this chapter. This treatment of the features will allow you to remember the traits that can help you recognize a given form.
In order to understand how Arabic can create different meanings through elements such as prefixes, consider by analogy a similar development in English. The English language inherited numerous verbs from Latin, and these verbs come to the language already carrying various prepositional prefixes that radically change their meanings. Nowadays we don’t even think about how some of these verbs are related to one another. Words have specific meanings for us in English today that aren’t readily apparent from their etymologies alone.

For example, from Latin *capere*, meaning *to take*, we get these words: *receive, conceive, and perceive*. Similarly, from Latin *mittere*, meaning *to send*, we get *remit, commit, and permit*. And from Latin *formare*, meaning *to form*, we get *reform, conform, and perform*.

**Form II**

Form II is a common and easily recognizable verb form. As you’re about to see, there’s a visual flag on a Form II verb that helps you determine that you do, in fact, have a Form II verb on your hands. Here are the distinct traits of Form II:

- The second consonant of the root doubles, which is written by placing a ّ (shadda) over the second consonant. Only two of the Arabic verb forms will have a ّ (shadda) over the second consonant — Forms II and V. And Form V will have an additional prefix that Form II doesn’t have.
- A ـ (kasra) is added under the second consonant of the root in the present tense.
- A ُ (Damma) is added over the present tense prefixes.

Forget what the *kasra*, Damma, and shadda are? Check out Chapter 3.

**The meaning of Form II**

Form II can affect the root meaning of a verb in two ways. In some cases, it seems to imply an intensifying of the action. For example, consider the Form I verb, َّلَسْرُ (kasara), which means *to break*. The intensified Form II version of this verb is َّسْرُ (kassara), which means *to shatter/smash*. Here’s an example sentence using this verb:

(َّسْرَتْ الِرِّمَأةُ العَشَباَتُةُ الزِّجْباَتُ عَلِىِ الْأَرْضَ
(kassarat al-imra’atu al-ghaDbaanatu az-zujaajata 3alaa-l’arDi. The angry woman smashed the bottle on the ground.)
Other verbs in Form II are causative. For instance, the Form I verb, 
\( \text{دَرْسَ} \) (\text{darasa; to learn}), changes in Form II to 
\( \text{دُرْسَ} \) (\text{darrasa}), which means to teach (or to cause to learn). Check out this example sentence:

\[
\text{أَشْكُرُ الرَّجُلَ الَّذِي دَرَسَنيِ اللُّغَةَ الْعَرَبِيَّةَ}
\]
\[
(\text{ashkuru ar-rajula alladhii darrasanii al-lughata al-3arabiyyata. I thank the man who taught me the Arabic language.})
\]

You can observe the intensifying meaning of Form II when you compare Form I 
\( \text{كَسَرَ} \) (\text{kasara; to break}) to Form II 
\( \text{كَسْرَ} \) (\text{kassara; to shatter}). But that doesn’t mean you can take just any verbal root and put it into Form II with the intention of intensifying the meaning. In other words, a verbal root may occur in Form II or it may not. And if a verbal root doesn’t occur in Form II, you can’t create a new verb by putting it into Form II.

### Producing Form II

Here are some other common and important verbs that occur in Form II. Unlike 
\( \text{kَسَرَ} \) (\text{kassara; to shatter}), these verbs don’t have any apparent meaning imparted to them by Form II:

\[\text{sَلَّمَ} \quad \text{سَلَّمَ} \quad \text{ghayyara; to change}\]

\[\text{سَلَّمَ} \quad \text{سَلَّمَ} \quad \text{sallama; to greet}\]

The following are some examples using these verbs:

\[
\text{sَلَّمَ لَي عَلِي رَجَحَتْ مِن قَضْيَكَ}
\]
\[
(\text{sallim lii 3alaa zawjatika min faDlika. Please convey my greetings to your wife.})
\]

\[
\text{غَيَرَتْ رَأيي سَرِيعاً}
\]
\[
(\text{ghayyartu ra’yii sarii3an. I changed my opinion quickly.})
\]

To produce Form II, you apply the steps I show you in the introduction to this section. All Arabic verb forms take the same suffixes and prefixes to form their past and present tenses. (If you’re interested in reviewing past and present tense formation, you can visit Chapter 2.)

The following tables show the conjugation of 
\( \text{دَرْسَ} \) (\text{darrasa; to teach}), which is a Form II verb. I show the conjugation in both past and present tense.
Part III: Staying Active: Forming Arabic Verbs

Past tense conjugation for **(darrasa; to teach)**

<table>

We teach that we might learn.

The best way to internalize your production of each verb form in this chapter is to apply the steps you discover in each section immediately after you encounter them. For this exercise, I give you a pronoun and a verbal root. Write the past and present tenses of the Form II verb that correspond to the verbal root and the supplied pronoun in each item.

**Q.** `huwa` / **d-r-s**

**A.**

1. `anaa` / **s-h-d**
2. `anta` / **gh-r-b**
3. `anti` / **sh-j-3**
4. `huwa` / **kh-b-r**

Practice
5. ﻫﹺﻱﹶ (hiya) / ﺟﺪﺩ (j-d-d) ______________________________________________________

6. ﻥﹶﺤﹾﻦﹸ (naHnu) / ﻣﺪﻥ (m-d-n) ________________________________________________

7. ﺍﹶﻨﹾﺘﹸﻢ (antum) / ﻥﹶﺸﹾﻒ (n-sh-f) ____________________________________________

8. ﺛﹺﻢ (hum) / ﺪﺏﹶﻕ (T-b-q) __________________________________________________

**Form III**

These are the distinct features of Form III:

- A long a vowel — written with an ﺎﹶﻟﹺﻒ (’alif) — comes after the first consonant of the root.
- A kasra is added under the second consonant in the present tense.
- A Damma is added over the prefixes in the present tense.

To read more about the ﺎﹶﻟﹺﻒ (’alif), flip to Chapter 3.

**The meaning of Form III**

Form III generally imparts a meaning of trying to do something. For example, consider the Form I verb, ﺷﹶﻬﹺﺪﹶ (shahida; to witness). The Form III version, ﺷﺎﻫﹶﺪﹶ (shaahada) means to watch or to try to witness something. Another example is the Form I verb صﹶﺪﹶﻕﹶ (Sadaqa; to speak the truth). The Form III version of this verb is صﺎﺩﹶﻕﹶ (Saadaqa), meaning to befriend, consent.

Here are examples of sentences using these verbs:

- ﺷﺎﻫﹶﺪﹶﻧﺎ ﻓﹺﻠﻤﺎﹰ (shaahadnaa filman ‘amsi. We watched a movie yesterday.)
- ﺺﺎﺩﹶﻕﹶ ﺍﻟْـﺬﻱ ﺍﻟﺠﺎﺭﹶ (Saadaqtu al-jaara alladhii kaana 3aduwwan lii. I befriended the neighbor who used to be my enemy.)

Here are three other useful verbs that occur in Form III:

- رﺍﻑﹶﻕﹶ (raafaqa; to accompany)
- ﺷﺍﺭﹶﻙ (shaaraka; to share/take part in)
The following are some examples using these verbs:

ﺍﻟﺴﹼﻮﻕﹺ؟ﺇﻟﻰﺗﹸﺮﺍﻓﹸﻨﻲﻫﹶﻞ
(hal turaafiqunii 'ilaa-s-suuqi? Will you accompany me to the store?)

يُشَارِكُ العُمالِ فِي الضَّرْبِ
(yushaariku al-3ummaal fi-D-Darb. The workers are taking part in the strike.)

**Producing Form III**

The main distinguishing feature of Form III is the long a vowel, written with أَلِفٌ ('alif), after the first consonant of your root. It's visible in both the present and past tenses.

The following tables show the conjugation of the Form III verb تَابِعُ (taaba3a; to continue). I show the conjugation in both past and present tense.

### Past tense conjugation for تَابِعُ (taaba3a; to continue)

(لماذا تَابِعَتْ هذِه الحَجة؟
(limaaadhaa nutaabi3u haadhihi-l-Hujjata? Why do we continue this argument?)
For this exercise, I give you a pronoun and a verbal root. Write the past and present tenses of the Form III verb that correspond to the verbal root and the supplied pronoun in each item.

Q. ﻫُﻮﹶ (huwa) / ﺧﹶﻮﹶ (b-k-r)

A. ﺑَﺎﻛَرﹶ (baakara; he anticipated) / ﻱُﺒَﺎﻛﹺﺮﹶ (yubaakiru; he anticipates)

9. آَ ﻧَﺁ (’anaa) / ﺮﹶﻮﹶ (r-f-q)

10. ﺛَﺁ (’anta) / ﺡِﺳﹾﺐ (H-s-b)

11. ﺛَﺁ (’anti) / ﻋﹶﻮﹶ (3-q-b)

12. ﻫُﻮﹶ (huwa) / ﻚَﻤﹾ (k-t-m)

13. ﻫﹺﻮﹶ (hiya) / ﺣُﻜﹶﻢ (H-k-m)

14. ﻧَﺎ (naHnu) / ﺐَﻠَﻎ (b-l-gh)

15. ﺛَﺎ (’antum) / ﺩِﺮﹶ (d-r-k)

16. ﻫُﻮﹶ (hum) / ﻓِﺼﹶﻞ (f-S-l)

**Form IV**

Form IV is unusual because its past and present tenses each have different distinctive traits that you use to spot a verb in that category. The features of a Form IV verb are:

✔️ A prefixed ﺁ (’a) is added in the past tense only.
✔️ ﺁُ (Damma) is added over the prefixes in the present tense.
✔️ ﻝَ (kasra) is added under the second consonant in the present tense.

**The meaning of Form IV**

Form IV reliably gives a causative meaning to a verbal root. In other words, if your verb root means *to cook*, the Form IV of that verb root would mean *to cause someone to cook* (*make someone cook*). For example, consider the Form I verb ﻓَﺮَ (qara’a), which means *to read*. The Form IV version of this word is ﺃَﻗْﺮَ (’aqra’a), meaning *to make someone read*. Another example is the Form I verb ﻋَﻤَلَ (’aamila; *to work*). The Form IV version of this verb is ﺑَﺎَ (’a3mala), meaning *to put to work*. 

The following are some example sentences that use these verbs:

لا. لأنّ مدرسانا ما أقرأنا هذه القصّة.
(laa. li'anna mudarrisatanaa maa 'aqra'atnaa haadhihi-l-qiSSa. No. Because our teacher didn’t make us read this story.)

These are some other useful verbs that occur in Form IV:

أرسلَ (arsala; to send)
أعلّنَ (a3lana; to announce/advertise)

Here are some sentences using these Form IV verbs:

أرسل لي رسالة حيّر تَحْصُّل على النتائج.
(´arsil lii risaalatan Hiina taHsul 3alaa-n-nataa'ij. Send me a message when you get the results.)

يعلن الطّياران عن وصول طائرتهما القادمة من باريس.
(yu3linu aT-Tayaraan 3an wuSuul Taa'iratihi al-qaadima min baariis. The airline is announcing the arrival of their plane coming from Paris.)

**Producing Form IV**

Make sure to study the past and present tenses of the Form IV verb separately and internalize the different look and feel of them. In the past tense, note the use of the ﹙alif⟩ prefix. In the present tense, observe how the Form IV verb differs from Form I in the vowels alone.

The following tables show the conjugation of the Form IV verb أكملَ (´akmala), which means to finish. I show the conjugation in both past and present tenses.

<table>
<thead>
<tr>
<th>Past tense conjugation for أكملَ ('akmala; to finish)</th>

</table>

**ماَتِى تُكْمِلَيْنَ الْعَمَلَ الْيَوْمَ؟**

(mataa tukmilliina al3amal al-yawma? When do you finish work today?)

---

To help you improve your use of Forms IV, your teacher designed a matching exercise. You have a word bank with seven verbs in Form IV. Match each one with the sentence that fits the meaning best. **Note:** The exact form in the word bank isn’t what you need to fill in the blank, because the context of the sentence will prompt you for a specific tense and person of the verb. Each verb will make the best sense in only one place.

<table>

22. __________ (___________ al-maTba3a kitaabahaa 3an 3ilm al’aHyaa’i Hadliithan. The printer recently __________ her book about biology.)
Form V

Form V is a very recognizable form. Form V presents the following distinct features:

- A (ta-) is prefixed onto the root.
- The second consonant of the root is doubled.
- A (fatHa) is added over the present tense prefixes.
- A (fatHa) is added over the second consonant of the root in both the present and past tenses.

The meaning of Form V

Form V serves as the reflexive or passive counterpart to Form II. What I mean is that when you have a verbal root in Form V, the same root will usually have a Form II with a similar meaning. Form V will be the reflexive (where the action is done by the subject on themselves) or passive (where the action is done to the subject). For instance, consider the Form I verb عَلَّمَ (3allama; to teach). The Form V version of this verb is تَعَلَّمَ (ta3allama), which means to learn (or to be taught). The following is a sentence using this Form V verb:

- اتَعَلَّمَتِ السَّرَّ النُّجَاحِ؟
  ('ata3allamta sirra an-najaaHi? Have you learned the secret of success?)

Here are some other useful verbs that occur in Form V:

- تَعْرِفَ (ta3arrafa; to get to know/meet/become acquainted)
- تَضْمِنُ (taDammana; to include/contain)

The following are some example sentences that show you how these Form V verbs are used:

- تَعَرِفتُ عَلَى جَارِي.
  (ta3arraftu 3alaa jaarii. I made the acquaintance of my neighbor.)

- يَتَضَمَّنُ الْكِتَابُ مَعَالَمَاتٍ مُهِمَّةَ.
  (yataDammanu al-kitaab ma3luumaat muhimma. The book contains important information.)

Producing Form V

The Form V verb has the same distinctive doubling as the Form II verb, but it additionally has the distinctive ش (ta-) prefix.
The following tables show the conjugation of the Form V verb (takallama; to speak). I show the conjugation in both past and present tenses.

### Past tense conjugation for (takallama; to speak)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

They will speak together after the meeting.

(sa-yatakallamuuna ma3an ba3da-l-'ijtimaa3i. They will speak together after the meeting.)

For this exercise, I give you a pronoun and a verbal root. Write the past and present tenses of the Form V verb that correspond to the verbal root and the supplied pronoun in each item.

**Q.** هوَ (huwa) / خرج (kh-r-j)

**A.** تخرج (takharraja; he graduated) / يخرج (yatakharraju; he graduates)

23. أنا (‘anaa) / جند (j-n-d)

24. أنت (‘anta) / سنتر (s-t-r)

25. أنتي (‘anti) / قبل (q-b-l)

26. هوَ (huwa) / لفت (l-f-t)
Form VI

Form VI is produced by:

- Adding a prefixed ِت (ta-)
- Inserting a long a vowel after the first consonant of the root
- Using a ِfaHa (fatHa) over the second consonant in both the present and past tenses
- Using a ِfaHa (fatHa) over the prefixes in the present tense

The meaning of Form VI

Form VI is the reciprocal counterpart to Form III. Here’s what I mean: If a verb is in Form VI, it describes people exchanging the action of a verb that exists in Form III. For example, consider the Form III verb حارِب (Haaraba), which means to fight. The Form VI version of this verb is ِتَحَارِب (taHaaraba), which means to fight one another.

The following is an example sentence that uses this verb:

تَحَارِبُ الجَنُودُ كُلَّ اللَّيلَةِ.
(taHaaraba al-junuud kulla-l-laylati. The soldiers fought one another all night.)

Here are some other useful verbs that occur in Form VI:

- تَسَالِم (tasaalama; to make peace with one another)
- تَسَاءَلِ (tasa’a’ala; to ask oneself/inquire)

Take a look at these example sentences:

تَسَالِمُ الآخِذاءَ أَخِيرًا.
(tasaalama al-a’3daa’ ‘akhliiran. The enemies finally reconciled.)

تَسَاءَلْتُ مْلِ سَأَذْهَبَ إِلَى الْحَفَلَةِ أَمْ لاً.
(tasa’a’altu hal sa-adh-hab ‘ilaa-l-Haflati ‘am laa. I asked myself whether I would go to the party or not.)
Producing Form VI

Watch for the long a vowel — written with ﺍَﻟِﻔَ (alif) — and the prefixed ﺑَ (ta-) as the key points of Form VI.

The following tables show the conjugation of the Form VI verb تُبَادِل (tabaadala), which means to exchange. I show the conjugation in both the past and present tenses.

### Past tense conjugation for تُبَادِل (tabaadala; to exchange)

<table>
<thead>
<tr>
<th>'anaa tabaadaltu</th>
<th>naHnu tabaadalnaa</th>
</tr>
</thead>
<tbody>
<tr>
<td>'anta tabaadalta</td>
<td>'antum tabaadaltum</td>
</tr>
<tr>
<td>'anti tabaadalti</td>
<td>'antunna tabaadaltunna</td>
</tr>
<tr>
<td>huwa tabaadala</td>
<td>hum tabaadaluu</td>
</tr>
<tr>
<td>hiya tabaadalat</td>
<td>hunna tabaadalna</td>
</tr>
</tbody>
</table>

ٍ(tabaadalnaa nuskhay al-3aqdi. We exchanged the two copies of the contract.)

### Present tense conjugation for تُبَادِل (tabaadala; to exchange)

<table>
<thead>
<tr>
<th>'anaa 'atabaadalu</th>
<th>naHnu natabaadalu</th>
</tr>
</thead>
<tbody>
<tr>
<td>'anta tatabaadalu</td>
<td>'antum tatabaadaluuna</td>
</tr>
<tr>
<td>'anti tatabaadaliina</td>
<td>'antunna tatabaadalna</td>
</tr>
<tr>
<td>huwa yatabaadala</td>
<td>hum yatabaadaluuna</td>
</tr>
<tr>
<td>hiya yatabaadalat</td>
<td>hunna yatabaadalna</td>
</tr>
</tbody>
</table>

(مٍمٍكٍن نتَبَادَل أرقام الهَاتِف؟ Maybe we can exchange phone numbers?)

Form VI isn’t terribly common, but you should try your hand at producing just a few of them so you’re familiar with their patterns. Write the past and present tenses for the indicated pronouns and verbal roots.

**Q.** هُمْ (hum) / زَحْمُ (z-H-m)

**A.** تَرَاحَمُوا (tazaalHamuu; they crowded together) / يَرَاحَمونَ (yatazaHamuuna; they crowd together)

31. ﺍﹶﻧﹾا (’anaa) / نﻮْل (n-w-l)
Part III: Staying Active: Forming Arabic Verbs

32.  ﺃﹶﻧﹾﺖﹶ (’anat) / ﺷﺮﻙ (sh-r-k)

33.  ﻫُﻢ (hum) / ﻟﺤﻖ (l-H-q)

Form VII

To create Form VII, you have to:

✔ Prefix a ن (nuun) to the verb
✔ Prefix an ﺍﹶﻟﹺﻒ (alif) + ﹶ (kasra) before the ن (nuun) in the past tense
✔ Add a ـ (fatHa) over the prefixes in the present tense
✔ Add a ـ (kasra) under the second consonant of the root in the present tense

The meaning of Form VII

Form VII is relatively rare and can impart a passive meaning. In other words, when it exists, it means the action is done to the subject of the verb. For example, consider the Form I verb ﺗَﻛَﺴَﺮﹶ (kasara), meaning to break (something). The Form VII version of this verb is ﺛَﻛَﺴَﺮﹶ (inkasara), which means to be broken.

The following sentence shows how you can use this verb:

إنْﻜَﺲَرَ الْبَابَ عِندَمَا فَتَحْتُهُ.

(inkasara al-baab 3indamaa fataHu. The door became broken when I opened it.)

Here are some other common and important verbs that occur in Form VII:

إنْﺪَلُِع (indala3a; to break out [war, fire])
إنْبَغِي (inbaghaa; to be incumbent upon)

Consider the following sentences, which show you how to use these common Form VII verbs:

كَنْتُ هَنَاكَ عِندَمَا إنْدَلَعَتُ الْحَرْبُ.
(kuntu hunaak 3indamaa indala3at al-Harb. I was there when the war broke out.)
Chapter 9: Forms and Functions: The Forms of the Arabic Verb

Produce Form VII

The feature of a Form VII verb is the prefixing of the ن (nuun). In the past, there’s the additional أَلِفْ (alif) before the ن (nuun). In the present, you find the ن (nuun) between the normal present tense prefix and the first consonant of your root.

The following tables show the conjugation of the Form VII verb إِنْكَسَرَ (inkasara), which means to get broken. I show the conjugation in both past and present tenses.

<table>
<thead>
<tr>
<th>Past tense conjugation for إِنْكَسَرَ (inkasara; to get broken)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(`anaa inkasartu)</td>
</tr>
<tr>
<td>(`anta inkasarta)</td>
</tr>
<tr>
<td>(`anti inkasarti)</td>
</tr>
<tr>
<td>(`huwa inkasara)</td>
</tr>
<tr>
<td>(`hiya inkasarat)</td>
</tr>
</tbody>
</table>

ﻭَقَعَتْ الصَّوْرَةُ وَإِنْكَسَرَتْ. (waqa3at aS-Suura wa-n-kasarat. The picture fell and broke.)

<table>
<thead>
<tr>
<th>Present tense conjugation for إِنْكَسَرَ (inkasara; to get broken)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(<code>anaa </code>ankasiru)</td>
</tr>
<tr>
<td>(`anta tankasiru)</td>
</tr>
<tr>
<td>(`anti tankasiriina)</td>
</tr>
<tr>
<td>(`huwa yankasiru)</td>
</tr>
<tr>
<td>(`hiya tankasiru)</td>
</tr>
</tbody>
</table>

مَمْكِن تَنْكَسَرُ ذَٰلِكَ. (mumkin tankasiru dhiraa3uhu. His arm may be broken.)

Form VII verbs are rare, but knowing how to form them will be a boon when you really need one. For this exercise, I give you a pronoun and a verbal root. Write the past and present tenses of the Form VII verb that correspond to the verbal root and pronoun in each item.
Form VIII

Form VIII has the following distinct features:

✔ A َّ (ta-) is inserted after the first consonant of the root.
✔ You have to prefix an َّلِف (‘alif) + َّ (kasra) to the verb in the past tense.
✔ You use a ُ (fatHa) over the prefixes in the present tense.
✔ You use a َّ (kasra) under the second consonant of the root in the present tense.

The meaning of Form VIII

Form VIII can be reflexive or passive. For example, consider the Form I verb َّفَع (rafa3a; to lift). The Form VIII version of this verb is َّرَفَعَ (irtafa3a), which means to rise.

The following is a sentence showing the use of this verb:

إِرْتَفَعَ الْبَالَوْنُ فَوْقَ الْبَيْنَايَةَ الْحَلْوِيَةَ.
(irtafa3a al-baaluunu fawqa-l-binaayati aT-Tawiilati. The balloon rose over the tall building.)

Here are some other useful verbs that occur in Form VIII:

إِجْتَمَعَ (ijtama3a; to meet [together])
إِنْتَقَلَ (intaqala; to move)

Check out these example sentences:

سَتَجْمَعُ اللَّجْنَةُ مَرَّتَيْنَ فِي الْسَّهْرِ الْقَاِمِ.
(satajtami3u al-lajna marratayn fish-shahr alaqadim. The committee will meet twice in the coming month.)

إِنْتَقَلَتْ عَائِلَتِي إِلَى بَيْتِ جَدِيدٍ.
(intaqalat 3aa’ilatii ’ilaa baytii jadiidin. My family moved into a new house.)
Chapter 9: Forms and Functions: The Forms of the Arabic Verb

Producing Form VIII

Form VIII is the only Arabic verb form with what’s called an infix. This means that the extra element, the consonant $t$, is inserted between the first and second consonants of the root. Be careful not to mistake a Form VIII verb for a verb with a $ت$ (taa’) as part of its root. Also be on the lookout for how similar a Form VIII verb with س (siin) as its first letter will look to a Form X verb. (You can read more about Form X later in this chapter.)

The following tables show the conjugation of perhaps the most common Form VIII verb, استمع (istama3a), which means to listen. I show the conjugation in both past and present tenses.

<table>
<thead>
<tr>
<th>Past tense conjugation for استمع (istama3a; to listen)</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘انا استمعت</td>
</tr>
<tr>
<td>‘أنت استمعت</td>
</tr>
<tr>
<td>‘انت استمعت</td>
</tr>
<tr>
<td>‘هو استمعت</td>
</tr>
<tr>
<td>‘هي استمعت</td>
</tr>
</tbody>
</table>

هل استمعتم إلى الخبر عن الزلزال؟
(hal istama3tum ‘ilaal-khabar 3an al-zalzalati? Did you listen to the news about the earthquake?)

<table>
<thead>
<tr>
<th>Present tense conjugation for استمع (istama3a; to listen)</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘انا استمع</td>
</tr>
<tr>
<td>‘أنت تستمع</td>
</tr>
<tr>
<td>‘انت تستمع</td>
</tr>
<tr>
<td>‘هو يستمع</td>
</tr>
<tr>
<td>‘هي تستمع</td>
</tr>
</tbody>
</table>

أنا استمع إلى الصوت خارجاً من البيت.
(‘اناا ‘استمع 3ي ‘يلاا-س-سواتي خارياا من البيق. I listen to the sound coming from the house.)

Now you have a chance to practice your formation of Form VIII verbs and your overall Arabic composition skills. Translate the following English sentences into Arabic. Each item requires you to generate a Form VIII verb.
Q. After the negotiations we finished the meeting.

A. (ba3da-l-mufaawaDaati takhattamnaa al-‘ijtimaa3a.)

37. I believe that the musical group is wonderful.

38. My professor tested my knowledge.

39. The United States elected a new president last year.

40. Did you consider the problem before you responded?

41. We celebrated her birthday at the restaurant.

Form IX

Form IX exists in Arabic, but it occurs rarely. It’s a way to describe the action of acquiring either a color or a bodily defect. Just so that you can recognize it if you ever come across it, the one distinct feature of a Form IX verb is a doubling of the third consonant in the verbal root, which is written by placing a “(shadda) over the third consonant. For example, consider the Form II verb حَمْرَةٌ (Hammara; to redden). The Form IX version of this verb is أحمرّ (ihmarra), which means to turn red.

For your reference, here are sample forms of the past and present tenses of a Form IX verb:

Past Tense: اِحْمَرْ (huwa ihmarra; he turned red)
Present Tense: تَحْمَرْ (hiya taHmarru; she turns red)

Now check out this example of a Form IX verb in a sentence:

(kaana-l-jawu Haarran jiddan fa-hiya ihmarrat mina-sh-shamsi. The weather was very hot, and so she turned red from the sun.)
Form X

Form X involves the following distinct features:

- Prefixing ستّ (sta-) to the verb
- Prefixing an ألف (alif) + كسرة (kasra) before the ستّ (sta-) prefix in the past tense
- Using فتحة (fatHa) over the present tense prefixes
- Using كسرة (kasra) under the second consonant of the root in the present tense

The meaning of Form X

Form X implies the act of seeking for the action described by the verbal root. For example, consider the Form II verb فَسَلَ (fassala; to explain). The Form X version of this verb is استفسلّ (istafsala), which means to seek an explanation.

Here’s an example sentence using this form of the verb:

(لا يفهمهم كيف حصلت الحادثة فهّو استفسِر عن الأسَّاس. (lam yafham kum kif hadathat al-Haaditha, fa-huwa istafsara 3an al-asbaabi. He didn’t understand how the accident occurred, so he sought an explanation as to the causes.))

These are some other common and important verbs that occur in Form X:

- استشهدّ (istash-hada; to be martyred/die in battle)
- استغرقّ (istaghraqa; to take/last)

Check out the following sentences, which are examples of uses of these verbs:

- استشهد ألف جندي في المعركة. (istash-hada alf jundi fii-l-ma3raka. A thousand soldiers died in the battle.)
- استغرقّ الرحلة يومين. (istaghraqat ar-riHla yawmayni. The trip took two days.)

Producing Form X

Form X is one of the easiest forms to identify, because it includes a two-consonant prefix ستّ (sta-) before the three consonants of the verbal root. In the past tense, you add the ستّ (sta-) prefix, and then you add an additional short i vowel before that prefix, which is written with an ألف (alif) and كسرة (kasra). In the present tense, you add the ستّ (sta-) prefix and then add the same present tense prefixes used for all the forms directly before the ستّ (sta-) prefix.
The following tables show the conjugation of the Form X verb استعملُ (ista3mala; to use). The overall root meaning of عملُ (3-m-l) is to work, so in Form X it means to seek to work, or to use. I show the conjugation in both the past and present tenses.

<table>
<thead>
<tr>
<th>Past tense conjugation for استعملُ (ista3mala; to use)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(انا استعملت)</td>
</tr>
<tr>
<td>(انت استعملت)</td>
</tr>
<tr>
<td>(اهم استعملت)</td>
</tr>
<tr>
<td>(هو استعملت)</td>
</tr>
<tr>
<td>(ءا استعملت)</td>
</tr>
</tbody>
</table>

(هو استعمل هااتفي نم ترك قوأ. He used my phone and then left immediately.)

<table>
<thead>
<tr>
<th>Present tense conjugation for استعملُ (ista3mala; to use)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(انا استعمل)</td>
</tr>
<tr>
<td>(انت استعمل)</td>
</tr>
<tr>
<td>(اهم استعمل)</td>
</tr>
<tr>
<td>(هو استعمل)</td>
</tr>
<tr>
<td>(ءا استعمل)</td>
</tr>
</tbody>
</table>

(ممكن استعمل حاسبتك حتى أعد الحساب؟ Could I use your calculator to add up the bill?)

For this exercise, I give you a pronoun and a verbal root. Write the past and present tenses of the Form X verb that correspond to the verbal root and pronoun in each item.

| Q. (هو) (q-b-l) |
| A. (istiqbala; he greeted) / (yastaqbilu; he greets) |
| 42. (انا) (f-h-m) |
| 43. (ا) (kh-d-m) |
44. اَنْتِ (‘anti) / سَلِمُ (s-l-m)

45. هُوَ (huwa) / نَبْتُ (n-b-T)

46. هِيَّا (hiya) / عِجْبُ (3-j-b)

47. نَحْنُ (naHnu) / دِرْكُ (d-r-k)
Part III: Staying Active: Forming Arabic Verbs

Answer Key

1. (sahhaltu; I facilitated) / أُسَهِّلْتُ (`usahhilu; I facilitate)
2. (gharrabta; you went away) / تُغَرِّبْتُ (tughharibu; you go away)
3. (shajja3ti; you encouraged) / تُشجِّعِينَ (tushajji3liina; you encourage)
4. (khabbara; he notified) / يُخَبَّرُ (yuKhabbiri; he notifies)
5. (jaddadat; she renewed) / تُجَدَّدُ (tujaddidu; she renew)
6. (madanna; we civilized) / نُمَدنُ (numaddinu; we civilize)
7. (nashshaftum; you dried) / تُنَشَّفْتُونَ (tunashshifuuna; you dry)
8. (Tabbaquu; they covered) / يُطَبَقُونَ (yuTabbiquuna; they cover)
9. (raafaqtu; I accompanied) / أَرَافَقْتُ (`uraafiqu; I accompany)
10. (Haasabta; you settled an account) / تُحَاسِبْبُ (tuHaasibu; you settle an account)
11. (3aaqabti; you punished) / تُعَاقِبِيْنَ (tu3aaqibiina; you punish)
12. (kaatama; he hid) / يُكَاَتِمُ (yukaatimu; he hides)
13. (Haakamat; she prosecuted) / تُحَاكَمْ (tuHaakimu; she prosecutes)
14. (baalaghnaa; we exaggerated) / نُباَلَغُونَ (nubaalighu; we exaggerate)
15. (daaraktum; you outran) / تُدارَكْتُونَ (tudaarikuuna; you outrun)
16. (faaSaluu; they bargained) / يُفاَصلُونَ (yufaaSiluuna; they bargain)
17. aTlaqa aS-Sayyaadu an-naara 3alaa-l-`asadi `amsi. The hunter shot at the lion yesterday.
18. yuz3ijunii kalbu jaarii daa’iman. My neighbor’s dog always bothers me.
### Chapter 9: Forms and Functions: The Forms of the Arabic Verb

| 19 | "sa-'udkhilu jumlatan fii risaalatin. I will insert a sentence into the message." |

Chapter 10

Exploring Irregularity in Arabic Verbs

In This Chapter

- Understanding verb weakness
- Producing initial weak verbs
- Creating verbs with medial weakness
- Writing with final weak verbs
- Looking into geminate verbs

If you grew up speaking English, you never had to think about how maddeningly irregular the language can be. People who learn English as a second language don’t have it so easy. They learn that if you want to put a verb in the past tense, you can just add -ed, such as in walked. But if the verb already ends in e, you just add a d, as in baked. If only that were the end of it! Instead you come across words like see, which in the past tense is saw. The last straw comes when you realize that with go, the past tense (went) is from a completely different verb. Every language has its irregularities, but English is among the worst offenders.

So you won’t be surprised to find out that Arabic also has irregular forms. Unlike English, however, the so-called irregularity in Arabic just amounts to a different set of rules when a few of the consonants appear in a verb. This chapter shows you how to confidently form any Arabic verb, regardless of these pesky irregularities.

Grasping Verb Weakness in Arabic

The verbs you encounter in this chapter are irregular in the sense that they don’t play by the same rules as the so-called “regular” verbs (see Chapters 2 and 9 for more on these run-of-the-mill verbs). Many Arabic grammar books prefer to call these irregular verbs weak. There’s a good reason for using that adjective to refer to these verbs. You probably recall from your basic Arabic studies that Arabic verbs have three consonants onto which you add the various suffixes and prefixes to indicate who’s performing the action of the verb.

Just a few consonants, however, are soft enough in their pronunciation that they can’t quite carry the vowels the same way as the others. For example, a w is a whole lot weaker in pronunciation than, say, a d. With a w, you’re bending air in your mouth,
Part III: Staying Active: Forming Arabic Verbs

168

but you aren’t touching your tongue against something as you do with letters such as 
\( d \). The three Arabic consonants that yield irregularities from the expected forms are 
\( \text{\'alif} \), \( \text{waaw} \), and \( \text{yaa’} \).

In this chapter, I show you the forms of weak verbs in their past and present tenses. 
Other chapters in this book cover forms of the verb, such as imperative forms 
(Chapter 11), verbal nouns (Chapter 15), and participles (Chapter 18). The weak verb 
forms of each of those are discussed in their respective chapters.

Discovering Initial Weak Verbs

Weak consonants can affect a verb no matter where they appear in a sentence. So in 
this section, I show you the various problems that weak consonants cause when they 
come in the first, or \( \text{initial} \), position.

Verbs with initial \( \text{\'} \) (hamza)

Verbs with an initial glottal stop, which is written with a \( \text{\'} \) (hamza), have the least 
amount of change overall from the regular pattern. A \text{glottal stop} is that little catch 
you have in the back of your throat before you start a word with a vowel. Even 
though we don’t think of the \text{glottal stop} as a consonant in English, in Arabic it’s 
treated as such. It may seem surprising to you that something we don’t even see as a 
consonant is still able to carry almost all the normal vowels of the Arabic verb.

The irregularity of the initial hamza verb stems from the inability of Arabic to have 
two \( \text{\'alifs} \) in a row. Forms such as the first person singular present in Form I 
and all the past tense of Form IV replace the two \( \text{\'alifs} \) with a \( \text{madda} \). (For more 
information on the madda, see Chapter 3.) The only other thing to be on the look out 
for with initial hamza verbs is the change in spelling when the hamza appears over 
the \( \text{waaw} \) seat in the present tense of Forms II, III, and IV.

The hamza with Form I verbs

The following tables showing the past and present conjugations of the common Form 
I verb \( \text{akala; to eat} \) demonstrate how an initial hamza verb behaves.

<table>
<thead>
<tr>
<th>Past conjugation for ( \text{akala; to eat} )</th>
<th>Present conjugation for ( \text{akala; to eat} )</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \text{'anaa \ 'akaltu} )</td>

<td>( \text{hunna \ 'akalna} )</td>
</tr>
</tbody>
</table>

\( \text{akala al-walad aT-Ta3aam sarli3an jiddan. The boy ate the food very fast.)} \)
Chapter 10: Exploring Irregularity in Arabic Verbs

As you can see from the previous tables, there’s only one form in the present tense where a verb with an initial hamza isn’t what you would have expected. That form is the first person singular. Here’s why: Arabic doesn’t permit two ’alifs to stand next to one another. Because of that fact, the first person singular form replaces the double ’alif with a madda.

The hamza with Form II verbs

Form II is a case where the initial hamza will only cause spelling irregularity. An initial hamza in a Form II verb is normal in the past tense, but it uses the waaw seat in the present. The following tables show the past and present conjugations of the Form II verb ﺍﹶﺧﹶﺮ (’akhkhara; to delay).
Take note of the present tense in the previous table, and get used to seeing the **hamza** over a **waaw** seat outside of Form I. Anytime there’s a ’ (Damma), the **hamza** will be written over a **waaw** as you see in the table.

**The hamza with Form III and IV verbs**

In Forms III and IV, the spelling irregularities of the **hamza** will be shown in two ways. First, the inability to have two consecutive ’alifs forces the use of a madda in the past tense of a Form III or IV verb. Secondly, the **hamza** is written over a **waaw** seat in the present of a Form III or Form IV verb. The following tables show the past and present conjugations for the Form IV verb **أكل** (‘aakala; to feed).

<table>
<thead>
<tr>
<th>Past conjugation for <strong>أكل</strong> (‘aakala; to feed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﺃَﻛَﻠََْ (’anaa ‘aakaltu)</td>
</tr>
<tr>
<td>ﺃَﻛَلْ (‘anta ‘aakalta)</td>
</tr>
<tr>
<td>ﺃَﻛَﻠْ (’anti ‘aakalti)</td>
</tr>
<tr>
<td>ﺃَﻛَلَ (huwa ‘aakala)</td>
</tr>
<tr>
<td>ﺃَﻛَلَ (hiya ‘aakalat)</td>
</tr>
</tbody>
</table>

أكلْتْيْ أمي جيدًا جدًا.  
(‘aakalatnii ummi jayyidan jiddan. My mother fed me very well.)

<table>
<thead>
<tr>
<th>Present conjugation for <strong>أكل</strong> (‘aakala; to feed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﻏَوْﻛُلْ (’anaa ‘u’kilu)</td>
</tr>
<tr>
<td>ﻏَوْﻛُلْ (‘anta tu’kilu)</td>
</tr>
<tr>
<td>ﻏَوْﻛُلْ (‘anti tu’kiliiina)</td>
</tr>
<tr>
<td>ﻏَوْﻛُلْ (huwa yu’kilu)</td>
</tr>
<tr>
<td>ﻏَوْﻛُلْ (hiya tu’kilu)</td>
</tr>
</tbody>
</table>

Looking at the table showing the past tense, just remember that whenever you have a madda, it’s because Arabic doesn’t like two ’alifs in a row. So an initial madda is an excellent hint that the first consonant of the verb is an ’alif.

The simple act of writing out the irregular verbs immediately after you study each type helps lock them in your memory. So in this exercise, write the past and present tenses for each root, pronoun, and form of the verb as indicated.

**Q.** ﺍُمَرْ (‘-m-r) / ﺗُوْﺳِرَ (huwa) / Form III

**A.** ﺑُوْاِمَرْ (yu’aamiru; he consults); ﺍُمَرْ (‘aamara; he consulted)
Verbs with initial وَاَوْ (waaw)

The وَاَوْ (waaw) is a weak wittle wetter. You’re going to see it behave in three ways. It will disappear entirely in some cases, assimilate into a doubled t in others, and just turn into a long u vowel elsewhere. An initial waaw causes significantly more changes to a verb than the initial hamza, which is described earlier in the chapter.

Some grammarians call initial waaw verbs assimilating verbs, because, as I said, assimilation is one of the things that an initial waaw verb will do. Other linguists, myself included, prefer to label all the irregular verbs with their most accurate description. If the issue is an initial waaw, that’s what I call the verb.

The waaw with Form I verbs

In Form I, the waaw disappears in the present tense, but is stable in the past tense. In the following tables, I show you an example of how the waaw behaves with the Form I verb وَصَلْ (waSala; to arrive). The conjugations are shown in the following tables.

<table>
<thead>
<tr>
<th>Past conjugation for وَصَلْ (waSala; to arrive)</th>
</tr>
</thead>
<tbody>
<tr>
<td>('anaa waSalatu)</td>
</tr>
<tr>
<td>('anta waSalta)</td>
</tr>
<tr>
<td>('anti waSalti)</td>
</tr>
<tr>
<td>(huwa waSala)</td>
</tr>
<tr>
<td>(hiya waSalat)</td>
</tr>
</tbody>
</table>

(واSala aT-Tard ba3da yawmayni faqaT. The package arrived after only two days.)
Part III: Staying Active: Forming Arabic Verbs

### Present conjugation for \( \text{waSala; to arrive} \)

<table>
<thead>
<tr>
<th>Subject Pronoun</th>
<th>Conjugation in Present Tense</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>'anaa </code>asSilu`</td>
<td>( \text{抵达} ) (<code>naHn</code>u <code>n</code>aSilu`)</td>
</tr>
<tr>
<td><code>anta taSilu</code></td>
<td><code>抵达</code> (``antum taS<code>i</code>luu`)</td>
</tr>
<tr>
<td><code>anti taSiliina</code></td>
<td><code>抵达</code> (``antunna taS<code>i</code>l<code>a</code>)</td>
</tr>
<tr>
<td><code>huwa yaSilu</code></td>
<td><code>抵达</code> (<code>hum yaS</code>i<code>luu</code>)</td>
</tr>
<tr>
<td><code>hiya taSilu</code></td>
<td><code>抵达</code> (<code>hunna yaS</code>i<code>lu</code>)</td>
</tr>
<tr>
<td>( \text{matata Silu aT-Taa'ira? When does the plane arrive?} )</td>
<td></td>
</tr>
</tbody>
</table>

Note the present tense in the previous table. Whenever you have a verb that seems to be missing a consonant to make up a nice triliteral root, consider the possibility that it’s an initial `waaw` like you see here.

### The `waaw` with Form IV verbs

Verbs with initial `waaw` are completely regular in Forms II and III, so we can skip over those. \( \text{al-Hamdu lillah. Praise God.} \) But in Form IV, an initial `waaw` causes some problems in the present tense. What you’ll see is that the `waaw` becomes a long `u` vowel following the prefix. Take a look at the following conjugation tables for the Form IV verb `ﺃﹶﻭﹾﺿﹶﺢﹶ` (`awDaHa; to make clear/explain`).

<table>
<thead>
<tr>
<th>Subject Pronoun</th>
<th>Conjugation in Present Tense</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>'anaa </code>awDaHu`</td>
<td><code>讲解</code> (<code>naHn</code>u <code>awDaHn</code>)</td>
</tr>
<tr>
<td><code>anta </code>awDaHa`</td>
<td><code>讲解</code> (``antum <code>awDaHtu</code>)</td>
</tr>
<tr>
<td><code>anti </code>awDaHiina`</td>
<td><code>讲解</code> (``antunna <code>awDaHti</code>)</td>
</tr>
<tr>
<td><code>huwa </code>awDaHa`</td>
<td><code>讲解</code> (<code>hum </code>awDaH`)</td>
</tr>
<tr>
<td><code>hiya </code>awDaHat`</td>
<td><code>讲解</code> (<code>hunna </code>awDaHa`)</td>
</tr>
<tr>
<td><code>ru</code>a<code> </code>awDaHu`</td>
<td><code>讲解</code> (<code>ru</code>a<code> </code>awDaH`)</td>
</tr>
</tbody>
</table>

\( \text{The vice president explained the ambassador's absense from the meeting.} \)

<table>
<thead>
<tr>
<th>Subject Pronoun</th>
<th>Conjugation in Present Tense</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>'anaa </code>uuDiHu`</td>
<td><code>讲解</code> (<code>naHn</code>u <code>uuDiHu</code>)</td>
</tr>
<tr>
<td><code>anta </code>uuDiHu`</td>
<td><code>讲解</code> (``antum <code>uuDiHu</code>)</td>
</tr>
<tr>
<td><code>anti </code>uuDiHiina`</td>
<td><code>讲解</code> (``antunna <code>uuDiHn</code>)</td>
</tr>
<tr>
<td><code>huwa </code>uuDiHu`</td>
<td><code>讲解</code> (<code>hum </code>uuDiHu`)</td>
</tr>
<tr>
<td><code>hiya </code>uuDiHat`</td>
<td><code>讲解</code> (<code>hunna </code>uuDiH`)</td>
</tr>
<tr>
<td><code>ru</code>a<code> </code>uuDiHu`</td>
<td><code>讲解</code> (<code>ru</code>a<code> </code>uuDiH`)</td>
</tr>
</tbody>
</table>

\( \text{You will understand when I explain my opinion.} \)
Notice that in the past tense, the initial waaw verb is regular in Form IV. But it turns into a long u vowel (written with waaw) in the present tense.

The waaw with Form VIII verbs
The initial waaw is regular in Forms V, VI, and VII. But if you thought regularity would run the table, think again! In Form VIII, an initial waaw assimilates into the taa' (taa’) you put after the first consonant in Form VIII, producing a doubled taa’ in both the past and present tenses. The doubled taa’ is written with a َّ (shadda). (For more on doubled letters, consult the information on the shadda in Chapter 3.) An example in which this happens is the verb إنُصِلَ (‘ittaSala; to call), which is shown in the following conjugation tables.

<table>
<thead>
<tr>
<th>Past conjugation for إنُصِلَ (‘ittaSala; to call)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(‘anaa ‘ittaSaltu) ٌ إنُصِلْنا</td>
</tr>
<tr>
<td>(‘anta ‘ittaSalta) إنُصِلْنِمْ</td>
</tr>
<tr>
<td>(‘anti ‘ittaSalti) إنُصِلْنِنْ</td>
</tr>
<tr>
<td>(huwa ‘ittaSala) إنُصِلْنِي</td>
</tr>
<tr>
<td>(hiya ‘ittaSalat) إنُصِلْنِي</td>
</tr>
</tbody>
</table>

(‘ittaSalo bi-‘abii ba3da ‘an waSalo ‘ilaa-l-‘urdun. I called my father after I got to Jordan.)

<table>
<thead>
<tr>
<th>Present conjugation for إنُصِلَ (‘ittaSala; to call)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(‘anaa ‘attaSilu) ٌ إنُصلِنِ</td>
</tr>
<tr>
<td>(‘anta tattaSilu) ٌ إنُصلِنْنْ</td>
</tr>
<tr>
<td>(‘anti tattaSilina) عَٰنْتُ ٌ إنُصلِنْنْ</td>
</tr>
<tr>
<td>(huwa yattaSilu) ٌ إنُصلِنْنْ</td>
</tr>
<tr>
<td>(hiya tattaSilu) ٌ إنُصلِنْنْ</td>
</tr>
</tbody>
</table>

(‘attaSilu bi-‘akhii fii 3iid milaadihi. I call my brother on his birthday.)

Make sure to remember that an initial waaw verb in Form VIII is one of the few that has its particular irregularity in both past and present tenses. That doubled taa’ turns into your friend when you realize it’s a huge red flag for an initial waaw verb in Form VIII.

Here’s your chance to produce the most irregular of the initial waaw forms. In this exercise, write the past and present tenses of the verb indicated by the root, pronoun, and verb form that I give you.

Q. وضع (w-D-3) / أَنْتَ (‘anti) / Form I
A. تَضَعِينَ (taDa3iina; you put); وَضَعْتِ (waDa3ti; you put)
Part III: Staying Active: Forming Arabic Verbs

6. ورق (w-r-q) / آنا (’anaa) / Form I

7. وزن (w-z-n) / نحون (naHnu) / Form IV

8. وحد (w-H-d) / آنا (’anaa) / Form VIII

9. وجد (w-J-d) / هم (hum) / Form I

10. وثق (w-th-q) / هي (hiya) / Form IV

11. وجه (w-J-h) / أنتم (’antum) / Form VIII

Getting to Know Medial Weak Verbs

In this section, you meet the most challenging type of irregular verbs in Arabic: the medial weak verbs. *Medial* simply means *in the middle*. Why is this name significant? Well, as you know, most Arabic verbs (and nouns) are made up of three consonants. When the middle consonant is a وَاَوُ (waaw) or a يَأْءِ (yaa’), more often than not something besides a *waaw* or a *yaa’* is used in that place. However, the original *waaw* or *yaa’* may reappear in some of the forms. You’ll see some books call these *hollow verbs*, because the medial *waaw* or *yaa’* will sometimes give the appearance that the verb is hollowed out.

Verbs with medial *waaw*

Verbs that have medial *waaw* are more common than verbs with medial *yaa’*, so I start with them. For some reason, the statistics overall in the Arabic language are that the *yaa’* as an actual consonant in the triliteral root is fairly rare. In the following section, I explain how the medial *waaw* behaves in each of the forms affected by it.

The medial *waaw* in Form I

In Form I, the medial *waaw* can take two different shapes. In one shape, the medial *waaw* will tend to stay as either a long or short *u* vowel. The important and useful verb قَالَ (qaala; to say) — which comes from the root قُولُ (q-w-l) — behaves this way.

Here are the features of a medial *waaw* verb that prefers the long or short *u* vowel in place of the *waaw*:

<table>
<thead>
<tr>
<th>Verb</th>
<th>Form</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>ورق</td>
<td>I</td>
<td>أَنا’ (‘anaa)</td>
</tr>
<tr>
<td>وزن</td>
<td>IV</td>
<td>نحون (naHnu)</td>
</tr>
<tr>
<td>وحد</td>
<td>VIII</td>
<td>أَنا’ (‘anaa)</td>
</tr>
<tr>
<td>وجد</td>
<td>I</td>
<td>هم (hum)</td>
</tr>
<tr>
<td>وثق</td>
<td>IV</td>
<td>هي (hiya)</td>
</tr>
<tr>
<td>وجه</td>
<td>VIII</td>
<td>أنتم (’antum)</td>
</tr>
</tbody>
</table>
The waaw only appears in the present tense and even then only as a long \( u \) vowel.

The long \( u \) vowel in the present tense is reduced to a \( ^{3}\) (Damma) in the two feminine plural forms.

In the past tense, you see a long \( a \) whenever the final consonant \( l \) has a vowel and a short \( u \) whenever the final consonant has a \( ^{5}\) (sukun).

The following tables show the past and present conjugations of قالَ (qaala; to say).

<table>
<thead>
<tr>
<th>Past conjugation for قالَ (qaala; to say)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﱐلُتْ (‘anaa qultu)</td>
</tr>
<tr>
<td>ﱐلُتْ (‘anta qulta)</td>
</tr>
<tr>
<td>ﱐلُتْ (‘anti qulti)</td>
</tr>
<tr>
<td>قالَ (huwa qaala)</td>
</tr>
<tr>
<td>قالَ (hiya qaalat)</td>
</tr>
</tbody>
</table>

قالَ ﱩك الْحَقَّ
(qultu laka al-Haqq. I told you the truth.)

<table>
<thead>
<tr>
<th>Present conjugation for قالَ (qaala; to say)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﱐوُلْ (‘anaa ‘aquulu)</td>
</tr>
<tr>
<td>ﱐوُلْ (‘anta taquulu)</td>
</tr>
<tr>
<td>ﱐوُلْ (‘anti taquuliina)</td>
</tr>
<tr>
<td>ﱐوُلْ (huwa yaqulu)</td>
</tr>
<tr>
<td>ﱐوُلْ (hiya taqulatu)</td>
</tr>
</tbody>
</table>

تأقوَّلُ النَّسَاء إِنْهُنَّ مَوَافِقَاتَ مَعِكَ
(taquulu an-nisaa’ ‘innahunna muwaafiqaat ma3aki. The women say that they agree with you.)

Make sure to notice that in the present tense, you can see all three consonants of the root in all but the feminine plural forms.

The verb نَامَ (naama; to sleep) shows you the second style a verb with medial waaw can display in Form I. Here, the medial waaw will become an \( a \) or \( i \) vowel. The features of verbs like نَامَ (naama) are:

- Instead of a Damma in the past tense, you use a \( ^{3}\) (kasra).
- In the present tense, you have a long \( a \) vowel (written with an \( ^{3}\) [‘alif]) in place of the long \( u \) (written with waaw).
- The feminine plural forms reduce the long \( a \) to a \( ^{5}\) (fatHa).

To read more about the Damma, kasra, and fatHa, check out Chapter 3.
The following tables show the conjugations of نَامَ (naama; to sleep).

### Past conjugation for نَامَ (naama; to sleep)

<table>
<thead>
<tr>
<th>نَامَتْ (`anaa nimtu)</th>
<th>نَامَ (naHnu nimmaa)</th>

<td>نَامَ (hunna yanamna)</td>
</tr>
</tbody>
</table>

لا نَامَ في الصَّفَّ أَبَداً.

(laa nanaamu fii-S-Saff ‘abadan. We never sleep in class.)

Even though you don’t see the واوا at all with this verb, the only verb that can have a long a (written with ‘alif) in the present tense of Form I is a medial واوا. So, look at that long a and always remember it’s secretly a واوا.

The particular style a medial واوا verb uses is predetermined. You can’t just select one or the other. A verb either follows the pattern of قَالَ (qaala) or نَامَ (naama). A dictionary can tell you the style a verb follows.

### The medial واوا in Form IV

A medial واوا causes no irregularity in Forms II and III. But Form IV is a different matter. In Form IV, the medial واوا vanishes altogether. Here are the guidelines to remember in this case:

- In the past tense, the واوا is replaced with a long a whenever the third consonant has a vowel.
- Forms with a سُكُون over the third consonant reduce the vowel to a فَتحَة.
- In the present tense, you encounter a long i vowel (written with ياء), except for the feminine plural forms, which reduce it to a كَسْرَة.
The verbُ (‘ajaaba; to answer) is a good example of how a Form IV medial waaw verb is formed. The following tables show the conjugations.

<table>
<thead>
<tr>
<th>Past conjugation for أجابُ (‘ajaaba; to answer)</th>
</tr>
</thead>
<tbody>
<tr>
<td>أجيبَ (‘anaa ‘ajabtu)</td>
</tr>
<tr>
<td>أنجبَ (nahHnu ‘ajabnaa)</td>

<tr>
<td>نجيبَ (hiya tujiibu)</td>
</tr>
<tr>
<td>نجيبَ (hum yujiibu)</td>
</tr>
<tr>
<td>نجيبَ (hiya yujiibu)</td>
</tr>
</tbody>
</table>

(‘ajaabat as-su’al sari3an. She answered the question quickly.)

<table>
<thead>
<tr>
<th>TIP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Take a mental note of the past and present tenses of أجابُ (‘ajaaba) because they show you at a glance how medial waaw appears in the forms after Form I. Whenever you see long a and long i between two consonants, you have a medial waaw or medial yaa’ verb. But because medial yaa’ is relatively rare, it’s probably a medial waaw.</td>
</tr>
</tbody>
</table>

The medial waaw in Forms VII and VIII

Like Form IV, Forms VII and VIII are other cases of the completely vanished medial waaw. Like the second style for Form I, the waaw is replaced with a long a everywhere except:

- Past tense forms with sukuun over the third consonant
- The feminine plural forms in the present tense

The verbِ إِنْقَاف (inqaada; to obey) demonstrates how to make the Form VII of a medial waaw verb. The following tables show you the conjugations.
Part III: Staying Active: Forming Arabic Verbs

Past conjugation for انقادة (inqada; to obey)

<table>

</tr>
</tbody>
</table>

كﹶﺜﻴﺮﺍﹰ ﺒﹸﺄﹾﻛﹸﻠﻮﺍ (ya3taaduuna 'an ya'kuluu kathiiran. They are accustomed to eating a lot.)

When you see a verb in Form VIII, resist the urge to assume that the taa’ appearing after the first consonant is part of the root. Keep in mind that any long a vowel in the past or present tense is likely hiding a waaw instead.

**The medial waaw in Form X**

Medial waaw verbs in Form X follow the same rules as Form IV. Here are the rules:

- In the past tense, the waaw is replaced with a long a whenever the third consonant has a vowel.
- Forms with a sukun over the third consonant reduce the vowel to a fatHa.
- In the present tense, you encounter a long i vowel (written with yaa’), except for the feminine plural forms, which reduce it to a kasra.

The verb استَقاءَمَ (istaqaama; to stand up) is an example of a Form X verb. The following are the conjugation tables for the verb.

<table>
<thead>
<tr>
<th>Subject</th>
<th>Past Tense</th>
<th>Future Tense</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANAA istaqamtu</td>
<td>NAHUH istaqamnaa</td>
<td></td>

<tr>
<td>anti istaqamti</td>
<td>antunna istaqam tunna</td>
<td></td>
</tr>
<tr>
<td>huwa istaqama</td>
<td>hum istaqamuun</td>
<td></td>
</tr>
<tr>
<td>hiya istaqamat</td>
<td>hunna istaqaman</td>
<td></td>
</tr>
</tbody>
</table>

استَقاءَمَ ﻓِي ﺍﻟْوَاجْمٰعِ وَﻗَدْمَتْ ﺍﻹِفْﺘِرَاحِ، (istaqamtu fii-l-ijtimaa3 wa-qaddantu iqtiraaHii. I stood up in the meeting and offered my proposal.)
### Part III: Staying Active: Forming Arabic Verbs

#### Present conjugation for **إستقام** (istaqaama; to stand up)

<table>
<thead>
<tr>
<th>Subject</th>
<th>Form</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>اناa</td>
<td>استقيم</td>
<td>Astaqimu (I stand up)</td>
</tr>
<tr>
<td>انتa</td>
<td>استقيم</td>
<td>Antu (you stand up)</td>
</tr>
<tr>
<td>انتII</td>
<td>استقيمي</td>
<td>Antum (we stand up)</td>
</tr>
<tr>

</tr>
<tr>
<td>ياII</td>
<td>استقم</td>
<td>Hum (they stand up)</td>
</tr>
<tr>
<td>ياIII</td>
<td>استقم</td>
<td>Hunna (you all stand up)</td>
</tr>
</tbody>
</table>

When we stand up together we will be strong. (3indamaa nastaqiimu ma3an sanakuunu 'aqwiyaa'. When we stand up together we will be strong.)

Form X is another example of the need to never disregard the clue of having a long a or long i in the verb. I’ve seen many students try to make the سين (siin) or تاء (taa’) of Form X part of the root.

#### Verbs with medial yaa’

Verbs with a medial yaa’ are somewhat rare in the language. But there are a few of them that are common and important verbs. A medial yaa’ presents its own peculiar irregularities to your verb formation. A verb with medial yaa’ in Form I follows these guidelines:

- A long a vowel takes the place of the yaa’ in the past tense when the third consonant has a vowel.
- The long a vowel in the past tense reduces to a kasra when the third consonant has a kasra.
- A long i vowel takes the place of the yaa’ in the present tense.
- The long i vowel in the present reduces to a kasra with the feminine plural forms.

The following conjugation table shows an example using the verb **باع** (baa3a; to sell).

<table>
<thead>
<tr>
<th>Subject</th>
<th>Form</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>اناa</td>
<td>بعث</td>
<td>Baa3tu (I sell)</td>
</tr>
<tr>

<td>Hiya baa3at (you sell)</td>
</tr>
<tr>
<td>ياII</td>
<td>بعنم</td>
<td>Hum baa3uu (they sell)</td>
</tr>
<tr>
<td>ياIII</td>
<td>بعنم</td>
<td>Hunna baa3na (you all sell)</td>
</tr>
</tbody>
</table>

My husband sold his car to his brother. (baa3a zawjii sayyaaratahu li-‘akhiihi.)
Chapter 10: Exploring Irregularity in Arabic Verbs

The main thing to concentrate on in the previous charts is the vowel over the prefixes in the present tense. If you see a fatHa over the prefix, and then a long i where you may have expected a medial consonant, it means that you have a Form I medial yaa’ verb on your hands. If you see a Damma, you have a Form IV irregular verb.

In Forms IV, VII, VIII, and X, verbs with medial yaa’ behave exactly the same as Form IV, VII, VIII, and X medial waaw verbs.

For each of the following items, create the past and present tenses of the verbs indicated by the root, pronoun, and verb form that I give you.

Q. ﻓﻮﺕ (f-w-t) / ﻫُﻢ (hum) / Form I

A. ﻳﹶﻔﻮﺗﻮﻥﹶ (yafuutuuna; they go by); ﻓﺎﺗﻮﺍ (faatuu; they went by)

12. ﺳﻴﺮ (s-y-r) / ﻫُﻴﹶ(372,13),(435,27) (hiya) / Form I

13. ﺛﻮﺭ (th-w-r) / ﻥﹶﺤﹾﻦﹶ (naHnu) / Form IV

14. ﻣﺎ tuo (T-w-3) / ﺛﺎﻥﹶ (’anta) / Form X

15. ﻳَﻮُذ (3-w-dh) / ﻫُﻢ (hum) / Form I
Working with Final Weak Verbs

When the weak consonants واٰ (waaw) or ياٰ (yaa’) appear as the final consonant in an Arabic verb root, they create a series of irregularities in your verb production. I explain verbs with both consonants in the following sections. You may see verbs with a final waaw or yaa’ called defective verbs in other books. This really isn’t a good way to reference them, because they aren’t defective at all. Rather, the final weak consonant just presents its own distinct patterns.

Verbs with final waaw

In Form I, verbs with a waaw as their third (and final) consonant follow these rules:

- Forms with ‘(sukuun) over the third consonant are normal, and the waaw appears as a full consonant.
- The waaw disappears in the past tense third person feminine singular.
- The waaw turns into a long a (written as an ‘alif [‘alif]) in the past tense third person masculine singular.
- The past tense third person masculine plural is a consonantal waaw.
- All present tense forms without a suffix replace the waaw with a long u vowel.
- The waaw disappears in the present tense second person feminine singular.

As an example, the following tables show the conjugations of the Form I verb دَعَأ (da3aa; to call, invite).

<table>
<thead>
<tr>
<th>Past conjugation for دَعَأ (da3aa; to call, invite)</th>
</tr>
</thead>
<tbody>
<tr>
<td>دَعَأَتْ (‘anaa da3awtu)</td>

<tr>
<td>يَدْعُو</td>
<td>(hiya tad3uu)</td>
<td>يَدْعُونَ</td>
</tr>
</tbody>
</table>

Note that a final waaw verb is the only case in the whole Arabic language where the masculine and feminine plural forms are identical. Verbs with final waaw behave as if they have a final yaa’ in all the other Forms. To see what changes that means for you, consult the next section on final yaa’ verbs.

**Verbs with final yaa’**

Much more irregular than final waaw verbs (see the previous section) are those with a yaa’ as the third and final consonant. They’re more irregular than final waaw verbs in that there are three different styles that a final yaa’ verb can follow. And you don’t have your choice as to which of the three styles you prefer. Instead, if a verb has a final yaa’, you need to determine which of the three it is in order to correctly state it in the past and present in Form I.

**The final yaa’ in Form I**

I show you the verb ﺑَكَى (bakaa; to cry) as an example of the first style of a final yaa’ verb. The traits of this style of final yaa’ verb are a tendency for the yaa’ to be a consonant in a closed syllable when suffixes are added to the past tense and for the yaa’ to appear as a long i vowel in the present tense. The following tables show the conjugations of ﺑَكَى (bakaa; to cry).

Past conjugation for ﺑَكَى (bakaa; to cry)

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>أَبْكَيْتُ</td>

</tr>
</tbody>
</table>

 هو سَعِيّ لَا نَتَكَلَّمَ مَعَهُ.
(huwa yas3aa li-’an yatakallama bi-buT’. He is making an effort to speak slowly.)

### The final yaa’ in Forms II–X

Verbs with either final وَااَو or final يَااَ’ each have the same endings in Forms II–X. Essentially, the final وَااَو verbs act as if they were final يَااَ’. Forms II, III, IV, VIII, and X use the same endings as the Form I verb بِكَااَ (bakaa; to cry). In the following conjugation tables, I show you the Form IV verb أَخْفَى (’akhfaa; to hide) as an example.

## Past conjugation for أَخْفَى (’akhfaa; to hide)

<table>
<thead>
<tr>
<th>Subject</th>
<th>Infinitive</th>
<th>Past Tense</th>
</tr>
</thead>
<tbody>
<tr>
<td>أَخْفَيْتُ</td>
<td>(’anaa ’akhfaytu)</td>
<td>أَخْفَيْنَ</td>
</tr>
<tr>
<td>أَخْفَيْتَ</td>
<td>(’anta ’akhfayta)</td>
<td>أَخْفَيْنَ</td>
</tr>
<tr>
<td>أَخْفَيْتِ</td>
<td>(’anti ’akhfayti)</td>
<td>أَخْفَيْنَ</td>
</tr>
<tr>
<td>أَخْفَيْ</td>
<td>(huwa ’akhfaa)</td>
<td>أَخْفَأَوُا</td>
</tr>
<tr>
<td>أَخْفَيْتُ</td>
<td>(hiya ’akhfat)</td>
<td>أَخْفَيْنَ</td>
</tr>
</tbody>
</table>

 أَخْفَيْتُ الْمَوْضُوع مِنْ أَمْهَا.
(’akhfat al-mawDuu3 min ’ummihaa. She hid the situation from her mother.)
### Present conjugation for **\( \text{ﺃﹶﺧﹾﻔﻲ} \) (akhfaa; to hide)**

<table>
<thead>
<tr>

<tr>
<td>hiya tatassamaw</td>
<td>nattsamman</td>
</tr>
</tbody>
</table>

**\( \text{hal nattsamman faaTima 'am hudaa? Are you named Fatima or Huda?} \)**

Notice that the only difference between the masculine and feminine plural forms in the previous tables is the consonant before the final -\( \text{na} \) prefix — \( \text{waaw} \) for masculine and \( \text{yaa'} \) for feminine.
Now it’s time to reinforce what you’ve discovered about final weak verbs with a bit of practice forming them. For each of the following items, create the past and present tenses of the verbs indicated by the root, pronoun, and verb form that I give you.

Q. ﺧﻔﻰ (/k-f-y/) / هو (/huwa/) / Form VII

A. ﺱْ זהו (/yakhtafii; he disappears); ﺱْ هذا (/ikhtafa; he disappeared)

18. كﻔﻰ (/k-f-y/) / هو (/huwa/) / Form I

19. ﺭﺟﻮ (/r-j-w/) / ﺧْﻨَن (/naHnu/) / Form I

20. ﺷْرِي (/sh-r-y/) / ﺑِنْت (/'anta/) / Form VIII

21. ﺑْقَي (/b-q-y/) / ﺑِنْت (/'antum/) / Form I

22. ﺣْضَر (/m-D-y/) / ﺑِنْا (/'anaa/) / Form IV

23. ﻣْضَو (/f-D-w/) / هو (/huwa/) / Form V

**Touching on Geminate Verbs**

Sometimes a verb has the same consonant in the second and final position. Because you essentially have twin consonants in one verb, these are called *geminate verbs* (like my zodiac sign, Gemini). Some linguists call these *doubled verbs*, but this name isn’t helpful because there’s plenty of doubling that goes on in Arabic apart from the nature of the root (such as the doubling of the middle consonant in Form II).

With geminate verbs in Forms II, III, V, and VI, there’s no irregularity at all. In those forms, you can just use all three consonants normally, even though the second and third consonants are identical. In those forms, you have both consonants living side by side. But in Form I, a geminate verb will sometimes assimilate the two identical twins into one doubled consonant.

In Form I, there’s no irregularity when you put a suffix that begins in a consonant on the verb. But with other suffixes and in all present tense forms except the feminine plural, the second and third consonants contract into one doubled consonant. To show you how this appears, I include a conjugation table of the Form I verb ﻋَدَّ (3adda; to count).
### Past Conjugation for عَدَّ (3adda; to count)

هل تستمر في دراساتك؟
(hal tastamirru fii diraasatika? Do you continue in your studies?)

The way to master the geminate verbs is to notice that the twin consonants double up whenever there’s a vowel after them. When there’s no vowel (such as when you have a consonant suffix), the twins insist on their individuality and both get pronounced.

You’re writing an e-mail describing your vacation to a friend. Fill in the blanks in the e-mail with the irregular verbs I provide. You’ll use each of the items once. Each one will best fit the context somewhere in the e-mail.

 Plains is considered ________ in your studies.

(3 indii mushkila li’anna-l-muwaddhaHaflina ‘aDaa3uu Haqaa’ibii fi’il-maaTar.)

Chapter 11

Using the Imperative in Commands

In This Chapter

- Using formal and informal commands in Arabic
- Producing imperative forms for regular verbs
- Understanding the forms of irregular Arabic imperatives

I bet in your average day you tell other people what to do hundreds of times. For example, if you’re a parent, you tell your kids to behave or to do their homework. Or, if you’re a student, you tell your roommates to pick up their clothes or to turn down their music. Now, I’m sure you’re appropriately polite about it. I mean, even if you’re a boss with lots of employees who answer to you, you’ve noticed that just barking orders doesn’t always get the desired result (unless, of course, you’re in the military!). You do better to at least add “please” to your request. And, chances are, when you tell someone what to do, you aren’t really so much telling them directly what to do as asking them in a roundabout way. You may say something like, “Would you please have this project done by close of business?” You may even ask that dreaded question, “Would you like to take out the trash?”

This chapter discusses the verb forms known as commands or imperatives. You first see how to work with verbs that have three strong consonants. Then later in the chapter, you uncover the changes to make when one of the three consonants is weak. Arabic also uses forms of the jussive mood to produce prohibitions (negative commands, such as “Don’t stay out too late”) as well as hortatory commands (suggestions like “Let’s go out sometime”). You can explore the jussive forms and the ways you can use the jussive in Chapter 13.

As in English, Arabic has ways to form commands along the entire spectrum of directness and courtesy. In this chapter, you discover how to use and form a command for any verb and every occasion, whether you need to direct it to a close friend or a dignitary you just met. So, please get ready. Would you like to begin?

Addressing People Properly with Commands

When you give any type of command, you’re addressing another person (unless you’re talking to a pet). You may be talking to one person, two friends, or 20 strangers, but a command is something you direct to other people. So many other things in Arabic can be about inanimate objects or people who aren’t even in the room. But, generally speaking, a command is, by definition, an utterance directed at another
human. (You can, of course, direct a command to your dogs. And they can even understand simple commands. But I'll leave that for another book: *Training Your Pets with Arabic Commands For Dummies!* Or, maybe not.)

A command by definition is a request for action on the part of someone else. But you can't really *make* anyone else do something. Just like in English, asking someone to do something in Arabic can run the spectrum of barking an order to asking for things as nicely as possible. Think of the difference, for instance, between these two sentences:

*Finish your homework!*

*Would you be so good as to finish your homework, please?*

The writer of both sentences has the same intention and hoped for outcome, but the tone of each is very different.

### When to use the command form

As a general rule of thumb, Arabic courtesies for commands are the same as in English. In other words, don’t give a straight-out command to someone in Arabic if you wouldn’t command that person in English. At the very least, don’t forget to add a word for “please” if you direct a command at someone. If you’re in a setting like a taxi cab, restaurant, or hotel lobby, you can use command forms with employees, but omitting “please” is needlessly rude. Here are some examples of commands you might use in such settings:

*فَاحْمِلْ حَقِيَّتِي إِلَى غَرَفَتِي من فَضْلِكَ.*

(*iHmil Haqiibatii 'ilaa ghurfatii, min faDlika.* Carry my bag to my room, please.)

*مِن فَضْلِكَ أَخْبِرِي الْطَّباَحَ بَأنَّ الْطَّعَامَ كَانَ مُمْتَازًا.*

(*min faDliki 'akhbirii aT-Tabbaakha bi'anna aT-Ta3aama kaana mumtaazan.* Please tell the cook that the food was wonderful.)

The preceding examples involve singular imperatives. You can generally use singular forms with a close friend or family member as well as with employees commonly understood to be in a servile position. **Remember**: You never have any reason to omit the courtesy of the word “please.”

### When to use the polite alternatives to the command form

Just as in English, formal communication requires you to ask for things in a more round about way. When you write a business letter, you ordinarily stick to a level of courtesy beyond singular commands. The way Arabic kicks formality up a notch is to use the plural command. Just as the Queen of England can say of herself, “We are not amused,” using plural forms directed at a single person is seen as a polite way to ask for things. Here is an example of a plural command used for politeness:
Creating Commands of Regular Verbs

You write or speak commands with the intention of getting someone to do something. It makes sense that a language would use the simplest and most concise form of a verb to do that. Think about English for a moment. You change vowels and add suffixes to the verb to tell depending on the tense. Someone tells a story. Yesterday he told a story. Right now she’s telling a story. But if you need to use the verb as a command, you use the most basic form available, and say “Tell me something.” Arabic is much the same. In this section, I show you how to strip the present tense of the verb down to its most basic form, the command.

Producing Form I regular verb commands

Form I verbs are the most common type in the Arabic language. (I cover the ten forms of the Arabic verb in Chapter 9.) I start with Form I verbs because they’re the most likely form you’ll face when writing and reading in Arabic. (You use a different final step to produce the commands for Forms II through X.) If you know how to form the present tense, forming the command won’t be difficult for you. If you’re rusty on the present tense, review it in Chapter 2.

A command is something you say to another person. And when you talk to another person, you use the second person present tense forms. Depending on whether you’re talking to one male, one female, or a mixed group of people, you use one of the four second person present tense forms of the verb. So there are four command forms, corresponding to the four second person present tense verbs. You shorten the second person present tense form of the verb to arrive at the command forms by following these steps:

1. Remove any suffix that follows a long vowel.

2. Shorten one more form, the second person masculine singular, by removing the final vowel, the Damma, and replacing it with the Sukuun, which indicates that it has no vowel at all.

3. Add an Alif (alif) after the Waaw (waaw) of the masculine plural form.

   Arabic always adds an alif after the long u sound of a plural verb; it has no pronunciation value.

4. Remove the present-tense prefix from all four second person present tense verb forms.

5. Identify the vowel after the second consonant of your verb and follow these instructions:
Part III: Staying Active: Forming Arabic Verbs

• If the vowel is an a (written with  FatHa), add a short i vowel (written with an 'alif and a Kasra) at the beginning of the word.
• If the vowel is an i (written with Kasra), add a short i vowel (written with an 'alif and a Kasra) at the beginning of the word.
• If the vowel is a u (written with a Damma), add a short u vowel at the beginning of the word (written with an 'alif and a Damma).

When you follow these five steps for the Form I verb  (dhahaba; to go), you produce the commands in Table 11-1.

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td>('anta tadh-habu; You go)</td>
<td>(idh-hab; Go!)</td>
</tr>
<tr>
<td>('anti tadh-habiina; You go)</td>
<td>(idh-habi; Go!)</td>
</tr>
<tr>
<td>('antum tadh-habuuna; You go)</td>
<td>(idh-habuu; Go!)</td>
</tr>
<tr>
<td>('antunna tadh-habna; You go)</td>
<td>(idh-habna; Go!)</td>
</tr>
</tbody>
</table>

The verb  (dakhala; to enter) has a ' (Damma) after the second consonant in the present tense. Follow the five steps from earlier in the chapter to produce the command forms, which you can see in Table 11-2.

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td>('anta tadkhulu; You enter)</td>
<td>(udkhul; Enter!)</td>
</tr>
<tr>
<td>('anti tadkhuliina; You enter)</td>
<td>(udkhulii; Enter!)</td>
</tr>
<tr>
<td>('antum tadkhuluuna; You enter)</td>
<td>(udkhuluu; Enter!)</td>
</tr>
<tr>
<td>('antunna tadkhulna; You enter)</td>
<td>(udkhulna; Enter!)</td>
</tr>
</tbody>
</table>

Here are examples of a few sentences showing the command forms in action:

إقرأ الكتابَ.
(iqra' al-kitaaba. Read the book.)

اكتبُ أسماؤكَ.
(uktubna asmaa'akunna. Write your names.)

This exercise lets you apply the five steps of command production that I explain earlier. For each item, I give you a second person present tense verb for Form I. Your job is to turn each one into the command form that matches the gender and number of the present tense verb you start with.
Chapter 11: Using the Imperative in Commands

### Q.
**茄ْمَلُ (ta3malu; You work)**

### A.
**أَمَلُ (13mal! Work!)

<tr>
<td>9.</td>
<td><strong>تَسْمَحُ (tasmaHu; You permit)</strong></td>
</tr>
<tr>
<td>10.</td>
<td><strong>تَسْمَعْونَ (tasma3uuna; You hear)</strong></td>
</tr>
</tbody>
</table>

### Producing regular verb commands for Forms II, III, V, and VI

To produce the commands of Forms II, III, V, and VI, you use some of the same steps you use to produce commands of Form I verbs (see the previous section). The difference is that you can stop after Step 4 with these verbs because the first consonant has a vowel. The fifth step is necessary only when Steps 2 through 4 leave an initial consonant without a vowel.

Here are the steps you take to produce commands for Forms II, III, V, and VI:

1. **Starting from the end of the verb, remove any suffix that follows a long vowel.**
2. **Shorten up one more form, the second person masculine singular, by removing the final vowel, the أَلْف (alif), and replacing it with the سُكُون (sukuun), which indicates that it now has no vowel at all.**
3. **Add an أَلْف (alif) after the وَاَو (waaw) of the masculine plural form.**
   
   Arabic always adds an 'alif after the long u sound of a plural verb; it has no pronunciation value.
4. **Remove the present-tense prefix from all four second person present tense verb forms.**

Table 11-3 shows the commands for the Form II verb درَسُ (darrasa; to teach).
### Table 11-3
**Imperative of دَرَسَ (darrasa; to teach), a Form II Verb**

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>

<tr>
<td>﴿اِنْتَنْ تُتَبَادَلُن﴾ (‘antunna tatabaadalna; You exchange)</td>
<td>﴿تَبَادَلَن﴾ (tabaadalna; Exchange!)</td>
</tr>
</tbody>
</table>
Now I give you a chance to practice producing the commands of verbs in Forms II, III, V, and VI. Produce the command that corresponds to the second person present tense form I give you.

Q. ﺑﹶﻜﹶﻠﹶﻔﹶ (tukallifu; You entrust)

A. ْﻚﹶﻠﹶﻔﹾ (kallif! Entrust!)

11. ﺑﹶﺘﹶﺤﹶﺒﹶﺲْ (tataHassanuuna; You improve)

12. ﺑﹶﺘﹶﺤﹶﺒﹶﺲْ (tuqarriru; You decide)

13. ﺑﹶﺘﹶﺤﹶﺒﹶﺲْ (tataaraasalu; You correspond)

14. ﺑﹶﺘﹶﺤﹶﺒﹶﺲْ (tulaaHiDHuuna; You notice)

15. ﺑﹶﺘﹶﺤﹶﺒﹶﺲْ (tumarrinu; You practice)

Producing regular verb commands for Forms IV, VII, VIII, IX, and X

Removing the present tense prefixes from Forms IV, VII, VIII, IX, and X leaves behind a consonant without a vowel. But Arabic doesn’t accept consonants without vowels at the beginnings of words. To solve the problem, you need another step to complete your command production. So to create the commands for these verbs, you have to follow the first four steps from the earlier section, “Producing Form I regular verb commands,” and then add the new Step 5. Here are the steps to follow:

1. Starting from the end of the verb, remove any suffix that follows a long vowel.

2. Shorten up one more form, the second person masculine singular, by removing the final vowel, the ُ (Damma), and replacing it with the ٌ (sukun), which indicates that it now has no vowel at all.

3. Add an َّلِفْ (alif) after the ْوَ (waaw) of the masculine plural form.

   Arabic always adds an 'alif after the long u sound of a plural verb; it has no pronunciation value.

4. Remove the present-tense prefix from all four second person present tense verb forms.

5. Add the past-tense prefix specific to each form.

I give you an example for four of the forms in this section; see Tables 11-7, 11-8, 11-9, and 11-10.
Table 11-7 Imperative of *(akmala; to complete)*, a Form IV Verb

Now I give you a chance to practice producing the commands of verbs in Forms IV, VII, VIII, IX, and X. Produce the command that corresponds to the second person present tense form I give you.

Q. تَعْمِلُينَ (tasta3milina; You use)
A. إِسْتَعْمِلِي (ista3mili; Use!)

16. تَنْتَقِلِينَ (tantaqiliina; You move)
17. تُعْلِنِينَ (tu3liniina; You announce)
18. تَعْتَقِبلُونَ (tastaqbiluuna; You greet)
19. تُشْرِفُ (tushrifu; You supervise)
20. تُنْتَخِبُونَ (tantakhibuuna; You elect)

### Making Commands with Weak Verbs

Verb forms in Arabic are quite regular whenever you have three strong consonants in the root. However, whenever one of the so-called “weak” letters appears, the verb can become irregular. Commands are no different. If you aren’t familiar with the ways weak letters change the verb, you can review the topic in Chapter 10.

### Commanding with the initial أَلِف (’alif) and initial وَاو (waaw)

When you have an أَلِف (’alif) or a وَاو (waaw) as the first consonant, it simply drops off when you create a command for Form I verbs. Tables 11-11 and 11-12 show some examples.

<table>
<thead>
<tr>

Part III: Staying Active: Forming Arabic Verbs

Table 11-12  Imperative for **وضع** (waDa3a; to put), a Form I Verb

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>'anta taDa3u; You put</strong></td>
<td><strong>ضَعُ (Da3; Put!)</strong></td>
</tr>
<tr>
<td><strong>'anti taDa3iina; You put</strong></td>
<td><strong>ضَعِي (Da3ii; Put!)</strong></td>
</tr>
<tr>
<td><strong>'antum taDa3uuna; You put</strong></td>
<td><strong>ضَعِوا (Da3uu; Put!)</strong></td>
</tr>
<tr>
<td><strong>'antunna taDa3na; You put</strong></td>
<td><strong>ضَعِن (Da3na; Put!)</strong></td>
</tr>
</tbody>
</table>

In other verb forms, commands from initial **أَلِف** (alif) and initial **وَاء** (waaw) verbs are no more irregular than the present tense from which you form them. Here are a few examples of commands from initial **أَلِف** (alif) and initial **وَاء** (waaw) verbs. The third example shows you how an initial **وَاء** (waaw) Form VIII verb is regular in its production:

*Da3 Haqibatii fi-l-zaawiyati, min faDlika. Put my bag in the corner, please.*

*كَلُوا بِأَوْلَادٍ.*

*Eat up, children.*

*أَتِجِهُ إِلَى الْبَيْسَارِ عَنْدَ الْمُفَتَّرِقَ.*

*Head to the left at the corner.*

**Commanding with medial weak verbs**

A *medial weak verb* is a verb with a **وَاء** (waaw) or a **يَاء** (yaa') as its second consonant. To produce the command of a medial weak verb, you follow the same first four steps as demonstrated in other sections of this chapter. But then you have a unique fifth step in which you reduce the long middle vowel for the masculine singular and feminine plural forms. The feminine singular and masculine plural commands are finished with just the first four steps.

If the medial vowel is written with **وَاء** (waaw), replace it with **ُ** (Damma). Table 11-13 shows the commands of a common verb of this type.

Table 11-13  Imperative of **قَالَ (qaala; to say), a Form I Medial Weak Verb**

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>'anta taquulu; You say</strong></td>
<td><strong>قُلْ (qul; Say!)</strong></td>
</tr>
<tr>
<td><strong>'anti taquuliina; You say</strong></td>
<td><strong>قُولِي (quuli; Say!)</strong></td>
</tr>
<tr>
<td><strong>'antum taquuluuna; You say</strong></td>
<td><strong>قُولوا (quuluu; Say!)</strong></td>
</tr>
<tr>
<td><strong>'antunna taqulna; You say</strong></td>
<td><strong>قُلْنَ (qulna; Say!)</strong></td>
</tr>
</tbody>
</table>
If the medial vowel is written with ياء (yaa’), replace it with كسرة (kasra). Table 11-14 shows examples of commands for a verb with a medial ياء (yaa’).

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘اonta tabii3u; You sell</td>
<td>بيع (bi3; Sell!)</td>
</tr>
<tr>
<td>‘اontabi3iina; You sell</td>
<td>بيعي (bi3i; Sell!)</td>
</tr>
<tr>
<td>‘اontum tabii3uuna; You sell</td>
<td>بعوا (bi3uu; Sell!)</td>
</tr>
<tr>
<td>‘اontunna tabii3na; You sell</td>
<td>بيعن (bi3na; Sell!)</td>
</tr>
</tbody>
</table>

If the medial vowel is written with ألف (alif), put فتحة (fatHa) in its place for the masculine singular and feminine plural command forms. Table 11-15 shows commands for this type of verb.

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘اonta takhaafu; You are afraid</td>
<td>خاف (khaf; Be afraid!)</td>
</tr>
<tr>
<td>‘اontakihaaфиina; You are afraid</td>
<td>خافي (khaafi; Be afraid!)</td>
</tr>
<tr>
<td>‘اontum takhaafuuuna; You are afraid</td>
<td>خافوا (khaafuu; Be afraid!)</td>
</tr>
<tr>
<td>‘اontunna takhaafna; You are afraid</td>
<td>خافن (khafna; Be afraid!)</td>
</tr>
</tbody>
</table>

The same reductions in vowel length that take place in Form I also occur in Forms II–X. Table 11-16 shows an example of a Form IV verb command from a medial weak verb.

<table>
<thead>
<tr>
<th>Present Tense</th>
<th>Imperative</th>
</tr>
</thead>
<tbody>
<tr>
<td>‘اonta tujiibu; You reply</td>
<td>أجيب (‘ajib; Reply!)</td>
</tr>
<tr>

<td>أجيبي (‘ajiibi; Reply!)</td>
</tr>
<tr>
<td>‘aonta tujiibuuna; You reply</td>
<td>أجيبوا (‘ajiibuu; Reply!)</td>
</tr>
<tr>
<td>‘aontunna tujiibna; You reply</td>
<td>أجيبن (‘ajiibna; Reply!)</td>
</tr>
</tbody>
</table>
Commanding with the final 

**(waaw)** and **(yaa')**

Verbs with a final **(waaw)** or final **(yaa')** form their command forms with the same first four steps as every other verb with only one exception: The final long vowel of the masculine singular reduces to a short vowel. If the final vowel is written with **(yaa')**, it reduces to ٍ **(kasra)**. Table 11-17 shows commands for this type of verb.

| Table 11-17 Imperative of **(bakaa; to cry)**, a Form I Final Weak Verb |
|---------------------------------|---------------------------------|
| **Present Tense**               | **Imperative**                  |
| 'anta tabkii; You cry)         | اْبْكِ (ibki; Cry!)              |
| 'anti tabkiina; You cry)       | اْبْكِ (ibkii; Cry!)             |
| 'antum tabkuuna; You cry)      | اْبْكْوَ (ibkuu; Cry!)           |
| 'antunna tabkiina; You cry)    | اْبْكْیْنِ (ibkiina; Cry!)       |

If the final vowel is written with **(waaw)**, it reduces to ُ **(Damma)**. Table 11-18 gives you the commands for this type of verb.

| Table 11-18 Imperative of **(da3aa; to call)**, a Form I Final Weak Verb |
|---------------------------------|---------------------------------|
| **Present Tense**               | **Imperative**                  |
| 'anta tad3uu; You call)         | اْدْعُ (ud3u; Call!)            |
| 'anti tad3iina; You call)       | اْدْعِ (ud3ii; Call!)           |
| 'antum tad3uuna; You call)      | اْدْعُوا (ud3uu; Call!)         |
| 'antunna tad3uuna; You call)    | اْدْعُونَ (ud3uuna; Call!)      |

If the final vowel is written with **(alif maksuura)**, it reduces to ً **(fatHa)**. In Table 11-19, I show you the commands of a verb of this type.
Table 11-19  Imperative of ﺗَﺣَﺪّي (taHadda; to provoke),
a Form V Final Weak Verb

Chapter 12
Writing to the Point with Object Suffixes and Pronouns

In This Chapter
► Changing nouns with possessive suffixes
► Forming object suffixes on verbs
► Adding suffixes to prepositions

"How can you correct this sentence to make this sentence more concise?"
That’s easy! Just don’t repeat the words “this sentence!” After you’ve referred to something once, you can usually replace it with a pronoun in the second reference. For example, you may write something like this: “How can you correct this sentence to make it more concise?”

You use pronouns so often in your speaking and writing that you probably don’t even think about them. Like so many things in a language, the most common things can frequently be the most irregular. For instance, consider the fact that English preserves different forms of pronouns depending on whether the pronoun is a subject or an object. And so, you write “He celebrates his birthday with me,” but then “I saw him at the party.”

Like English, Arabic also has different forms of pronouns depending on whether the pronoun is the subject or the object of the verb. In Arabic, however, only the subject pronouns will be separate words. Every other type of pronoun will be a suffix on a verb or preposition. In this chapter, you discover everything you need to tighten your writing by effortlessly adding object pronouns to verbs and prepositions.

Forms of the Object Suffix

Object suffixes that are added to a verb are almost identical to the possessive pronoun suffixes. If you’re rusty on the possessive pronoun suffixes, you may want to study them before working through this chapter. I discuss them in Chapter 2.

I show you the minor difference between object suffixes and possessive pronoun suffixes before letting you see all the forms together. Then I show you just a few minor tweaks to the system that you’ll encounter before you can declare yourself an expert on the object suffixes.
Note: Because the focus of this chapter is the object suffixes, I will not use all of the formal final endings on the nouns and verbs.

Using nii instead of ii

The object suffixes themselves depart from the possessive pronoun suffixes in only one place: the first person singular. When you put the possessive pronoun for my on a noun in Arabic, the ending is 

( 注意词语的拼写。

But when you want to describe in Arabic how someone saw me, the ending you put on the verb is (nii). Here’s an example of this suffix in use. I underline the ending so you can locate it easily:

‘akhbarani 3an al-binaaya allatii ya3amlu fiihaa. He told me about the building in which he works.)

Table 12-1 shows a run-through of the object suffixes using the third person past tense verb, زارة (zaara; he visited), as an example.

<table>
<thead>
<tr>

<td>hunna</td>
<td>زاركنهم (zaarahunna; he visited them)</td>
</tr>
</tbody>
</table>

Replacing the ُ (Damma) with a ِ (kasra)

You need to make one minor adjustment in the vowel of a few of the object suffixes. Arabic doesn’t like having a u vowel (written with the ُ [Damma]) after the i vowel, or ِ (kasra). So it changes the u to another i. (Linguists call this euphony, meaning, it sounds nicer.) So where you might have expected رآيتني (ra’aytihu; you saw him), you instead get رآيتني (ra’aytihi). Three conditions cause this euphonic change to happen. You will see it after:
a short i (written with kasra)
a long i (written with yaa’)
a closed syllable ending in y (written with a yaa’ and a sukun)

Here are two examples:

hal taraktihim fil-s-sayyara? Did you leave them in the car?
(ra’aytihi hunaka, ‘alaysa kadhaalika? You saw him there, isn’t that so?)

Looking at the disappearing ‘alif

The change I explain in this section is only a matter of spelling. You ordinarily write an extra ‘alif after the third person masculine plural in the past tense:

‘akaluu aT-Ta3aama. They ate the food.

When you add an object suffix, however, you just remove that extra ‘alif and add your object suffix:

‘akaluuhu. They ate it.

Here are a few more examples:

katabuu rasaa’ilahum thumma ‘arsaluuhaa li-‘asdiqaalihim. They wrote their letters and then sent them to their friends.

al-bayt jadiid, laakin baa3uuhu 3alaa kulli Haal. The house is new, but they sold it anyway.

Changing tum to tumuu

The change I explain in this section is a little more involved than the magical disappearing ‘alif trick. When you write the second person masculine plural ending, you use the ending tum. Here’s an example:

‘akaltum aT-Ta3aama. You ate the food.

When you add an object suffix to a verb with the second person masculine plural ending, however, you change the verb ending to tumuu, as in this example:

‘akaltumuuhu. You ate it.
Part III: Staying Active: Forming Arabic Verbs

Here are two more examples to demonstrate the different ending:

آرسلت الطارد منذ أسبوع. أراك تموه بعد؟
('arsaltu a-T-Tard mundhu usbuu3. 'ara'aytumuuhu ba3d? I sent the package a week ago. Have you seen it yet?)

أعجبتني تلك المقالة. هل قرأتها أيضاً؟
('a3jabatni tilka-l-maqaala. hal qara' tumuuhaa 'ayDaN? I loved that article. Have you also read it?)

Now it's your turn to have fun with object suffixes. In the following exercise, I give you a verb and a pronoun. Take the verb and add to it the object suffix that corresponds to the pronoun next to it.

Q. أشربُ ('ashrabu; I drink) / هوُ (huwa; it)
A. أشربهُ ('ashrabuhu; I drink it)

1. رأتُ (ra'at; she saw) / نحنُ (naHnu; we)

2. أخبرواُ ('akhbaru; they told) / أناُ ('anaa; I)

3. آرسلتَ ('arsalti; you sent) / همُ (hum; they)

4. رافقْتُ (raafaqtu; I accompanied) / هيُ (hiya; she)

5. تركناُ (taraknaa; we left) / أنتمَ ('antum; you)

6. سمعْتُ (sami3tum; you heard) / هوُ (huwa; he)

7. كَلْمَ (kallama; he spoke with) / أناُ ('anaa; I)

8. نجبُ ('tuHibbu; she loves) / أنتَ ('anta; you)
9. نُكَلِفُ (nukallifu; we entrust) / آنتُ (’anti; you)

10. تُؤُمِنُ (tu’minu; you believe) / هُمُ (hum; they)

**Important verbs using object suffixes**

After you’re comfortable with putting the object suffixes on verbs, you’re ready to use some important Arabic idiomatic verbs that require object suffixes. I show you two of the most common and useful verbs in this category. The proper use of these verbs will distinguish your Arabic use.

The Arabic verb أَعْجَبْ (‘a3jaba; to please) functions exactly the same as Spanish gustar. The thing liked will actually be the subject of the verb and the thing that likes it will be the direct object, expressed as an object suffix. In your basic Arabic studies, you may have learned to say you like something using أَحْبَبْ (’uHibbu; I like/love). This usage isn’t wrong, but it isn’t as formal and proper as أَعْجَبْ (‘a3jaba). (This verb is a Form IV verb, which you can review in Chapter 9.) Here are two examples that use this verb:

. المَطْعَم يُعْجِبُني (yu3jibunii al-maT3am. I like the restaurant. [literally, The restaurant pleases me.])
. السيَّارة أَعْجَبَتْنَا (‘a3jabatnaa as-sayyaara. We liked the car. [literally, The car pleased us.])

Another important idiomatic verb to include in your Arabic vocabulary is وَصُلَ (waSala; to arrive). This verb is a Form I verb but it’s irregular because it has a وَاء (waaw) as the first consonant of its root (you can refresh your memory on irregular verbs in Chapter 10). An idiomatic usage of وَصُلَ (waSala) requires you to use object suffixes. When you get something in the mail, the preferable idiom in Arabic is to say, The letter arrived [to] me. Here’s the Arabic equivalent:

. الرِّسَالَة وَصَلَتْني (waSalatnii ar-risaala. I received the letter.)

Whenever a language behaves differently than our native language, it’s difficult to break out of our normal mode of thinking. Resist the natural temptation to make yourself the grammatical subject when you remark that you like something or got something in the mail. Instead, think backwards from how English works. For example, avoid thinking I like or I receive. Instead, write please me and arrived me. If you use the verbs in this section correctly, these idioms will distinguish you as having a good command of Modern Standard Arabic.
Your Arabic teacher knows how important it is for you to master the idioms covered in this section. So, she’s giving you a pop quiz in which you have to form several sentences with each verb. For each question, you get a noun, a verb, and a pronoun. The noun is the grammatical subject and the pronoun is the object. Create the indicated Arabic sentence for both the past and present tenses.

(ar-rasaa'il / wasala / ana)
Connecting Prepositions with Object Pronouns

You use pronouns with prepositions because you can write more concisely with them. The rule we follow in English is to use the same form of the pronoun after prepositions as we would use for direct objects. For example, you may say, *I met my friend in the park and went with him to dinner.*

While English uses object pronouns after prepositions, Arabic puts the possessive pronouns on prepositions as a suffix.

In this section, you explore the two types of prepositions in Arabic and see how the possessive pronoun suffixes team up with them.

Indeclinable prepositions

The type of preposition that’s most common and easiest to learn in Arabic is called the *indeclinable preposition*. Characteristics of indeclinable prepositions include at least one of the following:

- ✔️ They’re spelled with only one or two letters.
- ✔️ They end in a long vowel.

Besides taking possessive pronoun suffixes, indeclinable prepositions can be used with nouns. I introduce you to a couple of indeclinable prepositions, underlining them for you to help you spot them:

(قارعت من البيت ومشييت إلى الحديقة.
(kharajtu mina-l-bayt wa-mashaytu 'ilaa al-Hadiiqa. I went out from the house and walked to the park.)

(رأيت صديقتها في السيارة.
(ra‘at Sadiiqatahaa fii-s-sayyaara. She saw her friend in the car.)
The possessive suffixes are added to the prepositions with just a few irregularities. Here are some guidelines to keep in mind:

- Before the suffix ي (ii; me, my), indeclinable prepositions ending in ن (nuun) double that nuun. For example, من (min; from) becomes مني (minni; from me).
- Instead of ي (ii; me, my), you add -ya (ya; me, my) to prepositions ending in a long vowel. You write the -ya with a "shadda" whenever the final vowel is a long i (written with باء [yaa']). Here are two examples: في (fiyya; in me) and إلي (ilayya; to me).

Table 12-2 shows the suffixes of the indeclinable preposition ب (bi; with). Note that the vowel of the forms ب (hu) and هم (hum) changes to i to match the vowel of the preposition.

<tr>
<td>-(hum) / -(him)</td>
<td>بههم (bihim; with them)</td>
</tr>
</tbody>
</table>

Here are some other indeclinable prepositions:

- سوا (siwaa; other than)
- كا (ka; like)
- عن (3an; about)
- حتى (Hatta; until)
- مع (ma3a; with)
- إلي (’ilaa; to)

A final "العَلْف مَكْسُورَة ‘العَلْف مَكْسُورَة (’alif maksuura) is hiding a final باء (yaa’) that existed in the distant past. When you put any type of suffix on a word with final "العَلْف مَكْسُورَة (’alif maksuura), the باء (yaa’) reappears. (This is similar to how you pronounce the usually silent final s in French words when a vowel immediately follows.)
Understanding suffixes on prepositions with a final
(‘alif maksuura)

When a preposition ends in َ (alif maksuura), the َ (ya′) becomes a final consonant, onto which you then put your possessive pronoun suffixes. Table 12-3 shows an example of when this happens with the preposition َ (alaa; on/onto). Note the use of the suffix َ (ya) in place of َ (ii), as well as َ (hi) for َ (hu) and َ (him) for َ (hum) in response to the final َ (ya′).

Table 12-3: Adding Suffixes on a Preposition with a Final َ (‘alif maksuura)

<table>
<thead>
<tr>
<th>Suffix</th>
<th>Preposition + Suffix</th>
</tr>

<tr>
<td>ه (hum) / ه (him)</td>
<td>َ (alayhim; on them)</td>
</tr>
</tbody>
</table>

Dealing with the preposition َ (li-; to)
The preposition َ (li-; to) picks up the vowel َ (fatHa) when you add suffixes that begin in consonants. Table 12-4 shows what the preposition looks like after you add the َ (fatHa).

Table 12-4: Adding Suffixes to the Preposition َ (li-; to)

Declinable prepositions

Think for a moment about the English preposition beside. You may have noticed that this preposition is related to the noun side. The English language also has inside and outside. These prepositions began their careers as nouns. Similarly, Arabic has several nouns that function as quasi-prepositions. They’re called declinable prepositions. They’re called this because they “decline,” that is to say they take the genitive case just like nouns if you put another preposition in front of them. (You can encounter the genitive case in more detail in Chapter 4.)

Here are two examples of the declinable preposition قرب (qurba; near) used by itself:

\[
\text{wajaduuhu qurba-l-bayti. They found him near the house.}
\]

\[
\text{laaHaDHathu qurbahu. She noticed him near it.}
\]

The thing that makes the declinable prepositions different from the indeclinable types is that they can take prepositions themselves. Like all words following prepositions, the declinable prepositions take on the final *a* vowel of the genitive case.

In the following two examples, I put the preposition bi- on the declinable preposition قرب (qurba). Notice that the meaning doesn’t change at all. The only thing that changes about the declinable preposition itself is that the final vowel changes from *a* to *i* because it takes on the genitive case after the prepositional prefix.

\[
\text{wajaduuhu bi-qurbi-l-bayt. They found him near the house.}
\]

\[
\text{laaHaDHathu bi-qurbih. She noticed him near it.}
\]

Here are some other declinable prepositions. Notice that one feature of the declinable prepositions is that all of them end in *a* when they stand by themselves:

- مثلا (mithla; like)
- بين (bayna; between)
- قرب (qurba; near)
- أمام (‘amaama; in front of)
- بعد (ba3da; after)
- قبل (qabla; before)
- وراء (waraa‘a; behind)
- خلال (khilaala; during)
- عند (3inda; at)
- دون (duuna; without)
In this exercise, you're writing an e-mail to your friend Ahmad that requires you to use several prepositions with object pronouns. The context of each sentence tells you which preposition in your word bank is the best choice as well as what object pronoun to add. To determine what the best preposition is, you may have to consult your dictionary to see what prepositions are used with the verbs in this e-mail. You have a variety of declinable and indeclinable prepositions to choose from, but each one makes the best sense in only one spot.

Q. يا صديقي! أنا قلت ____ الحَقّ.
   (yaa Sadiiqii! 'anaa qultu ____ al-Haqq)

## Answer Key

1. رَأَتْنا (ra’atnaa; She saw us)
2. أَخْبَرَنِي (’akhbaruunii; They told me)
3. أَرْسَلْهُم (’arsaltihim; You sent them)
4. رَفَقَتْهَا (rafaqtuhaa; I accompanied her)
5. تَرَكْنَاكُم (taraknaakum; We left you)
6. سَمِعْتُهُم (sami3tumuuhu; You heard him)
7. كِلَّمَنِي (kallamanii; He spoke with me)
8. تُحْبِبْكِ (tuHibbuka; She loves you)
9. نُكْلِفُكُم (nukallifuki; We entrust you)
10. تُعْجِبُكُم (tu3jibu-kum; You like)
11. أَعْجِبْتُهُ الْكِتَابَ (’a3jabatu al-kitaab. He liked the book.)
12. أَعْجِبْتُهُ الْكِتَابَ (’a3jabatu al-kitaab. He liked the book.)
13. تُعْجِبُكُم الْبِنايَةَ (tu3jibu-kum al-binaaya. You like the building.)
14. أَعْجِبْتُهُ الْبِنايَةَ (’a3jabatu al-binaaya. You liked the building.)
15. تُعْجِبُكُم الْقَالِمَ (tu3jibu-kum al-qalam. You like the pen.)
16. أَعْجِبْتُهُم الْطَعَامَ (’a3jabuhum aT-Ta3aam. They like the food.)
17. تُصَلِّكُم رِسَالَتَيْنِ (taSilalatku risaalati. You receive my letter.)
18. تُصَلِّكُم رِسَالَتَيْنِ (taSilalatku risaalati. You receive my letter.)
19. تُصَلِّكُم الرِّسَالَتَيْنِ (taSilalatku risaalati. You receive my letter.)
20. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
21. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
22. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
23. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
24. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
25. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
26. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
27. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
28. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
29. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
30. أَعْجِبْتُهُم الْمَجْلََةَ (’a3jabuhum aT-Ta3aam. They like the food.)
Translation of letter:

Hello, my friend Ahmad

I have to buy a new notebook tomorrow. Maybe you want to go with me.

As for me, I don’t want to go without you.

But you don’t know my new address. And you need it if you want to find my house.

Send me the phone number, and I will call you.

I heard about your problem, and I was thinking it over.

I want to learn all the details from you so we can find a solution about the issue before you.

As for your wife, greet her for me.

See you later,
In your everyday use of any language, you tend to talk about realities. You tell your friends what you did over the weekend. You tell your significant other that you love him or her. When you use language this way, you’re using the indicative mood, which means that the action of the verb...
Has actually taken place
✓ Is currently taking place
✓ Will indeed take place

The past tense you encountered in your basic studies is indicative because the action is over. The action definitely happened, and you’re using the past tense to describe it.

Take special note that a ʿ (Damma) appears over four of the present indicative forms: the first person singular and plural, the second person singular masculine, and the third person singular masculine. The verbs ending in ʿ (Damma) can be converted into the other two moods by changing only the ʿ (Damma). (You can read more about the ʿ [Damma] in Chapter 3.)

The following table shows you the present indicative of the Form I verb ﺷﹶﻜﹶﺮﹶ (shakara; to thank).

<table>

Hypothesizing with the Subjunctive Mood

The subjunctive mood is used to convey the idea of being subjective or hypothetical. You need the subjunctive, for instance, when you wish something would happen. Here are a few examples in English of the subjunctive in action:

I wish he would tell me what happened.
If only I could go along with them.
It’s important that he travel tomorrow.

Notice that in the third example, the subjunctive in English is different from the indicative he travels. The subjunctive doesn’t impart a new meaning to the verb. Rather, it’s just the correct version of the verb for certain situations. If you make a mistake and use the indicative instead of the subjunctive in English, people will understand you. In fact, many folks may not even notice the error. The same thing is true of
Arabic. But because I know that you want to stand out from the crowd, I show you how to create the subjunctive in Arabic and when to use it.

**Forming the subjunctive of regular verbs**

The subjunctive involves changing the suffixes of a verb. No matter which one of the ten verb forms you have, the suffixes are all the same. For that reason, forming the subjunctive is the same for all ten verb forms. To produce the subjunctive of regular verbs, you have to do the following:

- **✓** Change any final ً (`Damma`) to ٌ (`fatHa`).
- **✓** Remove the suffix ْن (`na`) or ْن (`ni`) after any long vowel, and add a superfluous َ (`alif`) after any resulting final َو (`waaw`).
- **✓** Leave the final ْن (`na`) of the feminine plural verbs alone. These verbs are the same in all three moods.

The following table shows you what you get after applying the previous guidelines to the verb  شكراً (`shakara`; to thank).

<table>
<thead>
<tr>
<th>شكراً (<code>shakara</code>; to thank)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ًاشكر (<code>'anaa </code>ashkura`)</td>
</tr>
<tr>
<td>َاشكر (<code>'anta tashkura</code>)</td>
</tr>
<tr>
<td>َاشكر (<code>'anti tashkurii</code>)</td>
</tr>
<tr>
<td>ُاشكر (<code>huwa yashkura</code>)</td>
</tr>
<tr>
<td>ُاشكر (<code>hiya tashkura</code>)</td>
</tr>
</tbody>
</table>

يجب أن أشكر مدرسي لمساعدته.
(yajibu `an `ashkura mudarrisii limusaa3adatihi. *It is necessary that I thank my teacher for his help.*)

**Forming the subjunctive of irregular verbs**

The subjunctive mood is only irregular with verbs that have a weak final letter (for more on irregular verbs see Chapter 10). Even then, only a few verbs require an adjustment to the normal rules that you use to produce the subjunctive.

It’s easier to show you the indicative and subjunctive of final weak verbs side by side and point out how the final weak letter altered the verb. Table 13-1 shows the present indicative and subjunctive versions of the Form I final َو (`waaw`) verb دعا (`da3aa`; to call).
Part III: Staying Active: Forming Arabic Verbs

### Table 13-1 Comparing the Subjunctive and Present Indicative of دَعَ (da3aa; to call), a Final واَو (waaw) Verb

<table>
<thead>
<tr>
<th>Subjunctive</th>
<th>Present Indicative</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﺛَﺪُّﻋِـٰٰ nv (‘anti tad3ii; [that] you call)</td>
<td>ﺛَﺪُّﻋٰـٰnv (‘anti tad3iina; you call)</td>
</tr>
<tr>
<td>ﺚُﺪُّﻋُو nv (huwa yad3uwa; [that] he calls)</td>
<td>ﺚُﺪُّﻋٰ nv (huwa yad3uu; he calls)</td>
</tr>
<tr>
<td>ﺢِﺜُّﻋُو nv (hiya tad3uwa; [that she] calls)</td>
<td>ﺢِﺜُّﻋٰ nv (hiya tad3uu; she calls)</td>
</tr>
<tr>
<td>ﻥَﺪُّﻋُو nv (naHnu nad3uwa; [that] we call)</td>
<td>ﻥَﺪُّﻋٰ nv (naHnu nad3uu; we call)</td>
</tr>
<tr>
<td>ﻥَﺪُّﻋَو nv (hum yad3uu; [that they] call)</td>
<td>ﻥَﺪُّﻋٰ nv (hum yad3uuna; they call)</td>
</tr>
</tbody>
</table>

When you remove the endings after long vowels, the subjunctive verbs with final واَو (waaw) are completely regular. The only tricky verbs are those that have a final long u vowel — written with a واَو (waaw). To produce these subjunctive verbs you:

- Turn the واَو (waaw) into a consonant and add the ﺖَ (fatHa) of the subjunctive.
- Put a ﺔَ (Damma) over the middle consonant of the root.

Verbs with a final يَاﺀ (yaa’) are irregular in one of two ways. First off, if the verb has an ﺟُ (alif maksuura) as the final vowel in the present indicative, the subjunctive won’t change at all. Table 13-2 shows the subjunctive and present indicative of the Form I final يَاﺀ (yaa’) verb ﻧَسِـٰٰ nv (nasiya; to forget).

### Table 13-2 Comparing the Subjunctive and Present Indicative of ﻧَسِـٰٰ nv (nasiya; to forget), a Final يَاﺀ (yaa’) Verb

<table>
<thead>
<tr>
<th>Subjunctive</th>
<th>Present Indicative</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﺛَﺪُّﻋِـٰٰ nv (‘anti tansay; [that] you forget)</td>
<td>ﺛَﺪُّﻋٰـٰnv (‘anti tansayna; you forget)</td>
</tr>
<tr>
<td>ﺚُﺪُّﻋُو nv (huwa yansaa; [that] he forgets)</td>
<td>ﺚُﺪُّﻋٰ nv (huwa yansaa; he forgets)</td>
</tr>
<tr>
<td>ﺢِﺜُّﻋُو nv (hiya tansaa; [that she] forgets)</td>
<td>ﺢِﺜُّﻋٰ nv (hiya tansaa; she forgets)</td>
</tr>
<tr>
<td>ﻥَﺪُّﻋُو nv (hum yansaw; [that they] forget)</td>
<td>ﻥَﺪُّﻋٰ nv (hum yansawna; they forget)</td>
</tr>
</tbody>
</table>

However, when a final يَاﺀ (yaa’) verb has a final long i vowel — written with يَاﺀ (yaa’) — in the present, the final يَاﺀ (yaa’) becomes a consonant in the subjunctive version. For example, Table 13-3 shows the subjunctive and present indicative of the Form I verb، ﺑَكَٰٰ nv (bakaa; to cry), with a final long i vowel.
Chapter 13: The Indicative, Jussive, and Subjunctive Moods of the Arabic Verb

</tbody>
</table>

Using the subjunctive

You use the subjunctive whenever you want to express a situation that may or may not have happened. The subjunctive in Arabic is always introduced by certain conjunctions, just as it is always preceded in Spanish by the conjunction que. Most of the time, you use subjunctive after the conjunction ﺍﹶﻥﹾ (‘an; that) in constructions expressing wishes. Other conjunctions that precede the subjunctive express purpose clauses. In this section, I show you how to form these important and common constructions in Arabic.

As a rule of thumb, you don’t need to worry about whether the subjunctive is warranted or not. Instead, whenever you naturally find yourself in need of one of the conjunctions that I demonstrate in this section, you put the verb that follows it in the subjunctive.

Working with the conjunction ﺍﹶﻥﹾ (‘an; that)

The conjunction ﺍﹶﻥﹾ (‘an; that) follows a verb expressing wish, necessity, or command. In the following example, note that the verb following ﺍﹶﻥﹾ (‘an) is in the subjunctive:

(‘an nusafira qariiban. It is necessary that we travel soon.)

I translated the preceding example into English very literally to demonstrate how the Arabic expresses that in a sentence. A better English translation of any sentence with the subjunctive is frequently to not express the word that at all and render the subjunctive as an infinitive. For example, the translation for the previous example may sound like this: We have to travel soon.

Arabic uses subjunctive in the preceding sentence construction because the example sentence (It is necessary that we travel soon) isn’t really talking about the fact of the action; there may be no traveling that actually occurs. The sentence instead is talking about the potential need for travel. As such, this is what is called an irreal situation. The action may or may not happen at all, and we may not even want the action to happen.
Here are several examples of sentences using the conjunction 
(‘an; that) followed by a subjunctive verb describing irreal situations:

(‘an; that)

(‘an; that)

Sometimes a verb requires a preposition for its object. When such a verb precedes a subjunctive, you can just put the preposition directly in front of the conjunction (‘an; that). Here are some examples with (‘an; that) plus a preposition:

Expressing purpose in the subjunctive with a few more conjunctions

The subjunctive is the appropriate mood to describe any situation that isn’t yet a concrete fact. That holds true for sentences in which you want to express purpose as well. If I say, for instance, “They stayed at the library in order to complete the task,” you don’t actually know from the sentence whether they completed the task. All you really know is that they completed an action for the purpose of completing another. For all we know, they got to chatting and still have lots of work to do! For that reason, you use the subjunctive in Arabic, along with conjunctions that essentially mean in order to, to express purpose in Arabic.

Here are examples of the conjunctions you can use with subjunctive verbs following:

(‘an; that)

(‘an; that)

(‘an; that)

(‘an; that)

And now here are examples using those conjunctions:

(‘an; that)

(‘an; that)
A friend has just sent you an e-mail. Find and underline cases where he should have used subjunctive. You’ll find 11 different mistakes. Then in the blanks provided, write the proper verb he should have used. As you’ll soon see, your friend’s problems run deeper than ignorance of the subjunctive!

Q. The first mistake, أَشْرَحُ, is underlined for you.

A. أَشْرَحُ (‘ashraHa; [that] I explain)

(ta3malu fii waDHiifatayni li-taksiba maalan kathiiran. She works two jobs in order to earn a lot of money.)
Taking Charge with the Jussive Mood

The jussive mood is named as such because one of its uses is to create polite commands. Unlike the subjunctive, we don’t have even a trace of a jussive in English.

Like the subjunctive, the jussive in Arabic doesn’t so much have a meaning but a proper context. Instead, there are a number of constructions in which jussive is the correct version of the verb to use. In this section, I show you how to create the jussive version of the verb and when you should use it.

Forming the jussive of regular verbs

You produce the jussive by making changes to the suffixes of the verb. Because all ten forms of the Arabic verb use the same suffixes, the process of creating the jussive is the same for all ten forms. To generate the jussive of a Form I regular verb, you do the following:

✔️ Change any final دamma (Damma) to السو (sukuun).
✔️ Remove the suffix نا (na) or ني (ni) after any long vowel. Add a superfluous ألف (‘alif) after any resulting final واو (waaw).
✔️ Leave the final د (na) of the feminine plural verbs alone. These verbs are the same in all three moods.
With the exception of the verbs that you change to ʿ(ṣukuun), the jussive and subjunctive forms are identical when you have three strong consonants in the root.

When you apply the previous three rules to the verb شَكَرَ (shakara; to thank), the conjugations look like those in the following table.

| لَاشْكَرْ مَدْرَسِي لِمُساعدةِه. (li’ashkur mudarrisii limusaa3adatihi. I should thank my teacher for his help.) |
|---|---|
| ﺃﹶﺷﹾﻜﹸﺮﹾ (‘anaa ‘ashkur) | ﻥﹶﺸﹾﻜﹸﺮﹾ (naHnu nashkur) |
| ﺛﹶﺸﹾﻜﹸﺮﹾ (‘anta tashkur) | ﻥﹶﺸﹾﻜﹸﺮﹶﺍ (‘antum tashkuruu) |
| ﺛﹶﺸﹾﻜﹸﺮﹶﻱ (‘anti tashkuri) | ﺛﹶﺸﹾﻜﹸﺮﹶﻥﹶ (‘antunna tashkurna) |
| ﻳﹶﺸﹾﻜﹸﺮﹾ (huwa yashkur) | ﻯﹶﺸﹾﻜﹸﺮﹾ (hum yashkuruu) |
| ﺛﹺﺸﹾﻜﹸﺮﹾ (hiya tashkur) | ﺛﹺﺸﹾﻜﹸﺮﹶﻥﹶ (hunna yashkurna) |

**Forming the jussive mood of irregular verbs**

The real hallmark of the jussive versions of the verb is that they’re attempting to shorten the verb wherever possible. When you have three strong consonants, the only way to shorten the verb is to remove all final vowels and the prefixes before long vowels. Some of the irregular verbs, however, give the jussive the opportunity to reduce the verbs even further.

**Final weak verb reductions**

Like the subjunctive, final weak verbs are fair game for this reduction. The basic rules you use to reduce final weak verbs in the jussive are as follows:

- When there’s a final long уш — written with a ٰوٰ (waaw) — it reduces to a ً (Damma).
- When there’s a final long ٰا — written with an ٰٓآ (alif maksuura) — it reduces to a َ (fatHa).
- When there’s a final long ٰا — written with a ٰئٰ (yaa’) — it reduces to a ِ (kasra).

Table 13-4 shows you what you get after you apply the rules to the final weak verb دَعا (da3aa; to call). Because the jussive is used for many different constructions and expressions, I won’t translate the jussive verbs differently than the indicative.
Table 13-4 Comparing the Jussive and Present Indicative of دَعَأ (da3aa; to call), a Final Weak Verb

**Medial weak verb reductions**

In addition to dropping off the suffixes, verbs with a medial weak letter also reduce their medial vowels in the jussive. (Check out Chapter 10 for more on medial weak verbs.) You produce the jussive of a medial weak verb with the following rules:
Any verb with a (sukuun) on the third consonant in the jussive reduces its medial long vowel.

A medial long u — written with (waaw) — reduces to a (Damma).

A medial long a — written with (alif) — reduces to a (fatHa).

A medial long i — written with (yaa’) — reduces to a (kasra).

The medial long vowel in all other jussive verbs remains.

Table 13-7 shows what you get after you apply these rules to the medial weak verb ﻗﺎﻝ (qaala; to say).

**Geminate irregularity**

One curious irregularity in the jussive comes when you have the same second and third consonant in the root. These verbs, which are called *geminate* verbs (see Chapter 10), would have had a ـ (sukkun) over a doubled letter. However, this really isn’t possible to pronounce. As a result, you actually have to add a ـ (fatHa) as the final vowel. The result is that the jussive and subjunctive of a geminate verb are identical.

Table 13-10 shows side by side the present indicative and jussive/subjunctive versions for the geminate verb ﻋﹶﺪﱠ (3adda; to count).

</tbody>
</table>

**Using the jussive mood**

A handy use of the jussive is to create indirect commands. To produce an indirect command, you add the particle ﻟﹺ (li-; to) to the jussive. Often, you can translate the resulting verb with the sense of *let’s do something*. Here’s a demonstration of this use of the jussive:

(linatakallam ma3an. Let’s speak together.)
Often, you see the particle ﻓﹶ (fa-) attached before the ﹽ(li-), which then takes a ﹽ(sukuun). Here is an example:

Falnadh-hab.

(LET’S GO.)

Several of the more important uses of the jussive are covered in other chapters of this book. For example, to see the use of jussive to create a negative command and produce a negated past tense, refer to Chapter 17. To see the jussive used in a conditional sentence, consult Chapter 14.

For each of the following items, I give you a pronoun and verb in the present indicative. Produce the correct jussive verb for each.

Q. ﻤَﺷﺎﻫِﺪَوْنَ (yushaahiduuna)

A. ﻤَﺷﺎﻫِﺪَوا (yushaahiduu; they watch)

12. ﻤَفْوَلُ (yaquulu)

13. ﻤَبْنُي (nabnii)

24. ﻤَيْشَكْرُونَ (yashkuruuna)

25. ﻤَأَجُدُ (’ajidu)
(My friend,
I want to explain to you what happened yesterday. But first you need to understand the situation. I was working at the office typing on the computer. I wanted to print an article, but I didn’t have paper. I went to the storeroom to find a box of paper. At the same time the director’s assistant arrived there to look for a pen. As for me, I am really in love with her, but I have never told her. I wanted her to notice me, so I tried to say to her: “May I help you?” But my heart said something else, and I heard these words coming from me: “May I kiss you?” She turned red and left me there. The director immediately fired me from the company. So now I need to find a new job. I spoke with a man in the office near my former office. And they may give me a job there. I want to get a job there so that I see the young lady from time to time.)

Part IV
Enlivening Your Writing with Particles

The 5th Wave
By Rich Tennant

I'm always surprised by the colorful vocabulary that seems to be inspired by an Intermediate Arabic exam.
Big things sometimes come in small packages. In this part, you find the same to be quite true of the Arabic particles. In this part’s chapters, you discover how to use small but mighty words to form sentences such as conditionals. You also add valuable words, including conjunctions, to your inventory. I provide a chapter on the verbal noun, which is the smallest form of the verb but important for many parts of speech. Negation is also important in communication, so I show you how to add not to any type of sentence. Finally, you discover the forms of the participle in Arabic.
Chapter 14
Forming Conditional Sentences

In This Chapter
- Discovering the parts of a conditional sentence
- Examining simple conditional sentences
- Dealing with contrary to fact conditionals
- Applying the jussive to conditional sentences
- Recognizing the conditional particle (‘in) in Classical Arabic

If you’ve worked through the preceding chapters, you’ve practiced quite a bit of Arabic! Just think: If you hadn’t picked up a copy of Intermediate Arabic For Dummies, you would have missed all the fun!

The preceding two sentences are conditional sentences. What’s that, you ask? A conditional sentence is one that discusses hypothetical situations and their consequences.

Whenever you describe a situation in English that may or may not happen, you usually form a sentence that starts with the word if. However, forming conditional sentences in Arabic requires you to choose the correct word for if. You also have to determine which tense and mood is the best choice for the conditional sentence you want to express.

This chapter gives you the information you need to confidently enter the Arabic world of “what if?” You’ll encounter the parts of the conditional sentence, a list of Arabic words for if, and some handy tips for selecting the correct type of verb to go in your sentence.

Seeing the Condition and Result in Sentences

Anytime you use the word if, you’re talking about a hypothetical situation (something that may or may not happen). These conditional sentences each have two parts. Grammarians call the part of the sentence introduced by the word if the protasis. This is the part of the sentence that affects the outcome of the second part, which is called the apodosis. In this book, I call them the condition clause and the result clause as shown in Table 14-1.
Table 14-1  The Main Parts of Conditional Sentences

<table>
<thead>
<tr>
<th>Protasis (Condition Clause)</th>
<th>Apodosis (Result Clause)</th>
</tr>
</thead>
<tbody>
<tr>
<td>If I had lived in Roman times,</td>
<td>I would have liked to have been a gladiator.</td>
</tr>
<tr>
<td>If I have the time,</td>
<td>I will surely come to your party.</td>
</tr>
</tbody>
</table>

In English, the condition clause and the result clause can actually come in reverse order and still produce a conditional sentence. For example, consider this sentence: *You won’t learn as quickly if you don’t complete the practice exercises.*

The first part of the sentence (*You won’t learn as quickly . . .*) is the result clause of the second part of the sentence (* . . . if you don’t complete the practice exercises*), which is the condition clause. In this sentence, you can also replace the word *if* with *unless* without changing the meaning. So, one half of the sentence tells you what may or may not happen, and the other half tells you the result.

In Arabic, the result clause comes before the condition clause much more rarely than in English. That’s not to say it’s never done, but that construction is definitely not as common as in English.

### Forming Simple Conditional Sentences in Arabic

In Arabic, conditional sentences can take on two basic forms:

- ✔️ Simple
- ✔️ Contrary to fact

In this section, I discuss simple conditional sentences. You can read about contrary to fact conditional sentences in the later section, “Getting to Know Contrary to Fact Conditional Sentences.”

A simple conditional sentence describes a situation that could have happened or still could happen. For example, “If I have the time, I will surely come to your party.” In the condition clause of this example, it isn’t yet clear whether the person will have the time (and thus whether he or she will come to the party). A simple conditional sentence includes two primary variations: past tense indicative and jussive. And, of course, there are some exceptions and twists!

English has one workhorse word to introduce conditional sentences: *if*. English distinguishes between different types of conditional situations through the use of grammatical moods. By contrast, Arabic uses different words to introduce conditional sentences, depending on whether they’re simple or contrary to fact. Because most conditional sentences are of the simple type, you will most often use the Arabic word for *if* reserved for this style of conditional sentence: ﻣﺎ (‘idha).
Be careful not to form an Arabic simple conditional sentence with a word for word substitution of English words and tenses. Someone reading what you write in this case will probably still understand what you mean, but he or she will also be aware that your Arabic needs help.

In this section, I show you the Arabic word that’s used for *if* in simple conditional sentences. I also walk you through the past indicative and show you how to add a negative to a simple conditional sentence.

**Using إذا (‘idha) for if**

If learning the word for *if* was all you needed to know in order to write simple conditional sentences in Arabic, you would be set up for success. But I have good news and bad news. The bad news is that writing simple conditional sentences is just a little more complicated than simply knowing the Arabic word for *if*. But the good news is that you form conditional sentences in Arabic without needing to understand any new forms of the verb. In fact, you just have to get used to using the past tense for everything, even when you’re referring to the present or future. See what I mean about past tense in the later section “Applying past tense indicative.”

Modern Standard Arabic has a special word for *if* that’s used when you want to form a simple conditional sentence. That word is إذا (‘idha). And in Arabic, the condition clause usually comes first. To finish the job of creating your simple conditional sentence, all you have to do next is state the verbs of both the conditional clause and the result clause in the past tense.

**Applying past tense indicative**

To get a feel for how conditional sentences would sound in English with only past tense verbs, take a look at the following examples:

*If you studied this book, you learned many things.*

*If I saw my friend, I was happy.*

*If he wanted, he was able to come too.*

These sentences (translated literally) may seem strange to English speakers. On the face of it, you may wonder how the speaker has forgotten whether he saw his friend. But this is just how Arabic forms simple conditional sentences. What the Arabic means here is this: *If I see my friend, I will be happy.* The Arabic, however, puts both verbs in the past tense.

In the following Arabic versions of the same sentences, the verbs are really past tense, but a good English translation of past tense verbs in a conditional sentence is to express them as present tense:

إذا درست هذا الكتاب تعلمت أشياء كثيرة.

(‘idhaa darasta hadha-l-kitaab, ta3alamta’ashyaa’ kathiira. *If you study this book, you’ll learn many things.*)
Using past tense this way may seem a bit confusing at first, but once you get used to it, you’ll be grateful that simple conditional sentences in Arabic are so easy. After all, in many languages, an entirely new form of the verb is required for this situation. In Arabic, on the other hand, you just need to use the most basic form of the verb.

Using the past tense in both the condition and result clauses is the most common method of forming conditional sentences in Arabic. A simple conditional sentence, however, can involve other tenses in the result clause. You may, for instance, use imperative or future tense. Just remember that when you do use something besides the past tense in a simple conditional sentence, you must add the prefix ﻓﹶ (fa-) to the result clause.

Here are a few examples of other tenses in the result clauses of simple conditional sentences:

 إذا اسْتَطَعْتُ فَقُلْ يِلَى سَرْرَكَ مِنْ قَضْلُكَ.
(‘idhaa istaTa3ta, fa-qul lii sirraka min faDlika. If you can, please tell me your secret.)

إذا أَرْدَتْ قَسَاءْقُولْهُ لَكَ.
(‘idhaa ‘aradta, fa-sa’aquuluhu laka. If you want, I will tell it to you.)

So you can identify them easily, I underline the verbs that are in some other tense besides past. In the first example, you have an imperative. In the second case, you can see a future tense verb. Each one, as per the requirement, has the prefix ﻓﹶ (fa-) on it first.

Adding a negative to a simple conditional sentence

When you need to add a negative to your simple conditional sentence, you can’t use the normal negative particle ﻣﺎ (maa; not) with the past tense verb. Instead, you use ﻞِمْ (lam; not) plus the jussive forms of the verb in the condition clause. (For more on using ﻞِمْ [lam] to negate sentences, check out Chapter 17.) You also have to add the prefix ﻓﹶ (fa-) to the result clause (as I discuss in the previous section).

Here are a few examples:

إذا ﻞِمْ يَزُرْ جَدْتُهُ فَلَنْ تَكُونَ مَسْرُورَةً مَعِهِ
(‘idhaa lam yazur jaddatu, fa-lan takuna masruuratan ma3ahu. If he doesn’t visit his grandmother, she won’t be happy with him.)
Chapter 14: Forming Conditional Sentences

If you aren’t sure about your answer, don’t guess.

For each of the English sentences I give you in the following practice set, translate them into Arabic using the word إذا (‘idha). For items 1–5, use the past tense of the verb in both the condition clause and the result clause. In item 6 you need to use a negative verb (covered in Chapter 17). For item 7, use a command (go to Chapter 11 if you’re uncertain about these). Item 8 requires a future tense (which you can discover in Chapter 2).

Q. If you agree, we would do that.
A. إذا كنت موافقًا فَعَلْنا ذلِكَ ('idha kunta muwaafiqan fa3alnaa dhaalika.)

1. If we go to the restaurant, I’d eat the falafel.

2. If I have time, I’d do that for you.

3. If she can come, we’d speak together.

4. If you want to know the answer, you should ask the question.

5. If he is here tomorrow, we would complete the work.

6. If he doesn’t arrive soon, we will start without him.

7. If she says something, don’t doubt it.

8. If the weather is nice tomorrow, we will go to the park.
Getting to Know Contrary to Fact Conditional Sentences

In most simple conditional sentences, there’s at least the potential for the condition to come true. The contrary to fact conditional, on the other hand, involves things that can never be true at all. An English example would be something like this: If I had lived in Roman times, I would have liked to have been a gladiator. Until time travel exists outside of science fiction, neither you nor I will be able to actually go back to the days of yore.

Here are some additional English examples about circumstances that didn’t happen or could never happen (okay, maybe you could become a king, but it isn’t likely):

If I were king, things would be different.
If I had gone to the party (but I didn’t), I would have seen my friend there.

The good news for you is that contrary to fact conditional sentences are even easier to form in Arabic than they are in English. After all, sometimes in English you hear someone say, “If I was in charge, things would be different.” But if you’re in tune to your grammar, you know that this is wrong! The correct statement is, “If I were in charge, things would be different.” English has a special form of certain verbs that’s used when you form contrary to fact conditionals. In this particular case, “were” is the subjunctive form, used in English to properly form conditions contrary to fact. Creating contrary to fact sentences in Arabic is much easier than all that. In Arabic, all you need to do is use a different word for if and use the past tense in both parts of the sentence.

In this section, I show you the Arabic word used for if in contrary to fact conditional sentences. I also explain how to be negative and contrary at the same time.

Expressing contrary to fact conditionals with ﻟﹶﻮﹾ (law)

Arabic has a word for if that’s reserved only for use in contrary to fact conditional sentences. That word is ﻟﹶﻮﹾ (law), and it’s translated as if, just like the word ﺧﹶذﹶا (‘idhaa) within simple conditional sentences.

When creating contrary to fact sentences in Arabic, you have to use the prefix ﻟﹶ (la-). You put the ﻟﹶ (la-) at the beginning of the result clause, but you don’t translate it. It’s just a stylistic conjunction required by Arabic at this particular spot.

To express a contrary to fact conditional sentence in Arabic, follow these steps:

1. Introduce the condition clause with the particle ﻟﹶﻮﹾ (law).
2. Add the prefix ﻟﹶ (la-) to the result clause.
3. Use the past tense in both the condition and result clauses.
Here are a few examples of contrary to fact conditional sentences:

(\text{law } \text{dhahabtu } '\text{ilaa Misr}, \text{ lara'aytu al-ahraam}. \text{ If I had gone to Egypt, I would have seen the Pyramids.})

(\text{law } \text{ra'a } \text{hadha-l-film}, \text{ lakaana muwaafiqan ma3ii}. \text{ If he had seen that movie, he would have agreed with me.})

(\text{law } \text{kaana } \text{sindahum milyuun dolaar}, \text{ la-shtaruu al-bayt}. \text{ If they had a million dollars, they would buy the house.})

In the previous examples, I underline the two past tense verbs of the conditional and result clauses. You can see that in each case, there’s the addition of the prefix \text{l} (\text{Ia-}) before the second past tense verb. Also note, however, that the English translation reflects the unreal situation posed by a contrary to fact sentence.

**Adding the negative to contrary to fact conditional sentences**

When you need to add a negative to your contrary to fact conditional sentence, you use \text{lam} (\text{not}) plus the jussive forms of the verb in the condition clause, and \text{maa} (\text{not}) plus the past tense in the result clause. To read more about the use of \text{maa} and \text{lam}, flip to Chapter 17.

In the following examples, I underline the verbs, preceded by their words for not so that you can easily spot them:

(\text{law } \text{lam } \text{'ursil aT-Tard yawm al-khamiis lamaa waSala liHabiibati 'amsi}. \text{ If I hadn’t sent the package on Thursday, my girlfriend would not have received it yesterday.})

(\text{law } \text{faaza firqaatii lamaa kuntu Hazinan al'aana}. \text{ If my team had won, I wouldn’t be sad right now.})

In this practice set, I give you several simple conditional sentences. Convert them into contrary to fact conditional sentences by replacing \text{idha} (\text{Iuda}) with \text{law} (\text{law}) and adding the particle \text{j} (\text{Ia-}) to the result clause. Then translate your newly created contrary to fact conditional sentence into English.
Tackling the Jussive in Simple Conditional Sentences

Jussive comes from a Latin word meaning to order. You can use the jussive mood in what are very polite orders, such as ﻓﹶﻠﹾﻨﹶﺬﹾﻫﹶﺐﹾ (falnadh-hab; Let’s go). Because the jussive is a mood that you can use in unreal situations, the jussive can be used in simple conditional sentences. A simple conditional sentence using jussive won’t impart a meaning different from one using just past tense (to see the use of past tense verbs refer to the earlier section “Applying past tense indicative”). But you want to know how to form a conditional sentence with jussive so you can vary your own writing style and also make sense of conditional sentences formed with jussive that you come across in your reading.

To use the jussive in a conditional sentence, you can start with a past tense verb in the condition clause, just like you would for a simple conditional sentence (see the earlier section “Forming Simple Conditional Sentences in Arabic” for more information). In the result clause, you use a jussive form of the verb, following the addition of the particle ﻓﹶ (fa-).

The particle ﻓﹶ (fa-) is left untranslated, because it’s a stylistic necessity of Arabic in a simple conditional sentence with the jussive, not a meaning-bearing word as such. However, ﻓﹶ (fa-) does have the translatable meaning of and so/and then in other contexts. (To discover further details about the use of ﻓﹶ (fa-), see Chapter 15.)

Here are a few examples of simple conditional sentences using the jussive in the result clause:
Chapter 14: Forming Conditional Sentences

In the previous examples, I underline the verbs to help you quickly locate them. Notice that all the verbs in the condition clause are past tense. The result clauses, however, have verbs in the jussive, each one preceded by the particle ُف (fa-).

Until you have fully mastered the jussive, get in the habit of just using past tense for all your conditional sentences. It’s grammatically correct, and it’s easier to work with than the jussive.

The following sentences are conditionals that currently use past tense in both parts. Rewrite each sentence, adding the prefix ُف (fa-) to the result clause and changing the verb in that clause to the jussive.

Q. (‘idhaa kunta muwaafiqan fa3alnā dhalika.)

A. (‘idhaa kunta muwaafiqan fanaf3al dhalika. If you agree, we would do that.)

12. (‘idhaa qara’uu risaalatii, 3arafuu al-jawaab.)

13. (‘idhaa zurnaa al-matHaf, ta3allamnā kathiiran.)

14. (‘idhaa darasta akthar, najaHta fi-l-imtHaan.)

15. (‘idhaa ‘akalta kathiran Sirta mariiDan.)

16. (‘idhaa ishtaraytu Haasuub jadliid kuntu faqiiran.)
Finding **إن** (‘in) in Classical Conditional Sentences

At one time, إذا (‘idha) was used to imply more potential for the conditional sentence coming true. By contrast, إن (‘in) implied a more hypothetical situation. In Modern Standard Arabic today, however, إذا (‘idha) has become the standard word for all conditional sentences. You may see إن (‘in) used in classical texts, but it’s no longer a commonly used word. It survives today within the phrase you should use whenever referring to the future: إن شاء الله (‘in shaa’ ‘allah; if God wills it). (To see more about the use and formation of the future tense, visit Chapter 2.) But don’t get in the habit of using إن (‘in) regularly in your own writing. It would make it sound overly formal and maybe even stuffy. I’m only showing you this particle so you recognize it when you see it in classical texts and quotes.
Chapter 14: Forming Conditional Sentences

Answer Key

1. 'If you eat a lot, you'd get sick.'

2. 'If the weather had been nice yesterday, we would have gone to the park.'

3. 'If you read my letter, they'll know the answer.'

4. 'If you visit the museum, we’ll learn a lot.'

5. 'If you study more, you’ll pass the test.'

6. 'If you eat more, you’d be poor.'

7. 'If you did better, you’d pass the test.'

8. 'If they read my letter, they’ll know the answer.'

9. 'If you had time, I would have done that for you.'

10. 'If she had come, we would have spoken together.'

11. 'If the weather had been nice yesterday, we would have gone to the park.'

12. 'If you read my letter, they’ll know the answer.'

13. 'If we visit the museum, we’ll learn a lot.'

14. 'If you study more, you’ll pass the test.'

15. 'If you eat a lot, you’d get sick.'

16. 'If I buy a new computer I’d be poor.'
Part IV: Enlivening Your Writing with Particles
Chapter 15

Picking Up the Pieces Using Particles and Partitives

In This Chapter

- Discovering simple and temporal conjunctions
- Looking into Arabic partitive nouns

Two particular pieces of Arabic grammar come together in this chapter: particles and partitives. Arab grammarians traditionally divided their language into just three categories: nouns, verbs, and, well, everything else. The name they gave to this “everything else” category is حُرُوف (Huruuf), meaning particles. If you’ve read through other chapters of this book, you’ve probably already seen many things that qualify as particles. Just like particles of dust in the air, Arabic particles are everywhere!

In the first part of this chapter, I give you an overview of Arabic particles. Then I focus on two important types of particles: simple and temporal conjunctions. Conjunctions are those words you use to bind or divide parts of your sentence. The most basic and important of the conjunctions is و (wa; and). But I explain several others that you can use to polish your Arabic writing.

In the second part of the chapter, I present the Arabic partitive nouns. Partitives are the words you use to talk about “parts” of a noun. In other words, they indicate whether you’re discussing all, some, or most of something.

Examining Arabic Particles

There’s a reason that the Arabic word for particle, حُرُوف (Huruuf), is the same word used for letters (of the alphabet). It’s because they’re both tiny little things. Languages tend to use small words for important and common tasks and reserve multiple syllable words for rarer things. Imagine how tired your tongue would be at the end of the day if the word for and were as long as antidisestablishmentarianism! Many different types of words qualify as particles. Included are prepositions, conjunctions, and even words such as لا (laa; no/not), which makes a verb negative. I show you the particles for making sentences negative in Chapter 17. And you can explore prepositions in detail in Chapter 12.
Pulling Sentences Together
Using Arabic Conjunctions

Arabic offers you a variety of ways to join words. Sometimes you just need to bind two words with 

(‘and). Other times you need something more sophisticated than that. So, in this section, I delve into the most common conjunctions that you may encounter and use to combine words and longer phrases. I break them down into two categories: simple and temporal.

Simple conjunctions

What grammarians call simple conjunctions are those words that either join or separate words and phrases in a sentence. Now, just because they’re called simple doesn’t mean they aren’t important. You’re about to see that these words can give you some powerful ways to express yourself in Arabic. The most common simple conjunctions, which I show you in the following sections, include the following: and, when, and/and so/and then, but, or, and because. I also toss in a few other essential conjunctions that fall into the miscellaneous category.

(‘and)
The conjunction ‘ (‘and) is probably the most important conjunction of all. You add ‘ (‘) as a prefix to words when you want to say ‘and. Here’s an example of this powerful conjunction in action:

(‘and)

I went to France when I was in college.

Notice that the conjunction in the previous example joins two people, Ahmad and Marwan, but also joins two clauses together the second time it occurs.

Here’s a useful trick you can perform with the conjunction ‘ (‘). You can create a circumstantial clause just by joining a few words or a separate sentence to your main sentence with ‘.

A circumstantial clause is a phrase or sentence that tells your reader some important background information (the circumstances) about your main topic. For instance, I could tell you that I went to France. But if I tell you that I went to France when I was in college, I would be adding information that’s circumstantial to my main topic (going to France). You can create a circumstantial clause in Arabic by putting ‘ (‘) in place of when in the example I just used. Here’s the Arabic equivalent:

(‘and)

I went to France when I was in college.
Keep in mind that it isn’t the case that و (wa; and) means when just because we translate it that way in English. Rather, Arabic uses the conjunction to create a circumstantial clause. Here are more examples of the conjunction wa- creating circumstantial clauses:

(تَعَلَّمَتْ يُلْكَ اللُّغَةِ وَهُوَ طَالِبٌ فِي الْجَامِعَةِ. Ta3allamat tilka-l-lugha wa-hiya Taalibatun fi-l-jaami3a. She learned that language when she was a student at the university.)

(نزَلَ مِن الْطَائِرَةِ وَهُوَ يَتَكَلَّمُ مَعَ صَديقِهِ. Nazala min aT-Taa’ira wa-huwa yatakallamu ma3a Sadiiqihi. He got off the plane while talking with his friend.)

(فَ (fa-; and/and so/and then) In addition to و (wa), Arabic has the conjunction ﹴ (fa-), which also translates as and in many contexts. The main difference between the two is that ﹴ (fa-) ordinarily implies that the two things you’re binding together are happening in a certain order. Most of the time, you use ﹴ (fa-) to put together two phrases that happen one after another. In this case, you can translate ﹴ (fa-) as simply and, or you could translate it as and so or and then (depending on what sounds best in that context). Like wa-, you attach fa- as a prefix to the first word in your new clause.

Here are a few examples of ﹴ (fa-) in action:

(دَهَّبَ أَحْمَدُ وَمَا رَوَاهَا إِلَى الْمَلْعَبِ فَرَجَعَ إِلَى الْبَيْتِ. Dhahaba ‘aHmadu wa-marwoaan ilaal-mal3ab ﹴ ilaal-bayt. Ahmad and Marwan went to the stadium, and then they returned to the house.)

(لَيْسَ عَنْدِي خَبْرٌ يَجِبْ أَنْ أَدْهَبَ إِلَى الْسَوقّ. Laysa 3indii khubzun ﹴ vajib ‘an ‘adhb-haba ‘ilaal-s-suuum. I don’t have bread, and so I need to go to the market.)

Notice that the conjunctions here are identical. It’s the English context that requires slightly different translations. In the first example, the conjunction focuses on the temporal relationship between the clauses. In the second example, the main point is the logical connection between the clauses. But the Arabic conjunction is the same for both.

(لاكِنُ/لكِنْ (laakin/laakinna; but) Arabic has two forms of the word for but. Those two forms are لَكِنْ (laakin) and لَكِنْ (laakinna).

The word لَكِنْ (laakin) is the simple version of but in Arabic. You can simply insert it as a separate word between two clauses when you want to express exclusion. It can occur before a verb or a noun in the nominative case (unlike لَكِنْ [laakinna], which requires accusative).
Here are a few examples of لِكَنْ (laakin):

(yuriduun an ya’kuluu hunaaka, laakin laysa 3indahum maalun kathirun. They want to eat there, but they don’t have much money.)

(ثَدْرُسُ فَاطِمَةُ الْرَّياضِيَاتِ لِكَنْ بَدْرُسُ أَخُوهَا الْهَدْسَةُ. Tadrusu faaTima arriyaaDiyaat, laakin yadrusu ’akhuhaa al-handasa. Fatima studies mathematics, but her brother studies engineering.)

لِكَنْ (laakin) also means but; however, it behaves differently than لِكَنْ (laakin). لِكَنْ (laakin) can’t be followed immediately by a verb. Instead, you have to follow it with the subject of the verb, either a noun (in the accusative case) or an object pronoun attached to لِكَنْ (laakin).

Here are some examples of لِكَنْ (laakin):

(yu3jibuni al-film, laakinna-l-mumaththiliina yuz3juunani kathirran. I like the film, but the actors really bother me.)

(تَشْرُبُ زُوْجَيْنِي كَثِيرًا مِنّ النَّشَابِي لِكَنْيَ أَفْضَلُ الْقَهْوَة. Tashrubu zawjatii kathiiran min ash-shaay, laakinnanii ’ufaDDilu al-qahwa. My wife drinks a lot of tea, but I prefer coffee.)

There are two equally valid ways of adding the object pronoun for أنا (’ana; I) and نَحْنُ (naHnu; we). One way is to assimilate the initial n sound into the doubled n of laakinna. The other way is to keep them as separate sounds. There’s no difference in meaning and no time when either option is more correct than the other. This example illustrates your options:

لِكَنْ (laakinni; but I . . .)
لِكَنْ (laakinnanii; but I . . .)

أَوْ/أَمْ (’aw’am; or)
The words أَوْ (’aw) and أَمْ (’am) both mean or. The only difference between them is that you use أَمْ (’am) when you need to express or within a question. By contrast, you use أَوْ (’aw) in any sentence that isn’t a question.

Here’s an example using أَوْ (’aw):

(سَأَّكِتُبُ رسَالَةَ الْيَوْمِ أَوْ سَأَتَصَلُ بِحَبْبِي. Sa’aktubu risaalatan al-yawm, ’aw sa’attaSilu biHabiibatii. I will write a letter today, or I will call my girlfriend.)

And to better understand the distinction between the two, check out this example that uses أَمْ (’am):

(هل تَدْهَمُينَ مَعَنا إِلَى السَّيَتُما أَمْ لا؟ Hal tadh-habiina ma3anaa ila-s-siinama 'am laa? Will you go to the cinema with us or not?)
The word for *because* in Arabic is لآنَّ (li’anna). Like لﮑِنَّ (laakinna; but), which is discussed earlier in the chapter, you use an accusative noun immediately after لآنَّ (li’anna). Or you can also add an object pronoun to it (see Chapters 4 and 12 for more on object pronouns). If you have a verb after the conjunction, you put the object pronoun on first. If you have a noun as a subject, it goes immediately after the conjunction and is expressed in the accusative case.

Here are two examples:

الأولاد جائعون جداً لأنهم لم يأكلوا بعد.
(al-’awlaad jaa’i3uuna jiddan li’annahum lam ya’kuluu ba3d. The children are very hungry because they haven’t eaten yet.)

You can create conjunctions in Arabic to say that something happened before or after something else by adding temporal prepositions to the conjunction أنَّ (’an).

Here’s an example using قِبلَ أنَّ (qabla ’an; before):

أعمال أبي لِمدة خمسين سنة قِبلَ أنْ تَقاعد.
(3amila ’abii li-muddat khamsiina sana qabla ’an taqaa3ada. My father worked fifty years before he retired.)

Here’s an example using بعِدَ أنَّ (ba3da ’an; after):

سافرت إلى قطر بعِدَ أنْ غادِرت الكويت.
(saafarat ’ila qaTar ba3da ’an ghaadarat al-kuwayt. She traveled to Qatar after she left Kuwait.)
(mundhu) is another temporal conjunction. You may recall seeing this particle as a preposition that means ago, as in this example:

(ittaqaytu bihi mundhu thalaath sanawat. I met him three years ago.)

As a temporal conjunction, however, (mundhu) means since:

(qad ‘alhabtuhu mundhu ittaqaytu bihi. I've liked him since I met him.)

In the following practice set, I give you a number of sentences with missing conjunctions. Each sentence is best completed by inserting one of the conjunctions supplied in the word bank. You may need to add object suffixes from clues elsewhere in the sentence. Each word is used once. (l'I’anna), however, is used once in the example and once in the actual practice set. Write the sentence with the conjunction on the line provided.

O. (huwa ta3baan jiddan ____ lam yanam jayyidan.)

A. (huwa ta3baan jiddan l'I'annahu lam yanam jayyidan. He's very tired because he didn't sleep well.)

1. (laysa 3indii maalun kathirun ____ laysa 3indii waDHiifatun.)

2. (turiidina ‘an ta'kulii waraq 3inab ____ samak mashwii?)

3. (‘ana mashghul jiddan al-yawm ____ laa ‘astaTi3u ‘an ‘adh-haba ma3aka.)

4. (naHnu bi-Haaja ‘ila ‘aqlaam ____ naktuba ar-rasa'il.)
Chapter 15: Picking Up the Pieces Using Particles and Partitives

Parceling Noun Quantity with the Arabic Partitives

You've probably heard the old adage, “You can fool some of the people all of the time, and all of the people some of the time, but you can not fool all of the people all of the time.” Whoever first said these words (they've been attributed to Abraham Lincoln and P.T. Barnum), made extensive use of a class of nouns known as partitives. Partitives in English frequently are used with the preposition of to express how much of something you have.

In some languages, such as Spanish, partitives are adjectives. Arabic partitives, however, behave in much the same way as English partitives. For example, you may say all of, some of, or most of something. In the same way, Arabic partitives come directly in front of the noun that they’re modifying. There are Arabic partitives to express all the potential quantities of a noun that English expresses. Really, all you need to do is learn them as vocabulary items, and you’re more than halfway to mastering them.

The Arabic partitives are a strange class of nouns. They function grammatically as nouns, having case, but they’re somewhat defective in that they don’t themselves have a plural. Instead, they convey the various shades of partitive meaning to whatever nouns you place immediately after them.

To use an Arabic partitive, you put the partitive in an 'iDaafa construction with the noun you want to modify. The meaning of the partitive can change depending on whether its noun is singular or plural and whether it has the Jl ('alif laam). I explain exactly how you change the translation as I show you each individual partitive. (If you want to review the formation of the 'iDaafa, check out Chapter 7. For more on the Jl ['alif laam], refer to Chapter 2.)

In this section, I show you how to use the Arabic partitives meaning all, some/part, and most.
Forming sentences with كُلّ (kull; all)

To express the phrase *all of the food* in Arabic, you take the partitive noun كُلّ (kull; all) and put the word الطعام (al-Ta3aam; the food) directly after it. So the phrase looks like this: كُلّ الطعام (kull aTa3aam; all [of] the food).

كُلّ (kull) can take the object suffixes (see Chapters 2 and 12) like any noun. You put object pronoun suffixes on this partitive when you want to express, for instance, *all of it* (as opposed to *all of the pie*) or *all of them*. Look at a few examples:

- أَمَّا أَصْدَفَائِي فَكَلُّهُمُ هُمْ. (‘amma aSdiqa’ii fa-kulluhum hunaa. As for my friends, they’re all here.)

- أَكَلَ الْوَلْدُ الكَانَوْ كُلَّهُ. (‘akala al-walad al-kaatu kullahu. The boy ate the cake — all of it.)

To show you how كُلّ (kull; all) works, I present the slightly different meanings it takes when it’s followed by a definite or indefinite noun.

Using كُلّ (kull) with a definite noun

When you combine كُلّ (kull) with a definite singular noun, the partitive can be translated as *the whole*. With a definite plural noun, you would translate it as *all of* the.

Here are some phrases using the partitive كُلّ (kull):

- كُلّ الْحَالَاتِ (kull al-3aalam; the whole world)
- كُلّ الْمُجَرَّدَاتِ (kull al-ayyaam; all [of] the days)
- كُلّ الْبُيُوتِ (kull al-yawm; the whole day)
- كُلّ اللّيْلِ (kull al-layl; the whole night)
- كُلّ السَّنَةِ (kull as-sana; the whole year)
- كُلّ الصَّفْقِ (kull aS-Saff; the whole class)

Using كُلّ (kull) with an indefinite noun

When an indefinite noun follows كُلّ (kull), it means *each* or *every*. Here are several example phrases for you:

- كُلّ يَوْمٍ (kull yawm; every day)
- كُلّ شَخْصِ (kull shakhS; each person)
- كُلّ سَنَةٍ (kull sana; every year)
- كُلّ أَحَدٍ (kull aHadin; every one/each one)
Creating reciprocal phrases with 

(\textit{ba3D}; some/part)

Like other partitives, \(\textit{ba3D}\) — which means \textit{some} or \textit{part} of something — precedes the noun it describes in an '\textit{iDaafa} construction. Here are several examples to show you how to use \(\text{\textit{ba3D}}\):

\begin{itemize}
  \item '\text{\textit{ba3D al-waqt}}; some of the time'
  \item '\text{\textit{ba3D an-naas}}; some of the people'
  \item '\text{\textit{ba3D al-ayyaam}}; some of the days'
\end{itemize}

\(\text{\textit{ba3D}}\) with a possessive suffix gives you this useful reciprocal phrase:

\(\text{\textit{ba3Duhum ba3Dan}}; \text{one another/each other}\)

What’s a \textit{reciprocal phrase}, you ask? It’s a phrase in which you express action that’s done between two subjects. You usually translate it with \textit{each other} or \textit{one another}.

With the exception of the way you translate \(\text{\textit{ba3D}}\) in a reciprocal phrase, this partitive can always be translated as \textit{some}.

Writing with \textit{\textit{m\textsuperscript{u}3DHam}} and \textit{\textit{\textit{a}g\textsuperscript{l}lab}}

The Arabic words \textit{\textit{m\textsuperscript{u}3DHam}} and \textit{\textit{\textit{a}g\textsuperscript{l}lab}} both mean \textit{most}. There isn’t difference in meaning between them, and neither is more correct in any given context. The meaning stays the same regardless of the noun that follows it. Just as with \textit{kull; all} and \(\text{\textit{ba3D}; some}\) in the preceding sections, you use \textit{\textit{m\textsuperscript{u}3DHam}} and \textit{\textit{\textit{a}g\textsuperscript{l}lab}} in an '\textit{iDaafa} with the noun you want to modify. Here are a few examples:

\begin{itemize}
  \item '\textit{\textit{m\textsuperscript{u}3DHam aT-Ta3aam}}; most \text{[of] the food}’
  \item '\textit{\textit{a}g\textsuperscript{l}lab aT-Tullaab}; most \text{[of] the students}’
  \item '\textit{\textit{a}g\textsuperscript{l}lab al-mashaakil}; most \text{[of] the problems}’
\end{itemize}

To help you practice your use of the partitive nouns visually, in this exercise I show you a number of objects circled in different ways. For each picture, I give you a number of phrases — only one of which expresses the reality in the picture with the appropriate Arabic partitive. Select the item that best matches how the objects are circled, and then translate the Arabic phrase into English.
Part IV: Enlivening Your Writing with Particles

9. (A) كل الأفلام (kull al-aqlaam)
   (B) كل قلم (kull qalam)
   (C) معظم الأفلام (mu3DHam al-aqlaam)

10. (C) معظم الأفلام (mu3DHam al-aqlaam; most of the pencils)

9. (A) كل صورة (kull Suura)
    (B) كل الصور (kull aS-Suwar)
    (C) بعض الصور (ba3D aS-Suwar)

10. (A) كل النساء (kull an-nissa’)
      (B) بعض النساء (ba3D an-nisaa’)
      (C) معظم النساء (mu3DHam an-nisaa’)

11. (A) كل الرجال (kull ar-rijaal)
       (B) بعض الرجال (ba3D ar-rajul)
       (C) معظم الرجال (mu3DHam ar-rijaal)

12. (A) كل الصحف (kull al-aS-SuHuun)
       (B) بعض الصحف (ba3D aS-SuHuun)
       (C) كل صحن (kull SaHn)
Chapter 15: Picking Up the Pieces Using Particles and Partitives

13.  
(A) كلّ السّاعات (kull as-saa3aat)  
(B) أغلّب السّاعات ('aghlab as-saa3aat)  
(C) كلّ ساعة (kull saa3a)

14.  
(A) معظم بيت (mu3DHam bayt)  
(B) كلّ البيت (kull al-bayt)  
(C) كلّ البيوت (kull al-buyuut)

15.  
(A) كلّ سيارة (kull sayyaara)  
(B) كلّ السيارات (kull as-sayyaaraat)  
(C) أغلّب السيارات ('aghlab as-sayyaaraat)

16.  
(A) كلّ كتاب (kull kitaab)  
(B) بعض الكتب (ba3D al-kutub)  
(C) كلّ الكتب (kull al-kutub)
**Answer Key**

1. لايس عندي مال كثير لأنني لايس عندي وظيفة. (laysa 3indii maalun kathirun li’annanii laysa 3indii waDHiifatun. I don’t have much money because I don’t have a job.)

2. تريدين أن تأكل ورق عنب أم سمك مشوي؟ (turiidina ‘an ta’kulii waraq 3inab ’am samak mashwil? Do you want to eat stuffed grape leaves or grilled fish?)

3. أنا مشغول جدا اليوم فلا استطيع أن أذهب معك. (ana mashghul jiddan al-yawm fa-la ‘astaTi3u ’an ‘adhb-haba ma3aka. I am very busy today, and so I can’t go with you.)

4. نحن بحاجة إلى أفلام قبل أن نكتب الرسائل. (naHnu bi-Haaja ’ilaa ’aqlaam qabla ’an naktuba ar-rasaa’il. We need pens before we write the letters.)

5. اتصل بي عندما تصل إلى المحطة. (ittaSil bii 3indamaa taSilu ’ilaa-l-maHaTTa. Call me when you get to the station.)

6. سأشرب الماء أو الفهوة. (sa’ashrabu al-maa’ ‘aw al-qahwa. I will drink water or coffee.)

7. اكتسبت خبرة كثيرة وهمية موثقة في هذه الشركة. (iktasabat khibra kathirra wa-hiya muwaDHDHafa fii haadhihi-sh-sharika. She gained a lot of experience while she was an employee at this company.)

8. سياراتها جديدة لكن سياراته قديمة. (sayyaaratuhaa jadiida, laakinna sayyaaratahu qadiima. Her car is new, but his car is old.)

9. (A) كل صورة (kull Suura; each picture)

10. (C) معظم النساء (mu3DHam an-nisaa‘; most of the women)

11. (A) كل الرجال (kull ar-rijaal; all of the men)

12. (B) بعض الصحنون (ba3D aS-SuHuun; some of the plates)

13. (B) أعظم الساعات (’aghlab as-saa3aat; most of the clocks)

14. (C) كل البيوت (kull al-buyuut; all of the houses)

15. (A) كل سيارة (kull sayyaara; each car)

16. (B) بعض الكتب (ba3D al-kutub; some of the books)
Chapter 16

Uncovering the Source
of the Verbal Noun

In This Chapter
- Getting to know verbal nouns
- Creating verbal nouns for all the forms of the Arabic verb
- Using verbal nouns in your writing

In English, when you write about actions as abstract or complex concepts, you're using verbal nouns. For example, in the maxim, “To err is human, to forgive divine,” the words err and forgive are verbal nouns. They represent both abstract and complex actions. This is different from using a verb such as “Run!” which indicates a pretty simple and clear action.

Arabic has a system of verbal nouns that allows you to express abstract or complex concepts concisely. The Arabic word for the verbal noun is مصْدَر (maSdar), which literally means source. You can think of the verbal noun as the source or most basic form of any verb. In this chapter, you discover how to produce the maSdar for any verb that you need to use. You also encounter how to use the maSdar in several important sentence structures.

Understanding the Basics of Verbal Nouns

Before you can begin using the Arabic maSdar in your writing, you first need to wrap your brain around it. A veteran linguist at the National Security Agency once told me that the key to understanding the Arabic verbal noun is to view it as more verb than noun. The maSdar is indeed a noun in form, though; it can take all the cases of the noun. (For more on the cases, flip to Chapter 4). But a verbal noun in Arabic doesn’t just describe an action. Instead, it’s a way of expressing action. In Arabic, for instance, you frequently use a verbal noun where English would use a form of the verb called an infinitive. Like all verbs in Arabic, the verbal noun is quite varied in its shape in Form I, and remarkably regular in Forms II through X.

To help you understand verbal nouns from a grammatical standpoint, I start by describing their formations and uses in English. Verbal nouns are derived from verbs, and they describe the act of performing whatever their verbs mean. Grammarians use the term gerund in English to describe verbal nouns that end -ing. Think of the advice
“Seeing is believing.” In this example, seeing and believing are gerunds being used as verbal nouns.

You can also use infinitives as verbal nouns. In English, you form the infinitive by putting the preposition to in front of the most basic form of the verb. You use the infinitive when you want to complete the action of certain auxiliary verbs. For example, when you say “I want . . .” you finish your thought with an infinitive (such as “to eat a nice juicy steak”). Consider the infinitive’s use in the following maxim: “To err is human.” In this example, to err is an infinitive, but it’s representing the concept of erring.

While English uses more than one type of word as a verbal noun (such as the gerunds and infinitives in the previous examples), an Arabic verb has one verbal noun but can use that one verbal noun as both a gerund and even as an infinitive. Each of the ten Arabic verb forms has its own verbal noun, but you can think of them as verbal nouns of different verbs, even though they’re derived from the same verbal root.

Grammatically, a verbal noun is a noun. You use it in both English and Arabic the same way you use other more concrete nouns. Here’s an example of the same verb expressed once with a tangible object and then with a verbal noun as its object:

I like stuffed grape leaves.
I like eating in Arab restaurants.

I underline the direct objects of the verb in the previous examples. In the first example, the verb, like, has as its direct object a tangible (and delicious) concrete thing — stuffed grape leaves. In the second example, however, the object of the verb is an action that I like doing. The two sentences are identical in their deep grammatical structures (each one having a verb and a direct object). But they’re quite different in that the second example shows the versatility of using a verbal noun to express succinctly what could have been a much more complex sentence if done verbally (for example, I like it when I eat in Arab restaurants).

Producing the maSdar in the Forms

Producing a maSdar is easy. All you need to know is the word pattern used by the particular verbal root in Form I or the regular word pattern used by each of the other verb forms. You can then simply substitute the consonants of your verbal root for the consonants in the dummy root فعل (f-3-l). (To discover more about this root to produce word patterns, visit Chapter 2.) Here are several examples of this substitution:

<table>
<thead>
<tr>
<th>Pattern</th>

</tbody>
</table>
After you see how to align the consonants one by one with the location within the word pattern of the dummy root ﻓﻌﻞ (f-3-l), you can take any supplied pattern and produce the maSdar. Notice how the consonants in each verbal root replace the consonants of the dummy root ﻓﻌﻞ (f-3-l) to produce a word that essentially rhymes with the pattern.

The Arabic verb comes in ten forms. Each one of them has its own maSdar to master. The Arabic verb is also subject to various irregularities depending on the relative strength or weakness of the consonants in each verbal root. In this section, you encounter everything you need to know to produce the maSdar, not only of the regular verb in all ten forms, but also of the irregular verb.

**Creating the maSdar of regular verbs**

To succeed with the maSdar of the regular verb, all you need to know is the principle of substituting consonants within the word patterns with the dummy root. The maSdar almost always preserves the distinct elements you use to recognize the form of the verb. (For more on the ten forms of the Arabic verb, go to Chapter 9.)

**Form I**

The maSdar of Form I verbs is unpredictable. I know it’s frustrating to have to memorize random patterns for these verbs. But do know that the rest of the forms are completely regular and predictable.

No single word pattern is reserved for the Form I maSdar. Arabic uses an enormous variety of word patterns to produce it. And unfortunately, from a verbal root alone, you can’t infallibly predict what shape that root’s Form I maSdar will take. As a result, you ultimately have to memorize the maSdar of the basic and important verbs in Form I. To show you the possibilities, here are several Form I verbal nouns of some basic and important verbs:

- ﺗُهَاﺏ (dhahaab; to go)
- ﻛُوْل (dukhuul; to enter)
- 3ﺎم (3amal; to work)
- ﺳَرَة (diraas; to study)

**Forms II–X**

The maSdar in Forms II–X are regular and a little easier to master than Form I. In Table 16-1, I present the maSdar for some verbs in Forms II–X. In the “Pattern” column, I provide the word pattern that you use to produce each form’s maSdar. The present tense is provided as a reference to remind you about the distinct features you find in each of the ten verb forms. Now, you can’t exactly extrapolate the maSdar from any particular part of the verb. Instead, you need to memorize the word patterns for each of the ten forms.
### Table 16-1: The mašdar in Forms II–X

<table>
<thead>

<tr>
<td>X</td>
<td>ﺱَتْعَمُ (yastəm3i3lu)</td>
<td>إِسْتُعْمَالٌ (istif3aal)</td>
<td>إْسْتِفْعَالٌ (i3faal)</td>
<td>to use</td>
</tr>
</tbody>
</table>

In this exercise, I give you the three consonants of a regular verb root and the word pattern of a mašdar (using the consonants ﺳَلِلُ [f-3-l]). Substitute the consonants and write the resulting mašdar form as I did for you in Table 16-1.

**Q.** Verbal root: ﺪَلِقُ (3-l-q); mašdar pattern: تَعْمِيلُ (tafiil); verb form: II; English: *to hang*

**A.** تَعْلِيقُ (ta3liiq)

1. Verbal root: ﺖَخْلِلُ (d-kh-l); mašdar pattern: إْفَعْلَاءً (i3faal); verb form: IV; English: *to insert*

2. Verbal root: ﺦَدِمُ (kh-d-m); mašdar pattern: إْسْتِفْعَالُ (istif3aal); verb form: X; English: *to utilize*

3. Verbal root: ﺦَرِجُ (kh-r-j); mašdar pattern: تَفْعِيلُ (tafiil); verb form: V; English: *to graduate*
Creating the maSdar of irregular verbs

Arabic verbs are considered irregular if one or more of the three consonants of the verbal root are weak enough in pronunciation that they affect the form of the verb. When you produce the maSdar with a root containing a weak letter, you still use the same word patterns as the regular verb. You just have to make a few adjustments because of the weak letters.

Form I

Just as with regular verbs, the irregular Form I maSdar is unpredictable and has to be memorized separately. A dictionary can give you this information.

Here are the maSdar forms of several important irregular verbs in Form I:

- ٌكُونِ (kawn; to be)
- ٌوُصُولِ (wuSuul; to arrive)
- ٌبَيعُ (bay3; to sell)
- ٌشَراءِ (shiraa'; to buy)
In many cases, verbs that are irregular in their present or past tenses are completely regular in their mašdar forms. Geminate verbs, for instance, split up the doubled letter to produce a regular mašdar. Here are examples of geminate verbs with the letters doubled in the past tense and split up in the mašdar:

- اَسْتَمْرَ (istamarra; he continued)
- اَسْتَمْرَا (istikmaara; to continue)

You can read more about geminate verbs in Chapter 10.

### Initial (waaw) or (yaa') verbs (Forms VIII, IV and X)

The mašdar of a verb with an initial (waaw) or (yaa’) isn’t terribly difficult to spot. Initial waaw or yaa’ verbs keep the assimilation that they ordinarily have in Form VIII. However, in Forms IV and X, they turn their initial consonant into a long i vowel, which is written with (yaa’). Here are some examples:

<table>
<thead>
<tr>
<th>Form</th>
<th>Verbal Root</th>
<th>Present</th>
<th>mašdar</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>VIII</td>
<td>(w-S-l) وَصْلُ (yattaSilu)</td>
<td>اِتْصَالُ (ittiSaal)</td>
<td>to call</td>
<td></td>
</tr>
<tr>
<td>IV</td>
<td>(w-J-b) وَجَبُ (yuujibu)</td>
<td>اِجْبَاءُ ('lijaab)</td>
<td>to obligate</td>
<td></td>
</tr>
<tr>
<td>X</td>
<td>(w-R-d) وَرْدُ (yastawridu)</td>
<td>اِسْتِبْرَادُ (istiiraad)</td>
<td>to import</td>
<td></td>
</tr>
</tbody>
</table>

Note the doubled تاء (taa’), which is the distinctive feature of an initial (waaw) verb in Form VIII. The long i vowel — written with (yaa’) — in the Form IV and X mašdar of an initial (waaw) verb can take some getting used to. Remember that the yaa’ and the waaw (waaw) behave similarly in the irregular verbs, so it’s no surprise that a waaw (waaw) turns into a yaa’ (yaa’).

### Medial (waaw) or (yaa’) verbs (Forms IV and X)

Medial (waaw) or (yaa’) verbs in Forms IV and X turn the medial letter into a long a vowel (written with an أَلِف [‘alif]) and add a تاء مُرْبوطة (taa’ marbuTuTa). Check out a few examples:

<table>
<thead>
<tr>
<th>Form</th>
<th>Verbal Root</th>
<th>Present</th>
<th>mašdar</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>IV</td>
<td>(q-w-m) قُومُ (yuqliimu)</td>
<td>إِقَامَةُ ('iqama)</td>
<td>to elevate</td>
<td></td>
</tr>
<tr>
<td>X</td>
<td>(q-w-m) قُومُ (yastaqliimu)</td>
<td>إِسْتِقَامَةُ (istiqaama)</td>
<td>to stand upright</td>
<td></td>
</tr>
</tbody>
</table>

Arabic likes its roots to have three consonants. When the weakness of a consonant makes it disappear, as you see it do by turning into a long a vowel in the previous table, the language compensates by adding something. The تاء مُرْبوطة (taa’ marbuTuTa) gives the mašdar here an extra syllable to make up for the lost letter.

### Final (waaw) or (yaa’) verbs (Forms II and III)

Final (waaw) or (yaa’) verbs add a تاء مُرْبوطة (taa’ marbuTuTa) in Forms II and III as shown in these examples:
Chapter 16: Uncovering the Source of the Verbal Noun

The key to recognizing the maSdar of a final َوَاءَ (waaw) or َياءَ (yaa') verb in Forms II and III is to note that most of the normal shape of the maSdar is still present with them. Just be careful not to mistake the form ِتَرْبِيَة (tarbiya) for a feminine adjective (for more information on adjectives, check out Chapter 6).

Final َوَاءَ (waaw) or َياءَ (yaa') verbs (Forms IV, VII, VIII and X)

In Forms IV, VII, VIII, and X, final َوَاءَ (waaw) or َياءَ (yaa') verbs turn the final letter into a long َاءَ — written with َأَلِف (alif) — followed by َء (hamza). Check out these examples:

<table>
<thead>
<tr>
<th>Form</th>
<th>Verbal Root</th>
<th>Present</th>
<th>maSdar</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>IV</td>
<td>جَرَيْ</td>
<td>يُجْرِيَ</td>
<td>إِجْرَاءَ ('ijraa')</td>
<td>to implement</td>
</tr>
<tr>
<td>VII</td>
<td>ﻋَزَوْ</td>
<td>ﻋَنْزَاءَ</td>
<td>إِنْزَاءَ ('in3izaa')</td>
<td>to console oneself</td>
</tr>
<tr>
<td>VIII</td>
<td>ﻋِنْيَ</td>
<td>إِعْنَيَاءَ</td>
<td>'i3tinaa'</td>
<td>to feel concern for</td>
</tr>
<tr>
<td>X</td>
<td>ﻗَصَوُ</td>
<td>ﻤَسْقَصِيَ</td>
<td>إِسْمَقَصِاءَ (istiqSaa)</td>
<td>to examine</td>
</tr>
</tbody>
</table>

As you can see in the previous examples, the final َوَاءَ (waaw) or َياءَ (yaa') is replaced by the distinctly recognizable long َاءَ and َء (hamza). The key to finding a word in a dictionary is knowing what root it comes from. If you ever run across such a form in your reading, it’s a good bet that a final long َاءَ and َء (hamza) are hiding a final َوَاءَ (waaw) or َياءَ (yaa').

Final َوَاءَ (waaw) or َياءَ (yaa') verbs (Forms V and VI)

In Forms V and VI, final َوَاءَ (waaw) or َياءَ (yaa') verbs remove the final letter altogether and replace it with َكُسْرَانِينَ (kasratayn). The kasratayn turns into a full long َاءَ vowel — written with َياءَ (yaa') — when the maSdar is the head of an 'iDaafa or has the َاءَ | َل (alif laam). Here are two examples:

<table>
<thead>
<tr>
<th>Form</th>
<th>Verbal Root</th>
<th>Present</th>
<th>maSdar</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>V</td>
<td>ﺑِسْطَقَصِيَ</td>
<td>ﺛِقْصَصَيَ (taqaSSii)</td>
<td>إِسْتَقْصِاءَ (istiqSii)</td>
<td>to inquire</td>
</tr>
<tr>
<td>VI</td>
<td>ﺑِسْطَقَصِيَ</td>
<td>ﺛِقْصَصَيَ (taqaSSii)</td>
<td>إِسْتَقْصِاءَ (istiqSii)</td>
<td>to claim</td>
</tr>
</tbody>
</table>

To help you note the alternate forms, I've placed the Form V and VI final َوَاءَ (waaw) or َياءَ (yaa') maSdar directly below the form with kasratayn. The version with the final long vowel is the one you will actually see more commonly, because the maSdar will tend to take on the َاءَ | َل (alif laam) in actual use. (To see more about adding the َاءَ | َل (alif laam) to the maSdar, continue to the next section, “Incorporating the maSdar in Your Writing.”)
Incorporating the maSdar in Your Writing

The Arabic maSdar is a powerful tool for expressing yourself succinctly. In this section, I show you ways to use a maSdar as a noun, describing actions vividly in the three cases. I also show you ways to replace longer verbal clauses with a maSdar. Finally, you discover how to coordinate the use of your maSdar with important auxiliary verbs, which shows you can express a polished literary style.

Using the maSdar as a noun

Like in English, every verbal noun in Arabic can be used as a noun that describes an action rather than a physical object. In fact, as a noun, a maSdar can appear in any place you might use another noun. In other words, it can be used in all three cases: nominative, accusative, and genitive. The verbal noun sometimes denotes a concept only transferrable as a noun. Other times, the verbal noun could be replaced with a form of a verb to create a sentence of the same meaning. I explain how to use a maSdar with all three cases in the following sections.

The maSdar as a nominative noun

A maSdar in the nominative case can be the subject of a nominal sentence or the subject of a verb. A maSdar with a تاء مربوطة (taa’ marbuuTa) is treated as a feminine noun. A verbal noun in Arabic is usually in the definite state, meaning it has the ال (‘alif laam) prefix (the equivalent of the English word the). (To see how to add the ال [‘alif laam] to nouns, flip to Chapter 2.) In other words, unless the verbal noun is the first member of an ‘iDaafa, it either has the ال (‘alif laam) or a possessive suffix.

Here’s an example of the maSdar being used in the nominative case (the maSdar is underlined):

الدراسة كلا يوم مهمة.
(ad-diraasatu kullayawmin muhimmatun. Studying every day is important.)

The maSdar as an accusative object noun

Just as a verbal noun can be the subject of a verb, it can also be the object, which means it’s in the accusative case. Here are two examples of verbal nouns in the accusative case and serving as objects to verbs (the maSdar is underlined):

أجبُ الأكل في مطاعم غربيّة.
(‘uHibbu al-‘akl fii maTaa3im 3arabiyya. I love eating in Arab restaurants.)

بدأت زيارةها في المتحف.
(bada’at ziyaaratanaa fii-l-matHafi. She began her visit at the museum.)

Notice that in the first example, the English gerund would be interchangeable with the infinitive to eat. In that example, the verbal noun is functioning as a verbal complement within the sentence. In the other example, the verbal noun is rendered much more as a noun. This displays the versatility of verbal nouns in Arabic.
The maSdar as a genitive noun

A verbal noun can appear in the genitive case after prepositions or as the second member of an 'iDaafa. Here are two examples of verbal nouns in the genitive case (the maSdar is underlined):

\[
\text{kaanat \\ natiijat-3amaliha mu’aththiratan. The result of her work was impressive.}
\]

\[
\text{naama jayyidan ba3da 3awdatihi min ar-Hlati. He slept well after his return from the trip.}
\]

Notice that in the second example, another perfectly good translation would be to render the verbal noun as a verbal phrase: *He slept well after he returned from the trip.*

As long as you understand what the Arabic is actually doing on a grammatical level, you should feel free to translate more freely than a literal word for word rendering.

Creating purpose clauses with the maSdar

The maSdar gives you a convenient way to express a purpose clause (a clause that describes the reason or intention for doing something) that would otherwise require a longer sentence. You can add the preposition ل (li-; to) to a maSdar and use it as an infinitive. This maSdar can stand in the place of a longer clause formed using the subjunctive. Here are a few examples:

\[
\text{dhahabtu 'ila miSr likay 'adrusa hunaaka. I went to Egypt for the study of Arabic there.}
\]

In the previous examples, it only takes one less syllable to use the maSdar in the purpose clause. Even so, learning to use the maSdar instead of the subjunctive is an efficient way to write. After all, there may be times when you won’t know the subjunctive form of an irregular verb. The maSdar will likely be easier to remember.

Sometimes, you may want to form a purpose clause with an object. In this case, you can add an object to your purpose clause by putting your maSdar in an 'iDaafa with the intended object. (See Chapter 7 for more on the 'iDaafa.) Consider this literal translation of an 'iDaafa added to the earlier example:

\[
\text{dhahabtu 'ila miSr li-diraasat-al-3arabiyya hunaaka. I went to Egypt for the study of Arabic there.}
\]
The “study of Arabic” is essentially the same thing as “studying Arabic.” Here are some other examples of purpose clauses with ‘iDaaf as objects:

\[\text{dakhlat al-ghurfata litablighi-r-ra'isi 3an al-mukaalama. She entered the room to inform the president about the call.}\]

\[\text{yajibu 'an taktuba risaalatan li-waalidayka li-tahdi'a a3Saabihima. You should write a letter to your parents in order to calm their nerves.}\]

### Making use of the maSdar with an auxiliary verb

A feature especially common in Arabic media is the use of the maSdar with certain auxiliary verbs. They’re common in newspapers because they provide a way to concisely express certain constructions. In this section, I show you one auxiliary verb that is so pervasively used in literary Arabic that knowing it is essential as you begin to read and write at the intermediate level. The auxiliary verb you want to know is قام (qaama bi; to rise).

The verb قام (qaama) means to rise. This verb can have numerous idiomatic uses, especially when you add a prepositional phrase to it. When you follow the verb قام (qaama) with the preposition بـ (bi; with, by) plus maSdar, it denotes the concept of performing or undertaking an action. In many cases, it isn’t even necessary to add the sense of performing or undertaking to your translation. You can just translate the maSdar as if it were the main verb of the sentence.

Here are a few examples of قامـ بـ (qaama bi-) with a maSdar:

\[\text{قام الرئيس يتوقيع المعايدة.} \]

\[\text{(qaama ar-ra'is bi-tawqii3i-l-mu3aahada. The president signed the treaty.)}\]

\[\text{قاموا بالبحث عن الذهب.} \]

\[\text{(qaamuu bi-l-baHthi 3an adh-dhahabi. They undertook to search for the gold.)}\]

Remember that the maSdar is the real verb of the sentence when it’s used with the auxiliary verbs. In the first example, I don’t translate the auxiliary at all, because it isn’t necessary. In the second example, I render it with the verb to undertake; though They searched for the gold would be a valid translation.

Almost all of the following sentences use one or more examples of the maSdar. See if you can arrange the sentences into the order that best makes a coherent story. To do
so, first write the English translation below each sentence, and then write the letters of each sentence in the correct order to make a story in the space provided.

A. (laakin qabla shurb 3aSiir at-tuffaaH, sami3tu Darban 3alaa-l-baab.)

B. (fa-qumtu bi-taHDiir alfaTuur.)

C. (fataHtuhu wa-ra'aytu Sadiiqii muSTafaa.)

D. (“‘laa ta3rifu ’anna hudaal sa-taku-unu hunaaka ’ayDan?” qaala lii.)

E. (ba3da’-akl-bayDatayn, laa HaDHtu ’annani kuntu 3aTshaan ’ayDan.)

F. (i3tabartu as-su’aal.)

G. (dhakartu al-imra’a al-Jamiila adh-dhakIyya allatii ilaTqaytu bihaa al-’usbuu3 al-maaDii.)

H. (“limaadhaal lam taqul dhaalika ’awwalan?” ‘ajabtuhu. “falnadhab!”)

I. (istayqaDHtu min an-nawm wa-kuntu jaa’i3an jiddan.)

J. (huwa qaala, “adh-habu alyawm lid-diraasa fi-l-maktaba. hal turiidu adh-dhaaba ma3ii?”)
K. قبَدَتُ البَحْثَ عَن شَربَ فِي الْتَلَاجَةُ. (fa-bada’tu albaHth 3an sharaabin fii-th-thallaja.)

L. لَا، شُكْرًا، قُلْتُ لَهُ. (’lā, shukran,’ qultu lahu.)

11. Write the letters in the correct order here: ______________________________
Answer Key

1. إدخال
2. استخدام
3. نخرج
4. مسافرة
5. تكليف
6. احتفال

10. إنتقل

1. جدأ جائعونا من النوم وكنت جائعا جدًا (IstayqaDHtu min an-nawm wa-kuntu jaa'i3an jiddan. I awoke from sleep, and I was very hungry.)

B. فقمت بتحضير الفطور (Fa-qumtu bi-taHDiir alfaTuur. So I prepared the breakfast.)

E. بعد أن كتبت لاحظت أنني كنت عطشان أيضًا (Ba3da'a-akl-bayDatayn, laaHaDHtu 'annani kuntu 3aTshaan 'ayDan. After eating two eggs, I noticed that I was thirsty also.)

K. فبدأ البائع عن شراب في الثلاجة (Fa-bada'tu albaHth 3an sharaabin fi-l-thallaaja. So I began the search for a drink in the refrigerator.)

A. لكن قبل شرب عصير التفاح سمعت ضربًا على الباب (Laakin qabla shurb 3aSiir at-tuffaaH, sami3tu Darban 3alaa-l-baab. But before drinking the apple juice, I heard a knock on the door.)

C. ففتحته ورأيت صديقي مصطفى (FataHtu wa-raqaytu Sadiiqii muSTafa. I opened it and saw my friend Mustafa.)

J. هو قال "ذهب اليوم لدراسة في المكتبة. هل تريد الذهاب معي؟" (Huwa qaaala, “adh-habu alyawm lid-diraasa fii-l-maktaba. hal turidu adh-dhaaba ma3il?” He said, “I'm going today to study at the library. Do you want to go with me?”)
Part IV: Enlivening Your Writing with Particles

F. ٢٧٦ (I3tabarti as-su’aal. I considered the question.)

L. ٢٧٦ (”lā, shukran,” qultu lahu. “No, thanks,” I said to him.)

D. ٢٧٦ (”lā t‘āruf an’ hādi‘a‘ sa-tu‘unu hu‘naaka ‘ayDan?” qaala lii. “Don’t you know that Huda will be there too?” he said to me.)

G. ٢٧٦ (dhakarti al-imra‘a al-jami‘la adh-dhakiiyya allatii iltaqaytu bihaa al’usbu‘3 al-maa‘Dii. I thought about the beautiful and intelligent woman whom I had met last week.)

Chapter 17

Being Positive About Adding the Negative to Arabic Sentences

In This Chapter

- Adding the negative to sentences of all tenses
- Negating nouns and adjectives

If you ask your boss for a raise, you’re hoping, of course, to hear the word yes. And if you call that special someone for a date, you’d like to hear an enthusiastic sure! What you don’t want to hear is that one dreaded word: no. Negative sentences have received a bad rap because they so often stand in the way of what you want in life. But negative sentences can be positive. Perhaps your boss says, “I’ve been thinking you don’t make enough money here.” Or, maybe your sweetheart says to you, “There’s no one else in the world I’d rather go out with.”

However you look at it, adding no or not to a sentence is important. In this chapter, you discover that Arabic adds no or not in a number of ways. In the first part of the chapter, you see that you need to use different words for no and not and different moods of the verb, depending on whether you want to negate past, present, or future tenses. In the second half of the chapter, you experience the different ways nouns and adjectives are negated. I can’t guarantee you’ll always hear the answer you hope for in life, but I’ll at least try to make your experience of the negative in Arabic a positive one.

Putting a Negative Spin on Verbs

Telling your readers that something didn’t happen is at least as valuable as being able to report what did. In English, you add the word not, usually directly in front of your verb, and you’ve done the job. Arabic, however, offers you a few more techniques. In this section, I show you how to negate in the past, present, and future tenses as well as how to negate commands.

Before you begin encountering the ways you add not to verbs, make sure you’re comfortable with the jussive and subjunctive forms of the verb. (I explain them in considerable detail in Chapter 13.)
Don’t do it! Writing the negative command

Unlike in English, in Arabic you can’t tell someone not to do something just by putting the word not with the command. Instead, you have to put the word ﻻ (lāa) in front of the second person jussive forms.

Here are some examples of negative commands:

لا تَقولي ذلِكَ! (lāa taquullī dhālīka! Don’t say that!)
لا تَمشِى إِلَى الْمَدَرَسةُ إِذَا كَنتَ مَريضًا. (lāa tamshi ‘ila-l-madrasa ‘idha kunta mariiDan. Don’t go to school if you’re sick.)
لا تَنسَى عِيد مِيلادِي! (lāa tansa 3iid milaadī! Don’t forget my birthday!)
لا تَتأخِرُوا! (lāa tata’akhharuu! Don’t be late!)

The way it wasn’t: Negating the past tense

The past tense is the only timeframe in which Arabic gives you two options for adding not to your sentence. In each case, you put the word that means not directly in front of the verb form required by the negative.

Putting ﻻ (maa) before a past tense verb

The first and easiest way to negate a past tense verb is to put the word ﻻ (maa; not) before your verb. Here are several examples of ﻻ (maa) plus a past tense verb:

ما كانَ جائعًا عَنْدَما وَصلَ إلى المَطُوْعَم. (maa kaana jaa’i3an 3indamaa waSala ‘ila-l-mat3am. He was not hungry when he arrived at the restaurant.)
ما شَربَتُ القَهْوَة لَانِي أُفضِّلُ الشَّاي. (maa sharibtu al-qahwa li’anni ‘ufaDDilu al-shaay. I did not drink the coffee because I prefer tea.)
ما سافَرُوا إلى الأردن مَعَ جَدِّيهم. (maa saafaruu ‘ila-l-'urdun ma3a jaddatihim. They did not travel to Jordan with their grandmother.)

The handy thing about using ﻻ (maa) plus the past tense verb is that this option allows you to just add one word to a fairly basic form of the verb. Because you
Chapter 17: Being Positive About Adding the Negative to Arabic Sentences

probably picked up the past tense early in your Arabic studies, negating it with this method is easy enough.

Negating with َلَمْ (lam) plus the jussive mood

The other way to negate the past tense involves using a form of the verb you probably didn’t encounter until later in your Arabic studies: the jussive (see Chapter 13 if you need a refresher). If you put the word َلَمْ (lam; not) directly in front of a jussive verb, you can translate the sentence just as if it were a past tense verb with مَا (maa), which I discuss in the previous section.

The jussive on its own isn’t a past tense verb. Only when you put َلَمْ (lam) in front of the jussive does it take on a past tense meaning.

Here are some examples that use َلَمْ (lam) plus the jussive. (Note: I use the same examples in the preceding section to show you the past tense with مَا [maa]. Notice that the translation is identical).

َلَمْ يَكُنْ جَاهِعًا َعندَما وَسَلَّ إلى المَطْعَمُ.

(lam yakun jaa'i3an 3indamaa waSalam 'ilaal-mat3am. He was not hungry when he arrived at the restaurant.)

َلَمْ يُسَافَرُوا إلى الأَرْدنَ مَعَ جَدَّتِهِمْ.

(lam yusaafiruu 'ilaal-'urdun ma3a jaddatihim. They did not travel to Jordan with their grandmother.)

Adding مَا (maa) to negate a past tense verb is a bit less formal than using َلَمْ (lam) plus the jussive mood. However, مَا (maa) isn’t colloquial Arabic. You’re likely to encounter both these methods, and you should know how to produce both equally well.

Putting the word مَا (maa) in front of a past tense verb doesn’t involve much of a challenge. The more valuable skill is turning a past tense verb into a negative with the jussive option. For each of the past tense verbs I give you here, add َلَمْ (lam) and replace the past tense verb with the corresponding jussive form. You’ll find one practice problem that’s already negative with مَا (maa). In that case, replace the مَا (maa) accordingly.

Q. َشَرَبْتَ (sharibta; you drank)

A. َلَمْ تَشْرَبْ (lam tashrab; you didn’t drink)

1. قَالَ (qaala; he said) ____________________________________________

2. إِسْتَطَعَوا (istaTa3uu; they could) ______________________________

3. كُنْنَا (kunnaa; we were) ______________________________________

4. تَكَلَّمْتُمْ (takallamtum; you [P] spoke) __________________________

5. أُرَادُوا (‘araaduu; they wanted) ________________________________
6. ﻣَا ﺱﺎﻓَرتُ (maa saafartu; I didn’t travel) ______________________________________

7. ﺱَمِﻊْتُ (sami3ti; you [FS] heard) ____________________________________________

8. ﺝَدَدتُ (wajadat; she found) ________________________________________________

**Not happening: Negating the present tense**

Negating the present tense isn’t difficult. I just did it in English! Luckily, it’s just as easy in Arabic. All you have to do is add the word for not and you’re in business. And because Arabic doesn’t even have a present tense of the most basic verb of all, to be, you get a special verb just for when you need to say, to not be.

**Using ﻻ (laa) with most verbs**

When you’re dealing with the present timeframe and need to add the word not, you need only place the word ﻻ (laa) in front of your verb. Here are two examples of negated present tense verbs:

لا يُريد أن يذهب معنا لأنه مريض.
(laa yuriidu 'an yadh-haba ma3ana li'annahu mariiD. He does not want to go with us because he’s sick.)

لا أسكن في بيت بل في شقة.
(laa 'askunu fii baytin bal fii shaqqatin. I do not live in a house, but rather an apartment.)

**Not having or being: Applying لَيْسَ (laysa)**

Because Arabic has no present tense form of the verb to be, you use a special negative particle لَيْسَ (laysa) to express concepts such as he is not . . . (See Chapter 15 for more on particles.) The curious thing about لَيْسَ (laysa) is that although you use it as a negative form of the present tense, it has past tense endings on it. Like the verb كَانَ (kaana; to be), لَيْسَ (laysa) uses the accusative case in the predicate. Check out the verb table for the conjugation of this word.

<table>
<thead>
<tr>
<th>لَيْسَ (laysa; not to be)</th>
<th>لَيْسُنا (naHnu lasna)</th>
</tr>
</thead>
<tbody>
<tr>
<td>لَيْسُ 'اناا لاستو (anaa lastu)</td>
<td>لَيْسُنا (naHnu lasna)</td>
</tr>
<tr>
<td>لَيْسُ 'انتا لاستو (anta lasta)</td>
<td>لَيْسُنْ 'انتتوم لاستمو ('antum lastum)</td>
</tr>
<tr>
<td>لَيْسُ 'انتك لاستو (anti lasti)</td>
<td>لَيْسُنْ 'انتو لاستن ('antunna lastunna)</td>
</tr>
<tr>
<td>لَيْسَ (huwa laysa)</td>
<td>لَيْسُوا (hum laysuu)</td>
</tr>
<tr>
<td>لَيْسُ (hiya laysat)</td>
<td>لَيْسُنِ (hun lasna)</td>
</tr>
</tbody>
</table>

لاَيْسَ عَطْشْاشانُ الآن.
(lastu 3aTshaan al'aan. I’m not thirsty right now.)
Here are a couple of examples of using لَيْسَ (laysa) to negate to be:

لَيْسَ الفِیْلم جَيِّدًا جَدًّا.
(laysa-l-film jayyidan jiddan. The movie is not very good.)

لَمْ يُدْرِسُ الطَّلَابَ فَلَيْسُوا مُسْتَعِدِينَ لِلِّمْعَانِ.
(lam yadrusu al-Tullaab, fa-laysuu musta3idiin li-limtiHaan. The students didn’t study, so they’re not prepared for the test.)

You can also use لَيْسَ (laysa) in the sense of there isn’t [something]:

لَيْسَ هَنَاكَ شَيْءٌ عَلَى الْطاْلَةِ.
(laysa hunaaka 'shay'un 3alaa-Taawila. There is not anything on the table.)

The word لَيْسَ (laysa) is also useful for negating عَنْدَ (3inda; to have). Consider these examples:

لَيْسَ عَنْدِي مُشْكَلَةٍ.
(laysa 3indii muskila. I have no problem.)

لَيْسَ عَنْدَنَا الْوَقْتُ الْآَنِ.
(laysa 3indana al-waqt al'aan. We do not have the time right now.)

Not meant to be: Negating the future tense

To add the word not in the future tense, you need to use a special word for not: لَنْ (lan). You put it directly in front of the subjunctive form of the verb. (Refer to Chapter 13 for more on the subjunctive.) Here are some examples of sentences with future tense followed by a sentence with negated verbs in the subjunctive mood:

سَأَلِسِلُكَ الرِّسَالَةَ.
(sa'ursilu laka ar-risaala. I will send you the letter.)

لَنْ أَرْسِلُكَ الرِّسَالَةَ.
(lan 'ursila lahu ar-risaala. I will not send you the letter.)

سَيَصِلُونَ إِلَى الْمَطَارِ فِي السَّاعَةِ الْبَالِغَةِ (sa-yaSiluuna 'ilaa-l-maTaar fii-s-saa3a at-taasi3a. They will arrive at the airport at nine o’clock.)

لَنْ يَصِلُونَ إِلَى الْمَطَارِ فِي السَّاعَةِ الْبَالِغَةِ (lan yaSiluu 'ilaa-l-maTaar fii-s-saa3a at-taasi3a. They will not arrive at the airport at nine o’clock.)

The following sentences contain no negatives. Change each one into its negative equivalent. If you have a present tense verb, all you need to do is put ﺞَلْ (laa) before the verb. If it’s a present tense nominal sentence, you need to add a form of لَيْسَ (laysa). (For more on nominal sentences, see Chapter 2.) If the verb has a future tense, you need to add لَنْ (lan) and change the verb into the subjunctive. Good luck!

Q. أنا حَزِينُ. ('anaa Haziiin. I’m sad.)

A. لَسْتُ حَزِينًا. (lastu Haziiinan. I’m not sad.)
Part IV: Enlivening Your Writing with Particles

9. (huwa muhimm. He’s interesting.)

10. (yqra’u al-kitaab. He reads the book.)

11. (sanazuuruhaa ghadan. We’ll visit her tomorrow.)

12. (3indii haatif. I have a phone.)

13. (naHnu muwaafiquuna. We agree.)

14. (tadrusu kathiiran. She studies a lot.)

15. (satarji3u sarii3an. You’ll return quickly.)

16. (sayakuunu hunaaka. He’ll be there.)

Turning Nouns and Adjectives Negative

It isn’t only verbs that get negated in a language. In English, for instance, we have the sayings “No man is an island,” “Hell hath no fury,” and “there’s no crying in baseball” (unless you’re like me, a Cubs fan), which negate nouns and gerunds. In Arabic, you also can add a negative thought to things besides verbs. With an assortment of negative particles, you’ll be able to make nouns and adjectives negative.

Making simple nouns negative with َلا (lāa)

Put the ordinary negative particle َلا (lāa) in front of nouns when you’re forming a sentence that speaks of an exception. Here’s an example to illustrate this somewhat formal construction:

لا صديق لي إلا مصطفى.
(lāa Sadiiqa li i’llaa muSTafaa. I have no friend except Mustafa.)
The use of ﻷ (lāa) before a noun produces a few other useful words and phrases, such as the following:

- ﻷ ﺷﺎﻛّا (lāa shakka; no doubt)
- ﻷ ﺛَﺪّ (lāa budda; it’s inevitable [that])

**Understanding how to negate verbal nouns**

*Verbal nouns* are nouns that describe an action in abstract terms. They’re frequently in the form of a gerund, such as seeing is believing. They can also be nouns, such as agreement and composition (see Chapter 16).

When you need to add a negative to the phrase you’re expressing with the verbal noun, you use the special word ﻲﺪَم (3adam). All on its own, this word would be translated as *nothingness* or *nonexistence*. When you put a verbal noun in an ‘iDaafa with ﻲﺪَم (3adam), you essentially express the nonexistence of that verbal noun’s action. (Flip to Chapter 7 for more on the ‘iDaafa construction.)

Take a look at a couple examples of verbal nouns negated with ﻲﺪَم (3adam):

- ﺑَﻌْداَدَرُ ﺃُﺣْمَدَ عَﻦَ عَﺪَمِ دراَسَيْهِ ﺮِ مَىّرَ (ya3tadhiru ‘aHmad 3an 3adam diraasatihi fii miSr. Ahmad apologizes for not studying in Egypt.)
- ﻦُرْاَذْتُ ﻋَﻤِيِ ﻦُرْاَذْبَ عَﺪَمِ زيَارَيْنِ ﺲِيّبِيّ ﺔَﺸْ-outs (sharaHtu li-ummii sababa 3adam ziyaaratii al’usbuu3 al-maaDii. I explained to my mother the reason I did not visit last week.)

**Generating negative adjectives**

In English, you can turn an adjective into a negative by adding a prefix such as un-, as in changing *acceptable* to *unacceptable*. You can also use non- in certain cases, as in *binding* and *nonbinding*. In Arabic, however, you negate an adjective by putting it in an ‘iDaafa with the word ﻏَﺒْرُ (ghayr).

Here are some examples of adjectives negated with ﻏَﺒْرُ (ghayr):

- ﻣُﺤْدَوُدُ ﻏَﺒْرُ ﻓَرْﺣُﻩ (faraHuhaa ghayr maHduud. Her joy is unbounded.)
- ﺃَنَا ﻏَﺒْرُ ﺯَمْسَعَدُ (‘anaa ghayr musta3idd. I’m unprepared.)
- ﻧِاَذْـ ﻏَﺒْرُ ﺔَـ (haadha ghayr SaHiiH. That’s untrue.)
Part IV: Enlivening Your Writing with Particles

Your friend is readying a newspaper ad for the grand opening of his restaurant. He has asked you to proofread it. Keep an eye out for any errors he made in the use of the negative. Circle them and write in the blanks which word he should have written. Then rewrite the sentence with correct word filled in.

Q. ٍلا سَتَتَكَلُّمُ هَذِهُ اللُغَةُ. (lā satatakallamu haadhīhi-l-lughā.)

A. Error: ٍلا سَتَتَكَلُّمُ هَذِهُ اللُغَةُ. (lā satatakallamu) / ِلَنْ تَتَكَلُّمُ هَذِهُ اللُغَةُ. (lān tatakallama haadhīhi-l-lughā. You will not speak this language.)

We announce the opening night of our new restaurant <<The Star of Lebanon>>
You’ve never before seen a place like it!

The food here isn’t expensive, and you’ll eat a lot.

You will not be sorry for your visit.

If you haven’t eaten excellent Arab dishes for a long time, visit us soon.
Chapter 18

Active and Passive Participles

In This Chapter
- Forming active and passive participles for regular and irregular verbs
- Understanding how to use participles in your writing

Have you ever been the recipient of that old prank where someone calls you, pretending to be from the electrical company, and asks if your refrigerator is running? You answer, “Why, yes it is!” The caller then responds, “Well, you better go catch it!” The joke hinges on ambiguity in English over the use of participles.

In this chapter, you discover everything you need to know about using participles in Arabic. One thing you see is that Arabic participles don’t have any of the ambiguity that the electrical joke depends on.

You may already know the endings you put on the Arabic participles. Participles take that series of endings called the sound plurals. They’re called sound plurals because they’re regular and predictable (as in the phrase safe and sound). After you master a few simple steps, you’ll be producing Arabic active and passive participles for every one of the ten verb forms.

In this chapter, you also encounter the ways you use participles in your Arabic writing. Forming active and passive participles accurately and using them correctly is a valuable skill because it allows you to dramatically expand your ability to describe the world around you.

Acting or Acted Upon: Comparing Active and Passive Participles

A convenient definition of a participle is that it’s a version of a verb that functions as an adjective. You can use to eat as a verb in the present tense to say John eats too fast. You can use it in the past tense to say Yesterday I ate too much. And you can use it in the future tense to say We’ll eat at a great restaurant tonight. But a participle lets you take that same verb and make it describe not the action itself but someone or something doing that action. An active participle describes someone currently doing that action. A passive participle describes something an action has been done upon.

In English, you form all active participles with the suffix -ing. With a participle you can write, “Eating his meal, John noticed a fly in his soup.” Or, “In the corner of the restaurant,
he saw two people kissing.” In both of these cases, the participle is really an adjective.
Passive participles take the same action and describe someone as having experienced that action. With passive participles you can talk about taking home the rest of your half-eaten meal. You can also ask the waiter whether the tip is included.

English and Arabic share the fact that their participles are used as adjectives. Arabic, however, has separate versions of the participle depending on whether the participle is describing a male versus a female or one person versus a crowd. This fact isn’t surprising, because Arabic distinguishes for gender and number in the rest of its adjectives as well. Another key difference is that Arabic doesn’t form the participle with a simple ending as English does. Instead, Arabic uses the endings to mark gender and number. In Arabic you put the participle together by adding prefixes or changing the vowels, depending on the type of verb you’re using to create your participle.

Creating Forms of the Participle

Within each form, you have two kinds of participles:

- **Active:** An active participle (also called the present participle in English) describes an action that’s currently happening. In English, these end with -ing. The proverb “A rolling stone gathers no moss” shows you how the active participle is really used as an adjective.

- **Passive:** A passive participle (also called the past participle in English) describes an action as already completed. Consider the two passive participles in the proverb “A penny saved is a penny earned.” A passive participle is a short way to say that an action has been accomplished on something. “A penny having been saved is a penny having been earned” is just unnecessarily long.

In this section, I show you how to form active and passive participles for the basic Form I verb, both regular and irregular. Because Forms II–X are more similar to each other than any of them are to Form I, I also show you the relatively easy task of forming participles for regular and irregular verbs in those forms.

Producing Form I active participles of regular verbs

To make the active participle of a Form I regular verb, take the three consonants that make up your verb (the verbal root) and add the following:

- A long َّ ( kasra) under the second consonant

Following these two rules produces the word pattern َّا َّاِلِّ (fe3il; one doing).

You use different versions of the participle when you need to use participles for the different genders and numbers of nouns. Here are examples of all the versions of a
sample Form I active participle showing all the endings of the participle, including the final vowels. Only the masculine plural has a special and different form for its accusative/genitive plural. Here’s the active participle of داخل (daakhil; entering), a regular Form I verb:

<table>
<thead>
<tr>
<th>Masculine (Nom.)</th>
<th>Masculine (Acc./Gen.)</th>
<th>Feminine</th>
</tr>
</thead>
<tbody>
<tr>
<td>Singular</td>
<td>داخِلٌ (daakhilun)</td>
<td>داخلَةٌ (daakhilatun)</td>
</tr>
<tr>
<td>Plural</td>
<td>داخِلُونَ (daakhiluuna)</td>
<td>داخلِينَ (daakhiliina)</td>
</tr>
<tr>
<td></td>
<td>داخِلاتُ (daakhilaatu)</td>
<td></td>
</tr>
</tbody>
</table>

**Producing Form I active participles of irregular verbs**

Some weak consonants produce Form I active participles that are different from those of the regular verb. In the following sections, I show you a few representative forms of irregular participles and let you in on a few tricks to produce them.

**Handling irregularities with verbs rooted in وَاَو (waaw) or يَأَّ (yaa’)**

Even in English, when you make the sounds w and y, your lips and tongue don’t completely touch anything. They’re pretty weak sounds in comparison to, say, something meaty like a d or a g. In Arabic, these weak consonants, the وَاَو (waaw) and the يَأَّ (yaa’), tend to turn into other consonants or disappear altogether when the verb takes on different shapes. The Arabic verb has three consonants, and وَاَو (waaw) or يَأَّ (yaa’) can appear in any of the three positions: first, second, or final.

If the وَاَو (waaw) or يَأَّ (yaa’) is the first consonant of the root, there’s no irregularity in Form I. Here’s an example:

**وِاقِف (waaqif; stopping)**

If the وَاَو (waaw) or يَأَّ (yaa’) is the second consonant of the root, you can produce your Form I active participle by just turning the وَاَو (waaw) or يَأَّ (yaa’) into a ء (hamza).

Here are a few examples using masculine singular active participles. I transliterate the three consonants of the root with lowercase letters for you and separate them with hyphens so you can see the position of the weak letters clearly:

<table>
<thead>
<tr>
<th>Participle (MS)</th>
<th>Verbal Root</th>
<th>English Participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>بائع (baa’î3)</td>
<td>بيع (b-y-3)</td>
<td>[one] selling; (a salesperson)</td>
</tr>
<tr>
<td>قائل (qaa’il)</td>
<td>قول (q-w-l)</td>
<td>[one] saying</td>
</tr>
</tbody>
</table>

If the وَاَو (waaw) or يَأَّ (yaa’) is the final consonant of the root, you can produce the Form I active participles by turning the وَاَو (waaw) or يَأَّ (yaa’) into a final long i...
vowel. The masculine singular indefinite form is written with ﺗﹶﻨﹾﻮﻳﻦ (tanwiin), but it becomes a long i when you add an ﺎﹶﻟ (‘alif laam). Here are a few examples:

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>Verbal Root</th>
<th>English Participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>راِج (raajin)</td>
<td>راِجِيَة (raajiiya)</td>
<td>رِجَو (r-j-w)</td>
<td>[one] hoping</td>
</tr>
<tr>
<td>باِك (baakin)</td>
<td>باِكِيَة (baakiiya)</td>
<td>بِكِي (b-k-y)</td>
<td>[one] weeping</td>
</tr>
</tbody>
</table>

**Producing participles from geminate verbs**

Sometimes a verb has the very same consonant in the second and final position. Because you essentially have twin consonants in one verb, these are called **geminate verbs** (like my zodiac sign, Gemini). You can discover more about the irregular shapes a geminate verb can have in Chapter 10.

To produce the active participle of a Form I geminate verb, you do the following:

- Insert a long a — written with ﺎﹶﻟ (‘alif) — after the first consonant of the verbal root.
- Write the identical second and third consonants as a single doubled letter — written with ـ (shadda).

Here’s an example:

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>Verbal Root</th>
<th>English Participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﻋَدَّ (3aadd)</td>
<td>ﻋَدَة (3aadda)</td>
<td>عَدد (3-d-d)</td>
<td>counting</td>
</tr>
<tr>
<td>ﻏَدَّ (maadd)</td>
<td>ﻏَدَة (maadda)</td>
<td>ﻏَدد (m-d-d)</td>
<td>stretching</td>
</tr>
</tbody>
</table>

**Producing Form I passive participles of regular verbs**

You form the passive participle of a Form I verb with the following steps:

- Attach the prefix مَ (ma-) to the first consonant of the root.
- Add ﻋ (sukuun) to the first consonant.
- Insert a long u vowel — written with ـ (waaw) — after the second consonant of the root.

Following these rules produces the word pattern مَفْعَول (maf3uul). Here are the forms of a sample Form I passive participle, مَدْخَول (madkhuul; entered):

- مَدْخَول (madkhuul, MS)
- مَدْخَولة (madkuula, FS)
- مَدْخَولَة (madkhuuluna, MP)
- مَدْخَولات (madkhuulaat, FP)
In this practice, take the supplied verbal root and write the four versions of the active participle and the four versions of the passive participle (the masculine singular, the feminine singular, the masculine plural, and the feminine plural).

Q. ﻓﻘﺪ (f-q-d; to lose)

A. Active (losing): ﻓﺎﻗﹺﺪ (faaqid); ﻓﺎﻗﹺﺪﺓ (faaqida); ﻓﺎﻗﹺﺪﻭﻥﹶ (faaqiduuna); ﻓﺎﻗﹺﺪﺍﺕ (faaqidaat)

Passive (lost): ﻣﹶﻔﹾﻘﻮﺩ (mafquud); ﻣﹶﻔﹾﻘﻮﺩﺓ (mafquuda); ﻣﹶﻔﹾﻘﻮﺩﻭﻥﹶ (mafquuduuna); ﻣﹶﻔﹾﻘﻮﺩﺍﺕ (mafquudaat)

1. ﺷﺮﺏ (sh-r-b; to drink)

Active (drinking): ____________________________

Passive (drunk): _____________________________

2. ﻋﻠﻢ (3-l-m; to know)

Active (knowing): ____________________________

Passive (known): _____________________________

3. ﺧﺮﺝ (kh-r-j; to exit)

Active (exiting): ____________________________

Passive (exited): _____________________________

4. ﺗﺮﻙ (t-r-k; to leave)

Active (leaving): ____________________________

Passive (left): ______________________________

5. ﺑﺤﺚ (b-H-th; to search)

Active (searching): ____________________________

Passive (searched): ____________________________

6. ﻭﺻﻞ (w-S-l; to arrive)

Active (arriving): ____________________________

Passive (arrived): _____________________________

7. ﻲﻨﺒ (k-t-b; to write)

Active (writing): ____________________________

Passive (written): _____________________________
8. ربط (r-b-T; to connect)

Active (connecting): ________________________________

Passive (connected): ________________________________

**Producing Form I passive participles of irregular verbs**

When a weak consonant is in the initial position, there are no irregularities with the passive participles in Form I. Here’s an example: ﻣﻮﻘﻮﻑ (mawquuf; stopped).

However, the irregular verbs do cause a few difficulties when you need to create Form I passive participles. Like the active participles, these problems occur only when the second or final letter is weak.

**Working with the second consonant**

For the passive participle of a verb that has a weak consonant in the second syllable, you just turn the medial consonant into a long vowel. Here are some roots and their masculine singular passive participles:

<table>
<thead>
<tr>
<th>Passive Participle (MS)</th>
<th>Verbal Root</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﻣَﺒﻴﻊ (mabii3)</td>
<td>بيع (b-y-3)</td>
<td>selling</td>
</tr>
<tr>
<td>ﻣَﻘﻮﻝ (maquul)</td>
<td>قول (q-w-l)</td>
<td>said</td>
</tr>
</tbody>
</table>

**Working with the final consonant**

The passive participle of a ﻲاء (yaa’) verb turns the final consonant into a long i vowel. The passive participle of a ﻮاﻮ (waaw) verb preserves the ﻮاﻮ (waaw). Here are a couple of examples:

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>Verbal Root</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>ﻣَﺒﻨﹺﻲ ﺑﻦ (mabniyyun)</td>
<td>ﻣَﺒﻨﹺﻴﺓ ﺑﻨﱐ (mabniyya)</td>
<td>ﺑﻨﻲ (b-n-y)</td>
<td>built</td>
</tr>
<tr>
<td>ﻣَﺪَﻋﻮ ﺗﺪ (mad3uwun)</td>
<td>ﻣَﺪَﻋﻮﺓ ﺗﺪ (mad3uwwa)</td>
<td>ﺗﺪ (d-3-w)</td>
<td>called</td>
</tr>
</tbody>
</table>

**Working with geminate verbs**

The passive participles of geminate verbs have no irregularity, because the twin letters are kept separate by the shape of the passive participle. Here’s an example:

- ﻣَﺪَﻋﻮ (ma3duud; counted, MS)
- ﻣَﺪَﻋﻮﺓ (ma3duuda; counted, FS)
Producing active participles for regular verbs in Forms II–X

After mastering the steps to create the active and passive participle for Form I verbs, you can produce all the rest of the Forms with just a few common rules. (If you aren’t familiar with the rules for producing the ten forms, see Chapter 9 before tackling the participles.)

To produce an active participle of verbs in Forms II–X, follow these steps:

1. Start with the third person singular present verb.
   For instance, start with the Form V verb ﻲﺘﹶﻜﹶﻠﹶﻢﹸ (yatakallamu; he speaks).
2. Remove the verbal prefix (the ﻲ (yaa’) and its vowel) and add the prefix ﻢ (mu-).
   For example, ﻲﺘﹶﻜﹶﻠﹶﻢﹸ (yatakallamu) becomes ﻢﺘﹶﻜﹶﻠﹶﻢﹸ (mutakallamu).
3. In Forms V and VI, change the ﹶ (fatHa) of the second consonant to a ﹺ (kasra).
   For example, ﻢﺘﹶﻜﹶﻠﹶﻢﹸ (mutakallamu) becomes ﻢﺘﹶﻜﹶﻠﹾﻢﹸ (mutakallimu).
4. Remove the ﹴ (Damma) from the third consonant and add the sound endings.
   For instance, ﻢﺘﹶﻜﹶﻠﹾﻢﹸ (mutakallimu) becomes ﻢُﺘﹶﻜﹶﻠﹾمﹶ (mutakallima), ﻢُﺘﹶﻜﹶﻠﹾمﹶﺓ (mutakallima), ﻢُﺘﹶﻜﹶﻠﹾمﹶات (mutakallimaat), all of which mean speaking.

With just these four rules, you can produce all the active participles of Forms II–X. Table 18-1 shows you sample participles in Forms II–X. Because the sound endings are so regular, I just show you the masculine and feminine singular versions.

</table>
Producing passive participles for regular verbs in Forms II–X

The passive participles of Forms II–X are produced the same way as the active with one exception. Rule #3 from the previous list of steps will be the following for passive participles: Change the kasra of the second consonant of the root to a fatha. (In Forms V and VI, you just leave it as it is.)

In other words, the only difference between an active and a passive participle in Forms II–X is the vowel of the second consonant of the root. Forms VII and IX have no passive at all. Table 18-2 shows sample passive participles for the forms that have a passive.

</table>

Producing active participles for irregular verbs in Forms II–X

Irregular verbs pose even less difficulty in Forms II–X than they do in Form I. Internalize just a few tricks, and you’ll be recognizing and producing them easily.

Working with weak first and second consonants

There are no special rules for creating active participles for verbs with weak first or second consonants in Forms II–X. Following the same four rules you use for regular verbs (see the preceding section) produces the correct forms because any irregularity is already present in the third person singular present tense form you start with.
Working with a weak final consonant

As with Form I participles, when the وَاو (waaw) or يَاyaw (yaa') is the final consonant of the root, you can produce the active participles by simply turning the وَاو (waaw) or يَاyaw (yaa') into a final long i vowel. Here’s an example:

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>Verbal Root</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>مُلْتَقٍ (multaqin)</td>
<td>مُلْتَقِيَة (multaqiya)</td>
<td>لْقَي (l-q-y)</td>
<td>[one] meeting</td>
</tr>
<tr>
<td>مُبْكِيٍّ (mubkin)</td>
<td>مُبْكِيَة (mubkiye)</td>
<td>بْكِي (b-k-y)</td>
<td>[one] causing tears</td>
</tr>
</tbody>
</table>

Producing passive participles for irregular verbs in Forms II–X

As with the active participle, there are no special rules for generating the passive participle of a verb with an irregularity in the first consonant. But like active participles, passive participles of irregular verbs present a few curious issues. In the following sections, I show you the peculiar cases to be on the lookout for.

Working with the second consonant

To produce the passive participles of medial وَاو (waaw) or يَاyaw (yaa') verbs in the other forms, just put a long a vowel — written with an أﹶلﹺﻒ ('alif) — in the place of the medial letter. The following are a few examples using masculine singular passive participles. (Note: The passive participles of abstract concepts will sometimes look more like adjectives than participles.)

<table>
<thead>
<tr>
<th>Passive Participle (MS)</th>
<th>Verbal Root</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>مُسْتَطَاع (mustaTaa3)</td>
<td>طُوْع (T-w-3)</td>
<td>possible</td>
</tr>
<tr>
<td>مُقَام (muqaam)</td>
<td>قُوم (q-w-m)</td>
<td>set up</td>
</tr>
</tbody>
</table>

Working with the final consonant

In Forms II–X, the passive participles of a final وَاو (waaw) or يَاyaw (yaa') verb have a final أﹶلﹺﻒ مَكْسُورَة (‘alif maksuura) in the masculine and a long a (written with an أﹶلﹺﻒ ['alif]) in the feminine. Here’s an example:

<table>
<thead>
<tr>
<th>Masculine</th>
<th>Feminine</th>
<th>Verbal Root</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>مُنْتَدٍ (muntadan)</td>
<td>مُنْتَدَة (muntadaa)</td>
<td>نْذُو (n-d-w)</td>
<td>meeting point</td>
</tr>
<tr>
<td>مُخْتَفٍّ (mukhafan)</td>
<td>مُخْتَفَة (mukhtaafaa)</td>
<td>خْفَيْ (kh-f-y)</td>
<td>hiding place</td>
</tr>
</tbody>
</table>
To get a good grasp of how to use participles, you need to keep in mind exactly what they are. A participle is a verb that’s given the endings of an adjective. As such, participles don’t describe the action itself. Instead, a participle is primarily describing a noun in terms of an action that the noun is either doing or has had done to it.

The following can help you keep track of the main ways you use participles in your writing:

- As adjectives (their primary function)
- As nouns (as a logical extension from the adjective)
- As verbs

**Using participles as adjectives**

Participles function as adjectives in all ten of the Arabic verb forms. Some words you may have already encountered as adjectives are actually participles.

English and Arabic both can use participles as adjectives. The adjective *exciting* has the same -ing ending as the participle *drinking*. One difference, however, is that Arabic uses participles in place of adjectives for meanings that English speakers wouldn’t expect a participle to convey.

In the following examples, I underline in the English the adjective that uses a participle in the Arabic.

**Using participles as nouns**

Many adjectives in Arabic have come over time to be used as nouns in their own right. A classic example in Arabic is the participle *مَدْرَسَة* (mudarris; teaching). Over time, the meaning of this participle changed to denote *one who teaches*, that is, *a teacher*. If you ask Arabic speakers or writers to tell you what *مَدْرَسَة* (mudarris) means, their first and immediate answer will be *teacher*. Even so, if those same speakers or writers need to form the participle of the verb *يُدْرِسُ* (yudarris; to teach), they’ll form the word *مَدْرَسَة* (mudarris) for that as well because it still remains a participle.
Unlike Arabic, English doesn’t like to use participles as nouns. Instead, English speakers tend to use a class of nouns called the *nomen agentis*, the “noun of doing.” To form these, you add *-er* to the end of the word. Words such as *teacher*, *singer*, and *baker* are examples.

Here are several example sentences that use participles as full nouns in Arabic:

(لام يرجع العامل بعد الاجتماع. *lam yarji3 al-3aamilu ba3da al-ijtimaa3i.* The worker [one working] didn’t return after the meeting.)

(علَنَّ المذيع أن الطائرة قد هبطَت. *'a3lana al-mudhii3u 'anna-T-Taa'irata qad habaTat.* The announcer [one announcing] reported that the plane had landed.)

**Using participles as verbs**

In many cases, a present participle can stand in the place of a verb. This usage anticipates the evolution of the participle into the present tense of the verb in most spoken Arabic dialects. Here’s an example in which the word translated as *sitting* is the participle being used as a verb:

(المرأة جالسة تحت الشجرة. *al-'imra'atu jaalisatun taHt ash-shajarati.* The woman is sitting under the tree.)

You’re sending an e-mail to a good friend. To complete it, select the appropriate forms of the participles from the word bank. You need to use all the different types of participles discussed in this chapter for this exercise.

**Q.** (لام أدخل لأن الباب كان **ماقفلًا**. *lam 'adkhul li'anna-l-baaba kaana maqfuulan.*

**A.** (لام أدخل لأن الباب كان **مقفلًا**. *lam 'adkhul li'anna-l-baaba kaana maqfuulan.*

*I didn’t enter because the door was locked.*

Answer Key

1. Active (drinking): شارب (shaarib); شاربون (shaariba); شاربيات (shaaribaat)
   Passive (drunk): مشروب (mashruub); مشروبة (mashruuba); مشروبون (mashruubuuna); مشروبات (mashruubaat)

2. Active (knowing): عالم (3aalim); عالمة (3aalima); عالمون (3aalimuuna); عالمات (3aalimaat)
   Passive (known): معلوم (ma3luum); معلومة (ma3luuma); معلومون (ma3luumuuna); معلومات (ma3luumaat)

3. Active (exiting): خارج (khaarij); خارجة (khaarija); خارجون (khaarijuuna); خارجات (khaarijaat)
   Passive (exited): مخرج (makhruuj); مخرجة (makhruuja); مخرجون (makhruujuuna); مخرجات (makhruujaat)

4. Active (leaving): ترك (taarik); تركة (taarika); تركون (taarikuuna); تركات (taarikaat)
   Passive (left): مسترول (mawSuul); مسترولة (mawSuula); مسترولون (mawSuuluuna); مسترولات (mawSuulaat)

5. Active (searching): بحث (baaHith); بحثة (baaHitha); بحوث (mabHuuth); بحوثة (mabHuutha); بحوثون (mabHuuthuuna); بحوثات (mabHuuthaat)
   Passive (searched): مكتوب (maktuub); مكتوبة (maktuuba); مكتوبون (maktuubuuna); مكتوبات (maktuubaat)

6. Active (arriving): وصل (waaSil); وصلة (waaSilaa); وصلون (waaSiluuna); وصلات (waaSilaat)
   Passive (arrived): موصول (mawSuul); موصولة (mawSuula); موصولون (mawSuuluuna); موصولات (mawSuulaat)

7. Active (writing): كاتب (kaatib); كاتبة (kaatiba); كاتبون (kaatibuuna); كاتبات (kaatibaat)
   Passive (written): مكتوب (maktuub); مكتوبة (maktuuba); مكتوبون (maktuubuuna); مكتوبات (maktuubaat)

8. Active (connecting): رابط (raaTib); رابطة (raaTiba); رابطون (raaTibuuna); رابطات (raaTibaat)
   Passive (connected): مرتبط (marbuuT); مرتبطة (marbuuTa); مرتبطون (marbuuTuuna); مرتبطات (marbuuTaat)
My friend,
I’m sorry that I haven’t sent you my news.

I left my apartment yesterday looking for the famous author’s house.

I was very, very happy when I finally found it.

She was born in 1936. She composed wonderful books on education.

She also certainly changed the system of education in her country.

I learned that she made the acquaintance of the former president when she was living in America.

So now I agree with you that she is very interesting.

It’s been decided that I will return on Thursday. So I will give you a call after that, God willing.
Part V
The Part of Tens

The 5th Wave  By Rich Tennant

I’m not sure what he's yelling about. It’s all in Arabic. But I think he’s calling you a monster.
No *For Dummies* book is complete without the Part of Tens. In this book’s Part of Tens, you get chapters on the ten common mistakes to avoid and the ten ways to further hone your ever-increasing Arabic skills.
Chapter 19

Ten Mistakes to Avoid in Arabic

I hope you’ve made a lot of mistakes in Arabic. Because that means you’ve tried to use your Arabic, no matter how much of a beginner you may yet be. That said, I’m sure you’d like to know how to avoid some of the most common mistakes English speakers tend to make when producing Arabic either in speech or in written form. Knowledge is the power to ever improve your use of Arabic. So in this chapter, I compile the ten most common mistakes you should be careful to avoid.

Using Incorrect Word Order

Both English and Modern Standard Arabic are word order languages. What’s that, you ask? It’s a language in which action is indicated by where the subject appears relative to the verb. Consider, for instance, this sentence: The cat ate the mouse. You know the cat did the action because subjects come before the verb in English. But, in fact, English and Modern Standard Arabic are two languages that don’t use the same word order at all! The only common point between them is that the object of a verb comes after the verb. But if you adjust your English grammar instincts in just a few ways, you can improve your Arabic.

The following are some pointers to keep your Arabic word order in line:

✓ Put your verb first, and then state your subject. For example:

(yuHibbu ‘aHmadu ‘ummahu. Ahmad loves his mother.)

✓ Make sure your adjective is placed after the noun it describes. Your English instinct is to talk about your new car. Instead, rave about:

(sayyaaratuka al-jadiida; literally your car the new)

✓ Place any adverbs at the end of your sentence. For example:

(sanusaafiru ‘ilaa miSr ghadan. We will travel tomorrow to Egypt.)

To explore word order and verbs in more detail, see Chapter 2. For more information on the use of adjectives and adverbs, go to Chapter 6.
Writing in the Wrong Mood

If you use the wrong mood when writing Arabic, everyone will still understand what you mean. But they’ll also, of course, understand that you don’t know how to use the right mood! One way around the problem, especially when you’re just starting out, is to drop off all the final vowels from your verbs. Putting the wrong vowel on a verb is worse than no vowel at all. But when you want to distinguish yourself, lock in your knowledge of the formation and use of the Arabic verb moods. You’ll be sure to stand out. (See Chapter 13 for more on the many moods of Modern Standard Arabic.)

Adding Colloquialisms to Your Writing

It’s good to know some colloquial Arabic, especially if you’re going to be spending any significant time in an Arabic-speaking country. But Arabs are proud of their formal language, which they call Modern Standard Arabic. So learn some colloquialisms to use with new friends in speech, but keep them completely out of your writing.

While I’m on the topic of colloquial speech, I want to give you a word of warning about slang. You’ve probably seen books for sale that promise to tell you all the “naughty” language your teacher never taught you. But don’t fall for it. No one will be impressed if you use the Arabic equivalent of profanity. Instead, stand out as an accomplished writer of Modern Standard Arabic and keep it clean.

Translating Word for Word

Translating word for word is an understandable habit when you’re attempting composition in a new language. And you can even learn the use of important vocabulary just by trying to look up words that you think you need. But do remember that languages convey meaning in different ways.

Languages like Spanish and Italian are related enough that a word-for-word-translation from one to the other would probably be accurate most of the time. English and Arabic, however, are completely unrelated. As a result, what English uses a word to convey, Arabic may accomplish through a particular form of the verb. And Arabic may have one word where English has two.

The only way to get out of the bad habit of translating word for word is just to get a lot of Arabic practice under your belt. As you immerse yourself in the sentence structures and cadences of your new language, you’ll develop a sense of how to express yourself in Arabic without thinking through English first.

Overusing Pronouns

English has lost the verb endings that its distant cousins like Russian and Spanish still maintain. As a result, in English, you have to use pronouns to convey who’s doing the action of a verb. Arabic, on the other hand, puts prefixes and suffixes on the verb to tell your reader or listener who’s being described as performing the action of the verb.
But Arabic pronouns are used in some instances. For example, they can be used to express emphasis. Take a look at this sentence:

ﻝَلَّمَّ أَنتَ تَرْبِدُ أَنْ تَدْهَبُ أَيْضاً؟
(hal 'anta turidu 'an tadh-haba 'ayDan? Do you want to go as well?)

The pronoun also can be used as the copula (a word that links the subject and predicate in a sentence). When used in this way, the pronoun stands in place of the absent present tense verb to be, as in this sentence:

أمَّا الْرَّجُلُ هَنَاكَ فَهُوَ صَديقِي.
('amma ar-rajulu hunaaka fa-huwa Sadiiqii. The man over there is my friend.)

But in most sentences with a verb, you can leave the pronoun out all together, such as with the second verb of this sentence (English usage still requires the use of the pronoun, but the Arabic can go without):

تَرَكَ مُحَمَّدُ أَمْسَ لَكِنْ سَيْرِجَ عُدَّا إِنْ شَاءَ اللَّهُ.
(taraka muHammadu 'amsi laakin sa-yarji3u ghadan 'in shaa'a 'allah. Muhammad left yesterday, but he will return tomorrow, God willing.)

I underlined the second verb to show you the lack of the pronoun there. Refer to Chapters 2 and 8 for more details on Arabic pronouns.

## Forgetting to Coordinate Gender

One of my students recently had a difficult time with the concept that in Arabic the word for table, طاولة (Taawila), is feminine. She wanted to know what made the table feminine. The answer is that nothing made the table feminine. It just is. But knowing the gender of a noun is crucial if you want to describe the noun with an adjective or make it the subject of a verb. After all, Arabic practices gender coordination with those parts of speech.

My advice is to go ahead and play it pretty loose at first. As long as you’re putting your adjective right after the noun and putting your subject right after the verb, you’ll be understood even if you make gender mistakes. The mistakes will correct themselves when you have encountered enough cases of the right answer.

## Using the Incorrect Case

Knowing when to use the nominative, accusative, and genitive case endings in Arabic can take a lot of practice. But don’t worry! There are exercises in this book that can help you get a handle on how they work (see Chapter 4).

If you’re uncertain about what case ending you should use, just leave the final syllable vowel-less. The formal final vowels of Modern Standard Arabic are ordinarily not pronounced at all in media sources anyway. So, if you don’t fill out the final vowels, no one will suspect that you did it because you were unsure of them. But also go ahead and develop a sense for when the cases are correct and add them in so that you can stand out as an accomplished Arabic speaker and writer.
Some of the consonants in Arabic are close in pronunciation to others. As a result, nonnative speakers and writers sometimes forget over time whether, for instance, a word has a ح (Haa’) versus a خ (khaa’) or a س (siin) versus a ص (Saad). (But I’ve seen plenty of misspelled words written by native Arabic speakers and writers as well.) If you’re ever in doubt, reach for your dictionary to be sure of the correct spelling. You’ll not only deepen your knowledge, but you’ll keep your writing as pure as possible.

Prepositions are notoriously idiomatic in any language. I recently used the idiom plugging away in a conversation with my Romanian-American wife. She speaks excellent English, but she had to ask me what exactly was being plugged and how anything could be plugged away. When I told her that the idiom means to be persistent in an action, she rolled her eyes and replied, “And you say Romanian is difficult!”

When you look in the dictionaries of this book, you’ll notice that two different prepositions can mean with. Two different prepositions can both mean to as well. And another preposition can mean both in and at, depending on the context. I explain in the dictionaries the distinctions between these prepositions.

Make sure that when you learn a preposition you don’t just memorize a simple English equivalent. The precise usage is an important part of the prepositions. You can review prepositions in Chapter 12.

There are two important cases when your English instinct will suggest the use of plural but Arabic actually would use singular. If you use the singular in these cases, you’ll prevent a common mistake. Here are the two cases to watch for:

✔ As you know, verbs should come before the subject in an Arabic sentence. When the subject is plural, you use a singular verb (even though many people may be doing the action). Any verbs that follow the plural subject are plural. Here’s an example of this grammatical construction:

✔ When you have to create the plural of several inanimate objects, you always use feminine singular adjectives to describe them. Here’s an example of what I mean:

al-buyuutu [plural noun] fii tilkaa-l-minTaqati jamilatan [singular adjective]. The houses in that area are beautiful.)
You’ve already demonstrated that you intend to do whatever necessary to improve your Arabic skills. After all, you’ve bought this book, haven’t you? In this chapter, I share ten tips for how to best apply yourself to your exploration of the beautiful and important Arabic language.

**Master the Alphabet Early**

A language and its writing system aren’t identical. A person can be illiterate and still be a native speaker of a language. The same goes for Arabic. I know plenty of native speakers of colloquial dialects who can’t read and write the language much at all. But your progress in Modern Standard Arabic really does depend strongly on your developing the ability to function comfortably in the Arabic script.

The transliteration in this book is a tool to help you master the reading and writing of Arabic by comparing the transliteration to what you think you’re reading in the Arabic script. The faster you learn the alphabet and how to both read it and write in it, the quicker you’ll be able to start taking advantage of a world of other resources, such as online news in Arabic.

**Learn Singular and Plural Nouns Together**

Because the majority of Arabic nouns have irregular plurals that can’t really be predicted from the form of the singular, you’re really wasting your time by learning a singular noun by itself. After all, you’re just as likely to refer to a specific number of books as you are to just one. So from the very start, learn the plural of any new noun you encounter. The dictionaries in this book include the plural of every noun included.

**Build Your Vocabulary**

Mastering grammatical constructions and the forms of irregular verbs is crucial business on your journey to being a competent writer and speaker of Arabic. But, let’s face it; if you don’t know the word in Arabic for clock, you’re going to have a hard time talking about one! (By the way, the Arabic word for clock is ساعة [saa3a].)
Here are a few ways to boost your vocabulary:

✓ Spend some time speaking casually with friends or loved ones. Have a notebook handy, and every time someone uses a basic word you don’t know in Arabic, write it down. Later, look up those words in a good English-Arabic dictionary and commit them to memory. Then you can practice forming sentences in which you need that new vocabulary item.

✓ Read large amounts of Arabic without worrying about understanding every word. Over time you'll pick up words that keep reappearing based on the context in which you encounter them.

Explore Arab Culture

Go online (or to the library) and begin exploring the world of Arab culture, whether it be the rich literary tradition, the impressive scientific achievements, or the cinema. Knowing more about the culture behind the language that you’re learning helps you better understand the language because basic cultural concepts often come up in writing and speech.

As an example, knowing the importance of the month of رَمَضَان (ramaDaan; Ramadan) will provide you with an abundance of phrases and vocabulary that appear yearly in Arabic language media. (Ramadan is the month during which Muslims observe a total fast during daylight hours.) Knowing more about the culture behind Arabic can also give you an appreciation of the global importance of the language you’re learning (and thus inspire you to work hard to experience it more deeply).

One last point on culture: Don’t forget to frequent an Arab restaurant — if one is near you. Personally, I adore the dish وَرَقَ عَنب (waraq 3inab; stuffed grape leaves). Order it and tell them I sent you. You won’t regret it.

Memorize Proverbs and Passages

There’s great value in memorizing some select Arabic proverbs. If you happen to pull them out at an apropos time, your Arab friends will be endlessly impressed. But besides wowing your friends, proverbs also can be good tools for learning vocabulary in context.

Here are a few proverbs to get you started:

ربّ يُقَدِّرُ وَأَللَّهُ يُدَبِّرُ (al-‘insaanu yudabbiru wa-‘allahu yuqaddiru. Humans plan, and God preordains.) (Essentially, this is the Arabic equivalent of the notion that if you want to make God laugh, tell him your plans.)
No matter what your personal religious tradition is, memorizing key texts, such as the الْفَاتِحَة (faatiHa), the opening Surah (chapter) of the Qur’an, or the Lord’s Prayer in Arabic will also ground you in some important vocabulary and convey your appreciation for Arab culture.

**Be Brave and Use Any Arabic You Can**

You’ll continuously encounter Arabs who simply can’t believe that you have learned even a little Arabic. As a result, everyone you encounter will be extraordinarily generous of you for your efforts. No matter what mistakes you make, you’ll be praised with the words, “You speak it better than me!” (Even though you’ll know better.)

The upshot of all this is that you can (and should) just relax and use whatever Arabic you have. It’s a win-win situation for you. No matter what comes out of your mouth, you’re a hero. And the effort of trying to produce Arabic will help you get even better.

Being brave is also good advice for working your way through this book. Don’t labor too much over any one item in the practices. What’s the worst that could happen? That you find out you were wrong? I wish I had a nickel for every time I tried to produce language and was wrong! When you don’t get something right, just review it another day and your mistake will have been well worth making.

**Practice Regularly**

You’ve heard it said that Rome wasn’t built in a day. And no one has ever learned everything there was to know about a language in a day either. You’ve likely seen books and programs promising that with their product you could speak Arabic in one week. Don’t bother buying them. Unless you’re a linguistic genius (and I’m certainly not), the book or program won’t help you accomplish that goal.

Much more important is the regular study of Arabic. Ten minutes a day is better than 90 minutes once a week. To acquire a language, you need to regularly train your brain to think in the words and grammatical patterns of your target language. Obviously I suggest that you study more than ten minutes a day. But, whatever you do, do it regularly.

**Consult a Variety of Resources**

This book is a tool (and a good one at that!). There’s a lot of Arabic for you to master between these covers. But you can supplement this book with other sources of the language. For instance, you can read and listen to Arabic news online at a variety of sites.

I recommend the BBC (news.bbc.co.uk/hi/arabic/news), where you can find news stories translated into Arabic as well as audio of the main stories of the day. The good thing about the BBC is that you can also click on the English page. There you can read the English source of the story and learn the English equivalents for any words you need without looking them up in the dictionary.
Another valuable pursuit is finding a few songs in Arabic and listening to them regularly. Combining music and language is not only aesthetically pleasing, but it’s also helpful in learning.

**Discover How You Learn Best**

Personally, I’m a visual learner. I can’t hear a word spoken and learn it in any credible way. I need to see the word written, in Arabic, in order to acquire it as a vocabulary item that I can then use myself when the situation demands it. But you, my dear reader, are not me. You may very well be an auditory learner. And no one is right or wrong when it comes to learning. You just need to discover how you, personally, learn a foreign language best.

If you’re an auditory learner, you should make tapes of yourself reading the sentences and practices from this book. Burn it onto a CD and listen to it in your car. Download news from the Internet and do the same. If, on the other hand, you’re like me, write out the exercises in your own hand and study them that way. You may even be a learner of a totally different sort. Try a number of different things. Try crazy things! Success can’t be judged by anyone. Whatever helps you learn a language is what you need to focus on. Go find it!

**Start All Over**

Are you reading this chapter after working your way through the entire book? If so, let me congratulate you. But whether you have finished your exploration of *Intermediate Arabic For Dummies* or have just begun it, there’s value in starting all over in your Arabic language study. Every now and then I break out my first-year books in a language that I work in and start from scratch. The basics of a language make up 70 percent of it all. There’s no way to minimize the importance of deepening your mastery of 70 percent of Arabic (or any other language you want to function in).
The 5th Wave

By Rich Tennant

“I have to remember that Arabic is read the way it’s written—right to left. I once read an Arabic recipe left to right and made a cup of rice, a pound of ground lamb, and a jar of greens out of a plate of stuffed grape leaves.”
In this part . . .

Do you need to quickly refresh your memory about one of the ten Arabic verb forms? This part has a chart for you to consult. And if there’s an Arabic word on the tip of your tongue, but you just can’t seem to recall it (and you need it to complete the exercises or talk to your friend or co-worker), this part helps you out with bilingual dictionaries.
Books on Romance languages, such as Italian, could include many charts showing you examples of the verbs — regular and irregular — in a reasonably-sized appendix. For Arabic, however, verb weakness issues would require dozens of pages to comprehensively show it all. So it’s all in this book, in the chapters touching on verbs, commands, participles, and verbal nouns.

But I wanted to give you a one-page chart that you can consult whenever you need to see the big picture of the ten forms. This one-page chart can be helpful whenever you want to see at a glance all the parts of speech for the forms lined up with each other. You’ll also find that it’s easier to memorize when you see the parts of speech this way.

In Table A-1, I give you the third person singular forms of the past and present tense, the verbal noun, and the masculine singular active and passive participles of all ten verb forms. This chart uses the root فعل (f-3-l; to do/make). Using f-3-l as a dummy root to display the various verb forms is a common convention in Arabic books, even though the root doesn’t actually occur in all these forms.

There’s no singular word pattern used for the verbal noun in Form I. When no form appears, it means that the verb form doesn’t exist.

In this appendix, I provide some of the Arabic vocabulary used in this book, arranged alphabetically by the English translation, for your use in completing the practices or learning valuable new words. I provide you with the past and present tenses of all Arabic verbs (in that order). I also provide you with the singular of every noun and adjective as well as the plural (except where the plural is regularly formed, such as the sound plurals). To discover more about plural formation, go to Chapter 5. To search out the formation of adjectives, flip to Chapter 6.

yesterday: أمس (amsi)
you (FS): أنت (anti)
you (MP): أنتم ('antum)
you (MS): أنت ('anta)
young woman: فتاة (fataah) / فتاة (fatayaat)
In this appendix, I provide some of the Arabic vocabulary used in this book. It’s arranged alphabetically by the English transliteration, for your use in completing the practices or learning valuable new words. I provide you with the past and present tenses of all Arabic verbs (in that order). I also provide you with the singular of every noun and adjective as well as the plural (except where the plural is regularly formed, such as the sound plurals). To discover more about plural formation, go to Chapter 5. To search out the formation of adjectives, flip to Chapter 6.

Note: Other larger dictionaries you buy may organize the words by root, but I want you to be able to quickly find a word based on the form you actually have in your practice exercise. So I arranged this dictionary alphabetically by the order of the letters in the Arabic alphabet. You can find a list of those letters in order on the Cheat Sheet at the front of the book.
